

Capital Construction Project Report
September 2017
Dave Henderson

Temporary Electrical in IC: This is on schedule and will be completed on September 15.

Mechatronics: Notice to Proceed has been given and demo has begun. Meetings continue with IT/AV for low voltage requirements and with Security for access and cameras.

CTE: Welding IA, Machine Tool IB, Fab and Pipe IC design development completed. October 20 is deadline for 100% construction document development.

A scope of work timeline is being developed with accounting processes — “Bond Construction at a Glance.”
