

Board Report

In the month of late January and early February, the SLC team has been working on supporting another club initiative such as supporting The Black Curtain Society's trip, along with the support of four LBCC students to the United States Hispanic Leadership Institute Conference. The team is currently in the process of running elections and will soon find a new SLC President and Vice President. Then we will start filling the SLC members spot with new or old members. We are also supporting and providing funds to purchase a new monitor display case and to a small food station with staff for the students that have to stay in the learning center after 5:00 pm, once the café and student stores are no longer open. Aside from that we also took a few members of the SLC to Lobby for the Community College objective of this legislative cycle.

Since we are in the middle of winter term, we are all gearing up to end winter term with a last study jam. We are also preparing the students for the upcoming NWSLC Conference in Portland. There is nothing new to report about the OCCSA, we are connected, but have not heard anything about it. As for OSA, we had a meeting a few weeks ago, and there was a proposal to make the Community College 32 million objectives a Priority 1 case for OSA to support. The outcome of the said proposal was significantly agreed upon, and OSA will be helping with the Lobbying and other things on this matter. Our legislative representatives of Student Council and I will be keeping up with the updates about the process and the other part that still need to be done. Aside from this nothing else has occurred and will continue to work on the OSA Priority 1 case until the end.
