Memo

TO: All Faculty
FROM: Bill Siebler - LRC
DATE: June 5, 1973
SUBJECT: Media Services Subject Catalog

Preliminary copies of the Media Services Subject Catalog have been distributed to all divisions via the division chairmen. This catalog contains the basic bibliographic information on audio-visual materials available at LBCC. There are, however, some materials which have been assigned to faculty members without adequate information being retained in our files.

In order to make the catalog of materials as complete and correct as possible, we would appreciate each faculty member who has audio-visual materials in his office or lab to check these materials against the catalog. If they are not included, they should be sent to Media Services so that they can be properly marked and cataloged and then returned to the instructor if desired.

Any comments concerning the use and value of the catalog will also be appreciated.

DAVE MILLER FOUND THIS - a humorous letter to graduates based upon the automobile recall letters that some manufacturers have had to send out. Dave did some revisions to the original letter.

Dear Graduate:

According to our record you were graduated from this school this past June. Since that time it has been brought to our attention that certain insufficiencies are present in our graduates, so we are recalling all students for further education. We have learned that in the process of instruction provided, we forgot to install one or more of the following :

- a. At least one saleable skill
- b. A comprehensive and utilitarian set of values
- c. A readiness for an understanding of the responsibilities of citizenship

A recent consumer study consisting of followup of our graduates has revealed that many of them have been released with defective parts. Incompetencies and deficiencies are serious flaws, and we have discovered they are part of the make up of almost all of our products. These defects have been determined to be of such magnitude that the model produced in June is considered highly dangerous and should be removed from circulation as a hazard to the nation.

Some of the equipment which was classified as optional has been reclassified as standard and should be a part of every product of our school. Therefore, we plan to equip each graduate with (a) a desire to continue to learn, (b) a dedication to solving problems of local, national, and international concern, (c) several productive ways to use time, (d) a commitment to the democratic way of life, (e) extensive contact with the world outside the school, and (f) experience in making decisions.

In addition we found we had inadvertently removed from you such items as interest, enthusiasm, motivation, trust, and joy. We are sorry to report that these items have been mislaid and have not been turned in at the school's lost and found department. If you will inform us as to the value you placed on these qualities we will reimburse you promptly by cash or by check. As you can see it is in your best interest and vitally necessary for the safety and welfare of all that graduates be returned so that these errors and oversights can be corrected.

We admit that it would have been more effective and less costly in time and money to have produced the product correctly in the first place, but we hope you will forgive our error and continue to respect and support your public schools.

Sincerely,

John Doe, Administrative Executive

Seems particularly pertinent to community college concepts. All said in a unique sort of way. I would prefer to see it more positively said - but this certainly gets one's attention.
