

February 12th, 2018

Dear Board of Education members,

This month I would like to showcase accomplishments of two part-time faculty members:

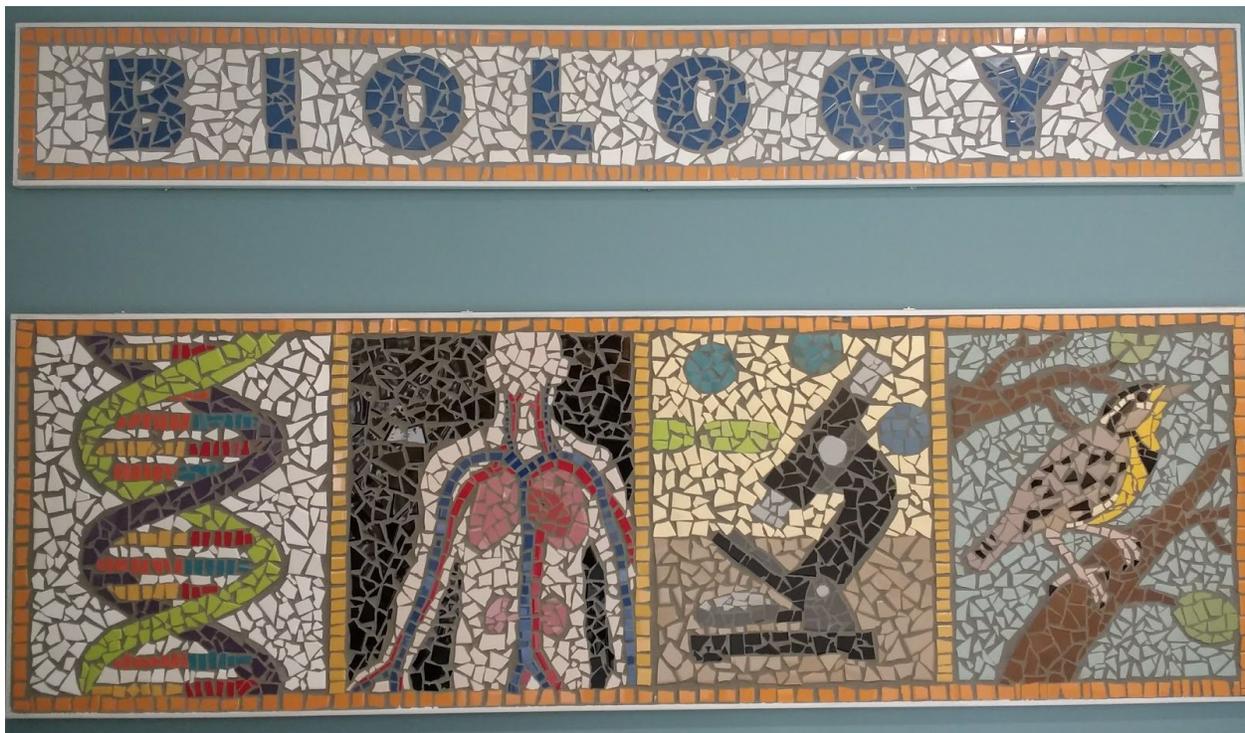

Kriste York

Kriste is a writing instructor and often teaches at the Sweet Home Center. Fall term, Kriste had student in her english composition course who was in a wheelchair and she quickly realized that the Sweet Home Center did not meet Gerritt Schaffer's need. The building did not have ADA compliant doors into the building and Gerritt struggled to navigate through the unwieldy doors in his wheelchair. Fall term, she teamed up with Pearl Christman, a clerical specialist at the center, to get an automatic door opener installed. You can read about Kriste and Pearl's efforts in the Sweet Home's local paper:

Erin Chamberlain

Erin is a biology instructor at LBCC, and has been working with an art teacher and students at Memorial Middle School in Albany to bring art into White Oak Hall and science into their art classroom! Students from Memorial created a beautiful biology themed mosaic, which is now hanging in the second floor of White Oak Hall, near the biology lab rooms. I'm told it is the envy of all the science departments on campus!

Sincerely,
Miranda Dudzik
PTFA President
