## Chapter 1 Introduction to Law and Legal Systems

### 1. What Is Law?

*Black's Law Dictionary* says that law is “a body of rules of action or conduct prescribed by controlling authority, and having binding legal force. That which must be obeyed and followed by citizens subject to sanctions or legal consequence is a law.” *Black's Law Dictionary*, 6th ed., s.v. “law.”

#### 1.1 Functions of the Law

In a nation, the law can serve to (1) keep the peace, (2) maintain the status quo, (3) preserve individual rights, (4) protect minorities against majorities, (5) promote social justice, and (6) provide for orderly social change. Some legal systems serve these purposes better than others. Although a nation ruled by an authoritarian government may keep the peace and maintain the status quo, it may also oppress minorities or political opponents (e.g., Burma, Zimbabwe, or Iraq under Saddam Hussein). Under colonialism, European nations often imposed peace in countries whose borders were somewhat arbitrarily created by those same European nations. Over several centuries prior to the twentieth century, empires were built by Spain, Portugal, Britain, Holland, France, Germany, Belgium, and Italy. With regard to the functions of the law, the empire may have kept the peace—largely with force—but it changed the status quo and seldom promoted the native peoples' rights or social justice within the colonized nation.

### 2. Schools of Legal Thought

There are different schools (or philosophies) concerning what law is all about. Philosophy of law is also called jurisprudence, and the two main schools are legal positivism and natural law.

As legal philosopher John Austin concisely put it, “Law is the command of a sovereign.” Law is only law, in other words, if it comes from a recognized authority and can be enforced by that authority, or sovereign—such as a king, a president, or a dictator—who has power within a defined area or territory. Positivism is a philosophical movement that claims that science

provides the only knowledge precise enough to be worthwhile. But what are we to make of the social phenomena of laws?

Positivism has its limits and its critics. New Testament readers may recall that King Herod, fearing the birth of a Messiah, issued a decree that all male children below a certain age be killed. Because it was the command of a sovereign, the decree was carried out (or, in legal jargon, the decree was “executed”). Suppose a group seizes power in a particular place and commands that women cannot attend school and can only be treated medically by women, even if their condition is life-threatening and women doctors are few and far between. Suppose also that this command is carried out, just because it is the law and is enforced with a vengeance. People who live there will undoubtedly question the wisdom, justice, or goodness of such a law, but it is law nonetheless and is generally carried out. To avoid the law’s impact, a citizen would have to flee the country entirely. During the Taliban rule in Afghanistan, from which this example is drawn, many did flee.

## **2.1 Defining Jurisprudence**

This begins by examining the philosophy of law and from this examination springs differing views and schools of legal thought.

### **Making the Law**

In the United States, legislators, judges, administrative agencies, governors, and presidents make law. In the federal system, judges are appointed by an elected official (the president) and confirmed by other elected officials (the Senate). If the president is from one party and the other party holds a majority of Senate seats, political conflicts may come up during the judges’ confirmation processes. Such a division has been fairly frequent over the past fifty years.

We could examine existing statutes—executive orders, regulations, or judicial decisions—in a fairly precise way to find out what the law says. For example, we could look at the posted speed limits on most US highways and conclude that the “correct” or “right” speed is no more than fifty-five miles per hour. Or we could look a little deeper and find out how the written law is usually applied. Doing so, we might conclude that sixty-one miles per hour is generally allowed

by most state troopers, but that occasionally someone gets ticketed for doing fifty-seven miles per hour in a fifty-five miles per hour zone. Either approach is empirical, even if not rigorously scientific. The first approach, examining in a precise way what the rule itself says, is sometimes known as the “positivist” school of legal thought. The second approach—which relies on social context and the actual behavior of the principal actors who enforce the law—is akin to the “legal realist” school of thought.

Positivism has its limits and its critics. New Testament readers may recall that King Herod, fearing the birth of a Messiah, issued a decree that all male children below a certain age be killed. Because it was the command of a sovereign, the decree was carried out (or, in legal jargon, the decree was “executed”). Suppose a group seizes power in a particular place and commands that women cannot attend school and can only be treated medically by women, even if their condition is life-threatening and women doctors are few and far between. Suppose also that this command is carried out, just because it is the law and is enforced with a vengeance. People who live there will undoubtedly question the wisdom, justice, or goodness of such a law, but it is law nonetheless and is generally carried out. To avoid the law’s impact, a citizen would have to flee the country entirely. During the Taliban rule in Afghanistan, from which this example is drawn, many did flee

## 2.2 Natural Law

The natural-law school of thought emphasizes that law should be based on a universal moral order. Natural law was “discovered” by humans through the use of reason and by choosing between that which is good and that which is evil. Here is the definition of natural law according to the *Cambridge Dictionary of Philosophy*: “Natural law, also called the law of nature in moral and political philosophy, is an objective norm or set of objective norms governing human behavior, similar to the positive laws of a human ruler, but binding on all people alike and usually understood as involving a superhuman legislator.” *Cambridge Dictionary of Philosophy*, s.v. “natural law.”

Both the US Constitution and the United Nations (UN) Charter have an affinity for the natural-law outlook, as it emphasizes certain objective norms and rights of individuals and nations. The US Declaration of Independence embodies a natural-law philosophy. The following short extract should provide some sense of the deep beliefs in natural law held by those who signed the document

The natural-law school has been very influential in American legal thinking. The idea that certain rights, for example, are “unalienable” (as expressed in the Declaration of Independence and in the writings of John Locke) is consistent with this view of the law. Individuals may have “God-given” or “natural” rights that government cannot legitimately take away. Government only by consent of the governed is a natural outgrowth of this view.

It is easier to know what the law “is” than what the law “should be.” Equal employment laws, for example, have specific statutes, rules, and decisions about racial discrimination. There are always difficult issues of interpretation and decision, which is why courts will resolve differing views. But how can we know the more fundamental “ought” or “should” of human equality? For example, how do we *know* that “all men are created equal” (from the Declaration of Independence)? Setting aside for the moment questions about the equality of women, or that of slaves, who were not counted as men with equal rights at the time of the declaration—can the statement be empirically proven, or is it simply a matter of a priori knowledge? (*A priori* means “existing in the mind prior to and independent of experience.”) Or is the statement about equality a matter of faith or belief, not really provable either scientifically or rationally? The dialogue between natural-law theorists and more empirically oriented theories of “what law is” will raise similar questions. In this book, we will focus mostly on the law as it is, but not without also raising questions about what it could or should be.

The legal realist school flourished in the 1920s and 1930s as a reaction to the historical school. Legal realists pointed out that because life and society are constantly changing, certain laws and doctrines have to be altered or modernized in order to remain current. The social context of law was more important to legal realists than the formal application of precedent to current or future legal disputes. Rather than suppose that judges inevitably acted objectively in

applying an existing rule to a set of facts, legal realists observed that judges had their own beliefs, operated in a social context, and would give legal decisions based on their beliefs and their own social context.

The legal realist view influenced the emergence of the critical legal studies (CLS) school of thought. The “Crits” believe that the social order (and the law) is dominated by those with power, wealth, and influence. Some Crits are clearly influenced by the economist Karl Marx and also by distributive justice theory (see [Chapter 2 "Corporate Social Responsibility and Business Ethics"](#)). The CLS school believes the wealthy have historically oppressed or exploited those with less wealth and have maintained social control through law. In so doing, the wealthy have perpetuated an unjust distribution of both rights and goods in society. Law is politics and is thus not neutral or value-free.

### 2.3 Law: The Moral Minimums in a Democratic Society

The law does not correct (or claim to correct) every wrong that occurs in society. At a minimum, it aims to curb the worst kind of wrongs, the kinds of wrongs that violate what might be called the “moral minimums” that a community demands of its members. These include not only violations of criminal law (see [Chapter 6 "Criminal Law"](#)) but also torts (see [Chapter 7 "Introduction to Tort Law"](#)) and broken promises (see [Chapter 8 "Introduction to Contract Law"](#)). Thus it may be wrong to refuse to return a phone call from a friend, but that wrong will not result in a viable lawsuit against you. But if a phone (or the Internet) is used to libel or slander someone, a tort has been committed, and the law may allow the defamed person to be compensated.

There is a strong association between what we generally think of as ethical behavior and what the laws require and provide. For example, contract law upholds society’s sense that promises—in general—should be kept. Promise-breaking is seen as unethical. The law provides remedies for broken promises (in breach of contract cases) but not for all broken promises; some excuses are accepted when it would be reasonable to do so. For tort law, harming others is considered unethical. If people are not restrained by law from harming one another, orderly society would be undone, leading to anarchy. Tort law provides for compensation when serious

injuries or harms occur. As for property law issues, we generally believe that private ownership of property is socially useful and generally desirable, and it is generally protected (with some exceptions) by laws. You can't throw a party at my house without my permission, but my right to do whatever I want on my own property may be limited by law; I can't, without the public's permission, operate an incinerator on my property and burn heavy metals, as toxic ash may be deposited throughout the neighborhood.

## 2.4 The Common Law: Property, Torts, and Contracts

Even before legislatures met to make rules for society, disputes happened and judges decided them. In England, judges began writing down the facts of a case and the reasons for their decision. They often resorted to deciding cases on the basis of prior written decisions. In relying on those prior decisions, the judge would reason that since a current case was pretty much like a prior case, it ought to be decided the same way. This is essentially reasoning by analogy. Thus the use of precedent in common-law cases came into being, and a doctrine of *stare decisis* (pronounced STAR-ay-de-SIGH-sus) became accepted in English courts. *Stare decisis* means, in Latin, "let the decision stand."

Most judicial decisions that don't apply legislative acts (known as statutes) will involve one of three areas of law—property, contract, or tort. Property law deals with the rights and duties of those who can legally own land (real property), how that ownership can be legally confirmed and protected, how property can be bought and sold, what the rights of tenants (renters) are, and what the various kinds of "estates" in land are (e.g., fee simple, life estate, future interest, easements, or rights of way). Contract law deals with what kinds of promises courts should enforce. For example, should courts enforce a contract where one of the parties was intoxicated, underage, or insane? Should courts enforce a contract where one of the parties seemed to have an unfair advantage? What kind of contracts would have to be in writing to be enforced by courts? Tort law deals with the types of cases that involve some kind of harm and or injury between the plaintiff and the defendant when no contract exists. Thus if you are libeled or a competitor lies about your product, your remedy would be in tort, not contract.

## 2.5 State Courts and the Domain of State Law

In the early years of our nation, federal courts were not as active or important as state courts. States had jurisdiction (the power to make and enforce laws) over the most important aspects of business life. The power of state law has historically included governing the following kinds of issues and claims:

- Contracts, including sales, commercial paper, letters of credit, and secured transactions
- Torts
- Property, including real property, bailments of personal property (such as when you check your coat at a theater or leave your clothes with a dry cleaner), trademarks, copyrights, and the estates of decedents (dead people)
- Corporations
- Partnerships
- Domestic matters, including marriage, divorce, custody, adoption, and visitation
- Securities law
- Environmental law
- Agency law, governing the relationship between principals and their agents.
- Banking
- Insurance

Over the past eighty years, however, federal law has become increasingly important in many of these areas, including banking, securities, and environmental law

## 2.6 Civil versus Criminal Cases

Most of the cases we will look at in this textbook are civil cases. Criminal cases are certainly of interest to business, especially as companies may break criminal laws. A criminal case involves a governmental decision—whether state or federal—to prosecute someone (named as a defendant) for violating society’s laws. The law establishes a moral minimum and does so especially in the area of criminal laws; if you break a criminal law, you can lose your freedom (in jail) or your life (if you are convicted of a capital offense). In a civil action, you would not be sent to prison; in the worst case, you can lose property (usually money or other assets), such as when Ford Motor Company lost a personal injury case and the judge awarded \$295 million to the plaintiffs or when Pennzoil won a \$10.54 billion verdict against Texaco (see [Chapter 7 "Introduction to Tort Law"](#)).

Some of the basic differences between civil law and criminal law cases are illustrated in [Table 1.1 "Differences between Civil and Criminal Cases"](#).

Table 1.1 Differences between Civil and Criminal Cases

	Civil Cases	Criminal Cases
<i>Parties</i>	Plaintiff brings case; defendant must answer or lose by default	Prosecutor brings case; defendant may remain silent
<i>Proof</i>	Preponderance of evidence	Beyond a reasonable doubt
<i>Reason</i>	To settle disputes peacefully, usually between private parties	To maintain order in society
		To punish the most blameworthy
		To deter serious wrongdoing
<i>Remedies</i>	Money damages (legal remedy)	Fines, jail, and forfeitures
	Injunctions (equitable remedy)	
	Specific performance (equity)	

Regarding plaintiffs and prosecutors, you can often tell a civil case from a criminal case by looking at the caption of a case going to trial. If the government appears first in the caption of the case (e.g., *U.S. v. Lieberman*, it is likely that the United States is prosecuting on behalf of the people. The same is true of cases prosecuted by state district attorneys (e.g., *State v. Seidel*). But this is not a foolproof formula. Governments will also bring civil actions to collect debts from or settle disputes with individuals, corporations, or other governments. Thus *U.S. v. Mayer* might be a collection action for unpaid taxes, or *U.S. v. Canada* might be a boundary dispute in the International Court of Justice. Governments can be sued, as well; people occasionally sue their state or federal government, but they can only get a trial if the government waives its sovereign immunity and allows such suits. *Warner v. U.S.*, for example, could be a claim for a tax refund wrongfully withheld or for damage caused to the Warner residence by a sonic boom from a US Air Force jet flying overhead.

## 2.7 Substance versus Procedure

Many rules and regulations in law are substantive, and others are procedural. We are used to seeing laws as substantive; that is, there is some rule of conduct or behavior that is called for or some action that is proscribed (prohibited). The substantive rules tell us how to act with one another and with the government. For example, all of the following are substantive rules of law and provide a kind of command or direction to citizens:

- Drive not more than fifty-five miles per hour where that speed limit is posted.
- Do not conspire to fix prices with competitors in the US market.
- Do not falsely represent the curative effects of your over-the-counter herbal remedy.
- Do not drive your motor vehicle through an intersection while a red traffic signal faces the direction you are coming from.
- Do not discriminate against job applicants or employees on the basis of their race, sex, religion, or national origin.
- Do not discharge certain pollutants into the river without first getting a discharge permit.

In contrast, procedural laws are the rules of courts and administrative agencies. They tell us how to proceed if there is a substantive-law problem. For example, if you drive fifty-three miles per hour in a forty mile-per-hour zone on Main Street on a Saturday night and get a ticket, you have broken a substantive rule of law (the posted speed limit). Just how and what gets decided in court is a matter of procedural law. Is the police officer's word final, or do you get your say before a judge? If so, who goes first, you or the officer? Do you have the right to be represented by legal counsel? Does the hearing or trial have to take place within a certain time period? A week? A month? How long can the state take to bring its case? What kinds of evidence will be relevant? Radar? (Does it matter what kind of training the officer has had on the radar device? Whether the radar device had been tested adequately?) The officer's personal observation? (What kind of training has he had, how is he qualified to judge the speed of a car, and other questions arise.) What if you unwisely bragged to a friend at a party recently that you went a hundred miles an hour on Main Street five years ago at half past three on a Tuesday morning? (If the prosecutor knows of this and the "friend" is willing to testify, is it relevant to the charge of fifty-three in a forty-mile-per-hour zone?)

In the United States, all state procedural laws must be fair, since the due process clause of the Fourteenth Amendment directs that no state shall deprive any citizen of "life, liberty, or property," without due process of law. (The \$200 fine plus court costs is designed to deprive you of property, that is, money, if you violate the speed limit.) Federal laws must also be fair, because the Fifth Amendment to the US Constitution has the exact same due process language as the Fourteenth Amendment. This suggests that some laws are more powerful or important than others, which is true. The next section looks at various types of positive law and their relative importance

### **3. Sources of Law**

In the United States today, there are numerous sources of law. The main ones are (1) constitutions—both state and federal, (2) statutes and agency regulations, and (3) judicial

decisions. In addition, chief executives (the president and the various governors) can issue executive orders that have the effect of law.

In international legal systems, sources of law include treaties (agreements between states or countries) and what is known as customary international law (usually consisting of judicial decisions from national court systems where parties from two or more nations are in a dispute).

As you might expect, these laws sometimes conflict: a state law may conflict with a federal law, or a federal law might be contrary to an international obligation. One nation's law may provide one substantive rule, while another nation's law may provide a different, somewhat contrary rule to apply. Not all laws, in other words, are created equal. To understand which laws have priority, it is essential to understand the relationships between the various kinds of law.

### **3.1 Constitutions**

Constitutions are the foundation for a state or nation's other laws, providing the country's legislative, executive, and judicial framework. Among the nations of the world, the United States has the oldest constitution still in use. It is difficult to amend, which is why there have only been seventeen amendments following the first ten in 1789; two-thirds of the House and Senate must pass amendments, and three-fourths of the states must approve them.

The nation's states also have constitutions. Along with providing for legislative, executive, and judicial functions, state constitutions prescribe various rights of citizens. These rights may be different from, and in addition to, rights granted by the US Constitution. Like statutes and judicial decisions, a constitution's specific provisions can provide people with a "cause of action" on which to base a lawsuit (see [Section 4.4 "Causes of Action, Precedent, and Stare Decisis"](#) on "causes of action").

### 3.2 Statutes and Treaties in Congress

In Washington, DC, the federal legislature is known as Congress and has both a House of Representatives and a Senate. The House is composed of representatives elected every two years from various districts in each state. These districts are established by Congress according to population as determined every ten years by the census, a process required by the Constitution. Each state has at least one district; the most populous state (California) has fifty-two districts. In the Senate, there are two senators from each state, regardless of the state's population. Thus Delaware has two senators and California has two senators, even though California has far more people. Effectively, less than 20 percent of the nation's population can send fifty senators to Washington.

### 3.3 Delegating Legislative Powers: Rules by Administrative Agencies

Congress has found it necessary and useful to create government agencies to administer various laws (see [Chapter 5 "Administrative Law"](#)). The Constitution does not expressly provide for administrative agencies, but the US Supreme Court has upheld the delegation of power to create federal agencies.

Examples of administrative agencies would include the Occupational Safety and Health Administration (OSHA), the Environmental Protection Agency (EPA), and the Federal Trade Commission (FTC).

It is important to note that Congress does not have unlimited authority to delegate its lawmaking powers to an agency. It must delegate its authority with some guidelines for the agency and cannot altogether avoid its constitutional responsibilities (see [Chapter 5 "Administrative Law"](#)).

Agencies propose rules in the Federal Register, published each working day of the year. Rules that are formally adopted are published in the *Code of Federal Regulations*, or CFR, available online at <https://www.govinfo.gov/help/cfr>

On a more local level, counties and municipal corporations or townships may be authorized under a state's constitution to create or adopt ordinances. Examples of ordinances include local building codes, zoning laws, and misdemeanors or infractions such as skateboarding or jaywalking.

### **3.4 Judicial Decisions: The Common Law**

Common law consists of decisions by courts (judicial decisions) that do not involve interpretation of statutes, regulations, treaties, or the Constitution. Courts make such interpretations, but many cases are decided where there is no statutory or other codified law or regulation to be interpreted. For example, a state court deciding what kinds of witnesses are required for a valid will in the absence of a rule (from a statute) is making common law.

United States law comes primarily from the tradition of English common law. By the time England's American colonies revolted in 1776, English common-law traditions were well established in the colonial courts. English common law was a system that gave written judicial decisions the force of law throughout the country. Thus if an English court delivered an opinion as to what constituted the common-law crime of burglary, other courts would stick to that decision, so that a common body of law developed throughout the country. Common law is essentially shorthand for the notion that a common body of law, based on past written decisions, is desirable and necessary.

## **4. Priority of Laws**

### **4.1 The Constitution as Preemptive Force in US Law**

The US Constitution takes precedence over all statutes and judicial decisions that are inconsistent

### **4.2 Statutes and Cases**

Statutes generally have priority, or take precedence, over case law (judicial decisions). Under common-law judicial decisions, employers could hire young children for difficult work, offer any wage they wanted, and not pay overtime work at a higher rate

### 4.3 Treaties as Statutes: The “Last in Time” Rule

A treaty or convention is considered of equal standing to a statute. Thus when Congress ratified the North American Free Trade Agreement (NAFTA), any judicial decisions or previous statutes that were inconsistent—such as quotas or limitations on imports from Mexico that were opposite to NAFTA commitments—would no longer be valid. Similarly, US treaty obligations under the General Agreement on Tariffs and Trade (GATT) and obligations made later through the World Trade Organization (WTO) would override previous federal or state statutes.

### 4.4 Causes of Action, Precedent, and *Stare Decisis*

No matter how wrong someone’s actions may seem to you, the only wrongs you can right in a court are those that can be tied to one or more causes of action.

Your cause of action is thus based on existing laws, including decided cases. How closely your case “fits” with a prior decided case raises the question of precedent.

As noted earlier in this chapter, the English common-law tradition placed great emphasis on precedent and what is called *stare decisis*. A court considering one case would feel obliged to decide that case in a way similar to previously decided cases. Written decisions of the most important cases had been spread throughout England (the common “realm”), and judges hoped to establish a somewhat predictable, consistent group of decisions.

## 5. Legal and Political Systems of the World

### 5.1 Comparing Common-Law Systems with Other Legal Systems

The common-law tradition is unique to England, the United States, and former colonies of the British Empire. Although there are differences among common-law systems (e.g., most nations do not permit their judiciaries to declare legislative acts unconstitutional; some nations use the jury less frequently),

## 5.2 Civil-Law Systems

The main alternative to the common-law legal system was developed in Europe and is based in Roman and Napoleonic law. A civil-law or code-law system is one where all the legal rules are in one or more comprehensive legislative enactments. During Napoleon's reign, a comprehensive book of laws—a code—was developed for all of France. The code covered criminal law, criminal procedure, noncriminal law and procedure, and commercial law. The rules of the code are still used today in France and in other continental European legal systems. The code is used to resolve particular cases, usually by judges without a jury. Moreover, the judges are not required to follow the decisions of other courts in similar cases. As George Cameron of the University of Michigan has noted, "The law is in the code, not in the cases." He goes on to note, "Where several cases all have interpreted a provision in a particular way, the French courts may feel bound to reach the same result in future cases, under the doctrine of *jurisprudence constante*. The major agency for growth and change, however, is the legislature, not the courts."

### 6. A Sample Case (See)

Harris v. Forklift Systems

*510 U.S. 17 (U.S. Supreme Court 1992)*

JUDGES: O'CONNOR, J., delivered the opinion for a unanimous Court. SCALIA, J., and GINSBURG, J., filed concurring opinions.

## Chapter 2 Corporate Social Responsibility and Business Ethics

### Learning Objectives

After reading this chapter, you should be able to do the following:

1. Define ethics and explain the importance of good ethics for business people and business organizations.
2. Understand the principal philosophies of ethics, including utilitarianism, duty-based ethics, and virtue ethics.
3. Explain why it is difficult to establish and maintain an ethical corporate culture in a business organization.

This chapter has a fairly modest aim: to introduce potential businesspeople to the differences between legal compliance and ethical excellence by reviewing some of the philosophical perspectives that apply to business, businesspeople, and the role of business organizations in society.

### 1. What Is Ethics?

#### Learning Objectives

1. Explain how both individuals and institutions can be viewed as ethical or unethical.
2. Explain how law and ethics are different, and why a good reputation can be more important than legal compliance.

Most of those who write about ethics do not make a clear distinction between ethics and morality. The question of what is “right” or “morally correct” or “ethically correct” or “morally desirable” in any situation is variously phrased, but all of the words and phrases are after the same thing: what act is “better” in a moral or ethical sense than some other act? People sometimes speak of morality as something personal but view ethics as having wider social

implications. Others see morality as the subject of a field of study, that field being ethics. Ethics would be morality as applied to any number of subjects, including journalistic ethics, business ethics, or the ethics of professionals such as doctors, attorneys, and accountants. We will venture a definition of *ethics*, but for our purposes, *ethics* and *morality* will be used as equivalent terms.

## CRITICAL THINKING

*“More creative people tend to be less ethical” What rationalizations can you assert to support this statement?*

People often speak about the ethics or morality of individuals and also about the morality or ethics of corporations and nations. There are clearly differences in the kind of moral responsibility that we can fairly ascribe to corporations and nations; we tend to see individuals as having a soul, or at least a conscience, but there is no general agreement that nations or corporations have either.

In talking about morality, we often use the word *good*; but that word can be confusing. If we say that Microsoft is a “good company,” we may be making a statement about the investment potential of Microsoft stock, or their preeminence in the market, or their ability to win lawsuits or appeals or to influence administrative agencies. Less likely, though possibly, we may be making a statement about the civic virtue and corporate social responsibility of Microsoft. In the first set of judgments, we use the word *good* but mean something other than ethical or moral; only in the second instance are we using the word *good* in its ethical or moral sense.

There are three key points here:

1. Although morals and ethics are not precisely measurable, people generally have similar reactions about what actions or conduct can rightly be called ethical or moral.
2. As humans, we need and value ethical people and want to be around them.

3. Saying that someone or some organization is law-abiding does not mean the same as saying a person or company is ethical.

Here is a cautionary note: for individuals, it is far from easy to recognize an ethical problem, have a clear and usable decision-making process to deal it, and then have the moral courage to do what's right. All of that is even more difficult within a business organization, where corporate employees vary in their motivations, loyalties, commitments, and character. There is no universally accepted way for developing an organization where employees feel valued, respected, and free to openly disagree; where the actions of top management are crystal clear; and where all the employees feel loyal and accountable to one another.

### 1.1 How Do Law and Ethics Differ?

There is a difference between legal compliance and moral excellence. Few would choose a professional service, health care or otherwise, because the provider had a record of perfect legal compliance, or always following the letter of the law. There are many professional ethics codes, primarily because people realize that law prescribes only a minimum of morality and does not provide purpose or goals that can mean excellent service to customers, clients, or patients.

- Individuals and organizations have reputations. (For an individual, moral reputation is most often tied to others' perceptions of his or her character: is the individual honest, diligent, reliable, fair, and caring? The reputation of an organization is built on the goodwill that suppliers, customers, the community, and employees feel toward it. Although an organization is not a person in the usual sense, the goodwill that people feel about the organization is based on their perception of its better qualities by a variety of stakeholders: customers or clients, suppliers, investors, employees, government officials).
- The goodwill of an organization is to a great extent based on the actions it takes and on whether the actions are favorably viewed. (This goodwill is usually specifically counted

in the sale of a business as an asset that the buyer pays for. While it is difficult to place a monetary value on goodwill, a firm's good reputation will generally call for a higher evaluation in the final accounting before the sale. Legal troubles or a reputation for having legal troubles will only lessen the price for a business and will even lessen the value of the company's stock as bad legal news comes to the public's attention.)

Another reason to think about ethics in connection with law is that the laws themselves are meant to express some moral view. If there are legal prohibitions against cheating the Medicare program, it is because people (legislators or their agents) have collectively decided that cheating Medicare is wrong. If there are legal prohibitions against assisting someone to commit suicide, it is because there has been a group decision that doing so is immoral. Thus the law provides some important cues as to what society regards as right or wrong.

#### Questions to analyze.

Is a corporation a person with the same natural and human rights that you and I have under the U.S. Constitution? Why does the European Court of Human Rights disagree?

[See cases on reserve:]

*Masterpiece Cakeshop Ltd. v. Colorado Civil Rights Commission*, 2017

*Citizens United v. Fed. Election Comm'n*, 130 S. Ct. 878, 175 L. Ed. 2d 753, 558 U.S. 310 (2010)

*Burwell v. Hobby Lobby Stores*, 134 S. Ct. 2751 (2014)

#### What is policy and when do courts consider it?

Finally, important policy issues that face society are often resolved through law, but it is important to understand the moral perspectives that underlie public debate—as, for example, in the continuing controversies over stem-cell research, medical use of marijuana, and abortion. Some ethical perspectives focus on rights, some on social utility, some on virtue or character, and some on social justice. People consciously (or, more often, unconsciously) adopt one or

more of these perspectives, and even if they completely agree on the facts with an opponent, they will not change their views. Fundamentally, the difference comes down to incompatible moral perspectives, a clash of basic values. These are hot-button issues because society is divided, not so much over facts, but over basic values. Understanding the varied moral perspectives and values in public policy debates is a clarifying benefit in following or participating in these important discussions.

## 1.2 Why Should an Individual or a Business Entity Be Ethical?

The usual answer is that good ethics is good business. In the long run, businesses that pay attention to ethics as well as law do better; they are viewed more favorably by customers. But this is a difficult claim to measure scientifically, because “the long run” is an indistinct period of time and because there are as yet no generally accepted criteria by which ethical excellence can be measured. In addition, life is still lived in the short run, and there are many occasions when something short of perfect conduct is a lot more profitable.

Some years ago, Royal Dutch/Shell (one of the world’s largest companies) found that it was in deep trouble with the public for its apparent carelessness with the environment and human rights. Consumers were boycotting and investors were getting frightened, so the company took a long, hard look at its ethic of short-term profit maximization. Since then, changes have been made. The CEO told one group of business ethicists that the uproar had taken them by surprise; they thought they had done everything right, but it seemed there was a “ghost in the machine.” That ghost was consumers, NGOs, and the media, all of whom objected to the company’s seeming lack of moral sensitivity.

Maximizing profits while being legally compliant is not a very inspiring goal for a business. People in an organization need some quality or excellence to strive for. By focusing on pushing the edge of what is legal, by looking for loopholes in the law that would help create short-term

financial gain, companies have often learned that in the long term they are not actually satisfying the market.

### Exercises

1. Think of a person who did something morally wrong, at least to your way of thinking. What was it? Explain to a friend of yours—or a classmate—why you think it was wrong. Does your friend agree? Why or why not? What is the basic principle that forms the basis for your judgment that it was wrong?
2. Think of a person who did something morally right, at least to your way of thinking. (This is not a matter of finding something they did well, like efficiently changing a tire, but something good.) What was it? Explain to a friend of yours—or a classmate—why you think it was right. Does your friend agree? Why or why not? What is the basic principle that forms the basis for your judgment that it was right?
3. Think of an action by a business organization (sole proprietor, partnership, or corporation) that was legal but still strikes you as wrong. What was it? Why do you think it was wrong?
4. Think of an act by an individual or a corporation that is ethical but not legal. Compare your answer with those of your classmates: were you more likely to find an example from individual action or corporate action? Do you have any thoughts as to why?

### 1.3. Major Ethical Perspectives

There are several well-respected ways of looking at ethical issues. Some of them have been around for centuries. It is important to know that many who think a lot about business and ethics have deeply held beliefs about which perspective is best. Others would recommend considering ethical problems from a variety of different perspectives. Here, we take a brief look at (1) utilitarianism, (2) deontology, (3) social justice and social contract theory, and (4) virtue theory. We are leaving out some important perspectives, such as general theories of justice and “rights” and feminist thought about ethics and patriarchy.

## 2. Ethical Philosophy

### 2.1 Utilitarianism

Utilitarianism is a prominent perspective on ethics, one that is well aligned with economics and the free-market outlook that has come to dominate much current thinking about business, management, and economics. Jeremy Bentham is often considered the founder of utilitarianism, though John Stuart Mill (who wrote *On Liberty* and *Utilitarianism*) and others promoted it as a guide to what is good. Utilitarianism emphasizes not rules but results. An action (or set of actions) is generally deemed good or right if it maximizes happiness or pleasure throughout society. Originally intended as a guide for legislators charged with seeking the greatest good for society, the utilitarian outlook may also be practiced individually and by corporations.

This statement describes “act utilitarianism”—which action among various options will deliver the greatest good to society? “Rule utilitarianism” is a slightly different version; it asks, what rule or principle, if followed regularly, will create the greatest good?

An individual or a company that consistently uses the test “What’s the greatest good for me or the company?” is not following the utilitarian test of the greatest good overall. Another common failing is to see only one or two options that seem reasonable. The following are some frequent mistakes that people make in applying what they think are utilitarian principles in justifying their chosen course of action:

1. Failing to come up with lots of options that seem reasonable and then choosing the one that has the greatest benefit for the greatest number. Often, a decision maker seizes on one or two alternatives without thinking carefully about other courses of action. If the alternative does more good than harm, the decision maker assumes it’s ethically okay.

2. Assuming that the greatest good for you or your company is in fact the greatest good for all—that is, looking at situations subjectively or with your own interests primarily in mind.
3. Underestimating the costs of a certain decision to you or your company. The now-classic Ford Pinto case demonstrates how Ford Motor Company executives drastically underestimated the legal costs of not correcting a feature on their Pinto models that they knew could cause death or injury. General Motors was often taken to task by juries that came to understand that the company would not recall or repair known and dangerous defects because it seemed more profitable not to. In 2010, Toyota learned the same lesson.
4. Underestimating the cost or harm of a certain decision to someone else or some other group of people.
5. Favoring short-term benefits, even though the long-term costs are greater.
6. Assuming that all values can be reduced to money. In comparing the risks to human health or safety against, say, the risks of job or profit losses, cost-benefit analyses will often try to compare apples to oranges and put arbitrary numerical values on human health and safety.

## 2.2 Rules and Duty: Deontology

In contrast to the utilitarian perspective, the deontological view presented in the writings of Immanuel Kant purports that having a moral intent and following the right rules is a better path to ethical conduct than achieving the right results. A deontologist like Kant is likely to believe that ethical action arises from doing one's duty and that duties are defined by rational thought. Duties, according to Kant, are not specific to particular kinds of human beings but are owed universally to all human beings. Kant therefore uses "universalizing" as a form of rational thought that assumes the inherent equality of all human beings. It considers all humans as equal, not in the physical, social, or economic sense, but equal before God, whether they are male, female, Pygmy, Eskimoan, Islamic, Christian, gay, straight, healthy, sick, young, or old.

For Kantian thinkers, this basic principle of equality means that we should be able to universalize any particular law or action to determine whether it is ethical. For example, if you were to consider misrepresenting yourself on a resume for a particular job you really wanted and you were convinced that doing so would get you that job, you might be very tempted to do so. (What harm would it be? you might ask yourself. When I have the job, I can prove that I was perfect for it, and no one is hurt, while both the employer and I are clearly better off as a result!) Kantian ethicists would answer that your chosen course of action should be a universal one—a course of action that would be good for all persons at all times. There are two requirements for a rule of action to be universal: consistency and reversibility. Consider reversibility: if you make a decision as though you didn't know what role or position you would have after the decision, you would more likely make an impartial one—you would more likely choose a course of action that would be most fair to all concerned, not just you. Again, deontology requires that we put duty first, act rationally, and give moral weight to the inherent equality of all human beings.

The second requirement for an action to be universal is the search for consistency. This is more abstract. A deontologist would say that since you know you are telling a lie, you must be willing to say that lying, as a general, universal phenomenon, is acceptable. But if everyone lied, then there would be no point to lying, since no one would believe anyone. It is only because honesty works well for society as a whole and is generally practiced that lying even becomes possible! That is, lying cannot be universalized, for it depends on the preexistence of honesty.

### 2.3 Social Justice Theory and Social Contract Theory

Social justice theorists worry about “distributive justice”—that is, what is the fair way to distribute goods among a group of people? Marxist thought emphasizes that members of society should be given goods according to their needs. But this redistribution would require a governing power to decide who gets what and when. Capitalist thought takes a different approach, rejecting any giving that is not voluntary. Certain economists, such as the late Milton Friedman (see corporations and corporate governance) also reject the notion that a corporation has a duty to give to unmet needs in society, believing that the government should play that

role. Even the most dedicated free-market capitalist will often admit the need for some government and some forms of welfare—Social Security, Medicare, assistance to flood-stricken areas, help for AIDS patients—along with some public goods (such as defense, education, highways, parks, and support of key industries affecting national security).

People who do not see the need for public goods (including laws, court systems, and the government goods and services just cited) often question why there needs to be a government at all. One response might be, “Without government, there would be no corporations.” Thomas Hobbes believed that people in a “state of nature” would rationally choose to have some form of government. He called this the social contract, where people give up certain rights to government in exchange for security and common benefits. In your own lives and in this course, you will see an ongoing balancing act between human desires for freedom and human desires for order; it is an ancient tension. Some commentators also see a kind of social contract between corporations and society; in exchange for perpetual duration and limited liability, the corporation has some corresponding duties toward society. Also, if a corporation is legally a “person,” as the Supreme Court reaffirmed in 2010, then some would argue that if this corporate person commits three felonies, it should be locked up for life and its corporate charter revoked!

It is important to realize that a social contract can be changed by the participants in a community, just as the US Constitution can be amended. Social contract theory is thus dynamic—it allows for structural and organic changes. Ideally, the social contract struck by citizens and the government allows for certain fundamental rights such as those we enjoy in the United States, but it need not. People can give up freedom-oriented rights (such as the right of free speech or the right to be free of unreasonable searches and seizures) to secure order (freedom from fear, freedom from terrorism). For example, many citizens in Russia now miss

the days when the Kremlin was all powerful; there was less crime and more equality and predictability to life in the Soviet Union, even if there was less freedom.

Thus the rights that people have—in positive law—come from whatever social contract exists in the society. This view differs from that of the deontologists and that of the natural-law thinkers such as Gandhi, Jesus, or Martin Luther King Jr., who believed that rights come from God or, in less religious terms, from some transcendent moral order.

## 2.4 Aristotle and Virtue Theory

Virtue theory, or virtue ethics, has received increasing attention over the past twenty years, particularly in contrast to utilitarian and deontological approaches to ethics. Virtue theory emphasizes the value of virtuous qualities rather than formal rules or useful results. Aristotle is often recognized as the first philosopher to advocate the ethical value of certain qualities, or virtues, in a person's character.

Aristotle named fourteen virtues: (1) courage, particularly in battle; (2) temperance, or moderation in eating and drinking; (3) liberality, or spending money well; (4) magnificence, or living well; (5) pride, or taking pleasure in accomplishments and stature; (6) high-mindedness, or concern with the noble rather than the petty; (7) unnamed virtue, which is halfway between ambition and total lack of effort; (8) gentleness, or concern for others; (9) truthfulness; (10) wit, or pleasure in group discussions; (11) friendliness, or pleasure in personal conduct; (12) modesty, or pleasure in personal conduct; (13) righteous indignation, or getting angry at the right things and in the right amounts; and (14) justice.

## 2.5 Josephson's Core Values Analysis and Decision Process

Michael Josephson, a noted American ethicist, believes that a current set of *core values* has been identified and that the values can be meaningfully applied to a variety of personal and corporate decisions.

To simplify, let's say that there are ethical and nonethical qualities among people in the United States. When you ask people what kinds of qualities they admire in others or in themselves, they may say wealth, power, fitness, sense of humor, good looks, intelligence, musical ability, or some other quality. They may also value honesty, caring, fairness, courage, perseverance, diligence, trustworthiness, or integrity. The qualities on the second list have something in common—they are distinctively ethical characteristics. That is, they are commonly seen as moral or ethical qualities, unlike the qualities on the first list. You can be, like the Athenian Alcibiades, brilliant but unprincipled, or, like some political leaders today, powerful but dishonest, or wealthy but uncaring. You can, in short, have a number of admirable qualities (brilliance, power, wealth) that are not per se virtuous. Just because Harold is rich or good-looking or has a good sense of humor does not mean that he is ethical. But if Harold is honest and caring (whether he is rich or poor, humorous or humorless), people are likely to see him as ethical.

**Among the virtues, are any especially important?** Studies from the Josephson Institute of Ethics in Marina del Rey, California, have identified six core values in our society, values that almost everyone agrees are important to them. When asked what values people hold dear, what values they wish to be known by, and what values they wish others would exhibit in their actions, six values consistently turn up: (1) trustworthiness, (2) respect, (3) responsibility, (4) fairness, (5) caring, and (6) citizenship.

Economist Milton Friedman is often quoted as having said that the only moral duty a corporation has is to make the most possible money, or to maximize profits, for its stockholders. Friedman's beliefs are noted at length (see sidebar on Friedman's article from the *New York Times*), but he asserted in a now-famous 1970 article that in a free society, "there is one and only one social responsibility of business: to use its resources and engage in activities designed to increase its profits as long as it stays within the rules of the game, which is to say, engages in open and free competition without deception and fraud." What follows is a major portion of what Friedman had to say in 1970.

## **ESSAY**

## **“The Social Responsibility of Business Is to Increase Its Profits”**

Milton Friedman, *New York Times Magazine*, September 13, 1970

What does it mean to say that “business” has responsibilities? Only people can have responsibilities. A corporation is an artificial person and in this sense may have artificial responsibilities, but “business” as a whole cannot be said to have responsibilities, even in this vague sense....

Presumably, the individuals who are to be responsible are businessmen, which means individual proprietors or corporate executives....In a free enterprise, private-property system, a corporate executive is an employee of the owners of the business. He has direct responsibility to his employers. That responsibility is to conduct the business in accordance with their desires, which generally will be to make as much money as possible while conforming to the basic rules of the society, both those embodied in law and those embodied in ethical custom....

...[T]he manager is that agent of the individuals who own the corporation or establish the eleemosynary institution, and his primary responsibility is to them...

Of course, the corporate executive is also a person in his own right. As a person, he may have other responsibilities that he recognizes or assumes voluntarily—to his family, his conscience, his feeling of charity, his church, his clubs, his city, his country. He may feel impelled by these responsibilities to devote part of his income to causes he regards as worthy, to refuse to work for particular corporations, even to leave his job...But in these respects he is acting as a principal, not an agent; he is spending his own money or time or energy, not the money of his employers or the time or energy he has contracted to devote to their purposes. If these are “social responsibilities,” they are the social responsibilities of individuals, not of business.

What does it mean to say that the corporate executive has a “social responsibility” in his capacity as businessman? If this statement is not pure rhetoric, it must mean that he has to act in some way that is not in the interest of his employers. For example, that he is to refrain from increasing the price of the product in order to contribute to the social objective of preventing

inflation, even though a price increase would be in the best interests of the corporation. Or that he is to make expenditures on reducing pollution beyond the amount that is in the best interests of the corporation or that is required by law in order to contribute to the social objective of improving the environment. Or that, at the expense of corporate profits, he is to hire “hardcore” unemployed instead of better qualified available workmen to contribute to the social objective of reducing poverty.

In each of these cases, the corporate executive would be spending someone else’s money for a general social interest. Insofar as his actions...reduce returns to stockholders, he is spending their money. Insofar as his actions raise the price to customers, he is spending the customers’ money. Insofar as his actions lower the wages of some employees, he is spending their money.

This process raises political questions on two levels: principle and consequences. On the level of political principle, the imposition of taxes and the expenditure of tax proceeds are governmental functions. We have established elaborate constitutional, parliamentary, and judicial provisions to control these functions, to assure that taxes are imposed so far as possible in accordance with the preferences and desires of the public....

Others have challenged the notion that corporate managers have no real duties except toward the owners (shareholders). By changing two letters in *shareholder*, stakeholder theorists widened the range of people and institutions that a corporation should pay moral consideration to. Thus they contend that a corporation, through its management, has a set of responsibilities toward nonshareholder interests.

## 2.6 Corporations and Corporate Governance

### 2.6.1 Legal Organization of the Corporation

The basic legal structure of a corporation under Delaware law and the laws of most other states in the United States. Shareholders elect directors, who then hire officers to manage the company. From this structure, some very basic realities follow. Because the directors of a corporation do not meet that often, it’s possible for the officers hired (top management, or the

“C-suite”) to be selective of what the board knows about, and directors are not always ready and able to provide the oversight that the shareholders would like. Nor does the law require officers to be shareholders, so that officers’ motivations may not align with the best interests of the company. This is the “agency problem” often discussed in corporate governance: how to get officers and other top management to align their own interests with those of the shareholders. For example, a CEO might trade insider information to the detriment of the company’s shareholders. Even board members are susceptible to misalignment of interest; for example, board members might resist hostile takeover bids because they would likely lose their perks (short for *perquisites*) as directors, even though the tender offer would benefit stockholders. Among other attempted realignments, the use of stock options was an attempt to make managers more attentive to the value of company stock, but the law of unintended consequences was in full force; managers tweaked and managed earnings in the bubble of the 1990s bull market, and “managing by numbers” became an epidemic in corporations organized under US corporate law. The rights of shareholders can be bolstered by changes in state and federal law, and there have been some attempts to do that since the late 1990s. But as owners, shareholders have the ultimate power to replace nonperforming or underperforming directors, which usually results in changes at the C-suite level as well.

## Chapter 3 Courts and the Legal Process

### Learning Objectives

After reading this chapter, you should be able to do the following:

1. Describe the two different court systems in the United States, and explain why some cases can be filed in either court system.
2. Explain the importance of subject matter jurisdiction and personal jurisdiction and know the difference between the two.
3. Describe the various stages of a civil action: from pleadings, to discovery, to trial, and to appeals.
4. Describe two alternatives to litigation: mediation and arbitration.

In the United States, law and government are interdependent. The Constitution establishes the basic framework of government and imposes certain limitations on the powers of government. In turn, the various branches of government are intimately involved in making, enforcing, and interpreting the law. Today, much of the law comes from Congress and the state legislatures. But it is in the courts that legislation is interpreted and prior case law is interpreted and applied.

As we go through this chapter, consider the case of Harry and Kay Robinson. In which court should the Robinsons file their action? Can the Oklahoma court hear the case and make a judgment that will be enforceable against all of the defendants? Which law will the court use to come to a decision? Will it use New York law, Oklahoma law, federal law, or German law?

## 3.1 The Relationship between State and Federal Court Systems in the United States

### Learning Objectives

1. Understand the different but complementary roles of state and federal court systems.
2. Explain why it makes sense for some courts to hear and decide only certain kinds of cases.
3. Describe the difference between a trial court and an appellate court.

Although it is sometimes said that there are two separate court systems, the reality is more complex. There are, in fact, fifty-two court systems: those of the fifty states, the local court system in the District of Columbia, and the federal court system. At the same time, these are not entirely separate; they all have several points of contact.

State and local courts must honor both federal law and the laws of the other states. First, state courts must honor federal law where state laws are in conflict with federal laws (under the supremacy clause of the Constitution; see [Chapter 4 "Constitutional Law and US Commerce"](#)). Second, claims arising under federal statutes can often be tried in the state courts, where the Constitution or Congress has not explicitly required that only federal courts can hear that kind of claim. Third, under the full faith and credit clause, each state court is obligated to respect the final judgments of courts in other states. Thus a contract dispute resolved by an Arkansas court cannot be relitigated in North Dakota when the plaintiff wants to collect on the Arkansas judgment in North Dakota. Fourth, state courts often must consider the laws of other states in deciding cases involving issues where two states have an interest, such as when drivers from two different states collide in a third state. Under these circumstances, state judges will consult their own state's case decisions involving conflicts of laws and sometimes decide that they must apply another state's laws to decide the case.

As state courts are concerned with federal law, so federal courts are often concerned with state law and with what happens in state courts. Federal courts will consider state-law-based claims when a case involves claims using both state and federal law. Claims based on federal laws will permit the federal court to take jurisdiction over the whole case, including any state issues raised. In those cases, the federal court is said to exercise “pendent jurisdiction” over the state claims. Also, the Supreme Court will occasionally take appeals from a state supreme court where state law raises an important issue of federal law to be decided. For example, a convict on death row may claim that the state’s chosen method of execution using the injection of drugs is unusually painful and involves “cruel and unusual punishment,” raising an Eighth Amendment issue.

There is also a broad category of cases heard in federal courts that concern only state legal issues—namely, cases that arise between citizens of different states. The federal courts are permitted to hear these cases under their so-called diversity of citizenship jurisdiction (or diversity jurisdiction). A citizen of New Jersey may sue a citizen of New York over a contract dispute in federal court, but if both were citizens of New Jersey, the plaintiff would be limited to the state courts. The Constitution established diversity jurisdiction because it was feared that local courts would be hostile toward people from other states and that they would need separate courts. In 2009, nearly a third of all lawsuits filed in federal court were based on diversity of citizenship. In these cases, the federal courts were applying state law, rather than taking federal question jurisdiction, where federal law provided the basis for the lawsuit or where the United States was a party (as plaintiff or defendant).

Why are there so many diversity cases in federal courts? Defense lawyers believe that there is sometimes a “home-court advantage” for an in-state plaintiff who brings a lawsuit against a nonresident in his local state court. The defense attorney is entitled to ask for removal to a federal court where there is diversity. This fits with the original reason for diversity jurisdiction in the Constitution—the concern that judges in one state court would favor the in-state plaintiff rather than a nonresident defendant. Another reason there are so many diversity cases is that plaintiffs’ attorneys know that removal is common and that it will move the case along faster by

filing in federal court to begin with. Some plaintiffs' attorneys also find advantages in pursuing a lawsuit in federal court. Federal court procedures are often more efficient than state court procedures, so that federal dockets are often less crowded. This means a case will get to trial faster, and many lawyers enjoy the higher status that comes in practicing before the federal bench. In some federal districts, judgments for plaintiffs may be higher, on average, than in the local state court. In short, not only law but also legal strategy factor into the popularity of diversity cases in federal courts.

### **1.1 State Court Systems**

The vast majority of civil lawsuits in the United States are filed in state courts. Two aspects of civil lawsuits are common to all state courts: trials and appeals. A court exercising a trial function has original jurisdiction—that is, jurisdiction to determine the facts of the case and apply the law to them. A court that hears appeals from the trial court is said to have appellate jurisdiction—it must accept the facts as determined by the trial court and limit its review to the lower court's theory of the applicable law.

### **1.2 Limited Jurisdiction Courts**

In most large urban states and many smaller states, there are four and sometimes five levels of courts. The lowest level is that of the limited jurisdiction courts. These are usually county or municipal courts with original jurisdiction to hear minor criminal cases (petty assaults, traffic offenses, and breach of peace, among others) and civil cases involving monetary amounts up to a fixed ceiling (no more than \$10,000 in most states and far less in many states). Most disputes that wind up in court are handled in the 18,000-plus limited jurisdiction courts, which are estimated to hear more than 80 percent of all cases.

One familiar limited jurisdiction court is the small claims court, with jurisdiction to hear civil cases involving claims for amounts ranging between \$1,000 and \$5,000 in about half the states and for considerably less in the other states (\$500 to \$1,000). The advantage of the small claims court is that its procedures are informal, it is often located in a neighborhood outside the

business district, it is usually open after business hours, and it is speedy. Lawyers are not necessary to present the case and in some states are not allowed to appear in court.

### 1.3 General Jurisdiction Courts

All other civil and criminal cases are heard in the general trial courts, or courts of general jurisdiction. These go by a variety of names: superior, circuit, district, or common pleas court (New York calls its general trial court the supreme court). These are the courts in which people seek redress for incidents such as automobile accidents and injuries, or breaches of contract. These state courts also prosecute those accused of murder, rape, robbery, and other serious crimes. The fact finder in these general jurisdiction courts is not a judge, as in the lower courts, but a jury of citizens.

Although courts of general jurisdiction can hear all types of cases, in most states more than half involve family matters (divorce, child custody disputes, and the like). A third were commercial cases, and slightly over 10 percent were devoted to car accident cases and other torts (as discussed in [Chapter 7 "Introduction to Tort Law"](#)).

Most states have specialized courts that hear only a certain type of case, such as landlord-tenant disputes or probate of wills. Decisions by judges in specialized courts are usually final, although any party dissatisfied with the outcome may be able to get a new trial in a court of general jurisdiction. Because there has been one trial already, this is known as a trial de novo. It is not an appeal, since the case essentially starts over.

### 1.4 Appellate Courts

The losing party in a general jurisdiction court can almost always appeal to either one or two higher courts. These intermediate appellate courts—usually called courts of appeal—have been established in forty states. They do not retry the evidence, but rather determine whether the trial was conducted in a procedurally correct manner and whether the appropriate law was applied. For example, the appellant (the losing party who appeals) might complain that the judge wrongly instructed the jury on the meaning of the law, or improperly allowed testimony

of a particular witness, or misconstrued the law in question. The appellee (who won in the lower court) will ask that the appellant be denied—usually this means that the appellee wants the lower-court judgment affirmed. The appellate court has quite a few choices: it can affirm, modify, reverse, or reverse and remand the lower court (return the case to the lower court for retrial).

The last type of appeal within the state courts system is to the highest court, the state Supreme Court, which is composed of a single panel of between five and nine judges and is usually located in the state capital. (The intermediate appellate courts are usually composed of panels of three judges and are situated in various locations around the state.) In a few states, the highest court goes by a different name: in New York, it is known as the court of appeals. In certain cases, appellants to the highest court in a state have the right to have their appeals heard, but more often the Supreme Court selects the cases it wishes to hear. For most litigants, the ruling of the state Supreme Court is final. In a relatively small class of cases—those in which federal constitutional claims are made—appeal to the US Supreme Court to issue a writ of certiorari remains a possibility.

## **2.1 The Federal-State Balance: Federalism**

State courts have their origins in colonial era courts. After the American Revolution, state courts functioned (with some differences) much like they did in colonial times. The big difference after 1789 was that state courts coexisted with federal courts. Federalism was the system devised by the nation's founders in which power is shared between states and the federal government. This sharing requires a division of labor between the states and the federal government. It is Article III of the US Constitution that spells out the respective spheres of authority (jurisdiction) between state and federal courts.

Take a close look at Article III of the Constitution. (You can find a printable copy of the Constitution at <https://www.archives.gov/founding-docs/constitution-transcript>.) Article III makes clear that federal courts are courts of limited power or jurisdiction. Notice that the only kinds of cases federal courts are authorized to deal with have strong federal connections. For

example, federal courts have jurisdiction when a federal law is being used by the plaintiff or prosecutor (a “federal question” case) or the case arises “in admiralty” (meaning that the problem arose not on land but on sea, beyond the territorial jurisdiction of any state, or in navigable waters within the United States). Implied in this list is the clear notion that states would continue to have their own laws, interpreted by their own courts, and that federal courts were needed only where the issues raised by the parties had a clear federal connection. The exception to this is diversity jurisdiction, discussed later.

The Constitution was constructed with the idea that state courts would continue to deal with basic kinds of claims such as tort, contract, or property claims. Since states sanction marriages and divorce, state courts would deal with “domestic” (family) issues. Since states deal with birth and death records, it stands to reason that paternity suits, probate disputes, and the like usually wind up in state courts. You wouldn’t go to the federal building or courthouse to get a marriage license, ask for a divorce, or probate a will: these matters have traditionally been dealt with by the states (and the thirteen original colonies before them). Matters that historically get raised and settled in state court under state law include not only domestic and probate matters but also law relating to corporations, partnerships, agency, contracts, property, torts, and commercial dealings generally. You cannot get married or divorced in federal court, because federal courts have no jurisdiction over matters that are historically (and are still) exclusively within the domain of state law.

In terms of subject matter jurisdiction, then, state courts will typically deal with the kinds of disputes just cited. Thus if you are Michigan resident and have an auto accident in Toledo with an Ohio resident and you each blame each other for the accident, the state courts would ordinarily resolve the matter if the dispute cannot otherwise be settled. Why state courts? Because when you blame one another and allege that it’s the other person’s fault, you have the beginnings of a tort case, with negligence as a primary element of the claim, and state courts have routinely dealt with this kind of claim, from British colonial times through Independence and to the present. (See also [Chapter 7 "Introduction to Tort Law"](#) of this text.) People have had a need to resolve this kind of dispute long before our federal courts were created, and you can

tell from Article III that the founders did not specify that tort or negligence claims should be handled by the federal courts. Again, federal courts are courts of limited jurisdiction, limited to the kinds of cases specified in Article III. If the case before the federal court does not fall within one of those categories, the federal court cannot constitutionally hear the case because it does not have subject matter jurisdiction.

Always remember: a court must have subject matter jurisdiction to hear and decide a case. Without it, a court cannot address the merits of the controversy or even take the next jurisdictional step of figuring out which of the defendants can be sued in that court. The question of which defendants are appropriately before the court is a question of personal jurisdiction.

Because there are two court systems, it is important for a plaintiff to file in the right court to begin with. The right court is the one that has subject matter jurisdiction over the case—that is, the power to hear and decide the kind of case that is filed. Not only is it a waste of time to file in the wrong court system and be dismissed, but if the dismissal comes after the filing period imposed by the applicable statute of limitations, it will be too late to refile in the correct court system. Such cases will be routinely dismissed, regardless of how deserving the plaintiff might be in his quest for justice. (The plaintiff's only remedy at that point would be to sue his lawyer for negligence for failing to mind the clock and get to the right court in time!)

## **2.2 The Federal Court System**

### *District Courts*

The federal judicial system is uniform throughout the United States and consists of three levels. At the first level are the federal district courts, which are the trial courts in the federal system. Every state has one or more federal districts; the less populous states have one, and the more populous states (California, Texas, and New York) have four. The federal court with the heaviest commercial docket is the US District Court for the Southern District of New York (Manhattan).

There are forty-four district judges and fifteen magistrates in this district. The district judges throughout the United States commonly preside over all federal trials, both criminal and civil.

### *Courts of Appeal*

Cases from the district courts can then be appealed to the circuit courts of appeal, of which there are thirteen ([Figure 3.1 "The Federal Judicial Circuits"](#)). Each circuit oversees the work of the district courts in several states. For example, the US Court of Appeals for the Second Circuit hears appeals from district courts in New York, Connecticut, and Vermont. The US Court of Appeals for the Ninth Circuit hears appeals from district courts in California, Oregon, Nevada, Montana, Washington, Idaho, Arizona, Alaska, Hawaii, and Guam. The US Court of Appeals for the District of Columbia Circuit hears appeals from the district court in Washington, DC, as well as from numerous federal administrative agencies (see [Chapter 5 "Administrative Law"](#)). The US Court of Appeals for the Federal Circuit, also located in Washington, hears appeals in patent and customs cases. Appeals are usually heard by three-judge panels, but sometimes there will be a rehearing at the court of appeals level, in which case all judges sit to hear the case “en banc.”

There are also several specialized courts in the federal judicial system. These include the US Tax Court, the Court of Customs and Patent Appeals, and the Court of Claims.

### *United States Supreme Court*

Overseeing all federal courts is the US Supreme Court, in Washington, DC. It consists of nine justices—the chief justice and eight associate justices. (This number is not constitutionally required; Congress can establish any number. It has been set at nine since after the Civil War.) The Supreme Court has selective control over most of its docket. By law, the cases it hears represent only a tiny fraction of the cases that are submitted. In 2008, the Supreme Court had numerous petitions (over 7,000, not including thousands of petitions from prisoners) but heard arguments in only 87 cases. The Supreme Court does not sit in panels. All the justices hear and consider each case together, unless a justice has a conflict of interest and must withdraw from hearing the case.

## 3.2 The Problem of Jurisdiction

### Learning Objectives

1. Explain the concept of subject matter jurisdiction and distinguish it from personal jurisdiction.
2. Understand how and where the US Constitution provides a set of instructions as to what federal courts are empowered by law to do.
3. Know which kinds of cases must be heard in federal courts only.
4. Explain diversity of citizenship jurisdiction and be able to decide whether a case is eligible for diversity jurisdiction in the federal courts.

Jurisdiction is an essential concept in understanding courts and the legal system. Jurisdiction is a combination of two Latin words: *juris* (law) and *diction* (to speak). Which court has the power “to speak the law” is the basic question of jurisdiction.

There are two questions about jurisdiction in each case that must be answered before a judge will hear a case: the question of subject matter jurisdiction and the question of personal jurisdiction. We will consider the question of subject matter jurisdiction first, because judges do; if they determine, on the basis of the initial documents in the case (the “pleadings”), that they have no power to hear and decide that kind of case, they will dismiss it.

### 3.2.1 The Federal-State Balance: Federalism

State courts have their origins in colonial era courts. After the American Revolution, state courts functioned (with some differences) much like they did in colonial times. The big difference after 1789 was that state courts coexisted with federal courts. Federalism was the system devised by the nation’s founders in which power is shared between states and the federal government. This sharing requires a division of labor between the states and the federal government. It is Article III of the US Constitution that spells out the respective spheres of authority (jurisdiction) between state and federal courts.

Take a close look at Article III of the Constitution. (You can find a printable copy of the Constitution at <https://www.archives.gov/founding-docs/constitution-transcript>.) Article III makes clear that federal courts are courts of limited power or jurisdiction. Notice that the only kinds of cases federal courts are authorized to deal with have strong federal connections. For example, federal courts have jurisdiction when a federal law is being used by the plaintiff or prosecutor (a “federal question” case) or the case arises “in admiralty” (meaning that the problem arose not on land but on sea, beyond the territorial jurisdiction of any state, or in navigable waters within the United States). Implied in this list is the clear notion that states would continue to have their own laws, interpreted by their own courts, and that federal courts were needed only where the issues raised by the parties had a clear federal connection. The exception to this is diversity jurisdiction, discussed later.

The Constitution was constructed with the idea that state courts would continue to deal with basic kinds of claims such as tort, contract, or property claims. Since states sanction marriages and divorce, state courts would deal with “domestic” (family) issues. Since states deal with birth and death records, it stands to reason that paternity suits, probate disputes, and the like usually wind up in state courts. You wouldn’t go to the federal building or courthouse to get a marriage license, ask for a divorce, or probate a will: these matters have traditionally been dealt with by the states (and the thirteen original colonies before them). Matters that historically get raised and settled in state court under state law include not only domestic and probate matters but also law relating to corporations, partnerships, agency, contracts, property, torts, and commercial dealings generally. You cannot get married or divorced in federal court, because federal courts have no jurisdiction over matters that are historically (and are still) exclusively within the domain of state law.

In terms of subject matter jurisdiction, then, state courts will typically deal with the kinds of disputes just cited. Thus if you are Michigan resident and have an auto accident in Toledo with an Ohio resident and you each blame each other for the accident, the state courts would ordinarily resolve the matter if the dispute cannot otherwise be settled. Why state courts? Because when you blame one another and allege that it’s the other person’s fault, you have the

beginnings of a tort case, with negligence as a primary element of the claim, and state courts have routinely dealt with this kind of claim, from British colonial times through Independence and to the present. (See also [Chapter 7 "Introduction to Tort Law"](#) of this text.) People have had a need to resolve this kind of dispute long before our federal courts were created, and you can tell from Article III that the founders did not specify that tort or negligence claims should be handled by the federal courts. Again, federal courts are courts of limited jurisdiction, limited to the kinds of cases specified in Article III. If the case before the federal court does not fall within one of those categories, the federal court cannot constitutionally hear the case because it does not have subject matter jurisdiction.

Always remember: a court must have subject matter jurisdiction to hear and decide a case. Without it, a court cannot address the merits of the controversy or even take the next jurisdictional step of figuring out which of the defendants can be sued in that court. The question of which defendants are appropriately before the court is a question of personal jurisdiction.

Because there are two court systems, it is important for a plaintiff to file in the right court to begin with. The right court is the one that has subject matter jurisdiction over the case—that is, the power to hear and decide the kind of case that is filed. Not only is it a waste of time to file in the wrong court system and be dismissed, but if the dismissal comes after the filing period imposed by the applicable statute of limitations, it will be too late to refile in the correct court system. Such cases will be routinely dismissed, regardless of how deserving the plaintiff might be in his quest for justice. (The plaintiff's only remedy at that point would be to sue his lawyer for negligence for failing to mind the clock and get to the right court in time!)

### **3.1.2 Exclusive Jurisdiction in Federal Courts**

With two court systems, a plaintiff (or the plaintiff's attorney, most likely) must decide whether to file a case in the state court system or the federal court system. Federal courts have exclusive jurisdiction over certain kinds of cases. The reason for this comes directly from the Constitution. Article III of the US Constitution provides the following:

The judicial Power shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority; to all Cases affecting Ambassadors, other public Ministers and Consuls; to all Cases of admiralty and maritime Jurisdiction; to Controversies to which the United States shall be a Party; to Controversies between two or more States; between a State and Citizens of another State; between Citizens of different States; between Citizens of the same State claiming Lands under Grants of different States, and between a State, or the Citizens thereof, and foreign States, Citizens or Subjects.

By excluding diversity cases, we can assemble a list of the kinds of cases that can only be heard in federal courts. The list looks like this:

1. *Suits between states.* Cases in which two or more states are a party.
2. *Cases involving ambassadors and other high-ranking public figures.* Cases arising between foreign ambassadors and other high-ranking public officials.
3. *Federal crimes.* Crimes defined by or mentioned in the US Constitution or those defined or punished by federal statute. Such crimes include treason against the United States, piracy, counterfeiting, crimes against the law of nations, and crimes relating to the federal government's authority to regulate interstate commerce. However, most crimes are state matters.
4. *Bankruptcy.* The statutory procedure, usually triggered by insolvency, by which a person is relieved of most debts and undergoes a judicially supervised reorganization or liquidation for the benefit of the person's creditors.
5. *Patent, copyright, and trademark cases*
  1. *Patent.* The exclusive right to make, use, or sell an invention for a specified period (usually seventeen years), granted by the federal government to the inventor if the device or process is novel, useful, and nonobvious.
  2. *Copyright.* The body of law relating to a property right in an original work of authorship (such as a literary, musical, artistic, photographic, or film work) fixed in any tangible

medium of expression, giving the holder the exclusive right to reproduce, adapt, distribute, perform, and display the work.

3. *Trademark*. A word, phrase, logo, or other graphic symbol used by a manufacturer or seller to distinguish its product or products from those of others.
6. *Admiralty*. The system of laws that has grown out of the practice of admiralty courts: courts that exercise jurisdiction over all maritime contracts, torts, injuries, and offenses.
7. *Antitrust*. Federal laws designed to protect trade and commerce from restraining monopolies, price fixing, and price discrimination.
8. *Securities and banking regulation*. The body of law protecting the public by regulating the registration, offering, and trading of securities and the regulation of banking practices.
9. *Other cases specified by federal statute*. Any other cases specified by a federal statute where Congress declares that federal courts will have exclusive jurisdiction.

### 3.2.3 Concurrent Jurisdiction

When a plaintiff takes a case to state court, it will be because state courts typically hear that kind of case (i.e., there is subject matter jurisdiction). If the plaintiff's main cause of action comes from a certain state's constitution, statutes, or court decisions, the state courts have subject matter jurisdiction over the case. If the plaintiff's main cause of action is based on federal law (e.g., Title VII of the Civil Rights Act of 1964), the federal courts have subject matter jurisdiction over the case. But federal courts will also have subject matter jurisdiction over certain cases that have only a state-based cause of action; those cases are ones in which the plaintiff(s) and the defendant(s) are from different states and the amount in controversy is more than \$75,000. State courts can have subject matter jurisdiction over certain cases that have only a federal-based cause of action. The Supreme Court has now made clear that state courts have concurrent jurisdiction of any federal cause of action unless Congress has given exclusive jurisdiction to federal courts.

In short, a case with a federal question can be often be heard in either state or federal court, and a case that has parties with a diversity of citizenship can be heard in state courts or in federal courts where the tests of complete diversity and amount in controversy are met. Whether a case will be heard in a state court or moved to a federal court will depend on the parties. If a plaintiff files a case in state trial court where concurrent jurisdiction applies, a defendant may (or may not) ask that the case be removed to federal district court.

### *Summary of Rules on Subject Matter Jurisdiction*

1. A court must always have subject matter jurisdiction, and personal jurisdiction over at least one defendant, to hear and decide a case.
2. A state court will have subject matter jurisdiction over any case that is not required to be brought in a federal court.

Some cases can *only* be brought in federal court, such as bankruptcy cases, cases involving federal crimes, patent cases, and Internal Revenue Service tax court claims. The list of cases for exclusive federal jurisdiction is fairly short. That means that almost any state court will have subject matter jurisdiction over almost any kind of case. If it's a case based on state law, a state court will always have subject matter jurisdiction.

3. A federal court will have subject matter jurisdiction over any case that is either based on a federal law (statute, case, or US Constitution)

OR

A federal court will have subject matter jurisdiction over any case based on state law where the parties are (1) from different states and (2) the amount in controversy is at least \$75,000.

(1) The different states requirement means that no plaintiff can have permanent residence in a state where any defendant has permanent residence—there must be complete diversity of citizenship as between all plaintiffs and defendants.

(2) The amount in controversy requirement means that a good-faith estimate of the amount the plaintiff may recover is at least \$75,000.

NOTE: For purposes of permanent residence, a corporation is considered a resident where it is incorporated AND where it has a principal place of business.

4. In diversity cases, the following rules apply.

(1) Federal civil procedure rules apply to how the case is conducted before and during trial and any appeals, but

(2) State law will be used as the basis for a determination of legal rights and responsibilities.

(a) This “choice of law” process is interesting but complicated. Basically, each state has its own set of judicial decisions that resolve conflict of laws. For example, just because A sues B in a Texas court, the Texas court will not necessarily apply Texas law. Anna and Bobby collide and suffer serious physical injuries while driving their cars in Roswell, New Mexico. Both live in Austin, and Bobby files a lawsuit in Austin. The court there could hear it (having subject matter jurisdiction and personal jurisdiction over Bobby) but would apply New Mexico law, which governs motor vehicle laws and accidents in New Mexico. Why would the Texas judge do that?

(b) The Texas judge knows that which state’s law is chosen to apply to the case can make a decisive difference in the case, as different states have different substantive law standards. For example, in a breach of contract case, one state’s version of the Uniform Commercial Code may be different from another’s, and which one the court decides to apply is often exceedingly good for one side and dismal for the other. In *Anna v. Bobby*, if Texas has one kind of comparative negligence statute and New Mexico has a different kind of comparative negligence statute, who wins or loses, or how much is awarded, could well depend on which law applies. Because both were under the jurisdiction of New Mexico’s laws at the time, it makes sense to apply New Mexico law.

(3) Why do some nonresident defendants prefer to be in federal court?

(a) In the state court, the judge is elected, and the jury may be familiar with or sympathetic to the “local” plaintiff.

(b) The federal court provides a more neutral forum, with an appointed, life-tenured judge and a wider pool of potential jurors (drawn from a wider geographical area).

(4) If a defendant does not want to be in state court and there is diversity, what is to be done?

(a) Make a motion for removal to the federal court.

(b) The federal court will not want to add to its caseload, or docket, but must take the case unless there is *not* complete diversity of citizenship or the amount in controversy is *less than* \$75,000.

To better understand subject matter jurisdiction in action, let's take an example. Wile E. Coyote wants a federal judge to hear his products-liability action against Acme, Inc., even though the action is based on state law. Mr. Coyote's attorney wants to "make a federal case" out of it, thinking that the jurors in the federal district court's jury pool will understand the case better and be more likely to deliver a "high value" verdict for Mr. Coyote. Mr. Coyote resides in Arizona, and Acme is incorporated in the state of Delaware and has its principal place of business in Chicago, Illinois. The federal court in Arizona can hear and decide Mr. Coyote's case (i.e., it has subject matter jurisdiction over the case) because of diversity of citizenship. If Mr. Coyote was injured by one of Acme's defective products while chasing a roadrunner in Arizona, the federal district court judge would hear his action—using federal procedural law—and decide the case based on the substantive law of Arizona on product liability.

But now change the facts only slightly: Acme is incorporated in Delaware but has its principal place of business in Phoenix, Arizona. Unless Mr. Coyote has a federal law he is using as a basis for his claims against Acme, his attempt to get a federal court to hear and decide the case will fail. It will fail because there is not complete diversity of citizenship between the plaintiff and the defendant.

Now consider Mr. and Mrs. Robinson and their products-liability claim against Seaway Volkswagen and the other three defendants. There is no federal products-liability law that

could be used as a cause of action. They are most likely suing the defendants using products-liability law based on common-law negligence or common-law strict liability law, as found in state court cases. They were not yet Arizona residents at the time of the accident, and their accident does not establish them as Oklahoma residents, either. They bought the vehicle in New York from a New York–based retailer. None of the other defendants is from Oklahoma.

They file in an Oklahoma state court, but how will they (their attorney or the court) know if the state court has subject matter jurisdiction? Unless the case is *required* to be in a federal court (i.e., unless the federal courts have exclusive jurisdiction over this kind of case), *any* state court system will have subject matter jurisdiction, including Oklahoma’s state court system. But if their claim is for a significant amount of money, they cannot file in small claims court, probate court, or any court in Oklahoma that does not have statutory jurisdiction over their claim. They will need to file in a court of general jurisdiction. In short, even filing in the right court system (state versus federal), the plaintiff must be careful to find the court that has subject matter jurisdiction.

If they wish to go to federal court, can they? There is no federal question presented here (the claim is based on state common law), and the United States is not a party, so the only basis for federal court jurisdiction would be diversity jurisdiction. If enough time has elapsed since the accident and they have established themselves as Arizona residents, they could sue in federal court in Oklahoma (or elsewhere), but only if none of the defendants—the retailer, the regional Volkswagen company, Volkswagen of North America, or Audi (in Germany) are incorporated in or have a principal place of business in Arizona. The federal judge would decide the case using federal civil procedure but would have to make the appropriate choice of state law. In this case, the choice of conflicting laws would most likely be Oklahoma, where the accident happened, or New York, where the defective product was sold.

Table 3.1 Sample Conflict-of-Law Principles

Substantive Law Issue	Law to be Applied
Liability for injury caused by tortious conduct	State in which the injury was inflicted
Real property	State where the property is located
Personal Property: inheritance	Domicile of deceased (not location of property)
Contract: validity	State in which contract was made
Contract: breach	State in which contract was to be performed*
<b>*Or, in many states, the state with the most significant contacts with the contractual activities</b>	
<b>Note: Choice-of-law clauses in a contract will ordinarily be honored by judges in state and federal courts.</b>	

#### 4 Alternative Means of Resolving Disputes

##### Learning Objectives

1. Understand how arbitration and mediation are frequently used alternatives to litigation.
2. Describe the differences between arbitration and mediation.
3. Explain why arbitration is final and binding.

Disputes do not have to be settled in court. No law requires parties who have a legal dispute to seek judicial resolution if they can resolve their disagreement privately or through some other public forum. In fact, the threat of a lawsuit can frequently motivate parties toward private negotiation. Filing a lawsuit may convince one party that the other party is serious. Or the parties may decide that they will come to terms privately rather than wait the three or four years it can frequently take for a case to move up on the court calendar.

## 4.1 Arbitration

Beginning around 1980, a movement toward alternative dispute resolution began to gain force throughout the United States. Bar associations, other private groups, and the courts themselves wanted to find quicker and cheaper ways for litigants and potential litigants to settle certain types of quarrels than through the courts. As a result, neighborhood justice centers or dispute resolution centers have sprung up in communities. These are where people can come for help in settling disputes, of both civil and criminal nature, that should not consume the time and money of the parties or courts in lengthy proceedings.

These alternative forums use a variety of methods, including arbitration, mediation, and conciliation, to bring about agreement or at least closure of the dispute. These methods are not all alike, and their differences are worth noting.

Arbitration is a type of adjudication. The parties use a private decision maker, the arbitrator, and the rules of procedure are considerably more relaxed than those that apply in the courtroom. Arbitrators might be retired judges, lawyers, or anyone with the kind of specialized knowledge and training that would be useful in making a final, binding decision on the dispute. In a contractual relationship, the parties can decide even before a dispute arises to use arbitration when the time comes. Or parties can decide after a dispute arises to use arbitration instead of litigation. In a predispute arbitration agreement (often part of a larger contract), the parties can spell out the rules of procedure to be used and the method for choosing the arbitrator. For example, they may name the specific person or delegate the responsibility of choosing to some neutral person, or they may each designate a person and the two designees may jointly pick a third arbitrator.

Many arbitrations take place under the auspices of the American Arbitration Association, a private organization headquartered in New York, with regional offices in many other cities. The association uses published sets of rules for various types of arbitration (e.g., labor arbitration or commercial arbitration); parties who provide in contracts for arbitration through the association are agreeing to be bound by the association's rules. Similarly, the National

Association of Securities Dealers provides arbitration services for disputes between clients and brokerage firms. International commercial arbitration often takes place through the auspices of the International Chamber of Commerce. A multilateral agreement known as the Convention on the Recognition and Enforcement of Arbitral Awards provides that agreements to arbitrate—and arbitral awards—will be enforced across national boundaries.

Arbitration has two advantages over litigation. First, it is usually much quicker, because the arbitrator does not have a backlog of cases and because the procedures are simpler. Second, in complex cases, the quality of the decision may be higher, because the parties can select an arbitrator with specialized knowledge.

Under both federal and state law, arbitration is favored, and a decision rendered by an arbitrator is binding by law and may be enforced by the courts. The arbitrator's decision is final and binding, with very few exceptions (such as fraud or manifest disregard of the law by the arbitrator or panel of arbitrators). Saying that arbitration is favored means that if you have agreed to arbitration, you can't go to court if the other party wants you to arbitrate. Under the Federal Arbitration Act, the other party can go to court and get a stay against your litigation and also get an order compelling you to go to arbitration.

## 4.2 Mediation

Unlike adjudication, mediation gives the neutral party no power to impose a decision. The mediator is a go-between who attempts to help the parties negotiate a solution. The mediator will communicate the parties' positions to each other, will facilitate the finding of common ground, and will suggest outcomes. But the parties have complete control: they may ignore the recommendations of the mediator entirely, settle in their own way, find another mediator, agree to binding arbitration, go to court, or forget the whole thing!

### Key Takeaway

Litigation is not the only way to resolve disputes. Informal negotiation between the disputants usually comes first, but both mediation and arbitration are available. Arbitration, though, is

final and binding. Once you agree to arbitrate, you will have a final, binding arbitral award that is enforceable through the courts, and courts will almost never allow you to litigate after you have agreed to arbitrate

## Chapter 4 Constitutional Law and US Commerce

### Learning Objectives

After reading this chapter, you should be able to do the following:

1. Explain the historical importance and basic structure of the US Constitution.
2. Know what judicial review is and what it represents in terms of the separation of powers between the executive, legislative, and judicial branches of government.
3. Locate the source of congressional power to regulate the economy under the Constitution, and explain what limitations there are to the reach of congressional power over interstate commerce.
4. Describe the different phases of congressional power over commerce, as adjudged by the US Supreme Court over time.
5. Explain what power the states retain over commerce, and how the Supreme Court may sometimes limit that power.
6. Describe how the Supreme Court, under the supremacy clause of the Constitution, balances state and federal laws that may be wholly or partly in conflict.
7. Explain how the Bill of Rights relates to business activities in the United States.

The US Constitution is the foundation for all of US law. Business and commerce are directly affected by the words, meanings, and interpretations of the Constitution. Because it speaks in general terms, its provisions raise all kinds of issues for scholars, lawyers, judges, politicians, and commentators. For example, arguments still rage over the nature and meaning of “federalism,” the concept that there is shared governance between the states and the federal government. The US Supreme Court is the ultimate arbiter of those disputes, and as such it has a unique role in the legal system. It has assumed the power of judicial review, unique among federal systems globally, through which it can strike down federal or state statutes that it believes violate the Constitution and can even void the president’s executive orders if they are contrary to the Constitution’s language. No knowledgeable citizen or businessperson can afford to be ignorant of its basic provisions.

## 4.1 Basic Aspects of the US Constitution

In the US, the one document to which all public officials and military personnel pledge their unswerving allegiance is the Constitution. If you serve, you are asked to “support and defend” the Constitution “against all enemies, foreign and domestic.” The oath usually includes a statement that you swear that this oath is taken freely, honestly, and without “any purpose of evasion.” This loyalty oath may be related to a time—fifty years ago—when “un-American” activities were under investigation in Congress and the press; the fear of communism (as antithetical to American values and principles) was paramount. As you look at the Constitution and how it affects the legal environment of business, please consider what basic values it may impart to us and what makes it uniquely American and worth defending “against all enemies, foreign and domestic.”

In Article I, the Constitution places the legislature first and prescribes the ways in which representatives are elected to public office. Article I balances influence in the federal legislature between large states and small states by creating a Senate in which the smaller states (by population) as well as the larger states have two votes. In Article II, the Constitution sets forth the powers and responsibilities of the branch—the presidency—and makes it clear that the president should be the commander in chief of the armed forces. Article II also gives states rather than individuals (through the Electoral College) a clear role in the election process. Article III creates the federal judiciary, and the Bill of Rights, adopted in 1791, makes clear that individual rights must be preserved against activities of the federal government. In general, the idea of rights is particularly strong.

The Constitution itself speaks of rights in fairly general terms, and the judicial interpretation of various rights has been in flux. The “right” of a person to own another person was notably affirmed by the Supreme Court in the *Dred Scott* decision in 1857. In *Scott v. Sanford* (the Dred Scott decision), the court states that Scott should remain a slave, that as a slave he is not a citizen of the United States and thus not eligible to bring suit in a federal court, and that as a slave he is personal property and thus has never been free. The “right” of a child to freely

contract for long, tedious hours of work was upheld by the court in *Hammer v. Dagenhart* in 1918. Both decisions were later repudiated, just as the decision that a woman has a “right” to an abortion in the first trimester of pregnancy could later be repudiated if *Roe v. Wade* is overturned by the Supreme Court. *Roe v. Wade*, 410 US 113 (1973).

## 1.2 General Structure of the Constitution

Look at the Constitution. Notice that there are seven articles, starting with Article I (legislative powers), Article II (executive branch), and Article III (judiciary). Notice that there is no separate article for administrative agencies. The Constitution also declares that it is “the supreme Law of the Land” (Article VI). Following Article VII are the ten amendments adopted in 1791 that are referred to as the Bill of Rights. Notice also that in 1868, a new amendment, the Fourteenth, was adopted, requiring states to provide “due process” and “equal protection of the laws” to citizens of the United States.

## 1.3 Federalism

The partnership created in the Constitution between the states and the federal government is called federalism. The Constitution is a document created by the states in which certain powers are delegated to the national government, and other powers are reserved to the states. This is made explicit in the Tenth Amendment.

## 1.4 Separation of Powers and Judicial Review

Because the Founding Fathers wanted to ensure that no single branch of the government, especially the executive branch, would be ascendant over the others, they created various checks and balances to ensure that each of the three principal branches had ways to limit or modify the power of the others. This is known as the separation of powers. Thus the president retains veto power, but the House of Representatives is entrusted with the power to initiate spending bills.

Power sharing was evident in the basic design of Congress, the federal legislative branch. The basic power imbalance was between the large states (with greater population) and the smaller ones (such as Delaware). The smaller ones feared a loss of sovereignty if they could be outvoted by the larger ones, so the federal legislature was constructed to guarantee two Senate seats for every state, no matter how small. The Senate was also given great responsibility in ratifying treaties and judicial nominations. The net effect of this today is that senators from a very small number of states can block treaties and other important legislation. The power of small states is also magnified by the Senate's cloture rule, which currently requires sixty out of one hundred senators to vote to bring a bill to the floor for an up-or-down vote.

Because the Constitution often speaks in general terms (with broad phrases such as "due process" and "equal protection"), reasonable people have disagreed as to how those terms apply in specific cases. The United States is unique among industrialized democracies in having a Supreme Court that reserves for itself that exclusive power to interpret what the Constitution means. The famous case of *Marbury v. Madison* began that tradition in 1803, when the Supreme Court had marginal importance in the new republic. The decision in *Bush v. Gore*, decided in December of 2000, illustrates the power of the court to shape our destiny as a nation. In that case, the court overturned a ruling by the Florida Supreme Court regarding the way to proceed on a recount of the Florida vote for the presidency. The court's ruling was purportedly based on the "equal protection of the laws" provision in the Fourteenth Amendment.

From *Marbury* to the present day, the Supreme Court has articulated the view that the US Constitution sets the framework for all other US laws, whether statutory or judicially created. Thus any statute (or portion thereof) or legal ruling (judicial or administrative) in conflict with the Constitution is not enforceable. And as the *Bush v. Gore* decision indicates, the states are not entirely free to do what they might choose; their own sovereignty is limited by their union with the other states in a federal sovereign.

If the Supreme Court makes a “bad decision” as to what the Constitution means, it is not easily overturned. Either the court must change its mind (which it seldom does) or two-thirds of Congress and three-fourths of the states must make an amendment (Article V).

Because the Supreme Court has this power of judicial review, there have been many arguments about how it should be exercised and what kind of “philosophy” a Supreme Court justice should have. President Richard Nixon often said that a Supreme Court justice should “strictly construe” the Constitution and not add to its language. Finding law in the Constitution was “judicial activism” rather than “judicial restraint.” The general philosophy behind the call for “strict constructionist” justices is that legislatures make laws in accord with the wishes of the majority, and so unelected judges should not make law according to their own views and values. Nixon had in mind the 1960s Warren court, which “found” rights in the Constitution that were not specifically mentioned—the right of privacy, for example. In later years, critics of the Rehnquist court would charge that it “found” rights that were not specifically mentioned, such as the right of states to be free from federal antidiscrimination laws. See, for example, *Kimel v. Florida Board of Regents*, or the *Citizens United v. Federal Election Commission* case, which held that corporations are “persons” with “free speech rights” that include spending unlimited amounts of money in campaign donations and political advocacy. *Kimel v. Florida Board of Regents*, 528 US 62 (2000).

Because *Roe v. Wade* has been so controversial, this chapter includes a seminal case on “the right of privacy,” *Griswold v. Connecticut*, [Section 4.6.1](#). Was the court was correct in recognizing a “right of privacy” in *Griswold*? This may not seem like a “business case,” but consider: the manufacture and distribution of birth control devices is a highly profitable (and legal) business in every US state. Moreover, *Griswold* illustrates another important and much-debated concept in US constitutional law: substantive due process. The problem of judicial review and its proper scope is brought into sharp focus in the abortion controversy. Abortion became a lucrative service business after *Roe v. Wade* was decided in 1973. That has gradually changed, with state laws that have limited rather than overruled *Roe v. Wade* and with persistent antiabortion protests, killings of abortion doctors, and efforts to publicize the human

nature of the fetuses being aborted. The key here is to understand that there is no *explicit* mention in the Constitution of any right of privacy. As Justice Harry Blackmun argued in his majority opinion in *Roe v. Wade*,

The Constitution does not explicitly mention any right of privacy. In a line of decisions, however, the Court has recognized that a right of personal privacy or a guarantee of certain areas or zones of privacy, does exist under the Constitution....[T]hey also make it clear that the right has some extension to activities relating to marriage...procreation...contraception...family relationships...and child rearing and education....The right of privacy...is broad enough to encompass a woman's decision whether or not to terminate her pregnancy.

In short, justices interpreting the Constitution wield quiet yet enormous power through judicial review. In deciding that the right of privacy applied to a woman's decision to abort in the first trimester, the Supreme Court did not act on the basis of a popular mandate or clear and unequivocal language in the Constitution, and it made illegal any state or federal legislative or executive action contrary to its interpretation. Only a constitutional amendment or the court's repudiation of *Roe v. Wade* as a precedent could change that interpretation.

## 4.2 The Commerce Clause

### Learning Objectives

1. Name the specific clause through which Congress has the power to regulate commerce. What, specifically, does this clause say?
2. Explain how early decisions of the Supreme Court interpreted the scope of the commerce clause and how that impacted the legislative proposals and programs of Franklin Delano Roosevelt during the Great Depression.
3. Describe both the wider use of the commerce clause from World War II through the 1990s and the limitations the Supreme Court imposed in *Lopez* and other cases.

First, turn to Article I, Section 8. The commerce clause gives Congress the exclusive power to make laws relating to foreign trade and commerce and to commerce among the various states.

Most of the federally created legal environment springs from this one clause: if Congress is not authorized in the Constitution to make certain laws, then it acts unconstitutionally and its actions may be ruled unconstitutional by the Supreme Court. Lately, the Supreme Court has not been shy about ruling acts of Congress unconstitutional.

Here are the first five parts of Article I, Section 8, which sets forth the powers of the federal legislature. The commerce clause is in boldface. It is short, but most federal legislation affecting business depends on this very clause:

### **Article I Section 8**

[Clause 1] The Congress shall have Power To lay and collect Taxes, Duties, Imposts and Excises, to pay the Debts and provide for the common Defense and general Welfare of the United States; but all Duties, Imposts and Excises shall be uniform throughout the United States;

[Clause 2] To borrow Money on the credit of the United States;

**[Clause 3] To regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes;**

#### **2.1 Early Commerce Clause Cases**

For many years, the Supreme Court was very strict in applying the commerce clause: Congress could only use it to legislate aspects of the movement of goods from one state to another. Anything else was deemed local rather than national. For example, In *Hammer v. Dagenhart*, decided in 1918, a 1916 federal statute had barred transportation in interstate commerce of goods produced in mines or factories employing children under fourteen or employing children fourteen and above for more than eight hours a day. A complaint was filed in the US District Court for the Western District of North Carolina by a father in his own behalf and on behalf of his two minor sons, one under the age of fourteen years and the other between fourteen and sixteen years, who were employees in a cotton mill in Charlotte, North Carolina. The father's

lawsuit asked the court to enjoin (block) the enforcement of the act of Congress intended to prevent interstate commerce in the products of child labor.

The Supreme Court saw the issue as whether Congress had the power under the commerce clause to control interstate shipment of goods made by children under the age of fourteen. The court found that Congress did not. The court cited several cases that had considered what interstate commerce could be constitutionally regulated by Congress. In *Hipolite Egg Co. v. United States*, the Supreme Court had sustained the power of Congress to pass the Pure Food and Drug Act, which prohibited the introduction into the states by means of interstate commerce impure foods and drugs. *Hipolite Egg Co. v. United States*, 220 US 45 (1911). In *Hoke v. United States*, the Supreme Court had sustained the constitutionality of the so-called White Slave Traffic Act of 1910, whereby the transportation of a woman in interstate commerce for the purpose of prostitution was forbidden. In that case, the court said that Congress had the power to protect the channels of interstate commerce: "If the facility of interstate transportation can be taken away from the demoralization of lotteries, the debasement of obscene literature, the contagion of diseased cattle or persons, the impurity of food and drugs, the like facility can be taken away from the systematic enticement to, and the enslavement in prostitution and debauchery of women, and, more insistently, of girls." *Hoke v. United States*, 227 US 308 (1913).

In each of those instances, the Supreme Court said, "[T]he use of interstate transportation was necessary to the accomplishment of harmful results." In other words, although the power over interstate transportation was to regulate, that could only be accomplished by prohibiting the use of the facilities of interstate commerce to effect the evil intended. But in *Hammer v. Dagenhart*, that essential element was lacking. The law passed by Congress aimed to standardize among all the states the ages at which children could be employed in mining and manufacturing, while the goods themselves are harmless. Once the labor is done and the articles have left the factory, the "labor of their production is over, and the mere fact that they were intended for interstate commerce transportation does not make their production subject to federal control under the commerce power."

In short, the early use of the commerce clause was limited to the movement of physical goods between states. Just because something might enter the channels of interstate commerce later on does not make it a fit subject for national regulation. The production of articles intended for interstate commerce is a matter of local regulation. The court therefore upheld the result from the district and circuit court of appeals; the application of the federal law was enjoined. Goods produced by children under the age of fourteen could be shipped anywhere in the United States without violating the federal law.

## 2.2 From the New Deal to the New Frontier and the Great Society:1930s–1970

During the global depression of the 1930s, the US economy saw jobless rates of a third of all workers, and President Roosevelt’s New Deal program required more active federal legislation. Included in the New Deal program was the recognition of a “right” to form labor unions without undue interference from employers. Congress created the National Labor Relations Board (NLRB) in 1935 to investigate and to enjoin employer practices that violated this right.

In *NLRB v. Jones & Laughlin Steel Corporation*, a union dispute with management at a large steel-producing facility near Pittsburgh, Pennsylvania, became a court case. In this case, the NLRB had charged the Jones & Laughlin Steel Corporation with discriminating against employees who were union members. The company’s position was that the law authorizing the NLRB was unconstitutional, exceeding Congress’s powers. The court held that the act was narrowly constructed so as to regulate industrial activities that had the potential to restrict interstate commerce. The earlier decisions under the commerce clause to the effect that labor relations had only an indirect effect on commerce were effectively reversed. Since the ability of employees to engage in collective bargaining (one activity protected by the act) is “an essential condition of industrial peace,” the national government was justified in penalizing corporations engaging in interstate commerce that “refuse to confer and negotiate” with their workers. This was, however, a close decision, and the switch of one justice made this ruling possible. Without this switch, the New Deal agenda would have been effectively derailed.

1. Why would Congress have power under the Civil Rights Act of 1964 to require restaurants and hotels to not discriminate against interstate travelers on the basis of race, color, sex, religion, or national origin? Suppose the Holiday Restaurant near I-80 in Des Moines, Iowa, has a sign that says, “We reserve the right to refuse service to any Muslim or person of Middle Eastern descent.” Suppose also that the restaurant is very popular locally and that only 40 percent of its patrons are travelers on I-80. Are the owners of the Holiday Restaurant in violation of the Civil Rights Act of 1964? What would happen if the owners resisted enforcement by claiming that Title II of the act (relating to “public accommodations” such as hotels, motels, and restaurants) was unconstitutional?
2. If the Supreme Court were to go back to the days of *Hammer v. Dagenhart* and rule that only goods and services involving interstate movement could be subject to federal law, what kinds of federal programs might be lacking a sound basis in the commerce clause? “Obamacare”? Medicare? Homeland security? Social Security? What other powers are granted to Congress under the Constitution to legislate for the general good of society?

### **4.3 Dormant Commerce Clause**

Congress has the power to legislate under the commerce clause and often does legislate. For example, Congress might say that trucks moving on interstate highways must not be more than seventy feet in length. But if Congress does not exercise its powers and regulate in certain areas (such as the size and length of trucks on interstate highways), states may make their own rules. States may do so under the so-called historic police powers of states that were never yielded up to the federal government.

These police powers can be broadly exercised by states for purposes of health, education, welfare, safety, morals, and the environment. But the Supreme Court has reserved for itself the power to determine when state action is excessive, even when Congress has not used the commerce clause to regulate. This power is claimed to exist in the dormant commerce clause.

### **4.4 Preemption: The Supremacy Clause**

When Congress does use its power under the commerce clause, it can expressly state that it wishes to have exclusive regulatory authority. For example, when Congress determined in the 1950s to promote nuclear power (“atoms for peace”), it set up the Nuclear Regulatory Commission and provided a limitation of liability for nuclear power plants in case of a nuclear accident. The states were expressly told to stay out of the business of regulating nuclear power or the movement of nuclear materials. Thus Rochester, Minnesota, or Berkeley, California, could declare itself a nuclear-free zone, but the federal government would have preempted such legislation. If Michigan wished to set safety standards at Detroit Edison’s Fermi II nuclear reactor that were more stringent than the federal Nuclear Regulatory Commission’s standards, Michigan’s standards would be preempted and thus be void.

Even where Congress does not expressly preempt state action, such action may be impliedly pre-empted. States cannot constitutionally pass laws that interfere with the accomplishment of the purposes of the federal law. Suppose, for example, that Congress passes a comprehensive law that sets standards for foreign vessels to enter the navigable waters and ports of the United States. If a state creates a law that sets standards that conflict with the federal law or sets standards so burdensome that they interfere with federal law, the doctrine of **preemption** will (in accordance with the supremacy clause) void the state law or whatever parts of it are inconsistent with federal law.

The preemption doctrine derives from the supremacy clause of the Constitution, which states that the “Constitution and the Laws of the United States...shall be the supreme Law of the Land...any Thing in the Constitutions or Laws of any State to the Contrary notwithstanding.” This means of course, that *any* federal law—even a regulation of a federal agency—would control over *any* conflicting state law.

Preemption can be either express or implied. When Congress chooses to expressly preempt state law, the only question for courts becomes determining whether the challenged state law is one that the federal law is intended to preempt. Implied preemption presents more difficult issues. The court has to look beyond the express language of federal statutes to determine

whether Congress has “occupied the field” in which the state is attempting to regulate, or whether a state law directly conflicts with federal law, or whether enforcement of the state law might frustrate federal purposes.

## 5.1 Business and the Bill of Rights

### Learning Objectives

1. Understand and describe which articles in the Bill of Rights apply to business activities and how they apply.
2. Explain the application of the Fourteenth Amendment—including the due process clause and the equal protection clause—to various rights enumerated in the original Bill of Rights.

The Bill of Rights (the first ten amendments to the Constitution) was originally meant to apply to federal actions only. During the twentieth century, the court began to apply selected rights to state action as well. So, for example, federal agents were prohibited from using evidence seized in violation of the Fourth Amendment, but state agents were not, until *Mapp v. Ohio* (1960), when the court applied the guarantees (rights) of the Fourth Amendment to state action as well. In this and in similar cases, the Fourteenth Amendment’s due process clause was the basis for the court’s action. The due process clause commanded that states provide due process in cases affecting the life, liberty, or property of US citizens, and the court saw in this command certain “fundamental guarantees” that states would have to observe. Over the years, most of the important guarantees in the Bill of Rights came to apply to state as well as federal action. The court refers to this process as selective incorporation.

Here are some very basic principles to remember:

1. The guarantees of the Bill of Rights apply *only* to state and federal government action. They do not limit what a company or person in the private sector may do. For example, states may not impose censorship on the media or limit free speech in a way that

offends the First Amendment, but your boss (in the private sector) may order you not to talk to the media.

2. In some cases, a private company may be regarded as participating in “state action.” For example, a private defense contractor that gets 90 percent of its business from the federal government has been held to be public for purposes of enforcing the constitutional right to free speech (the company had a rule barring its employees from speaking out in public against its corporate position). It has even been argued that public regulation of private activity is sufficient to convert the private into public activity, thus subjecting it to the requirements of due process. But the Supreme Court rejected this extreme view in 1974 when it refused to require private power companies, regulated by the state, to give customers a hearing before cutting off electricity for failure to pay the bill. *Jackson v. Metropolitan Edison Co.*, 419 US 345 (1974).
3. States have rights, too. While “states rights” was a battle cry of Southern states before the Civil War, the question of what balance to strike between state sovereignty and federal union has never been simple. In *Kimel v. Florida*, for example, the Supreme Court found in the words of the Eleventh Amendment a basis for declaring that states may not have to obey certain federal statutes.

### 5.1.1 First Amendment

In part, the First Amendment states that “Congress shall make no law...abridging the freedom of speech, or of the press.” The Founding Fathers believed that democracy would work best if people (and the press) could talk or write freely, without governmental interference. But the First Amendment was also not intended to be as absolute as it sounded. Oliver Wendell Holmes’s famous dictum that the law does not permit you to shout “Fire!” in a crowded theater has seldom been answered, “But why not?” And no one in 1789 thought that defamation laws (torts for slander and libel) had been made unconstitutional. Moreover, because the apparent purpose of the First Amendment was to make sure that the nation had a continuing, vigorous debate over matters political, political speech has been given the highest level of protection over

such other forms of speech as (1) “commercial speech,” (2) speech that can and should be limited by reasonable “time, place, and manner” restrictions, or (3) obscene speech.

Because of its higher level of protection, political speech can be false, malicious, mean-spirited, or even a pack of lies. A public official in the United States must be prepared to withstand all kinds of false accusations and cannot succeed in an action for defamation unless the defendant has acted with “malice” and “reckless disregard” of the truth. Public figures, such as CEOs of the largest US banks, must also be prepared to withstand accusations that are false. In any defamation action, truth is a defense, but a defamation action brought by a public figure or public official must prove that the defendant not only has his facts wrong but also lies to the public in a malicious way with reckless disregard of the truth. Celebrities such as Lindsay Lohan and Jon Stewart have the same burden to go forward with a defamation action. It is for this reason that the *National Enquirer* writes exclusively about public figures, public officials, and celebrities; it is possible to say many things that aren’t completely true and still have the protection of the First Amendment.

Political speech is so highly protected that the court has recognized the right of people to support political candidates through campaign contributions and thus promote the particular viewpoints and speech of those candidates. Fearing the influence of money on politics, Congress has from time to time placed limitations on corporate contributions to political campaigns. But the Supreme Court has had mixed reactions over time. Initially, the court recognized the First Amendment right of a corporation to donate money, subject to certain limits. *Buckley v. Valeo*, 424 US 1 (1976). In another case, *Austin v. Michigan Chamber of Commerce* (1990), the Michigan Campaign Finance Act prohibited corporations from using treasury money for independent expenditures to support or oppose candidates in elections for state offices. But a corporation could make such expenditures if it set up an independent fund designated solely for political purposes. The law was passed on the assumption that “the unique legal and economic characteristics of corporations necessitate some

regulation of their political expenditures to avoid corruption or the appearance of corruption.”

The Michigan Chamber of Commerce wanted to support a candidate for Michigan’s House of Representatives by using general funds to sponsor a newspaper advertisement and argued that as a nonprofit organization, it was not really like a business firm. The court disagreed and upheld the Michigan law. Justice Marshall found that the chamber was akin to a business group, given its activities, linkages with community business leaders, and high percentage of members (over 75 percent) that were business corporations. Furthermore, Justice Marshall found that the statute was narrowly crafted and implemented to achieve the important goal of maintaining integrity in the political process. But as you will see in *Citizens United v. Federal Election Commission* ([Section 4.6 "Cases"](#)), *Austin* was overruled; corporations are recognized as “persons” with First Amendment political speech rights that cannot be impaired by Congress or the states without some compelling governmental interest with restrictions on those rights that are “narrowly tailored.”

### 5.1.2 Fourth Amendment

The Fourth Amendment says, “all persons shall be secure in their persons, houses, papers, and effects from unreasonable searches and seizures, and no warrants shall issue, but upon probable cause, before a magistrate and upon Oath, specifically describing the persons to be searched and places to be seized.”

The court has read the Fourth Amendment to prohibit only those government searches or seizures that are “unreasonable.” Because of this, businesses that are in an industry that is “closely regulated” can be searched more frequently and can be searched without a warrant. In one case, an auto parts dealer at a junkyard was charged with receiving stolen auto parts. Part of his defense was to claim that the search that found incriminating evidence was unconstitutional. But the court found the search reasonable, because the dealer was in a “closely regulated industry.”

In the 1980s, Dow Chemical objected to an overflight by the US Environmental Protection Agency (EPA). The EPA had rented an airplane to fly over the Midland, Michigan, Dow plant, using an aerial mapping camera to photograph various pipes, ponds, and machinery that were not covered by a roof. Because the court's precedents allowed governmental intrusions into "open fields," the EPA search was ruled constitutional. Because the literal language of the Fourth Amendment protected "persons, houses, papers, and effects," anything searched by the government in "open fields" was reasonable. (The court's opinion suggested that if Dow had really wanted privacy from governmental intrusion, it could have covered the pipes and machinery that were otherwise outside and in open fields.)

Note again that constitutional guarantees like the Fourth Amendment apply to governmental action. Your employer or any private enterprise is not bound by constitutional limits. For example, if drug testing of all employees every week is done by government agency, the employees may have a cause of action to object based on the Fourth Amendment. However, if a private employer begins the same kind of routine drug testing, employees have no constitutional arguments to make; they can simply leave that employer, or they may pursue whatever statutory or common-law remedies are available.

### 5.1.3 Fifth Amendment

The Fifth Amendment states, "No person shall be...deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation."

The Fifth Amendment has three principal aspects: procedural due process, the takings clause, and substantive due process. In terms of procedural due process, the amendment prevents government from arbitrarily taking the life of a criminal defendant. In civil lawsuits, it is also constitutionally essential that the proceedings be

fair. This is why, for example, the defendant in *Burger King v. Rudzewicz* had a serious constitutional argument, even though he lost.

The takings clause of the Fifth Amendment ensures that the government does not take private property without just compensation. In the international setting, governments that take private property engage in what is called expropriation. The standard under customary international law is that when governments do that, they must provide prompt, adequate, and effective compensation. This does not always happen, especially where foreign owners' property is being expropriated. The guarantees of the Fifth Amendment (incorporated against state action by the Fourteenth Amendment) are available to property owners where state, county, or municipal government uses the power of eminent domain to take private property for public purposes. Just what is a public purpose is a matter of some debate. For example, if a city were to condemn economically viable businesses or neighborhoods to construct a baseball stadium with public money to entice a private enterprise (the baseball team) to stay, is a public purpose being served?

In *Kelo v. City of New London*, Mrs. Kelo and other residents fought the city of New London, in its attempt to use powers of eminent domain to create an industrial park and recreation area that would have Pfizer & Co. as a principal tenant. *Kelo v. City of New London*, 545 US 469 (2005). The city argued that increasing its tax base was a sufficient public purpose. In a very close decision, the Supreme Court determined that New London's actions did not violate the takings clause. However, political reactions in various states resulted in a great deal of new state legislation that would limit the scope of public purpose in eminent domain takings and provide additional compensation to property owners in many cases.

In addition to the takings clause and aspects of procedural due process, the Fifth Amendment is also the source of what is called substantive due process. During the first third of the twentieth century, the Supreme Court often nullified state and federal laws using substantive due process. In 1905, for example, in *Lochner v. New York*, the Supreme Court voided a New York statute that limited the number of hours that bakers

could work in a single week. New York had passed the law to protect the health of employees, but the court found that this law interfered with the basic constitutional right of private parties to freely contract with one another. Over the next thirty years, dozens of state and federal laws were struck down that aimed to improve working conditions, secure social welfare, or establish the rights of unions. However, in 1934, during the Great Depression, the court reversed itself and began upholding the kinds of laws it had struck down earlier.

Since then, the court has employed a two-tiered analysis of substantive due process claims. Under the first tier, legislation on economic matters, employment relations, and other business affairs is subject to minimal judicial scrutiny. This means that a law will be overturned only if it serves no rational government purpose. Under the second tier, legislation concerning fundamental liberties is subject to “heightened judicial scrutiny,” meaning that a law will be invalidated unless it is “narrowly tailored to serve a significant government purpose.”

The Supreme Court has identified two distinct categories of fundamental liberties. The first category includes most of the liberties expressly enumerated in the Bill of Rights. Through a process known as selective incorporation, the court has interpreted the due process clause of the Fourteenth Amendment to bar states from denying their residents the most important freedoms guaranteed in the first ten amendments to the federal Constitution. Only the Third Amendment right (against involuntary quartering of soldiers) and the Fifth Amendment right to be indicted by a grand jury have not been made applicable to the states. Because these rights are still not applicable to state governments, the Supreme Court is often said to have “selectively incorporated” the Bill of Rights into the due process clause of the Fourteenth Amendment.

The second category of fundamental liberties includes those liberties that are not expressly stated in the Bill of Rights but that can be seen as essential to the concepts of freedom and equality in a democratic society. These unstated liberties come from Supreme Court precedents, common law, moral philosophy, and deeply rooted traditions of US legal history. The Supreme Court has stressed that the word *liberty*

cannot be defined by a definitive list of rights; rather, it must be viewed as a rational continuum of freedom through which every aspect of human behavior is protected from arbitrary impositions and random restraints. In this regard, as the Supreme Court has observed, the due process clause protects abstract liberty interests, including the right to personal autonomy, bodily integrity, self-dignity, and self-determination.

These liberty interests often are grouped to form a general right to privacy, which was first recognized in *Griswold v. Connecticut* ([Section 4.6.1](#)), where the Supreme Court struck down a state statute forbidding married adults from using, possessing, or distributing contraceptives on the ground that the law violated the sanctity of the marital relationship. According to Justice Douglas's plurality opinion, this penumbra of privacy, though not expressly mentioned in the Bill of Rights, must be protected to establish a buffer zone or breathing space for those freedoms that are constitutionally enumerated.

But substantive due process has seen fairly limited use since the 1930s. During the 1990s, the Supreme Court was asked to recognize a general right to die under the doctrine of substantive due process. Although the court stopped short of establishing such a far-reaching right, certain patients may exercise a constitutional liberty to hasten their deaths under a narrow set of circumstances. In *Cruzan v. Missouri Department of Health*, the Supreme Court ruled that the due process clause guarantees the right of competent adults to make advanced directives for the withdrawal of life-sustaining measures should they become incapacitated by a disability that leaves them in a persistent vegetative state. *Cruzan v. Missouri Department of Health*, 497 US 261 (1990). Once it has been established by clear and convincing evidence that a mentally incompetent and persistently vegetative patient made such a prior directive, a spouse, parent, or other appropriate guardian may seek to terminate any form of artificial hydration or nutrition.

#### 5.1.4 Fourteenth Amendment: Due Process and Equal Protection Guarantees

The Fourteenth Amendment (1868) requires that states treat citizens of other states with due process. This can be either an issue of procedural due process (See “cases,” *Burger King v. Rudzewicz*) or an issue of substantive due process. For substantive due process, consider what happened in an Alabama court not too long ago. *BMW of North America, Inc. v. Gore*, 517 U.S. 559 (1996)

The plaintiff, Dr. Ira Gore, bought a new BMW for \$40,000 from a dealer in Alabama. He later discovered that the vehicle’s exterior had been slightly damaged in transit from Europe and had therefore been repainted by the North American distributor prior to his purchase. The vehicle was, by best estimates, worth about 10 percent less than he paid for it. The distributor, BMW of North America, had routinely sold slightly damaged cars as brand new if the damage could be fixed for less than 3 percent of the cost of the car. In the trial, Dr. Gore sought \$4,000 in compensatory damages and also punitive damages. The Alabama trial jury considered that BMW was engaging in a fraudulent practice and wanted to punish the defendant for a number of frauds it estimated at somewhere around a thousand nationwide. The jury awarded not only the \$4,000 in compensatory damages but also \$4 million in punitive damages, which was later reduced to \$2 million by the Alabama Supreme Court. On appeal to the US Supreme Court, the court found that punitive damages may not be “grossly excessive.” If they are, then they violate substantive due process. Whatever damages a state awards must be limited to what is reasonably necessary to vindicate the state’s legitimate interest in punishment and deterrence.

“Equal protection of the laws” is a phrase that originates in the Fourteenth Amendment, adopted in 1868. The amendment provides that no state shall “deny to any person within its jurisdiction the equal protection of the laws.” This is the equal protection clause. It means that, generally speaking, governments must treat people equally. Unfair classifications among people or corporations will not be permitted. A well-known example of unfair classification would be race discrimination: requiring white children and black children to attend different public schools or requiring “separate but equal” public services, such as water fountains or restrooms.

Yet despite the clear intent of the 1868 amendment, “separate but equal” was the law of the land until *Brown v. Board of Education* (1954). *Plessy v. Ferguson*, 163 US 537 (1896).

Governments make classifications every day, so not all classifications can be illegal under the equal protection clause. People with more income generally pay a greater percentage of their income in taxes. People with proper medical training are licensed to become doctors; people without that training cannot be licensed and commit a criminal offense if they do practice medicine. To know what classifications are permissible under the Fourteenth Amendment, we need to know what is being classified. The court has created three classifications, and the outcome of any equal protection case can usually be predicted by knowing how the court is likely to classify the case:

- Minimal scrutiny: economic and social relations. Government actions are usually upheld if there is a rational basis for them.
- Intermediate scrutiny: gender. Government classifications are sometimes upheld.
- Strict scrutiny: race, ethnicity, and fundamental rights. Classifications based on any of these are almost never upheld.

Under minimal scrutiny for economic and social regulation, laws that regulate economic or social issues are presumed valid and will be upheld if they are rationally related to legitimate goals of government. So, for example, if the city of New Orleans limits the number of street vendors to some rational number (more than one but fewer than the total number that could possibly fit on the sidewalks), the local ordinance would not be overturned as a violation of equal protection.

Under intermediate scrutiny, the city of New Orleans might limit the number of street vendors who are men. For example, suppose that the city council decreed that all street vendors must be women, thinking that would attract even more tourism. A classification like this, based on sex, will have to meet a sterner test than a classification resulting from economic or social regulation. A law like this would have to substantially relate to important government

objectives. Increasingly, courts have nullified government sex classifications as societal concern with gender equality has grown. (See Shannon Faulkner's case against The Citadel, an all-male state school.) *United States v. Virginia*, 518 US 515 (1996).

Suppose, however, that the city of New Orleans decided that no one of Middle Eastern heritage could drive a taxicab or be a street vendor. That kind of classification would be examined with strict scrutiny to see if there was any compelling justification for it. As noted, classifications such as this one are almost never upheld. The law would be upheld only if it were necessary to promote a compelling state interest. Very few laws that have a racial or ethnic classification meet that test.

The strict scrutiny test will be applied to classifications involving racial and ethnic criteria as well as classifications that interfere with a fundamental right. In *Palmore v. Sidoti*, the state refused to award custody to the mother because her new spouse was racially different from the child. *Palmore v. Sidoti*, 466 US 429 (1984). This practice was declared unconstitutional because the state had made a racial classification; this was presumptively invalid, and the government could not show a compelling need to enforce such a classification through its law. An example of government action interfering with a fundamental right will also receive strict scrutiny. When New York State gave an employment preference to veterans who had been state residents at the time of entering the military, the court declared that veterans who were new to the state were less likely to get jobs and that therefore the statute interfered with the right to travel, which was deemed a fundamental right. *Atty. Gen. of New York v. Soto-Lopez*, 476 US 898 (1986).

## **CHAPTER 4 CASES (See)**

Griswold v. Connecticut 381 U.S. 479 (U.S. Supreme Court 1965)

## Chapter 5 [Administrative Law](#)

### Learning Objectives

After reading this chapter, you should be able to do the following:

1. Understand the purpose served by federal administrative agencies.
2. Know the difference between executive branch agencies and independent agencies.
3. Understand the political control of agencies by the president and Congress.
4. Describe how agencies make rules and conduct hearings.
5. Describe how courts can be used to challenge administrative rulings.

### 5.1 Administrative Agencies: Their Structure and Powers

#### Why Have Administrative Agencies?

The US Constitution mentions only three branches of government: legislative, executive, and judicial (Articles I, II, and III). There is no mention of agencies in the Constitution, even though federal agencies are sometimes referred to as “the fourth branch of government.” The Supreme Court has recognized the legitimacy of federal administrative agencies to make rules that have the same binding effect as statutes by Congress.

#### Why Regulate the Economy at All?

The market often does not work properly, as economists often note. Monopolies, for example, happen in the natural course of human events but are not always desirable. To fix this, well-conceived and objectively enforced competition law (what is called antitrust law in the United States) is needed.

Negative externalities must be “fixed,” as well. For example, as we see in tort law ([Chapter 7 "Introduction to Tort Law"](#)), people and business organizations often do things that impose costs (damages) on others, and the legal system will try—through the award of compensatory damages—to make fair adjustments. In terms of the ideal conditions for a free market, think of

tort law as the legal system's attempt to compensate for negative externalities: those costs imposed on people who have not voluntarily consented to bear those costs.

In terms of freedoms to enter or leave the market, the US constitutional guarantees of equal protection can prevent local, state, and federal governments from imposing discriminatory rules for commerce that would keep minorities, women, and gay people from full participation in business. For example, if the small town of Xenophobia, Colorado, passed a law that required all business owners and their employees to be Christian, heterosexual, and married, the equal protection clause (as well as numerous state and federal equal opportunity employment laws) would empower plaintiffs to go to court and have the law struck down as unconstitutional.

Knowing that information is power, we will see many laws administered by regulatory agencies that seek to level the playing field of economic competition by requiring disclosure of the most pertinent information for consumers (consumer protection laws), investors (securities laws), and citizens (e.g., the toxics release inventory laws in environmental law).

## **5.2 The Administrative Procedure Act**

In 1946, Congress enacted the Administrative Procedure Act (APA). This fundamental statute detailed for all federal administrative agencies how they must function when they are deciding cases or issuing regulations, the two basic tasks of administration. At the state level, the Model State Administrative Procedure Act, issued in 1946 and revised in 1961, has been adopted in twenty-eight states and the District of Columbia; three states have adopted the 1981 revision. The other states have statutes that resemble the model state act to some degree.

### **Rulemaking**

Trial-type hearings generally impose on particular parties liabilities based on past or present facts. Because these cases will serve as precedents, they are a partial guide to future conduct by others. But they do not directly apply to nonparties, who may argue in a subsequent case that their conduct does not fit within the holding announced in the case. Agencies can affect

future conduct far more directly by announcing rules that apply to all who come within the agency's jurisdiction.

The acts creating most of the major federal agencies expressly grant them authority to engage in rulemaking. This means, in essence, authority to legislate. The outpouring of federal regulations has been immense. The APA directs agencies about to engage in rulemaking to give notice in the *Federal Register* of their intent to do so. The *Federal Register* is published daily, Monday through Friday, in Washington, DC, and contains notice of various actions, including announcements of proposed rulemaking and regulations as adopted. The notice must specify the time, place, and nature of the rulemaking and offer a description of the proposed rule or the issues involved. Any interested person or organization is entitled to participate by submitting written "data, views or arguments." Agencies are not legally required to air debate over proposed rules, though they often do so.

### 5.3 The Scope of Judicial Review

#### Learning Objectives

1. Describe the "exhaustion of remedies" requirement.
2. Detail various strategies for obtaining judicial review of agency rules.
3. Explain under what circumstances it is possible to sue the government.

Neither an administrative agency's adjudication nor its issuance of a regulation is necessarily final. Most federal agency decisions are appealable to the federal circuit courts. To get to court, the appellant must overcome numerous complex hurdles. He or she must have standing—that is, be in some sense directly affected by the decision or regulation. The case must be ripe for review; administrative remedies such as further appeal within the agency must have been exhausted.

## **Exhaustion of Administrative Remedies**

Before you can complain to court about an agency's action, you must first try to get the agency to reconsider its action. Generally, you must have asked for a hearing at the hearing examiner level, there must have been a decision reached that was unfavorable to you, and you must have appealed the decision to the full board. The full board must rule against you, and only then will you be heard by a court. The broadest exception to this exhaustion of administrative remedies requirement is if the agency had no authority to issue the rule or regulation in the first place, if exhaustion of remedies would be impractical or futile, or if great harm would happen should the rule or regulation continue to apply. Also, if the agency is not acting in good faith, the courts will hear an appeal without exhaustion.

## Chapter 6 Criminal Law

At times, unethical behavior by businesspeople can be extreme enough that society will respond by criminalizing certain kinds of activities. Ponzi schemes, arson, various kinds of fraud, embezzlement, racketeering, foreign corrupt practices, tax evasion, and insider trading are just a few. A corporation can face large fines, and corporate managers can face both fines and jail sentences for violating criminal laws. This chapter aims to explain how criminal law differs from civil law, to discuss various types of crimes, and to relate the basic principles of criminal procedure.

### **6.1 The Nature of Criminal Law**

Criminal law is the most ancient branch of the law. Many wise observers have tried to define and explain it, but the explanations often include many complex and subtle distinctions. A traditional criminal law course would include a lot of discussions on criminal intent, the nature of criminal versus civil responsibility, and the constitutional rights accorded the accused. But in this chapter, we will consider only the most basic aspects of intent, responsibility, and constitutional rights.

Unlike civil actions, where plaintiffs seek compensation or other remedies for themselves, crimes involve “the state” (the federal government, a state government, or some subunit of state government). This is because crimes involve some “harm to society” and not just harm to certain individuals. But “harm to society” is not always evident in the act itself. For example, two friends of yours at a party argue, take the argument outside, and blows are struck; one has a bloody nose and immediately goes home. The crimes of assault and battery have been committed, even though no one else knows about the fight and the friends later make up. By contrast, suppose a major corporation publicly announces that it is closing operations in your community and moving operations to Southeast Asia. There is plenty of harm to society as the

plant closes down and no new jobs take the place of the company's jobs. Although the effects on society are greater in the second example, only the first example is a crime.

Crimes are generally defined by legislatures, in statutes; the statutes describe in general terms the nature of the conduct they wish to criminalize. For government punishment to be fair, citizens must have clear notice of what is criminally prohibited. Ex post facto laws—laws created “after the fact” to punish an act that was legal at the time—are expressly prohibited by the US Constitution. Overly vague statutes can also be struck down by courts under a constitutional doctrine known as “void for vagueness.”

What is considered a crime will also vary from society to society and from time to time. For example, while cocaine use was legal in the United States at one time, it is now a controlled substance, and unauthorized use is now a crime. Medical marijuana was not legal fifty years ago when its use began to become widespread, and in some states its use or possession was a felony. Now, some states make it legal to use or possess it under some circumstances. In the United States, you can criticize and make jokes about the president of the United States without committing a crime, but in many countries it is a serious criminal act to criticize a public official.

This requirement that criminal statutes not be vague does not mean that the law always defines crimes in ways that can be easily and clearly understood. Many statutes use terminology developed by the common-law courts. For example, a California statute defines murder as “the unlawful killing of a human being, with malice aforethought.” If no history backed up these words, they would be unconstitutionally vague. But there is a rich history of judicial decisions that provides meaning for much of the arcane language like “malice aforethought” strewn about in the statute books.

Because a crime is an act that the legislature has defined as socially harmful, the parties involved cannot agree among themselves to forget a particular incident, such as a barroom brawl, if the authorities decide to prosecute. This is one of the critical distinctions between

criminal and civil law. An assault is both a crime and a tort. The person who was assaulted may choose to forgive his assailant and not to sue him for damages. But he cannot stop the prosecutor from bringing an indictment against the assailant. (However, because of crowded dockets, a victim that declines to press charges may cause a busy prosecutor to choose to not to bring an indictment.)

A crime consists of an act defined as criminal—an actus reus—and the requisite “criminal intent.” Someone who has a burning desire to kill a rival in business or romance and who may actually intend to murder but does not act on his desire has not committed a crime. He may have a “guilty mind”—the translation of the Latin phrase mens rea—but he is guilty of no crime. A person who is forced to commit a crime at gunpoint is not guilty of a crime, because although there was an act defined as criminal—an actus reus—there was no criminal intent.

## **6.2 Types of Crimes**

Most classifications of crime turn on the seriousness of the act. In general, seriousness is defined by the nature or duration of the punishment set out in the statute. A felony is a crime punishable (usually) by imprisonment of more than one year or by death. (Crimes punishable by death are sometimes known as capital crimes; they are increasingly rare in the United States.) The major felonies include murder, rape, kidnapping, armed robbery, embezzlement, insider trading, fraud, and racketeering. All other crimes are usually known as misdemeanors, petty offenses, or infractions. Another way of viewing crimes is by the type of social harm the statute is intended to prevent or deter, such as offenses against the person, offenses against property, and white-collar crime.

## 2.1 Offenses against the Person

### Homicide

Homicide is the killing of one person by another. Not every killing is criminal. When the law permits one person to kill another—for example, a soldier killing an enemy on the battlefield during war, or a killing in self-defense—the death is considered the result of justifiable homicide. An *excusable homicide*, by contrast, is one in which death results from an accident in which the killer is not at fault.

All other homicides are criminal. The most severely punished form is murder, defined as homicide committed with “malice aforethought.” This is a term with a very long history. Boiled down to its essentials, it means that the defendant had the intent to kill. A killing need not be premeditated for any long period of time; the premeditation might be quite sudden, as in a bar fight that escalates in that moment when one of the fighters reaches for a knife with the intent to kill.

Sometimes a homicide can be murder even if there is no intent to kill; an intent to inflict great bodily harm can be murder if the result is the death of another person. A killing that takes place while a felony (such as armed robbery) is being committed is also murder, whether or not the killer intended any harm. This is the so-called felony murder rule. Examples are the accidental discharge of a gun that kills an innocent bystander or the asphyxiation death of a fireman from smoke resulting from a fire set by an arsonist. The felony murder rule is more significant than it sounds, because it also applies to the accomplices of one who does the killing. Thus the driver of a getaway car stationed a block away from the scene of the robbery can be convicted of murder if a gun accidentally fires during the robbery and someone is killed. Manslaughter is an act of killing that does not amount to murder. Voluntary manslaughter is an intentional killing, but one carried out in the “sudden heat of passion” as the result of some provocation. An example is a fight that gets out of hand. Involuntary manslaughter entails a lesser degree of willfulness; it usually occurs when someone has taken a reckless action that results in death (e.g., a death resulting from a traffic accident in which one driver recklessly runs a red light).

## **Assault and Battery**

Ordinarily, we would say that a person who has struck another has “assaulted” him. Technically, that is a battery—the unlawful application of force to another person. The force need not be violent. Indeed, a man who kisses a woman is guilty of a battery if he does it against her will. The other person may consent to the force. That is one reason why surgeons require patients to sign consent forms, giving the doctor permission to operate. In the absence of such a consent, an operation is a battery. That is also why football players are not constantly being charged with battery. Those who agree to play football agree to submit to the rules of the game, which of course include the right to tackle. But the consent does not apply to all acts of physical force: a hockey player who hits an opponent over the head with his stick can be prosecuted for the crime of battery.

Criminal assault is an *attempt* to commit a battery or the deliberate placing of another in fear of receiving an immediate battery. If you throw a rock at a friend, but he manages to dodge it, you have committed an assault. Some states limit an assault to an attempt to commit a battery by one who has a “present ability” to do so. Pointing an unloaded gun and threatening to shoot would not be an assault, nor, of course, could it be a battery. The modern tendency, however, is to define an assault as an attempt to commit a battery by one with an *apparent* ability to do so.

Assault and battery may be excused. For example, a bar owner (or her agent, the bouncer) may use reasonable force to remove an unruly patron. If the use of force is excessive, the bouncer can be found guilty of assault and battery, and a civil action could arise against the bar owner as well.

## **2.2 Offenses against Property**

### **Theft: Larceny, Robbery, Embezzlement, False Pretenses**

The concept of theft is familiar enough. Less familiar is the way the law has treated various aspects of the act of stealing. Criminal law distinguishes among many different crimes that are popularly known as theft. Many technical words have entered the language—burglary, larceny, robbery—but are often used inaccurately. Brief definitions of the more common terms are discussed here.

The basic crime of stealing personal property is larceny. By its old common-law definition, still in use today, larceny is the wrongful “taking and carrying away of the personal property of another with intent to steal the same.”

The separate elements of this offense have given rise to all kinds of difficult cases. Take the theft of fruit, for example, with regard to the essential element of “personal property.” If a man walking through an orchard plucks a peach from a tree and eats it, he is not guilty of larceny because he has not taken away *personal* property (the peach is part of the land, being connected to the tree). But if he picks up a peach lying on the ground, he is guilty of larceny. Or consider the element of “taking” or “carrying away.” Sneaking into a movie theater without paying is not an act of larceny (though in most states it is a criminal act). Taking electricity by tapping into the power lines of an electric utility was something that baffled judges late in the nineteenth century because it was not clear whether electricity is a “something” that can be taken. Modern statutes have tended to make clear that electricity can be the object of larceny. Or consider the element of an “intent to steal the same.” If you borrow your friend’s BMW without his permission in order to go to the grocery store, intending to return it within a few minutes and then do return it, you have not committed larceny. But if you meet another friend at the store who convinces you to take a long joyride with the car and you return hours later, you may have committed larceny.

A particular form of larceny is robbery, which is defined as larceny from a person by means of violence or intimidation.

Larceny involves the taking of property from the possession of another. Suppose that a person legitimately comes to possess the property of another and wrongfully appropriates it—for example, an automobile mechanic entrusted with your car refuses to return it, or a bank teller who is entitled to temporary possession of cash in his drawer takes it home with him. The common law had trouble with such cases because the thief in these cases already had possession; his crime was in assuming ownership. Today, such wrongful conversion, known as embezzlement, has been made a statutory offense in all states.

Statutes against larceny and embezzlement did not cover all the gaps in the law. A conceptual problem arises in the case of one who is tricked into giving up his title to property. In larceny and embezzlement, the thief gains possession or ownership without any consent of the owner or custodian of the property. Suppose, however, that an automobile dealer agrees to take his customer's present car as a trade-in. The customer says that he has full title to the car. In fact, the customer is still paying off an installment loan and the finance company has an interest in the old car. If the finance company repossesses the car, the customer—who got a new car at a discount because of his false representation—cannot be said to have taken the new car by larceny or embezzlement. Nevertheless, he tricked the dealer into selling, and the dealer will have lost the value of the repossessed car. Obviously, the customer is guilty of a criminal act; the statutes outlawing it refer to this trickery as the crime of false pretenses, defined as obtaining ownership of the property of another by making untrue representations of fact with intent to defraud.

A number of problems have arisen in the judicial interpretation of false-pretense statutes. One concerns whether the taking is permanent or only temporary. The case of *State v. Mills* ([Section 6.7 "Cases"](#)) shows the subtle questions that can be presented and the dangers inherent in committing “a little fraud.”

In the *Mills* case, the claim was that a mortgage instrument dealing with one parcel of land was used instead for another. This is a false representation of fact. Suppose, by contrast, that a person misrepresents his state of mind: “I will pay you back tomorrow,” he says, knowing full

well that he does not intend to. Can such a misrepresentation amount to false pretenses punishable as a criminal offense? In most jurisdictions it cannot. A false-pretense violation relates to a past event or existing fact, not to a statement of intention. If it were otherwise, anyone failing to pay a debt might find himself facing criminal prosecution, and business would be less prone to take risks.

The problem of proving intent is especially difficult when a person has availed himself of the services of another without paying. A common example is someone leaving a restaurant without paying for the meal. In most states, this is specifically defined in the statutes as *theft of services*.

## 2.3 Environmental Crimes

Many federal environmental statutes have criminal provisions. These include the Federal Water Pollution Control Act (commonly called the Clean Water Act); the Rivers and Harbors Act of 1899 (the Refuse Act); the Clean Air Act; the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA); the Toxic Substances Control Act (TSCA); and the Resource Conservation and Recovery Act (RCRA). Under the Clean Water Act, for example, wrongful discharge of pollutants into navigable waters carries a fine ranging from \$2,500 to \$25,000 per day and imprisonment for up to one year. “Responsible corporate officers” are specifically included as potential defendants in criminal prosecutions under the act. They can include officers who have responsibility over a project where subcontractors and their employees actually caused the discharge. *U.S. v. Hanousek*, 176 F.3d 1116 (9th Cir. 1999).

## 6.3 Procedure

### Learning Objectives

1. Describe the basic steps in pretrial criminal procedure that follow a government's determination to arrest someone for an alleged criminal act.
2. Describe the basic elements of trial and posttrial criminal procedure.

The procedure for criminal prosecutions is complex. Procedures will vary from state to state. A criminal case begins with an arrest if the defendant is caught in the act or fleeing from the scene; if the defendant is not caught, a warrant for the defendant's arrest will issue. The warrant is issued by a judge or a magistrate upon receiving a complaint detailing the charge of a specific crime against the accused. It is not enough for a police officer to go before a judge and say, "I'd like you to arrest Bonnie because I think she's just murdered Clyde." She must supply enough information to satisfy the magistrate that there is probable cause (reasonable grounds) to believe that the accused committed the crime. The warrant will be issued to any officer or agency that has power to arrest the accused with warrant in hand.

The accused will be brought before the magistrate for a preliminary hearing. The purpose of the hearing is to determine whether there is sufficient reason to hold the accused for trial. If so, the accused can be sent to jail or be permitted to make bail. Bail is a sum of money paid to the court to secure the defendant's attendance at trial. If he fails to appear, he forfeits the money. Constitutionally, bail can be withheld only if there is reason to believe that the accused will flee the jurisdiction.

Once the arrest is made, the case is in the hands of the prosecutor. In the fifty states, prosecution is a function of the district attorney's office. These offices are usually organized on a county-by-county basis. In the federal system, criminal prosecution is handled by the office of the US attorney, one of whom is appointed for every federal district.

Following the preliminary hearing, the prosecutor must either file an information (a document stating the crime of which the person being held is accused) or ask the grand jury for an indictment. The grand jury consists of twenty-three people who sit to determine whether there is sufficient evidence to warrant a prosecution. It does not sit to determine guilt or innocence. The indictment is the grand jury's formal declaration of charges on which the accused will be tried. If indicted, the accused formally becomes a defendant.

The defendant will then be arraigned, that is, brought before a judge to answer the accusation in the indictment. The defendant may plead guilty or not guilty. If he pleads not guilty, the case will be tried before a jury (sometimes referred to as a petit jury). The jury cannot convict unless it finds the defendant guilty beyond a reasonable doubt.

The defendant might have pleaded guilty to the offense or to a lesser charge (often referred to as a “lesser included offense”—simple larceny, for example, is a lesser included offense of robbery because the defendant may not have used violence but nevertheless stole from the victim). Such a plea is usually arranged through plea bargaining with the prosecution. In return for the plea, the prosecutor promises to recommend to the judge that the sentence be limited. The judge most often, but not always, goes along with the prosecutor’s recommendation.

The defendant is also permitted to file a plea of *nolo contendere* (no contest) in prosecutions for certain crimes. In so doing, he neither affirms nor denies his guilt. He may be sentenced as though he had pleaded guilty, although usually a *nolo* plea is the result of a plea bargain. Why plead *nolo*? In some offenses, such as violations of the antitrust laws, the statutes provide that private plaintiffs may use a conviction or a guilty plea as proof that the defendant violated the law. This enables a plaintiff to prove liability without putting on witnesses or evidence and reduces the civil trial to a hearing about the damages to plaintiff. The *nolo* plea permits the defendant to avoid this, so that any plaintiff will have to not only prove damages but also establish civil liability.

Following a guilty plea or a verdict of guilt, the judge will impose a sentence after presentencing reports are written by various court officials (often, probation officers). Permissible sentences are spelled out in statutes, though these frequently give the judge a range within which to work (e.g., twenty years to life). The judge may sentence the defendant to imprisonment, a fine, or both, or may decide to suspend sentence (i.e., the defendant will not have to serve the sentence as long as he stays out of trouble).

Sentencing usually comes before appeal. As in civil cases, the defendant, now convicted, has the right to take at least one appeal to higher courts, where issues of procedure and constitutional rights may be argued.

### **Key Takeaway**

Criminal procedure in US courts is designed to provide a fair process to both criminal defendants and to society. The grand jury system, prosecutorial discretion, plea bargains, and appeals for lack of a fair trial are all part of US criminal procedure.

## **6.4 Constitutional Rights of the Accused**

### **Learning Objectives**

1. Describe the most significant constitutional rights of defendants in US courts, and name the source of these rights.
2. Explain the Exclusionary rule and the reason for its existence.

### **Search and Seizure**

The rights of those accused of a crime are spelled out in four of the ten constitutional amendments that make up the Bill of Rights (Amendments Four, Five, Six, and Eight). For the most part, these amendments have been held to apply to both the federal and the state governments. The Fourth Amendment says in part that “the right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated.” Although there are numerous and tricky exceptions to the general rule, ordinarily the police may not break into a person’s house or confiscate his papers or arrest him unless they have a warrant to do so. This means, for instance, that a policeman cannot simply stop you on a street corner and ask to see what is in your pockets (a power the police enjoy in many other countries), nor can your home be raided without probable cause to believe that you have committed a crime. What if the police do search or seize unreasonably?

The courts have devised a remedy for the use at trial of the fruits of an unlawful search or seizure. Evidence that is unconstitutionally seized is excluded from the trial. This is the so-called exclusionary rule, first made applicable in federal cases in 1914 and brought home to the states in 1961. The exclusionary rule is highly controversial, and there are numerous exceptions to it. But it remains generally true that the prosecutor may not use evidence willfully taken by the police in violation of constitutional rights generally, and most often in the violation of Fourth Amendment rights. (The fruits of a coerced confession are also excluded.)

## Chapter 7 Introduction to Tort Law

### Learning Objectives

After reading this chapter, you should be able to do the following:

1. Know why most legal systems have tort law.
2. Identify the three kinds of torts.
3. Show how tort law relates to criminal law and contract law.
4. Understand negligent torts and defenses to claims of negligence.
5. Understand strict liability torts and the reasons for them in the US legal system.

In civil litigation, contract and tort claims are by far the most numerous. The law attempts to adjust for harms done by awarding damages to a successful plaintiff who demonstrates that the defendant was the cause of the plaintiff's losses. Torts can be intentional torts, negligent torts, or strict liability torts. Employers must be aware that in many circumstances, their employees may create liability in tort. This chapter explains the different kind of torts, as well as available defenses to tort claims.

### 7.1 Purpose of Tort Laws

#### Learning Objectives

1. Explain why a sound market system requires tort law.
2. Define a tort and give two examples.
3. Explain the moral basis of tort liability.
4. Understand the purposes of damage awards in tort.

#### 1.1 Definition of *Tort*

The term *tort* is the French equivalent of the English word *wrong*. The word *tort* is also derived from the Latin word *tortum*, which means twisted or crooked or wrong, in contrast to the word *rectum*, which means straight (*rectitude* uses that Latin root). Thus conduct that is twisted or

crooked and not straight is a tort. The term was introduced into the English law by the Norman jurists.

Long ago, *tort* was used in everyday speech; today it is left to the legal system. A judge will instruct a jury that a tort is usually defined as a wrong for which the law will provide a remedy, most often in the form of money damages. The law does not remedy all “wrongs.” The preceding definition of tort does not reveal the underlying principles that divide wrongs in the legal sphere from those in the moral sphere. Hurting someone’s feelings may be more devastating than saying something untrue about him behind his back; yet the law will not provide a remedy for saying something cruel to someone directly, while it may provide a remedy for “defaming” someone, orally or in writing, to others.

Although the word is no longer in general use, tort suits are the stuff of everyday headlines. More and more people injured by exposure to a variety of risks now seek redress (some sort of remedy through the courts). Headlines boast of multimillion-dollar jury awards against doctors who bungled operations, against newspapers that libeled subjects of stories, and against oil companies that devastate entire ecosystems. All are examples of tort suits.

The law of torts developed almost entirely in the common-law courts; that is, statutes passed by legislatures were not the source of law that plaintiffs usually relied on. Usually, plaintiffs would rely on the common law (judicial decisions). Through thousands of cases, the courts have fashioned a series of rules that govern the conduct of individuals in their noncontractual dealings with each other. Through contracts, individuals can craft their own rights and responsibilities toward each other. In the absence of contracts, tort law holds individuals legally accountable for the consequences of their actions. Those who suffer losses at the hands of others can be compensated.

Many acts (like homicide) are both criminal and tortious. But torts and crimes are different, and the difference is worth noting. A crime is an act against the people as a whole. Society punishes the murderer; it does not usually compensate the family of the victim. Tort law, on the other

hand, views the death as a private wrong for which damages are owed. In a civil case, the tort victim or his family, not the state, brings the action. The judgment against a defendant in a civil tort suit is usually expressed in monetary terms, not in terms of prison times or fines, and is the legal system's way of trying to make up for the victim's loss.

## **1.2 Kinds of Torts**

There are three kinds of torts: intentional torts, negligent torts, and strict liability torts. Intentional torts arise from intentional acts, whereas unintentional torts often result from carelessness (e.g., when a surgical team fails to remove a clamp from a patient's abdomen when the operation is finished). Both intentional torts and negligent torts imply some fault on the part of the defendant. In strict liability torts, by contrast, there may be no fault at all, but tort law will sometimes require a defendant to make up for the victim's losses even where the defendant was not careless and did not intend to do harm.

## **1.3 Dimensions of Tort: Liability**

There is a clear moral basis for recovery through the legal system where the defendant has been careless (negligent) or has intentionally caused harm. Using the concepts that we are free and autonomous beings with basic rights, we can see that when others interfere with either our freedom or our autonomy, we will usually react negatively. As the old saying goes, "Your right to swing your arm ends at the tip of my nose." The law takes this even one step further: under intentional tort law, if you frighten someone by swinging your arms toward the tip of her nose, you may have committed the tort of assault, even if there is no actual touching (battery).

Under a capitalistic market system, rational economic rules also call for no negative externalities. That is, actions of individuals, either alone or in concert with others, should not negatively impact third parties. The law will try to compensate third parties who are harmed by your actions, even as it knows that a money judgment cannot actually mend a badly injured victim.

## **Dimensions of Tort: Fault**

Tort principles can be viewed along different dimensions. One is the **fault** dimension. Like criminal law, tort law requires a wrongful act by a defendant for the plaintiff to recover. Unlike criminal law, however, there need not be a specific intent. Since tort law focuses on injury to the plaintiff, it is less concerned than criminal law about the reasons for the defendant's actions. An innocent act or a relatively innocent one may still provide the basis for liability. Nevertheless, tort law—except for strict liability—relies on standards of fault, or blameworthiness.

The most obvious standard is willful conduct. If the defendant (often called the tortfeasor—i.e., the one committing the tort) intentionally injures another, there is little argument about tort liability. Thus all crimes resulting in injury to a person or property (murder, assault, arson, etc.) are also torts, and the plaintiff may bring a separate lawsuit to recover damages for injuries to his person, family, or property.

Most tort suits do not rely on *intentional* fault. They are based, rather, on negligent conduct that in the circumstances is careless or poses unreasonable risks of causing damage. Most automobile accident and medical malpractice suits are examples of negligence suits.

The fault dimension is a continuum. At one end is the deliberate desire to do injury. The middle ground is occupied by careless conduct. At the other end is conduct that most would consider entirely blameless, in the moral sense. The defendant may have observed all possible precautions and yet still be held liable. This is called strict liability. An example is that incurred by the manufacturer of a defective product that is placed on the market despite all possible precautions, including quality-control inspection. In many states, if the product causes injury, the manufacturer will be held liable.

## **Dimensions of Tort: Nature of Injury**

Tort liability varies by the type of injury caused. The most obvious type is physical harm to the person (assault, battery, infliction of emotional distress, negligent exposure to toxic pollutants, wrongful death) or property (trespass, nuisance, arson, interference with contract). Mental suffering can be redressed if it is a result of physical injury (e.g., shock and depression following an automobile accident). A few states now permit recovery for mental distress alone (a mother's shock at seeing her son injured by a car while both were crossing the street). Other protected interests include a person's reputation (injured by defamatory statements or writings), privacy (injured by those who divulge secrets of his personal life), and economic interests (misrepresentation to secure an economic advantage, certain forms of unfair competition).

### **Dimensions of Tort: Excuses**

A third element in the law of torts is the excuse for committing an apparent wrong. The law does not condemn every act that ultimately results in injury.

One common rule of exculpation is assumption of risk. A baseball fan who sits along the third base line close to the infield assumes the risk that a line drive foul ball may fly toward him and strike him. He will not be permitted to complain in court that the batter should have been more careful or that management should have either warned him or put up a protective barrier.

Another excuse is negligence of the plaintiff. If two drivers are careless and hit each other on the highway, some states will refuse to permit either to recover from the other. Still another excuse is consent: two boxers in the ring consent to being struck with fists (but not to being bitten on the ear).

### **1.4 Damages**

Since the purpose of tort law is to compensate the victim for harm actually done, damages are usually measured by the extent of the injury. Expressed in money terms, these include replacement of property destroyed, compensation for lost wages, reimbursement for medical

expenses, and dollars that are supposed to approximate the pain that is suffered. Damages for these injuries are called compensatory damages.

In certain instances, the courts will permit an award of punitive damages. As the word *punitive* implies, the purpose is to punish the defendant's actions. Because a punitive award (sometimes called exemplary damages) is at odds with the general purpose of tort law, it is allowable only in aggravated situations. The law in most states permits recovery of punitive damages only when the defendant has deliberately committed a wrong with malicious intent or has otherwise done something outrageous.

Punitive damages are rarely allowed in negligence cases for that reason. But if someone sets out intentionally and maliciously to hurt another person, punitive damages may well be appropriate. Punitive damages are intended not only to punish the wrongdoer, by exacting an additional and sometimes heavy payment (the exact amount is left to the discretion of jury and judge), but also to deter others from similar conduct. The punitive damage award has been subject to heavy criticism in recent years in cases in which it has been awarded against manufacturers. One fear is that huge damage awards on behalf of a multitude of victims could swiftly bankrupt the defendant. Unlike compensatory damages, punitive damages are taxable.

## 7.2 Negligence

### Learning Objectives

1. Understand how the duty of due care relates to negligence.
2. Distinguish between actual and proximate cause.
3. Explain the primary defenses to a claim of negligence.

### 2.1 Elements of Negligence

Physical harm need not be intentionally caused. A pedestrian knocked over by an automobile does not hurt less because the driver intended no wrong but was merely careless. The law

imposes a duty of care on all of us in our everyday lives. Accidents caused by negligence are actionable.

Determining negligence is not always easy. If a driver runs a red light, we can say that he is negligent because a driver must always be careful to ascertain whether the light is red and be able to stop if it is. Suppose that the driver was carrying a badly injured person to a nearby hospital and that after slowing down at an intersection, went through a red light, blowing his horn, whereupon a driver to his right, seeing him, drove into the intersection anyway and crashed into him. Must one always stop at a red light? Is proof that the light was red always proof of negligence? Usually, but not always: negligence is an abstract concept that must always be applied to concrete and often widely varying sets of circumstances. Whether someone was or was not negligent is almost always a question of fact for a jury to decide. Rarely is it a legal question that a judge can settle.

The tort of negligence has four elements: (1) a duty of due care that the defendant had, (2) the breach of the duty of due care, (3) connection between cause and injury, and (4) actual damage or loss. Even if a plaintiff can prove each of these aspects, the defendant may be able to show that the law excuses the conduct that is the basis for the tort claim. We examine each of these factors below.

### **2.1.1 Standard of Care**

Not every unintentional act that causes injury is negligent. If you brake to a stop when you see a child dart out in front of your car, and if the noise from your tires gives someone in a nearby house a heart attack, you have not acted negligently toward the person in the house. The purpose of the negligence standard is to protect others against the risk of injury that foreseeably would ensue from unreasonably dangerous conduct.

Given the infinite variety of human circumstances and conduct, no general statement of a reasonable standard of care is possible. Nevertheless, the law has tried to encapsulate it in the form of the famous standard of “the reasonable man.” This fictitious person “of ordinary

prudence” is the model that juries are instructed to compare defendants with in assessing whether those defendants have acted negligently. Analysis of this mythical personage has baffled several generations of commentators. How much knowledge must he have of events in the community, of technology, of cause and effect? With what physical attributes, courage, or wisdom is this nonexistent person supposedly endowed? If the defendant is a person with specialized knowledge, like a doctor or an automobile designer, must the jury also treat the “reasonable man” as having this knowledge, even though the average person in the community will not? (Answer: in most cases, yes.)

Despite the many difficulties, the concept of the reasonable man is one on which most negligence cases ultimately turn. If a defendant has acted “unreasonably under the circumstances” and his conduct posed an unreasonable risk of injury, then he is liable for injury caused by his conduct. Perhaps in most instances, it is not difficult to divine what the reasonable man would do. The reasonable man stops for traffic lights and always drives at reasonable speeds, does not throw baseballs through windows, performs surgical operations according to the average standards of the medical profession, ensures that the floors of his grocery store are kept free of fluids that would cause a patron to slip and fall, takes proper precautions to avoid spillage of oil from his supertanker, and so on. The “reasonable man” standard imposes hindsight on the decisions and actions of people in society; the circumstances of life are such that courts may sometimes impose a standard of due care that many people might not find reasonable

## 2.2 Duty of Care and Its Breach

This is the most complex area of Negligence. What we are examining is conduct. It is the problem of the relations between Individuals, which imposes, upon one a legal obligation for the benefit of the other. It addresses particular conduct in terms of a legal standard of what is required to meet the obligation. “In other words “duty” is a question of whether the defendant is under any obligation for the benefit of the particular plaintiff; and in negligence case the duty is always the same-to conform to the legal standard of reasonable conduct in the light of the apparent risk. What the defendant must do, or must not do, is a question of the standard of conduct required to satisfy the duty”. *Prosser and Keeton on torts*, 5<sup>th</sup> ed. Chapter 9, p. 356 “Limited Duty”. (1984).

The law does not impose on us a duty to care for every person. If the rule were otherwise, we would all, in this interdependent world, be our brothers' keepers, constantly unsure whether any action we took might subject us to liability for its effect on someone else. The law copes with this difficulty by limiting the number of people toward whom we owe a duty to be careful.

In general, the law imposes no obligation to act in a situation to which we are strangers. We may pass the drowning child without risking a lawsuit. But if we do act, then the law requires us to act carefully. The law of negligence requires us to behave with due regard for the foreseeable consequences of our actions in order to avoid unreasonable risks of injury.

During the course of the twentieth century, the courts have constantly expanded the notion of "foreseeability," so that today many more people are held to be within the zone of injury than was once the case. For example, it was once believed that a manufacturer or supplier owed a duty of care only to immediate purchasers, not to others who might use the product or to whom the product might be resold. This limitation was known as the rule of privity. And users who were not immediate purchasers were said not to be in privity with a supplier or manufacturer. In 1916, Judge Benjamin N. Cardozo, then on the New York Court of Appeals, penned an opinion in a celebrated case that exploded the theory of privity, though it would take half a century before the last state—Mississippi in 1966—would fall in line.

Determining a duty of care can be a vexing problem. Physicians, for example, are bound by principles of medical ethics to respect the confidences of their patients. Suppose a patient tells a psychiatrist that he intends to kill his girlfriend. Does the physician then have a higher legal duty to warn prospective victim? The California Supreme Court has said yes. *Tarasoff v. Regents of University of California*, 551 P.2d 334 (Calif. 1976).

Establishing a breach of the duty of due care where the defendant has violated a statute or municipal ordinance is eased considerably with the doctrine of negligence per se, a doctrine common to all US state courts. If a legislative body sets a minimum standard of care for particular kinds of acts to protect a certain set of people from harm and a violation of that

standard causes harm to someone in that set, the defendant is negligent per se. If Harvey is driving sixty-five miles per hour in a fifty-five-mile-per-hour zone when he crashes into Haley's car and the police accident report establishes that or he otherwise admits to going ten miles per hour over the speed limit, Haley does not have to prove that Harvey has breached a duty of due care. She will only have to prove that the speeding was an actual and proximate cause of the collision and will also have to prove the extent of the resulting damages to her.

### 2.3 Causation: Actual Cause and Proximate Cause

"For want of a nail, the kingdom was lost," as the old saying has it. Virtually any cause of an injury can be traced to some preceding cause. The problem for the law is to know when to draw the line between causes that are immediate and causes too remote for liability reasonably to be assigned to them. In tort theory, there are two kinds of causes that a plaintiff must prove: actual cause and proximate cause. Actual cause (causation in fact) can be found if the connection between the defendant's act and the plaintiff's injuries passes the "but for" test: if an injury would not have occurred "but for" the defendant's conduct, then the defendant is the cause of the injury. Still, this is not enough causation to create liability. The injuries to the plaintiff must also be foreseeable, or not "too remote," for the defendant's act to create liability. This is proximate cause: a cause that is not too remote or unforeseeable.

Suppose that the person who was injured was not one whom a reasonable person could have expected to be harmed. Such a situation was presented in one of the most famous US tort cases, *Palsgraf v. Long Island Railroad* (CASES), which was decided by Judge Benjamin Cardozo. Although Judge Cardozo persuaded four of his seven brethren to side with his position, the closeness of the case demonstrates the difficulty that unforeseeable consequences and unforeseeable plaintiffs present.

### 2.4 Damages

For a plaintiff to win a tort case, she must allege and prove that she was injured. The fear that she might be injured in the future is not a sufficient basis for a suit. This rule has proved

troublesome in medical malpractice and industrial disease cases. A doctor's negligent act or a company's negligent exposure of a worker to some form of contamination might not become manifest in the body for years. In the meantime, the tort statute of limitations might have run out, barring the victim from suing at all. An increasing number of courts have eased the plaintiff's predicament by ruling that the statute of limitations does not begin to run until the victim discovers that she has been injured or contracted a disease.

The law allows an exception to the general rule that damages must be shown when the plaintiff stands in danger of immediate injury from a hazardous activity. If you discover your neighbor experimenting with explosives in his basement, you could bring suit to enjoin him from further experimentation, even though he has not yet blown up his house—and yours.

## 2.5 Problems of Proof

The plaintiff in a tort suit, as in any other, has the burden of proving his allegations.

He must show that the defendant took the actions complained of as negligent, demonstrate the circumstances that make the actions negligent, and prove the occurrence and extent of injury. Factual issues are for the jury to resolve. Since it is frequently difficult to make out the requisite proof, the law allows certain presumptions and rules of evidence that ease the plaintiff's task, on the ground that without them substantial injustice would be done. One important rule goes by the Latin phrase *res ipsa loquitur*, meaning "the thing speaks for itself." The best evidence is always the most direct evidence: an eyewitness account of the acts in question. But eyewitnesses are often unavailable, and in any event they frequently cannot testify directly to the reasonableness of someone's conduct, which inevitably can only be inferred from the circumstances.

In many cases, therefore, circumstantial evidence (evidence that is indirect) will be the only evidence or will constitute the bulk of the evidence. Circumstantial evidence can often be quite telling: though no one saw anyone leave the building, muddy footprints tracing a path along the sidewalk are fairly conclusive. *Res ipsa loquitur* is a rule of circumstantial evidence that permits

the jury to draw an inference of negligence. A common statement of the rule is the following: “There must be reasonable evidence of negligence but where the thing is shown to be under the management of the defendant or his servants, and the accident is such as in the ordinary course of things does not happen if those who have the management use proper care, it affords reasonable evidence, in the absence of explanation by the defendants, that the accident arose from want of care.” *Scott v. London & St. Katherine Docks Co.*, 3 H. & C. 596, 159 Eng.Rep. 665 (Q.B. 1865).

If a barrel of flour rolls out of a factory window and hits someone, or a soda bottle explodes, or an airplane crashes, courts in every state permit juries to conclude, in the absence of contrary explanations by the defendants, that there was negligence. The plaintiff is not put to the impossible task of explaining precisely how the accident occurred. A defendant can always offer evidence that he acted reasonably—for example, that the flour barrel was securely fastened and that a bolt of lightning, for which he was not responsible, broke its bands, causing it to roll out the window. But testimony by the factory employees that they secured the barrel, in the absence of any further explanation, will not usually serve to rebut the inference. That the defendant was negligent does not conclude the inquiry or automatically entitle the plaintiff to a judgment. Tort law provides the defendant with several excuses, some of which are discussed briefly in the next section.

## 2.6 Excuses

There are more excuses (defenses) than are listed here, but contributory negligence or comparative negligence, assumption of risk, and act of God are among the principal defenses that will completely or partially excuse the negligence of the defendant.

### 2.6.1 *Contributory and Comparative Negligence*

Under an old common-law rule, it was a complete defense to show that the plaintiff in a negligence suit was himself negligent. Even if the plaintiff was only mildly negligent, most of the fault being chargeable to the defendant, the court would dismiss the suit if the plaintiff's

conduct contributed to his injury. In a few states today, this rule of contributory negligence is still in effect. Although referred to as negligence, the rule encompasses a narrower form than that with which the defendant is charged, because the plaintiff's only error in such cases is in being less careful of himself than he might have been, whereas the defendant is charged with conduct careless toward others. This rule was so manifestly unjust in many cases that most states, either by statute or judicial decision, have changed to some version of comparative negligence. Under the rule of comparative negligence, damages are apportioned according to the defendant's degree of culpability. For example, if the plaintiff has sustained a \$100,000 injury and is 20 percent responsible, the defendant will be liable for \$80,000 in damages.

### 2.6.2 Assumption of Risk

Risk of injury pervades the modern world, and plaintiffs should not win a lawsuit simply because they took a risk and lost. The law provides, therefore, that when a person knowingly takes a risk, he or she must suffer the consequences.

The assumption of risk doctrine comes up in three ways. The plaintiff may have formally agreed with the defendant before entering a risky situation that he will relieve the defendant of liability should injury occur. ("You can borrow my car if you agree not to sue me if the brakes fail, because they're worn and I haven't had a chance to replace them.") Or the plaintiff may have entered into a relationship with the defendant knowing that the defendant is not in a position to protect him from known risks (the fan who is hit by a line drive in a ballpark). Or the plaintiff may act in the face of a risky situation known in advance to have been created by the defendant's negligence (failure to leave, while there was an opportunity to do so, such as getting into an automobile when the driver is known to be drunk).

The difficulty in many cases is to determine the dividing line between subjectivity and objectivity. If the plaintiff had no actual knowledge of the risk, he cannot be held to have assumed it. On the other hand, it is easy to claim that you did not appreciate the danger, and the courts will apply an objective standard of community knowledge (a "but you should have known" test) in many situations. When the plaintiff has no real alternative, however,

assumption of risk fails as a defense (e.g., a landlord who negligently fails to light the exit to the street cannot claim that his tenants assumed the risk of using it).

At the turn of the century, courts applied assumption of risk in industrial cases to bar relief to workers injured on the job. They were said to assume the risk of dangerous conditions or equipment. This rule has been abolished by workers' compensation statutes in most states.

### 2.6.5 Act of God

Technically, the rule that no one is responsible for an "act of God," or *force majeure* as it is sometimes called, is not an excuse but a defense premised on a lack of causation. If a force of nature caused the harm, then the defendant was not negligent in the first place. A marina, obligated to look after boats moored at its dock, is not liable if a sudden and fierce storm against which no precaution was possible destroys someone's vessel. However, if it is foreseeable that harm will flow from a negligent condition triggered by a natural event, then there is liability. For example, a work crew failed to remove residue explosive gas from an oil barge. Lightning hit the barge, exploded the gas, and injured several workmen. The plaintiff recovered damages against the company because the negligence consisted in the failure to guard against any one of a number of chance occurrences that could ignite the gas. *Johnson v. Kosmos Portland Cement Co.*, 64 F.2d 193 (6th Cir. 1933).

### 2.7 Vicarious Liability

Liability for negligent acts does not always end with the one who was negligent. Under certain circumstances, the liability is imputed to others. For example, an employer is responsible for the negligence of his employees if they were acting in the scope of employment. This rule of vicarious liability is often called *respondeat superior*, meaning that the higher authority must respond to claims brought against one of its agents. *Respondeat superior* is not limited to the employment relationship but extends to a number of other agency relationships as well.

Legislatures in many states have enacted laws that make people vicariously liable for acts of certain people with whom they have a relationship, though not necessarily one of agency. It is

common, for example, for the owner of an automobile to be liable for the negligence of one to whom the owner lends the car. So-called dram shop statutes place liability on bar and tavern owners and others who serve too much alcohol to one who, in an intoxicated state, later causes injury to others. In these situations, although the injurious act of the drinker stemmed from negligence, the one whom the law holds vicariously liable (the bartender) is not himself necessarily negligent—the law is holding him *strictly liable*, and to this concept we now turn.

## 7.3 Intentional Torts

### Learning Objectives

1. Distinguish intentional torts from other kinds of torts.
2. Give three examples of an intentional tort—one that causes injury to a person, one that causes injury to property, and one that causes injury to a reputation.

The analysis of most intentional torts is straightforward and parallels the substantive crimes already discussed in [Chapter 6 "Criminal Law"](#). When physical injury or damage to property is caused, there is rarely debate over liability if the plaintiff deliberately undertook to produce the harm. Certain other intentional torts are worth noting for their relevance to business.

### 3.1 Assault and Battery

One of the most obvious intentional torts is assault and battery. Both criminal law and tort law serve to restrain individuals from using physical force on others. Assault is (1) the threat of immediate harm or offense of contact or (2) any act that would arouse reasonable apprehension of imminent harm. Battery is unauthorized and harmful or offensive physical contact with another person that causes injury.

Often an assault results in battery, but not always. In *Western Union Telegraph Co. v. Hill*, for example, the defendant did not touch the plaintiff's wife, but the case presented an issue of possible assault even without an actual battery; the defendant employee attempted to kiss a customer across the countertop, couldn't quite reach her, but nonetheless created actionable fear (or, as the court put it, "apprehension") on the part of the plaintiff's wife. It is also possible

to have a battery without an assault. For example, if someone hits you on the back of the head with an iron skillet and you didn't see it coming, there is a battery but no assault. Likewise, if Andrea passes out from drinking too much at the fraternity party and a stranger (Andre) kisses her on the lips while she is passed out, she would not be aware of any threat of offensive contact and would have no apprehension of any harm. Thus there has been no tort of assault, but she could allege the tort of battery. (The question of what damages, if any, would be an interesting argument.)

Under the doctrine of transferred intent, if Draco aims his wand at Harry but Harry ducks just in time and the impact is felt by Hermione instead, English law (and American law) would transfer Draco's intent from the target to the actual victim of the act. Thus Hermione could sue Draco for battery for any damages she had suffered.

### 3.2 False Imprisonment

The tort of false imprisonment originally implied a locking up, as in a prison, but today it can occur if a person is restrained in a room or a car or even if his or her movements are restricted while walking down the street. People have a right to be free to go as they please, and anyone who without cause deprives another of personal freedom has committed a tort. Damages are allowed for time lost, discomfort and resulting ill health, mental suffering, humiliation, loss of reputation or business, and expenses such as attorneys' fees incurred as a result of the restraint (such as a false arrest). But as the case of *Lester v. Albers Super Markets, Inc.* (see "cases") shows, the defendant must be shown to have restrained the plaintiff in order for damages to be allowed.

### 3.3 Intentional Infliction of Emotional Distress

Until recently, the common-law rule was that there could be no recovery for acts, even though intentionally undertaken, that caused purely mental or emotional distress. For a case to go to the jury, the courts required that the mental distress result from some physical injury. In recent years, many courts have overthrown the older rule and now recognize the so-called new tort. In

an employment context, however, it is rare to find a case where a plaintiff is able to recover. The most difficult hurdle is proving that the conduct was “extreme” or “outrageous.”

In an early California case, bill collectors came to the debtor’s home repeatedly and threatened the debtor’s pregnant wife. Among other things, they claimed that the wife would have to deliver her child in prison. The wife miscarried and had emotional and physical complications. The court found that the behavior of the collection company’s two agents was sufficiently outrageous to prove the tort of intentional infliction of emotional distress. In *Roche v. Stern* (New York), the famous cable television talk show host Howard Stern had tastelessly discussed the remains of Deborah Roche, a topless dancer and cable access television host. *Roche v. Stern*, 675 N.Y.S.2d 133 (1998). The remains had been brought to Stern’s show by a close friend of Roche, Chaunce Hayden, and a number of crude comments by Stern and Hayden about the remains were videotaped and broadcast on a national cable television station. Roche’s sister and brother sued Howard Stern and Infinity broadcasting and were able to get past the defendant’s motion to dismiss to have a jury consider their claim.

A plaintiff’s burden in these cases is to show that the mental distress is severe. Many states require that this distress must result in physical symptoms such as nausea, headaches, ulcers, or, as in the case of the pregnant wife, a miscarriage. Other states have not required physical symptoms, finding that shame, embarrassment, fear, and anger constitute severe mental distress.

### 3.4 Trespass and Nuisance

Trespass is intentionally going on land that belongs to someone else or putting something on someone else’s property and refusing to remove it. This part of tort law shows how strongly the law values the rights of property owners. The right to enjoy your property without interference from others is also found in common law of nuisance. There are limits to property owners’ rights, however. In *Katko v. Briney*, for example, the plaintiff was injured by a spring gun while trespassing on the defendant’s property. *Katko v. Briney*, 183 N.W.2d 657 (Iowa 1971). The defendant had set up No Trespassing signs after ten years of trespassing and housebreaking

events, with the loss of some household items. Windows had been broken, and there was “messing up of the property in general.” The defendants had boarded up the windows and doors in order to stop the intrusions and finally had set up a shotgun trap in the north bedroom of the house. One defendant had cleaned and oiled his 20-gauge shotgun and taken it to the old house where it was secured to an iron bed with the barrel pointed at the bedroom door. “It was rigged with wire from the doorknob to the gun’s trigger so would fire when the door was opened.” The angle of the shotgun was adjusted to hit an intruder in the legs. The spring could not be seen from the outside, and no warning of its presence was posted.

The plaintiff, Katko, had been hunting in the area for several years and considered the property abandoned. He knew it had long been uninhabited. He and a friend had been to the house and found several old bottles and fruit jars that they took and added to their collection of antiques. When they made a second trip to the property, they entered by removing a board from a porch window. When the plaintiff opened the north bedroom door, the shotgun went off and struck him in the right leg above the ankle bone. Much of his leg was blown away. While Katko knew he had no right to break and enter the house with intent to steal bottles and fruit jars, the court held that a property owner could not protect an unoccupied boarded-up farmhouse by using a spring gun capable of inflicting death or serious injury.

In *Katko*, there is an intentional tort. But what if someone trespassing is injured by the negligence of the landowner? States have differing rules about trespass and negligence. In some states, a trespasser is only protected against the gross negligence of the landowner. In other states, trespassers may be owed the duty of due care on the part of the landowner. The burglar who falls into a drained swimming pool, for example, may have a case against the homeowner unless the courts or legislature of that state have made it clear that trespassers are owed the limited duty to avoid gross negligence. Or a very small child may wander off his own property and fall into a gravel pit on a nearby property and suffer death or serious injury; if the pit should (in the exercise of due care) have been filled in or some barrier erected around it, then there was negligence. But if the state law holds that the duty to trespassers is only to avoid gross negligence, the child’s family would lose, unless the state law makes an exception

for very young trespassers. In general, guests, licensees, and invitees are owed a duty of due care; a trespasser may not be owed such a duty, but states have different rules on this.

### 3.5 Intentional Interference with Contractual Relations

Tortious interference with a contract can be established by proving four elements:

1. There was a contract between the plaintiff and a third party.
2. The defendant knew of the contract.
3. The defendant improperly induced the third party to breach the contract or made performance of the contract impossible.
4. There was injury to the plaintiff.

In a famous case of contract interference, Texaco was sued by Pennzoil for interfering with an agreement that Pennzoil had with Getty Oil. After complicated negotiations between Pennzoil and Getty, a takeover share price was struck, a memorandum of understanding was signed, and a press release announced the agreement in principle between Pennzoil and Getty. Texaco's lawyers, however, believed that Getty oil was "still in play," and before the lawyers for Pennzoil and Getty could complete the paperwork for their agreement, Texaco announced it was offering Getty shareholders an additional \$12.50 per share over what Pennzoil had offered.

Texaco later increased its offer to \$228 per share, and the Getty board of directors soon began dealing with Texaco instead of Pennzoil. Pennzoil decided to sue in Texas state court for tortious interference with a contract. After a long trial, the jury returned an enormous verdict against Texaco: \$7.53 billion in actual damages and \$3 billion in punitive damages. The verdict was so large that it would have bankrupted Texaco. Appeals from the verdict centered on an obscure rule of the Securities and Exchange Commission (SEC), Rule 10(b)-13, and Texaco's argument was based on that rule and the fact that the contract had not been completed. If there was no contract, Texaco could not have legally interfered with one. After the SEC filed a brief that supported Texaco's interpretation of the law, Texaco agreed to pay \$3 billion to Pennzoil to dismiss its claim of tortious interference with a contract.

### 3.6 Malicious Prosecution

Malicious prosecution is the tort of causing someone to be prosecuted for a criminal act, knowing that there was no probable cause to believe that the plaintiff committed the crime. The plaintiff must show that the defendant acted with malice or with some purpose other than bringing the guilty to justice. A mere complaint to the authorities is insufficient to establish the tort, but any official proceeding will support the claim—for example, a warrant for the plaintiff's arrest. The criminal proceeding must terminate in the plaintiff's favor in order for his suit to be sustained.

A majority of US courts, though by no means all, permit a suit for wrongful civil proceedings. Civil litigation is usually costly and burdensome, and one who forces another to defend himself against baseless accusations should not be permitted to saddle the one he sues with the costs of defense. However, because, as a matter of public policy, litigation is favored as the means by which legal rights can be vindicated—indeed, the Supreme Court has even ruled that individuals have a constitutional right to litigate—the plaintiff must meet a heavy burden in proving his case. The mere dismissal of the original lawsuit against the plaintiff is not sufficient proof that the suit was unwarranted. The plaintiff in a suit for wrongful civil proceedings must show that the defendant (who was the plaintiff in the original suit) filed the action for an improper purpose and had no reasonable belief that his cause was legally or factually well grounded.

### 3.7 Defamation

Defamation is injury to a person's good name or reputation. In general, if the harm is done through the spoken word—one person to another, by telephone, by radio, or on television—it is called slander. If the defamatory statement is published in written form, it is called libel.

The Restatement (Second) of Torts defines a defamatory communication as one that “so tends to harm the reputation of another as to lower him in the estimation of the community or to deter third persons from associating or dealing with him.” Restatement (Second) of Torts, Section 559 (1965).

A statement is not defamatory unless it is false. Truth is an absolute defense to a charge of libel or slander. Moreover, the statement must be “published”—that is, communicated to a third person. You cannot be libeled by one who sends you a letter full of false accusations and scurrilous statements about you unless a third person opens it first (your roommate, perhaps). Any living person is capable of being defamed, but the dead are not. Corporations, partnerships, and other forms of associations can also be defamed, if the statements tend to injure their ability to do business or to garner contributions.

The statement must have reference to a particular person, but he or she need not be identified by name. A statement that “the company president is a crook” is defamatory, as is a statement that “the major network weathermen are imposters.” The company president and the network weathermen could show that the words were aimed at them. But statements about large groups will not support an action for defamation (e.g., “all doctors are butchers” is not defamatory of any particular doctor).

The law of defamation is largely built on strict liability. That a person did not intend to defame is ordinarily no excuse; a typographical error that converts a true statement into a false one in a newspaper, magazine, or corporate brochure can be sufficient to make out a case of libel. Even the exercise of due care is usually no excuse if the statement is in fact communicated.

Repeating a libel is itself a libel; a libel cannot be justified by showing that you were quoting someone else. Though a plaintiff may be able to prove that a statement was defamatory, he is not necessarily entitled to an award of damages. That is because the law contains a number of privileges that excuse the defamation.

Publishing false information about another business’s product constitutes the tort of slander of quality, or trade libel. In some states, this is known as the tort of product disparagement. It may be difficult to establish damages, however. A plaintiff must prove that actual damages proximately resulted from the slander of quality and must show the extent of the economic harm as well.

### 3.7.1 Absolute Privilege

Statements made during the course of judicial proceedings are absolutely privileged, meaning that they cannot serve as the basis for a defamation suit. Accurate accounts of judicial or other proceedings are absolutely privileged; a newspaper, for example, may pass on the slanderous comments of a judge in court. "Judicial" is broadly construed to include most proceedings of administrative bodies of the government. The Constitution exempts members of Congress from suits for libel or slander for any statements made in connection with legislative business. The courts have constructed a similar privilege for many executive branch officials.

### 3.7.2 Qualified Privilege

Absolute privileges pertain to those in the public sector. A narrower privilege exists for private citizens. In general, a statement that would otherwise be actionable is held to be justified if made in a reasonable manner and for a reasonable purpose. Thus you may warn a friend to beware of dealing with a third person, and if you had reason to believe that what you said was true, you are privileged to issue the warning, even though false. Likewise, an employee may warn an employer about the conduct or character of a fellow or prospective employee, and a parent may complain to a school board about the competence or conduct of a child's teacher. There is a line to be drawn, however, and a defendant with nothing but an idle interest in the matter (an "officious intermeddler") must take the risk that his information is wrong.

In 1964, the Supreme Court handed down its historic decision in *New York Times v. Sullivan*, holding that under the First Amendment a libel judgment brought by a public official against a newspaper cannot stand unless the plaintiff has shown "actual malice," which in turn was defined as "knowledge that [the statement] was false or with a reckless disregard of whether it was false or not." *Times v. Sullivan*, 376 US 254 (1964). In subsequent cases, the court extended the constitutional doctrine further, applying it not merely to government officials but to public figures, people who voluntarily place themselves in the public eye or who involuntarily find themselves the objects of public scrutiny. Whether a private person is or is not a public figure is a difficult question that has so far eluded rigorous definition and has been answered only from

case to case. A CEO of a private corporation ordinarily will be considered a private figure unless he puts himself in the public eye—for example, by starring in the company’s television commercials.

### 3.8 Invasion of Privacy

The right of privacy—the right “to be let alone”—did not receive judicial recognition until the twentieth century, and its legal formulation is still evolving. In fact there is no single right of privacy. Courts and commentators have discerned at least four different types of interests: (1) the right to control the appropriation of your name and picture for commercial purposes, (2) the right to be free of intrusion on your “personal space” or seclusion, (3) freedom from public disclosure of embarrassing and intimate facts of your personal life, and (4) the right not to be presented in a “false light.”

#### *3.8.1 Appropriation of Name or Likeness*

The earliest privacy interest recognized by the courts was appropriation of name or likeness: someone else placing your photograph on a billboard or cereal box as a model or using your name as endorsing a product or in the product name. A New York statute makes it a misdemeanor to use the name, portrait, or picture of any person for advertising purposes or for the purposes of trade (business) without first obtaining written consent. The law also permits the aggrieved person to sue and to recover damages for unauthorized profits and also to have the court enjoin (judicially block) any further unauthorized use of the plaintiff’s name, likeness, or image. This is particularly useful to celebrities.

Because the publishing and advertising industries are concentrated heavily in New York, the statute plays an important part in advertising decisions made throughout the country. Deciding what “commercial” or “trade” purposes are is not always easy. Thus a newsmagazine may use a

baseball player's picture on its cover without first obtaining written permission, but a chocolate manufacturer could not put the player's picture on a candy wrapper without consent.

### *3.8.2 Personal Space*

One form of intrusion upon a person's solitude—trespass—has long been actionable under common law. Physical invasion of home or other property is not a new tort. But in recent years, the notion of intrusion has been broadened considerably. Now, taking photos of someone else with your cell phone in a locker room could constitute invasion of the right to privacy. Reading someone else's mail or e-mail could also constitute an invasion of the right to privacy. Photographing someone on a city street is not tortious, but subsequent use of the photograph could be. Whether the invasion is in a public or private space, the amount of damages will depend on how the image or information is disclosed to others.

### *3.8.3 Public Disclosure of Embarrassing Facts*

Circulation of false statements that do injury to a person are actionable under the laws of defamation. What about true statements that might be every bit as damaging—for example, disclosure of someone's income tax return, revealing how much he earned? The general rule is that if the facts are truly private and of no "legitimate" concern to the public, then their disclosure is a violation of the right to privacy. But a person who is in the public eye cannot claim the same protection.

### *3.8.4 False Light*

A final type of privacy invasion is that which paints a false picture in a publication. Though false, it might not be libelous, since the publication need contain nothing injurious to reputation. Indeed, the publication might even glorify the plaintiff, making him seem more heroic than he actually is. Subject to the First Amendment requirement that the plaintiff must show intent or extreme recklessness, statements that put a person in a false light, like a fictionalized biography, are actionable.

## 7.4 Strict Liability

### 4.1 Historical Basis of Strict Liability: Animals and Ultrahazardous Activities

To this point, we have considered principles of liability that in some sense depend upon the “fault” of the tortfeasor. This fault is not synonymous with moral blame.

Aside from acts intended to harm, the fault lies in a failure to live up to a standard of reasonableness or due care. But this is not the only basis for tort liability. Innocent mistakes can be a sufficient basis. As we have already seen, someone who unknowingly trespasses on another’s property is liable for the damage that he does, even if he has a reasonable belief that the land is his. And it has long been held that someone who engages in ultrahazardous (or sometimes, abnormally dangerous) activities is liable for damage that he causes, even though he has taken every possible precaution to avoid harm to someone else.

Likewise, the owner of animals that escape from their pastures or homes and damage neighboring property may be liable, even if the reason for their escape was beyond the power of the owner to stop (e.g., a fire started by lightning that burns open a barn door). In such cases, the courts invoke the principle of strict liability, or, as it is sometimes called, liability without fault. The reason for the rule is explained in *Klein v. Pyrodyne Corporation* (see “cases”).

### 4.2 Strict Liability for Products

Because of the importance of products liability, this text devotes an entire chapter to it. Strict liability may also apply as a legal standard for products, even those that are not ultrahazardous. In some national legal systems, strict liability is not available as a cause of action to plaintiffs seeking to recover a judgment of products liability against a manufacturer, wholesaler, distributor, or retailer. (Some states limit liability to the manufacturer.) But it is available in the United States and initially was created by a California Supreme Court decision in the 1962 case of *Greenman v. Yuba Power Products, Inc.*

In *Greenman*, the plaintiff had used a home power saw and bench, the Shopsmith, designed and manufactured by the defendant. He was experienced in using power tools and was injured while using the approved lathe attachment to the Shopsmith to fashion a wooden chalice. The case was decided on the premise that Greenman had done nothing wrong in using the machine but that the machine had a defect that was “latent” (not easily discoverable by the consumer). Rather than decide the case based on warranties, or requiring that Greenman prove how the defendant had been negligent, Justice Traynor found for the plaintiff based on the overall social utility of strict liability in cases of defective products. According to his decision, the purpose of such liability is to ensure that the “cost of injuries resulting from defective products is borne by the manufacturers...rather than by the injured persons who are powerless to protect themselves.”

Today, the majority of US states recognize strict liability for defective products, although some states limit strict liability actions to damages for personal injuries rather than property damage. Injured plaintiffs have to prove the product caused the harm but do not have to prove exactly how the manufacturer was careless. Purchasers of the product, as well as injured guests, bystanders, and others with no direct relationship with the product, may sue for damages caused by the product.

The Restatement of the Law of Torts, Section 402(a), was originally issued in 1964. It is a widely accepted statement of the liabilities of sellers of goods for defective products. The Restatement specifies six requirements, all of which must be met for a plaintiff to recover using strict liability for a product that the plaintiff claims is defective:

1. The product must be in a defective condition when the defendant sells it.
2. The defendant must normally be engaged in the business of selling or otherwise distributing the product.
3. The product must be unreasonably dangerous to the user or consumer because of its defective condition.

4. The plaintiff must incur physical harm to self or to property by using or consuming the product.
5. The defective condition must be the proximate cause of the injury or damage.
6. The goods must not have been substantially changed from the time the product was sold to the time the injury was sustained.

Section 402(a) also explicitly makes clear that a defendant can be held liable even though the defendant has exercised “all possible care.” Thus in a strict liability case, the plaintiff does not need to show “fault” (or negligence).

For defendants, who can include manufacturers, distributors, processors, assemblers, packagers, bottlers, retailers, and wholesalers, there are a number of defenses that are available, including assumption of risk, product misuse and comparative negligence, commonly known dangers, and the knowledgeable-user defense. We have already seen assumption of risk and comparative negligence in terms of negligence actions; the application of these is similar in products-liability actions.

Under product misuse, a plaintiff who uses a product in an unexpected and unusual way will not recover for injuries caused by such misuse. For example, suppose that someone uses a rotary lawn mower to trim a hedge and that after twenty minutes of such use loses control because of its weight and suffers serious cuts to his abdomen after dropping it. Here, there would be a defense of product misuse, as well as contributory negligence. Consider the urban (or Internet) legend of Mervin Gratz, who supposedly put his Winnebago on autopilot to go back and make coffee in the kitchen, then recovered millions after his Winnebago turned over and he suffered serious injuries. There are multiple defenses to this alleged action; these would include the defenses of contributory negligence, comparative negligence, and product misuse. (There was never any such case, and certainly no such recovery; it is not known who started this legend, or why.)

Another defense against strict liability as a cause of action is the knowledgeable user defense. If the parents of obese teenagers bring a lawsuit against McDonald's, claiming that its fast-food products are defective and that McDonald's should have warned customers of the adverse health effects of eating its products, a defense based on the knowledgeable user is available. In one case, the court found that the high levels of cholesterol, fat, salt, and sugar in McDonald's food is well known to users. The court stated, "If consumers know (or reasonably should know) the potential ill health effects of eating at McDonald's, they cannot blame McDonald's if they, nonetheless, choose to satiate their appetite with a surfeit of supersized McDonald's products." *Pellman v. McDonald's Corp.*, 237 F.2d 512 (S.D.N.Y. 2003).

#### CHAPTER CASES:

##### Negligence: Proximate Cause

- ***Palsgraf v. Long Island R.R.***
- 248 N.Y. 339, 162 N.E. 99 (N.Y. 1928)
- CARDOZO, Chief Judge
- Plaintiff was standing on a platform of defendant's railroad after buying a ticket to go to Rockaway Beach. A train stopped at the station, bound for another place. Two men ran forward to catch it. One of the men reached the platform of the car without mishap, though the train was already moving. The other man, carrying a package, jumped aboard the car, but seemed unsteady as if about to fall. A guard on the car, who had held the door open, reached forward to help him in, and another guard on the platform pushed him from behind. In this act, the package was dislodged, and fell upon the rails. It was a package of small size, about fifteen inches long, and was covered by a newspaper. In fact it contained fireworks, but there was nothing in its appearance to give notice of its contents. The fireworks when they fell exploded. The shock of the explosion threw down some scales at the other end of the platform many feet away. The scales struck the plaintiff, causing injuries for which she sues.

- The conduct of the defendant's guard, if a wrong in its relation to the holder of the package, was not a wrong in its relation to the plaintiff, standing far away. Relatively to her it was not negligence at all. Nothing in the situation gave notice that the falling package had in it the potency of peril to persons thus removed. Negligence is not actionable unless it involves the invasion of a legally protected interest, the violation of a right. "Proof of negligence in the air, so to speak, will not do....If no hazard was apparent to the eye of ordinary vigilance, an act innocent and harmless, at least to outward seeming, with reference to her, did not take to itself the quality of a tort because it happened to be a wrong, though apparently not one involving the risk of bodily insecurity, with reference to someone else....The plaintiff sues in her own right for a wrong personal to her, and not as the vicarious beneficiary of a breach of duty to another.
- A different conclusion will involve us, and swiftly too, in a maze of contradictions. A guard stumbles over a package which has been left upon a platform.
- It seems to be a bundle of newspapers. It turns out to be a can of dynamite. To the eye of ordinary vigilance, the bundle is abandoned waste, which may be kicked or trod on with impunity. Is a passenger at the other end of the platform protected by the law against the unsuspected hazard concealed beneath the waste? If not, is the result to be any different, so far as the distant passenger is concerned, when the guard stumbles over a valise which a truckman or a porter has left upon the walk?...The orbit of the danger as disclosed to the eye of reasonable vigilance would be the orbit of the duty. One who jostles one's neighbor in a crowd does not invade the rights of others standing at the outer fringe when the unintended contact casts a bomb upon the ground. The wrongdoer as to them is the man who carries the bomb, not the one who explodes it without suspicion of the danger. Life will have to be made over, and human nature transformed, before prevision so extravagant can be accepted as the norm of conduct, the customary standard to which behavior must conform.
- The argument for the plaintiff is built upon the shifting meanings of such words as "wrong" and "wrongful" and shares their instability. For what the plaintiff must show is

a “wrong” to herself; i.e., a violation of her own right, and not merely a “wrong” to someone else, nor conduct “wrongful” because unsocial, but not a “wrong” to anyone. We are told that one who drives at reckless speed through a crowded city street is guilty of a negligent act and therefore of a wrongful one, irrespective of the consequences.

- Negligent the act is, and wrongful in the sense that it is unsocial, but wrongful and unsocial in relation to other travelers, only because the eye of vigilance perceives the risk of damage. If the same act were to be committed on a speedway or a race course, it would lose its wrongful quality. The risk reasonably to be perceived defines the duty to be obeyed, and risk imports relation; it is risk to another or to others within the range of apprehension. This does not mean, of course, that one who launches a destructive force is always relieved of liability, if the force, though known to be destructive, pursues an unexpected path....Some acts, such as shooting are so imminently dangerous to anyone who may come within reach of the missile however unexpectedly, as to impose a duty of prevision not far from that of an insurer. Even today, and much oftener in earlier stages of the law, one acts sometimes at one’s peril....These cases aside, wrong-is defined in terms of the natural or probable, at least when unintentional....Negligence, like risk, is thus a term of relation.
- Negligence in the abstract, apart from things related, is surely not a tort, if indeed it is understandable at all....One who seeks redress at law does not make out a cause of action by showing without more that there has been damage to his person. If the harm was not willful, he must show that the act as to him had possibilities of danger so many and apparent as to entitle him to be protected against the doing of it though the harm was unintended.
- \* \*
- The judgment of the Appellate Division and that of the Trial Term should be reversed, and the complaint dismissed, with costs in all courts.
- **Case Questions**
- Is there actual cause in this case? How can you tell?

- Why should Mrs. Palsgraf (or her insurance company) be made to pay for injuries that were caused by the negligence of the Long Island Rail Road?
- How is this accident *not* foreseeable?

### **Negligence: Duty of Due Care**

**Tarasoff v. Regents of the University of California, 17 Cal. 3d 425, 551 P.2d 334 (1976)**

## **7.6 Products Liability (Hardbound chapter 20)**

### **Learning Objectives**

After reading this chapter, you should understand the following:

1. How products-liability law allocates the costs of a consumer society
2. How warranty theory works in products liability, and what its limitations are
3. How negligence theory works, and what its problems are
4. How strict liability theory works, and what its limitations are
5. What efforts are made to reform products-liability law, and why

### **7.7.1 Introduction: Why Products-Liability Law Is Important**

### **Learning Objectives**

1. Understand why products-liability law underwent a revolution in the twentieth century.
2. Recognize that courts play a vital role in policing the free enterprise system by adjudicating how the true costs of modern consumer culture are allocated.
3. Know the names of the modern causes of action for products-liability cases.

In previous chapters, we discussed remedies generally. In this chapter, we focus specifically on remedies available when a defective product causes personal injury or other damages. Products liability describes a type of claim, not a separate theory of liability. Products liability has strong emotional overtones—ranging from the pro-litigation position of consumer advocates to the conservative perspective of the manufacturers.

### 7.7.2 History of Products-Liability Law

The theory of *caveat emptor*—let the buyer beware—that pretty much governed consumer law from the early eighteenth century until the early twentieth century made some sense. A horse-drawn buggy is a fairly simple device: its workings are apparent; a person of average experience in the 1870s would know whether it was constructed well and made of the proper woods. Most foodstuffs 150 years ago were grown at home and “put up” in the home kitchen or bought in bulk from a local grocer, subject to inspection and sampling; people made home remedies for coughs and colds and made many of their own clothes. Houses and furnishings were built of wood, stone, glass, and plaster—familiar substances. Entertainment was a book or a piano. The state of technology was such that the things consumed were, for the most part, comprehensible and—very important—mostly locally made, which meant that the consumer who suffered damages from a defective product could confront the product’s maker directly. Local reputation is a powerful influence on behavior.

The free enterprise system confers great benefits, and no one can deny that: materialistically, compare the image sketched in the previous paragraph with circumstances today. But those benefits come with a cost, and the fundamental political issue always is who has to pay. Consider the following famous passage from Upton Sinclair’s great novel *The Jungle*. It appeared in 1906. He wrote it to inspire labor reform; to his dismay, the public outrage focused instead on consumer protection reform. Here is his description of the sausage-making process in a big Chicago meatpacking plant:

There was never the least attention paid to what was cut up for sausage; there would come all the way back from Europe old sausage that had been rejected, and that was moldy and white—it would be dosed with borax and glycerin, and dumped into the hoppers, and made over again for home consumption. There would be meat that had tumbled out on the floor, in the dirt and sawdust, where the workers had tramped and spit uncounted billions of consumption germs. There would be meat stored in great piles in rooms; and the water from leaky roofs would drip over it, and thousands of rats would race about on it. It was too dark in these storage places to

see well, but a man could run his hand over these piles of meat and sweep off handfuls of the dried dung of rats. These rats were nuisances, and the packers would put poisoned bread out for them; they would die, and then rats, bread, and meat would go into the hoppers together. This is no fairy story and no joke; the meat would be shoveled into carts, and the man who did the shoveling would not trouble to lift out a rat even when he saw one—there were things that went into the sausage in comparison with which a poisoned rat was a tidbit. There was no place for the men to wash their hands before they ate their dinner, and so they made a practice of washing them in the water that was to be ladled into the sausage. There were the butt-ends of smoked meat, and the scraps of corned beef, and all the odds and ends of the waste of the plants, that would be dumped into old barrels in the cellar and left there.

Under the system of rigid economy which the packers enforced, there were some jobs that it only paid to do once in a long time, and among these was the cleaning out of the waste barrels. Every spring they did it; and in the barrels would be dirt and rust and old nails and stale water—and cartload after cartload of it would be taken up and dumped into the hoppers with fresh meat, and sent out to the public's breakfast. Some of it they would make into "smoked" sausage—but as the smoking took time, and was therefore expensive, they would call upon their chemistry department, and preserve it with borax and color it with gelatin to make it brown. All of their sausage came out of the same bowl, but when they came to wrap it they would stamp some of it "special," and for this they would charge two cents more a pound. Upton Sinclair, *The Jungle* (New York: Signet Classic, 1963), 136.

It became clear from Sinclair's exposé that associated with the marvels of then-modern meatpacking and distribution methods was food poisoning: a true cost became apparent. When the true cost of some money-making enterprise (e.g., cigarettes) becomes inescapably apparent, there are two possibilities. First, the legislature can in some way mandate that the manufacturer itself pay the cost; with the meatpacking plants, that would be the imposition of sanitary food-processing standards. Typically, Congress creates an administrative agency and gives the agency some marching orders, and then the agency crafts regulations dictating as many industry-wide reform measures as are politically possible. Second, the people who incur

damages from the product (1) suffer and die or (2) access the machinery of the legal system and sue the manufacturer. If plaintiffs win enough lawsuits, the manufacturer's insurance company raises rates, forcing reform (as with high-powered muscle cars in the 1970s); the business goes bankrupt; or the legislature is pressured to act, either for the consumer or for the manufacturer.

If the industry has enough clout to blunt—by various means—a robust proconsumer legislative response so that government regulation is too lax to prevent harm, recourse is had through the legal system. Thus for all the talk about the need for tort reform (discussed later in this chapter), the courts play a vital role in policing the free enterprise system by adjudicating how the true costs of modern consumer culture are allocated.

Obviously the situation has improved enormously in a century, but one does not have to look very far to find terrible problems today. Consider the following, which occurred in 2009–10:

- In the United States, Toyota recalled 412,000 passenger cars, mostly the Avalon model, for steering problems that reportedly led to three accidents.
- Portable baby recliners that are supposed to help fussy babies sleep better were recalled after the death of an infant: the Consumer Product Safety Commission announced the recall of 30,000 Nap Nanny recliners made by Baby Matters of Berwyn, Pennsylvania.
- More than 70,000 children and teens go to the emergency room each year for injuries and complications from medical devices. Contact lenses are the leading culprit, the first detailed national estimate suggests.
- Smith and Noble recalled 1.3 million Roman shades and roller shades after a child was nearly strangled: the Consumer Product Safety Commission says a five-year-old boy in Tacoma, Washington, was entangled in the cord of a roller shade in May 2009. FindLaw, AP reports.
- The Consumer Product Safety Commission reported that 4,521 people were killed in the United States in consumer-product-related incidences in 2009, and millions of people

visited hospital emergency rooms from consumer-product-related injuries. US Consumer Product Safety Commission, *2009 Report to the President and the Congress*, accessed March 1, 2011, [https://www.cpsc.gov/s3fs-public/2009rpt\\_0.pdf](https://www.cpsc.gov/s3fs-public/2009rpt_0.pdf).

- Reports about the possibility that cell-phone use causes brain cancer continue to be hotly debated. Critics suggest that the studies minimizing the risk were paid for by cell-phone manufacturers. Matt Hamblen, "New Study Warns of Cell Phone Dangers," *Computerworld US*, August 9, 2009, accessed March 1, 2011, <http://news.techworld.com/personal-tech/3200539/new-study-warns-of-cell-phone-dangers>.

Products liability can also be a life-or-death matter from the manufacturer's perspective. In 2009, Bloomberg BusinessWeek reported that the costs of product safety for manufacturing firms can be enormous: "Peanut Corp., based in Lynchburg, Va., has been driven into bankruptcy since health officials linked tainted peanuts to more than 600 illnesses and nine deaths. Mattel said the first of several toy recalls it announced in 2007 cut its quarterly operating income by \$30 million. Earlier this decade, Ford Motor spent roughly \$3 billion replacing 10.6 million potentially defective Firestone tires." Michael Orey, "Taking on Toy Safety," *BusinessWeek*, March 6, 2009, accessed March 1, 2011, <https://www.bloomberg.com/news/articles/2009-03-06/taking-on-toy-safetybusinessweek-business-news-stock-market-and-financial-advice>. Businesses complain, with good reason, about the expenses associated with products-liability problems.

### 7.7.3 Current State of the Law

Although the debate has been heated and at times simplistic, the problem of products liability is complex and most of us regard it with a high degree of ambivalence. We are all consumers, after all, who profit greatly from living in an industrial society. In this chapter, we examine the legal theories that underlie products-liability cases that developed rapidly in the twentieth century to address the problems of product-caused damages and injuries in an industrial society.

In the typical products-liability case, three legal theories are asserted—a contract theory and two tort theories. The contract theory is warranty, governed by the UCC, and the two tort theories are negligence and strict products liability, governed by the common law.

## **7.8 Warranties**

### **7.8.1 Types of Warranties**

#### **Express Warranties**

An express warranty is created whenever the seller affirms that the product will perform in a certain manner. Formal words such as “warrant” or “guarantee” are not necessary. A seller may create an express warranty as part of the basis for the bargain of sale by means of (1) an affirmation of a fact or promise relating to the goods, (2) a description of the goods, or (3) a sample or model. Any of these will create an express warranty that the goods will conform to the fact, promise, description, sample, or model. Thus a seller who states that “the use of rustproof linings in the cans would prevent discoloration and adulteration of the Perform solution” has given an express warranty, whether he realized it or not. *Rhodes Pharmacal Co. v. Continental Can Co.*, 219 N.E.2d 726 (Ill. 1976). Claims of breach of express warranty are, at base, claims of misrepresentation.

But the courts will not hold a manufacturer to every statement that could conceivably be interpreted to be an express warranty. Manufacturers and sellers constantly “puff” their products, and the law is content to let them inhabit that gray area without having to make good on every claim. UCC 2-313(2) says that “an affirmation merely of the value of the goods or a statement purporting to be merely the seller’s opinion or commendation of the goods does not create a warranty.” Facts do.

It is not always easy, however, to determine the line between an express warranty and a piece of puffery. A salesperson who says that a strawberry huller is “great” has probably puffed, not warranted, when it turns out that strawberries run through the huller look like victims of a massacre. But consider the classic cases of the defective used car and the faulty bull. In the former, the salesperson said the car was in “A-1 shape” and “mechanically perfect.” In the latter, the seller said not only that the bull calf would “put the buyer on the map” but that “his father was the greatest living dairy bull.” The car, carrying the buyer’s seven-month-old child, broke down while the buyer was en route to visit her husband in the army during World War II. The court said that the salesperson had made an express warranty. *Wat Henry Pontiac Co. v. Bradley*, 210 P.2d 348 (Okla. 1949). The bull calf turned out to be sterile, putting the farmer on the judicial rather than the dairy map. The court said the seller’s spiel was trade talk, not a warranty that the bull would impregnate cows. *Frederickson v. Hackney*, 198 N.W. 806 (Minn. 1924).

Is there any qualitative difference between these decisions, other than the quarter century that separates them and the different courts that rendered them? Perhaps the most that can be said is that the more specific and measurable the statement’s standards, the more likely it is that a court will hold the seller to a warranty, and that a written statement is easier to construe as a warranty than an oral one. It is also possible that courts look, if only subliminally, at how reasonable the buyer was in relying on the statement, although this ought not to be a strict test. A buyer may be unreasonable in expecting a car to get 100 miles to the gallon, but if that is what the seller promised, that ought to be an enforceable warranty.

### **Implied Warranties**

Express warranties are those over which the parties dickered—or could have. Express warranties go to the essence of the bargain. An implied warranty, by contrast, is one that circumstances alone, not specific language, compel reading into the sale. In short, an implied warranty is one created by law, acting from an impulse of common sense.

## **Implied Warranty of Merchantability**

Section 2-314 of the UCC lays down the fundamental rule that goods carry an implied warranty of merchantability if sold by a merchant-seller. What is merchantability? Section 2-314(2) of the UCC says that merchantable goods are those that conform at least to the following six characteristics:

1. Pass without objection in the trade under the contract description
2. In the case of fungible goods, are of fair average quality within the description
3. Are fit for the ordinary purposes for which such goods are used
4. Run, within the variations permitted by the agreement, of even kind, quality, and quantity within each unit and among all units involved
5. Are adequately contained, packaged, and labeled as the agreement may require
6. Conform to the promise or affirmations of fact made on the container or label if any

For the purposes of Section 2-314(2)(c) of the UCC, selling and serving food or drink for consumption on or off the premises is a sale subject to the implied warranty of merchantability—the food must be “fit for the ordinary purposes” to which it is put. The problem is common: you bite into a cherry pit in the cherry-vanilla ice cream, or you choke on the clam shells in the chowder. Is such food fit for the ordinary purposes to which it is put? There are two schools of thought. One asks whether the food was natural as prepared. This view adopts the seller’s perspective. The other asks what the consumer’s reasonable expectation was.

The first test is sometimes said to be the “natural-foreign” test. If the substance in the soup is natural to the substance—as bones are to fish—then the food is fit for consumption. The second test, relying on reasonable expectations, tends to be the more commonly used test.

## **Fitness for a Particular Purpose**

Section 2-315 of the UCC creates another implied warranty. Whenever a seller, at the time she contracts to make a sale, knows or has reason to know that the buyer is relying on the seller's skill or judgment to select a product that is suitable for the particular purpose the buyer has in mind for the goods to be sold, there is an implied warranty that the goods are fit for that purpose. For example, you go to a hardware store and tell the salesclerk that you need a paint that will dry overnight because you are painting your front door and a rainstorm is predicted for the next day. The clerk gives you a slow-drying oil-based paint that takes two days to dry. The store has breached an implied warranty of fitness for particular purpose.

Note the distinction between "particular" and "ordinary" purposes. Paint is made to color and when dry to protect a surface. That is its ordinary purpose, and had you said only that you wished to buy paint, no implied warranty of fitness would have been breached. It is only because you had a particular purpose in mind that the implied warranty arose. Suppose you had found a can of paint in a general store and told the same tale, but the proprietor had said, "I don't know enough about that paint to tell you anything beyond what's on the label; help yourself." Not every seller has the requisite degree of skill and knowledge about every product he sells to give rise to an implied warranty. Ultimately, each case turns on its particular circumstances:

### **Other Warranties**

Article 2 contains other warranty provisions, though these are not related specifically to products liability. Thus, under UCC, Section 2-312, unless explicitly excluded, the seller warrants he is conveying *good title* that is rightfully his and that the goods are transferred free of any security interest or other lien or encumbrance. In some cases (e.g., a police auction of bicycles picked up around campus and never claimed), the buyer should know that the seller does not claim title in himself, nor that title will necessarily be good against a third party, and so subsection (2) excludes warranties in these circumstances. But the circumstances must be so obvious that no reasonable person would suppose otherwise.

In *Menzel v. List*, an art gallery sold a painting by Marc Chagall that it purchased in Paris. *Menzel v. List*, 246 N.E.2d 742 (N.Y. 1969). The painting had been stolen by the Germans when the original owner was forced to flee Belgium in the 1930s. Now in the United States, the original owner discovered that a new owner had the painting and successfully sued for its return. The customer then sued the gallery, claiming that it had breached the implied warranty of title when it sold the painting. The court agreed and awarded damages equal to the appreciated value of the painting. A good-faith purchaser who must surrender stolen goods to their true owner has a claim for breach of the implied warranty of title against the person from whom he bought the goods.

A second implied warranty, related to title, is that the merchant-seller warrants the goods are *free of any rightful claim by a third person* that the seller has infringed his rights (e.g., that a gallery has not infringed a copyright by selling a reproduction). This provision only applies to a seller who regularly deals in goods of the kind in question. If you find an old print in your grandmother's attic, you do not warrant when you sell it to a neighbor that it is free of any valid infringement claims.

A third implied warranty in this context involves the course of dealing or usage of trade. Section 2-314(3) of the UCC says that unless modified or excluded implied warranties may arise from a course of dealing or usage of trade. If a certain way of doing business is understood, it is not necessary for the seller to state explicitly that he will abide by the custom; it will be implied. A typical example is the obligation of a dog dealer to provide pedigree papers to prove the dog's lineage conforms to the contract.

## 7.9 Problems with Warranty Theory

### In General

It may seem that a person asserting a claim for breach of warranty will have a good chance of success under an express warranty or implied warranty theory of merchantability or fitness for a particular purpose. In practice, though, claimants are in many cases denied recovery. Here are four general problems:

- The claimant must prove that there was a sale.
- The sale was of goods rather than real estate or services.
- The action must be brought within the four-year statute of limitations under Article 2-725, when the tender of delivery is made, not when the plaintiff discovers the defect.
- Under UCC, Section 2-607(3)(a) and Section 2A-516(3)(a), which covers leases, the claimant who fails to give notice of breach within a reasonable time of having accepted the goods will see the suit dismissed, and few consumers know enough to do so, except when making a complaint about a purchase of spoiled milk or about paint that wouldn't dry.

In addition to these general problems, the claimant faces additional difficulties stemming directly from warranty theory, which we take up later in this chapter.

### **Exclusion or Modification of Warranties**

The UCC permits sellers to exclude or disclaim warranties in whole or in part. That's reasonable, given that the discussion here is about contract, and parties are free to make such contracts as they see fit. But a number of difficulties can arise.

#### **Exclusion of Express Warranties**

The simplest way for the seller to exclude express warranties is not to give them. To be sure, Section 2-316(1) of the UCC forbids courts from giving operation to words in fine print that negate or limit express warranties if doing so would unreasonably conflict with express warranties stated in the main body of the contract—as, for example, would a blanket statement that “this contract excludes all warranties express or implied.” The purpose of the UCC provision is to prevent customers from being surprised by unbargained-for language.

#### **Exclusion of Implied Warranties in General**

Implied warranties can be excluded easily enough also, by describing the product with language such as “as is” or “with all faults.” Nor is exclusion simply a function of what the seller says. The

buyer who has either examined or refused to examine the goods before entering into the contract may not assert an implied warranty concerning defects an inspection would have revealed.

### **Implied Warranty of Merchantability**

Section 2-316(2) of the UCC permits the seller to disclaim or modify the implied warranty of merchantability, as long as the statement actually mentions “merchantability” and, if it is written, is “conspicuous.” Note that the disclaimer need not be in writing, and—again—all implied warranties can be excluded as noted.

### **Implied Warranty of Fitness**

Section 2-316(2) of the UCC permits the seller also to disclaim or modify an implied warranty of fitness. This disclaimer or modification must be in writing, however, and must be conspicuous. It need not mention fitness explicitly; general language will do. The following sentence, for example, is sufficient to exclude all implied warranties of fitness: “There are no warranties that extend beyond the description on the face of this contract.”

Here is a standard disclaimer clause found in a Dow Chemical Company agreement: “Seller warrants that the goods supplied here shall conform to the description stated on the front side hereof, that it will convey good title, and that such goods shall be delivered free from any lawful security interest, lien, or encumbrance. SELLER MAKES NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. NOR IS THERE ANY OTHER EXPRESS OR IMPLIED WARRANTY.”

### **Conflict between Express and Implied Warranties**

Express and implied warranties and their exclusion or limitation can often conflict. Section 2-317 of the UCC provides certain rules for deciding which should prevail. In general, all warranties are to be construed as consistent with each other and as cumulative. When that assumption is unreasonable, the parties’ intention governs the interpretation, according to the

following rules: (a) exact or technical specifications displace an inconsistent sample or model or general language of description; (b) a sample from an existing bulk displaces inconsistent general language of description; (c) express warranties displace inconsistent implied warranties other than an implied warranty of fitness for a particular purpose. Any inconsistency among warranties must always be resolved in favor of the implied warranty of fitness for a particular purpose. This doesn't mean that warranty cannot be limited or excluded altogether. The parties may do so. But in cases of doubt whether it or some other language applies, the implied warranty of fitness will have a superior claim.

### **The Magnuson-Moss Act and Phantom Warranties**

After years of debate over extending federal law to regulate warranties, Congress enacted the Magnuson-Moss Federal Trade Commission Warranty Improvement Act (more commonly referred to as the Magnuson-Moss Act) and President Ford signed it in 1975. The act was designed to clear up confusing and misleading warranties, where—as Senator Magnuson put it in introducing the bill—“purchasers of consumer products discover that their warranty may cover a 25-cent part but not the \$100 labor charge or that there is full coverage on a piano so long as it is shipped at the purchaser's expense to the factory....There is a growing need to generate consumer understanding by clearly and conspicuously disclosing the terms and conditions of the warranty and by telling the consumer what to do if his guaranteed product becomes defective or malfunctions.” The Magnuson-Moss Act only applies to consumer products (for household and domestic uses); commercial purchasers are presumed to be knowledgeable enough not to need these protections, to be able to hire lawyers, and to be able to include the cost of product failures into the prices they charge.

The act has several provisions to meet these consumer concerns; it regulates the content of warranties and the means of disclosing those contents. The act gives the Federal Trade Commission (FTC) the authority to promulgate detailed regulations to interpret and enforce it. Under FTC regulations, any written warranty for a product costing a consumer more than ten

dollars must disclose in a single document and in readily understandable language the following nine items of information:

1. The identity of the persons covered by the warranty, whether it is limited to the original purchaser or fewer than all who might come to own it during the warranty period.
2. A clear description of the products, parts, characteristics, components, or properties covered, and where necessary for clarity, a description of what is excluded.
3. A statement of what the warrantor will do if the product fails to conform to the warranty, including items or services the warranty will pay for and, if necessary for clarity, what it will not pay for.
4. A statement of when the warranty period starts and when it expires.
5. A step-by-step explanation of what the consumer must do to realize on the warranty, including the names and addresses of those to whom the product must be brought.
6. Instructions on how the consumer can be availed of any informal dispute resolution mechanism established by the warranty.
7. Any limitations on the duration of implied warranties—since some states do not permit such limitations, the warranty must contain a statement that any limitations may not apply to the particular consumer.
8. Any limitations or exclusions on relief, such as consequential damages—as above, the warranty must explain that some states do not allow such limitations.
9. The following statement: “This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.”

### **Privity**

A second problem with warranty law (after exclusion and modification of warranties) is that of privity. Privity is the legal term for the direct connection between the seller and buyer, the two contracting parties. For decades, the doctrine of privity has held that one person can sue another only if they are in privity. That worked well in the days when most commerce was local and the connection between seller and buyer was immediate. But in a modern industrial (or postindustrial) economy, the product is transported

through a much larger distribution system. Two questions arise: (1) Is the manufacturer or wholesaler (as opposed to the retailer) liable to the buyer under warranty theory? and (2) May the buyer's family or friends assert warranty rights?

## 7.10 Contributory Negligence, Comparative Negligence, and Assumption of Risk

After disclaimers and privity issues are resolved, other possible impediments facing the plaintiff in a products-liability warranty case are issues of assumption of the risk, contributory negligence, and comparative negligence (discussed in [Chapter 7 "Introduction to Tort Law"](#) on torts).

Courts uniformly hold that assumption of risk is a defense for sellers against a claim of breach of warranty, while there is a split of authority over whether comparative and contributory negligence are defenses. However, the courts' use of this terminology is often conflicting and confusing. The ultimate question is really one of causation: was the seller's breach of the warranty the cause of the plaintiff's damages?

The UCC is not markedly helpful in clearing away the confusion caused by years of discussion of assumption of risk and contributory negligence. Section 2-715(2)(b) of the UCC says that among the forms of consequential damage for which recovery can be sought is "injury to person or property *proximately* resulting from any breach of warranty" (emphasis added). But "proximately" is a troublesome word. Indeed, ultimately it is a circular word: it means nothing more than that the defendant must have been a direct enough cause of the damages that the courts will impose liability. Comment 5 to this section says, "Where the injury involved follows the use of goods without discovery of the defect causing the damage, the question of 'proximate' turns on whether it was reasonable for the buyer to use the goods without such inspection as would have revealed the defects. If it was not reasonable for him to do so, or if he did in fact discover the defect prior to his use, the injury would not proximately result from the breach of warranty."

Obviously if a sky diver buys a parachute and then discovers a few holes in it, his family would not likely prevail in court when they sued to recover for his death because the parachute failed to function after he jumped at 5,000 feet. But the general notion that it must have been reasonable for a buyer to use goods without inspection can make a warranty case difficult to prove.

## 7.11 Negligence

### **Typical Negligence Claims: Design Defects and Inadequate Warnings**

Negligence theory in products liability is most useful in two types of cases: defective design and defective warnings.

#### **Design Defects**

Manufacturers can be, and often are, held liable for injuries caused by products that were defectively designed. The question is whether the designer used reasonable care in designing a product reasonably safe for its foreseeable use. The concern over reasonableness and standards of care are elements of negligence theory.

Defective-design cases can pose severe problems for manufacturing and safety engineers. More safety means more cost. Designs altered to improve safety may impair functionality and make the product less desirable to consumers. At what point safety comes into reasonable balance with performance, cost, and desirability is impossible to forecast accurately, though some factors can be taken into account. For example, if other manufacturers are marketing comparable products whose design are intrinsically safer, the less-safe products are likely to lose a test of reasonableness in court.

## **Warning Defects**

We noted that a product may be defective if the manufacturer failed to warn the user of potential dangers. Whether a warning should have been affixed is often a question of what is reasonably foreseeable, and the failure to affix a warning will be treated as negligence. The manufacturer of a weed killer with poisonous ingredients is certainly acting negligently when it fails to warn the consumer that the contents are potentially lethal.

The law governing the necessity to warn and the adequacy of warnings is complex. What is reasonable turns on the degree to which a product is likely to be misused and, as the disturbing *Laaperi* case illustrates, whether the hazard is obvious.

## **Problems with Negligence Theory**

Negligence is an ancient cause of action and, as was discussed in the torts chapter, it carries with it a number of well-developed defenses. Two categories may be mentioned: common-law defenses and preemption.

## **Common-Law Defenses against Negligence**

Among the problems confronting a plaintiff with a claim of negligence in products-liability suits (again, these concepts are discussed in the torts chapter) are the following:

- Proving negligence at all: just because a product is defective does not necessarily prove the manufacturer breached a duty of care.
- Proximate cause: even if there was some negligence, the plaintiff must prove her damages flowed proximately from that negligence.
- Contributory and comparative negligence: the plaintiff's own actions contributed to the damages.
- Subsequent alteration of the product: generally the manufacturer will not be liable if the product has been changed.

- Misuse or abuse of the product: using a lawn mower to trim a hedge or taking too much of a drug are examples.
- Assumption of the risk: knowingly using the product in a risky way.

## 7.12 Strict Liability in Tort

The warranties grounded in the Uniform Commercial Code (UCC) are often ineffective in assuring recovery for a plaintiff's injuries. The notice requirements and the ability of a seller to disclaim the warranties remain bothersome problems, as does the privity requirement in those states that continue to adhere to it.

Negligence as a products-liability theory obviates any privity problems, but negligence comes with a number of familiar defenses and with the problems of preemption.

To overcome the obstacles, judges have gone beyond the commercial statutes and the ancient concepts of negligence. They have fashioned a tort theory of products liability based on the principle of **strict products liability**. One court expressed the rationale for the development of the concept as follows: "The rule of strict liability for defective products is an example of necessary paternalism judicially shifting risk of loss by application of tort doctrine because [the UCC] scheme fails to adequately cover the situation. Judicial paternalism is to loss shifting what garlic is to a stew—sometimes necessary to give full flavor to statutory law, always distinctly noticeable in its result, overwhelmingly counterproductive if excessive, and never an end in itself." *Kaiser Steel Corp. v. Westinghouse Electric Corp.*, 127 Cal. Rptr. 838 (Cal. 1976).

Paternalism or not, strict liability has become a very important legal theory in products-liability cases.

### Strict Liability Defined

The formulation of strict liability that most courts use is Section 402A of the Restatement of Torts (Second), set out here in full:

(1) One who sells any product in a defective condition unreasonably dangerous to the user or consumer or to his property is subject to liability for physical harm thereby caused to the ultimate user or consumer, or to his property, if

(a) the seller is engaged in the business of selling such a product, and

(b) it is expected to and does reach the user or consumer without substantial change in the condition in which it is sold.

(2) This rule applies even though

(a) the seller has exercised all possible care in the preparation and sale of his product, and

(b) the user or consumer has not bought the product from or entered into any contractual relation with the seller.

Section 402A of the Restatement avoids the warranty booby traps. It states a rule of law not governed by the UCC, so limitations and exclusions in warranties will not apply to a suit based on the Restatement theory. And the consumer is under no obligation to give notice to the seller within a reasonable time of any injuries. Privity is not a requirement; the language of the Restatement says it applies to “the user or consumer,” but courts have readily found that bystanders in various situations are entitled to bring actions under Restatement, Section 402A. The formulation of strict liability, though, is limited to physical harm. Many courts have held that a person who suffers economic loss must resort to warranty law.

Strict liability avoids some negligence traps, too. No proof of negligence is required.

### **Unreasonably Dangerous**

The product must be not merely dangerous but unreasonably dangerous. Most products have characteristics that make them dangerous in certain circumstances. As the Restatement commentators note, “Good whiskey is not unreasonably dangerous merely because it will make

some people drunk, and is especially dangerous to alcoholics; but bad whiskey, containing a dangerous amount of fuel oil, is unreasonably dangerous....Good butter is not unreasonably dangerous merely because, if such be the case, it deposits cholesterol in the arteries and leads to heart attacks; but bad butter, contaminated with poisonous fish oil, is unreasonably dangerous.”Restatement (Second) of Contracts, Section 402A(i). Under Section 402A, “the article sold must be dangerous to an extent beyond that which would be contemplated by the ordinary consumer who purchases it, with the ordinary knowledge common to the community as to its characteristics.”

Even high risks of danger are not necessarily unreasonable. Some products are unavoidably unsafe; rabies vaccines, for example, can cause dreadful side effects. But the disease itself, almost always fatal, is worse. A product is unavoidably unsafe when it cannot be made safe for its intended purpose given the present state of human knowledge. Because important benefits may flow from the product’s use, its producer or seller ought not to be held liable for its danger.

However, the failure to warn a potential user of possible hazards can make a product defective under Restatement, Section 402A, whether unreasonably dangerous or even unavoidably unsafe. The dairy farmer need not warn those with common allergies to eggs, because it will be presumed that the person with an allergic reaction to common foodstuffs will be aware of them. But when the product contains an ingredient that could cause toxic effects in a substantial number of people and its danger is not widely known (or if known, is not an ingredient that would commonly be supposed to be in the product), the lack of a warning could make the product unreasonably dangerous within the meaning of Restatement, Section 402A. Many of the suits brought by asbestos workers charged exactly this point; “The utility of an insulation product containing asbestos may outweigh the known or foreseeable risk to the insulation workers and thus justify its marketing. The product could still be unreasonably dangerous, however, if unaccompanied by adequate warnings. An insulation worker, no less than any other product user, has a right to decide whether to expose himself to the risk.”*Borel v. Fibreboard Paper Products Corp.*, 493 F.2d 1076 (5th Cir. 1973). This rule of law came to

haunt the Manville Corporation: it was so burdened with lawsuits, brought and likely to be brought for its sale of asbestos—a known carcinogen—that it declared Chapter 11 bankruptcy in 1982 and shucked its liability. *In re Johns-Manville Corp.*, 36 R.R. 727 (So. Dist. N.Y. 1984).

### **Problems with Strict Liability**

Strict liability is liability without proof of negligence and without privity. It would seem that strict liability is the “holy grail” of products-liability lawyers: the complete answer. Well, no, it’s not the holy grail. It is certainly true that 402A abolishes the contractual problems of warranty. Restatement, Section 402A, Comment *m*, says,

The rule stated in this Section is not governed by the provisions of the Uniform Commercial Code, as to warranties; and it is not affected by limitations on the scope and content of warranties, or by limitation to “buyer” and “seller” in those statutes. Nor is the consumer required to give notice to the seller of his injury within a reasonable time after it occurs, as provided by the Uniform Act. The consumer’s cause of action does not depend upon the validity of his contract with the person from whom he acquires the product, and it is not affected by any disclaimer or other agreement, whether it be between the seller and his immediate buyer, or attached to and accompanying the product into the consumer’s hands. In short, “warranty” must be given a new and different meaning if it is used in connection with this Section. It is much simpler to regard the liability here stated as merely one of strict liability in tort.

### **7.13 Public Nuisance Remedies available to Government**

Public Nuisance is not new. It can be traced to the 15<sup>th</sup> century common law. One definition found in early American courts states; “A common or public nuisance is the doing of or failure to do something that injuriously affects the safety, health or morals of the public or works some substantial annoyance, inconvenience or injury to the public.” *Commonwealth v. South Covington & Cincinnati Street Railway Co.*, 215 S.W. 581, 6 A.L.R. 118 (1918).

Recent cases have used the theory to address harm caused by the manufacture of guns, tobacco, lead and opioids. (See *City of Cincinnati v. Beretta U.S.A. Corporation* 768 N.E. 2d 1136 (2002)). One problem with the theory is how does it fit in the space between criminal prosecution and abatement by injunction relief. Analysis must start with legal theories of criminal law, equity and the tort of private nuisance. See Prosser and Keeton on Torts 5<sup>th</sup> ed. Chapter 15 sect. 99 page 643 (1984) See 88 A.L.R. 5<sup>th</sup> 1, *Firearm or Ammunition Manufacturer or Seller's Liability for Injuries Caused to Another by Use of Gun in committing Crime* (2001).

Another recent aspect to this area is to liable the cause of action Product Public Nuisance. This has receive attention in the manufacturer of Opioids “artificial pain synthetics”. Massive settlements may lead to bankruptcy and the creation of “Public Benefit Trust”.

## Chapter 8 Introduction to Contract Law (Hardbound chapter 8 and 53)

### Learning Objectives

After reading this chapter, you should understand the following:

1. Why and how contract law has developed
2. What a contract is
3. What topics will be discussed in the contracts chapter of this book
4. What the sources of contract law are
5. How contracts are classified (basic taxonomy)

### 8.1 General Perspectives on Contracts

#### Learning Objectives

1. Explain contract law's cultural roots: how it has evolved as capitalism has evolved.
2. Understand that contracts serve essential economic purposes.
3. Define contract.
4. Understand the basic issues in contract law.

#### 1.1 The Role of Contracts in Modern Society

Contract is probably the most familiar legal concept in our society because it is so central to the essence of our political, economic, and social life. In common parlance, contract is used interchangeably with *agreement*, *bargain*, *undertaking*, or *deal*. Whatever the word, the concept it embodies is our notion of freedom to pursue our own lives together with others. Contract is central because it is the means by which a free society orders what would otherwise be a jostling, frenetic anarchy.

So commonplace is the concept of contract—and our freedom to make contracts with each other—that it is difficult to imagine a time when contracts were rare, when people's everyday

associations with one another were not freely determined. Yet in historical terms, it was not so long ago that contracts were rare, entered into if at all by very few: that affairs should be ordered based on mutual assent was mostly unknown. In primitive societies and in feudal Europe, relationships among people were largely fixed; traditions spelled out duties that each person owed to family, tribe, or manor. People were born into an ascribed position—a status (not unlike the caste system still existing in India)—and social mobility was limited. Sir Henry Maine, a nineteenth-century British historian, wrote that “the movement of the progressive societies has...been a movement from status to contract.” Sir Henry Maine, *Ancient Law* (1869), 180–82. This movement was not accidental—it developed with the emerging industrial order. From the fifteenth to the nineteenth century, England evolved into a booming mercantile economy, with flourishing trade, growing cities, an expanding monetary system, the commercialization of agriculture, and mushrooming manufacturing. With this evolution, contract law was created of necessity.

Contract law did not develop according to a conscious plan, however. It was a response to changing conditions, and the judges who created it frequently resisted, preferring the imagined quieter pastoral life of their forefathers. Not until the nineteenth century, in both the United States and England, did a full-fledged law of contracts arise together with, and help create, modern capitalism.

Modern capitalism, indeed, would not be possible without contract law. So it is that in planned economies, like those of the former Soviet Union and pre-capitalistic China, the contract did not determine the nature of an economic transaction. That transaction was first set forth by the state’s planning authorities; only thereafter were the predetermined provisions set down in a written contract. Modern capitalism has demanded new contract regimes in Russia and China; the latter adopted its Revised Contract Law in 1999.

Contract law may be viewed economically as well as culturally. In *An Economic Analysis of Law*, Judge Richard A. Posner (a former University of Chicago law professor) suggests that contract law performs three significant economic functions. First, it helps maintain incentives for

individuals to exchange goods and services efficiently. Second, it reduces the costs of economic transactions because its very existence means that the parties need not go to the trouble of negotiating a variety of rules and terms already spelled out. Third, the law of contracts alerts the parties to troubles that have arisen in the past, thus making it easier to plan the transactions more intelligently and avoid potential pitfalls. Richard A. Posner, *Economic Analysis of Law* (New York: Aspen, 1973).

## 1.2 The Definition of Contract

As usual in the law, the legal definition of contract is formalistic. The Restatement (Second) of Contracts (Section 1) says, “A contract is a promise or a set of promises for the breach of which the law gives a remedy, or the performance of which the law in some way recognizes as a duty.” Similarly, the Uniform Commercial Code says, “‘Contract’ means the total legal obligation which results from the parties’ agreement as affected by this Act and any other applicable rules of law.” Uniform Commercial Code, Section 1-201(11). As operational definitions, these two are circular; in effect, a contract is defined as an agreement that the law will hold the parties to.

Most simply, a contract is a legally enforceable promise. This implies that not every promise or agreement creates a binding contract; if every promise did, the simple definition set out in the preceding sentence would read, “A contract is a promise.” But—again—a contract is not simply a promise: it is a legally enforceable promise. The law takes into account the way in which contracts are made, by whom they are made, and for what purposes they are made. For example, in many states, a wager is unenforceable, even though both parties “shake” on the bet. We will explore these issues in the chapters to come.

## 1.3 Overview of the Contracts Chapter

Although contract law has many wrinkles and nuances, it consists of four principal inquiries, each of which will be taken up in subsequent chapters:

1. Did the parties create a valid contract? Four elements are necessary for a valid contract:
  1. Mutual assent (i.e., offer and acceptance), [Chapter 9 "The Agreement"](#)

2. Real assent (no duress, undue influence, misrepresentation, mistake, or incapacity), [Chapter 11 "Real Assent"](#)
3. Consideration, [Chapter 10 "Consideration"](#)
4. Legality, [Chapter 12 "Legality"](#)
2. What does the contract mean, and is it in the proper form to carry out this meaning? Sometimes contracts need to be in writing (or evidenced by some writing), or they can't be enforced. Sometimes it isn't clear what the contract means, and a court has to figure that out. These problems are taken up in [Chapter 13 "Form and Meaning"](#).
3. Do persons other than the contracting parties have rights or duties under the contract? Can the right to receive a benefit from the contract be assigned, and can the duties be delegated so that a new person is responsible? Can persons not a party to the contract sue to enforce its terms?
4. How do contractual duties terminate, and what remedies are available if a party has breached the contract? These issues are taken up in [Chapter 14 "Discharge of Obligations"](#) and [Chapter 15 "Remedies"](#).

Together, the answers to these four basic inquiries determine the rights and obligations of contracting parties.

## 8.2 Sources of Contract Law

### Learning Objectives

1. Understand that contract law comes from two sources: judges (cases) and legislation.
2. Know what the Restatement of Contracts is.
3. Recognize the Convention on Contracts for the International Sale of Goods.

The most important sources of contract law are state case law and state statutes (though there are also many federal statutes governing how contracts are made by and with the federal government).

## 2.1 CASE LAW

Law made by judges is called case law. Because contract law was made up in the common-law courtroom by individual judges as they applied rules to resolve disputes before them, it grew over time to formidable proportions. By the early twentieth century, tens of thousands of contract disputes had been submitted to the courts for resolution, and the published opinions, if collected in one place, would have filled dozens of bookshelves. Clearly this mass of material was too unwieldy for efficient use. A similar problem also had developed in the other leading branches of the common law.

Disturbed by the profusion of cases and the resulting uncertainty of the law, a group of prominent American judges, lawyers, and law teachers founded the American Law Institute (ALI) in 1923 to attempt to clarify, simplify, and improve the law. One of the ALI's first projects, and ultimately one of its most successful, was the drafting of the Restatement of the Law of Contracts, completed in 1932. A revision—the Restatement (Second) of Contracts—was undertaken in 1964 and completed in 1979. Hereafter, references to “the Restatement” pertain to the Restatement (Second) of Contracts.

The Restatements—others exist in the fields of torts, agency, conflicts of laws, judgments, property, restitution, security, and trusts—are detailed analyses of the decided cases in each field. These analyses are made with an eye to discerning the various principles that have emerged from the courts, and to the maximum extent possible, the Restatements declare the law as the courts have determined it to be. The Restatements, guided by a reporter (the director of the project) and a staff of legal scholars, go through several so-called tentative drafts—sometimes as many as fifteen or twenty—and are screened by various committees within the ALI before they are eventually published as final documents.

The Restatement (Second) of Contracts won prompt respect in the courts and has been cited in innumerable cases. The Restatements are not authoritative, in the sense that they are not actual judicial precedents; but they are nevertheless weighty interpretive texts, and judges

frequently look to them for guidance. They are as close to “black letter” rules of law as exist anywhere in the American common-law legal system.

Common law, case law (the terms are synonymous), governs contracts for the sale of real estate and services. “Services” refer to acts or deeds (like plumbing, drafting documents, driving a car) as opposed to the sale of property.

## *2.2 Statutory Law: The Uniform Commercial Code*

Common-law contract principles govern contracts for real estate and services. Because of the historical development of the English legal system, contracts for the sale of goods came to be governed by a different body of legal rules. In its modern American manifestation, that body of rules is an important statute: the Uniform Commercial Code (UCC), especially Article 2, which deals with the sale of goods.

### *History of the UCC*

A bit of history is in order. Before the UCC was written, commercial law varied, sometimes greatly, from state to state. This first proved a nuisance and then a serious impediment to business as the American economy became nationwide during the twentieth century. Although there had been some uniform laws concerned with commercial deals—including the Uniform Sales Act, first published in 1906—few were widely adopted and none nationally. As a result, the law governing sales of goods, negotiable instruments, warehouse receipts, securities, and other matters crucial to doing business in an industrial market economy was a crazy quilt of untidy provisions that did not mesh well from state to state.

The UCC is a model law developed by the ALI and the National Conference of Commissioners on Uniform State Laws; it has been adopted in one form or another by the legislatures in all fifty states, the District of Columbia, and the American territories. It is a “national” law not enacted by Congress—it is not federal law but uniform state law.

Initial drafting of the UCC began in 1942 and was ten years in the making, involving the efforts of hundreds of practicing lawyers, law teachers, and judges. A final draft, promulgated by the ALI, was endorsed by the American Bar Association and published in 1951. Various revisions followed in different states, threatening the uniformity of the UCC. The ALI responded by creating a permanent editorial board to oversee future revisions. In one or another of its various revisions, the UCC has been adopted in whole or in part in all American jurisdictions. The UCC is now a basic law of relevance to every business and business lawyer in the United States, even though it is not entirely uniform because different states have adopted it at various stages of its evolution—an evolution that continues still.

### Organization of the UCC

The UCC consists of nine major substantive articles; each deals with separate though related subjects. The articles are as follows:

- Article 1: General Provisions
- Article 2: Sales
- Article 2A: Leases
- Article 3: Commercial Paper
- Article 4: Bank Deposits and Collections
- Article 4A: Funds Transfers
- Article 5: Letters of Credit
- Article 6: Bulk Transfers
- Article 7: Warehouse Receipts, Bills of Lading, and Other Documents of Title
- Article 8: Investment Securities
- Article 9: Secured Transactions

Article 2 deals only with the sale of goods, which the UCC defines as “all things...which are movable at the time of identification to the contract for sale other than the money in which the price is to be paid.” Uniform Commercial Code, Section 2-105. The only contracts and agreements covered by Article 2 are those relating to the present or future sale of goods.

Article 2 is divided in turn into six major parts: (1) Form, Formation, and Readjustment of Contract; (2) General Obligation and Construction of Contract; (3) Title, Creditors, and Good Faith Purchasers; (4) Performance; (5) Breach, Repudiation, and Excuse; and (6) Remedies. These topics will be discussed in [Chapter 16 "Introduction to Sales and Leases"](#), [Chapter 17 "Title and Risk of Loss"](#), [Chapter 18 "Performance and Remedies"](#), and [Chapter 7 "Products Liability."](#)

## **8.3 Contracts (hardbound chapter 53)**

The two fundamental concepts considered the twin cornerstones of business relationships are contract and tort. Although both involve the concept of duty, creation of the duty differs in a manner that is important to business. The parties create *contract* duties through a bargaining process. The key element in the process is control; individuals are in control of a situation because they have the freedom to decide whether to enter into a contractual relationship. *Tort* duties, in contrast, are obligations the law imposes. Despite the obvious difficulty in controlling tort liability, an understanding of tort theory is important because it is a critical factor in strategic planning and risk management.

### **3.1 Economic View of Contract Law**

In *An Economic Analysis of Law* (1973), Judge Richard A. Posner (a former University of Chicago law professor) suggests that contract law performs three significant economic functions. First, it helps maintain incentives to individuals to exchange goods and services efficiently. Second, it reduces the costs of economic transactions because its very existence means that the parties need not go to the trouble of negotiating a variety of rules and terms already spelled out. Third, the law of contracts alerts the parties to trouble spots that have arisen in the past, thus making it easier to plan the transactions more intelligently and avoid potential pitfalls.

### 3.2 Sources of Contract Law

There are four basic sources of contract law: the Constitution, federal and state statutes, federal and state case law, and administrative law. For our purposes, the most important of these, and the ones that we will examine at some length, are case law and statutes.

### 3.3 Case Common Law and the Restatement of Contracts

Because contract law was forged in the common-law courtroom, hammered out case by case on the anvil of individual judges, it grew in the course of time to formidable proportions. By the early twentieth century, tens of thousands of contract disputes had been submitted to the courts for resolution, and the published opinions, if collected in one place, would have filled dozens of bookshelves. Clearly this mass of case law was too unwieldy for efficient use. A similar problem had developed in the other leading branches of the common law. Disturbed by the profusion of cases and the resulting uncertainty of the law, a group of prominent American judges, lawyers, and teachers founded the American Law Institute in 1923 to attempt to clarify, simplify, and improve the law. One of its first projects, and ultimately one of its most successful, was the drafting of the Restatement of the Law of Contracts, completed in 1932. A revision—the *Restatement (Second) of Contracts*—was undertaken in 1946 and finally completed in 1979.

The Restatements (others exist in the fields of torts, agency, conflicts of laws, judgments, property, restitution, security, and trusts) are detailed analyses of the decided cases in the field. These analyses are made with an eye to discerning the various principles that have emerged from the courts, and to the maximum extent possible, the Restatements declare the law as the courts have determined it to be. The Restatements, guided by a Reporter (the director of the project) and a staff of legal scholars, go through several so-called “tentative” drafts—sometimes as many as fifteen or twenty—and are screened by various committees within the American Law Institute before they are eventually published as final documents.

The *Restatement of Contracts* won prompt respect in the courts and has been cited in innumerable cases. The Restatements are not authoritative, in the sense that they are not

actual judicial precedents, but they are nevertheless weighty interpretive texts, and judges frequently look to them for guidance. They are as close to “black letter” rules of law as exist anywhere in the American legal system for judge-made (common) law.

### 3.4 Statutory Law: The Uniform Commercial Code

Common law contract principles govern contracts for real estate and for services, obviously very important areas of law. But in one area the common law has been superseded by an important statute: the Uniform Commercial Code (UCC), especially Article 2, which deals with the sale of goods.

## 8.4 Basic Taxonomy of Contracts

### Learning Objectives

1. Understand that contracts are classified according to the criteria of explicitness, mutuality, enforceability, and degree of completion and that some noncontract promises are nevertheless enforceable under the doctrine of promissory estoppel.
2. Keep your eyes (and ears) alert to the use of suffixes (word endings) in legal terminology that express relationships between parties.

Some contracts are written, some oral; some are explicit, some not. Because contracts can be formed, expressed, and enforced in a variety of ways, a taxonomy of contracts has developed that is useful in grouping together like legal consequences. In general, contracts are classified along four different dimensions: explicitness, mutuality, enforceability, and degree of completion. Explicitness is the degree to which the agreement is manifest to those not party to it. Mutuality takes into account whether promises are given by two parties or only one. Enforceability is the degree to which a given contract is binding. Completion considers whether the contract is yet to be performed or whether the obligations have been fully discharged by one or both parties. We will examine each of these concepts in turn.

### Basic Contract Taxonomy

Contracts are not all cut from the same die. Some are written, some oral; some are explicit, some not. Because contracts can be formed, expressed, and enforced in a variety of ways, a taxonomy of contracts has developed that is useful in lumping together like legal consequences. In general, contracts are classified along these dimensions: explicitness, mutuality, enforceability, and degree of completion. **Explicitness** is concerned with the degree to which the agreement is manifest to those not party to it. **Mutuality** takes into account whether promises are exchanged by two parties or only one. **Enforceability** is the degree to which a given contract is binding. **Completion** considers whether the contract is yet to be performed or the obligations have been fully discharged by one or both parties. We will examine each of these concepts in turn.

#### 4.1 Explicitness

##### **Express Contract**

An express contract is one in which the terms are spelled out directly; the parties to an express contract, whether written or oral, are conscious that they are making an enforceable agreement. For example, an agreement to purchase your neighbor's car for \$500 and to take title next Monday is an express contract.

##### **Implied Contract**

An implied contract is one that is inferred from the actions of the parties. Although no discussion of terms took place, an implied contract exists if it is clear from the conduct of both parties that they intended there be one. A delicatessen patron who asks for a "turkey sandwich to go" has made a contract and is obligated to pay when the sandwich is made. By ordering the food, the patron is implicitly agreeing to the price, whether posted or not.

##### **Contract Implied in Law: Quasi-contract**

Both express and implied contracts embody an actual agreement of the parties. A quasi-contract, by contrast, is an obligation said to be "imposed by law" in order to avoid unjust

enrichment of one person at the expense of another. In fact, a quasi-contract is not a contract at all; it is a fiction that the courts created to prevent injustice. Suppose, for example, that a carpenter mistakenly believes you have hired him to repair your porch; in fact, it is your neighbor who has hired him. One Saturday morning he arrives at your doorstep and begins to work. Rather than stop him, you let him proceed, pleased at the prospect of having your porch fixed for free (since you have never talked to the carpenter, you figure you need not pay his bill). Although it is true there is no contract, the law implies a contract for the value of the work.

### **8.5 Mutuality**

The garden-variety contract is one in which the parties make mutual promises. Each is both promisor and promisee; that is, each pledges to do something and each is the recipient of such a pledge. This type of contract is called a bilateral contract. But mutual promises are not necessary to constitute a contract. Unilateral contracts, in which only one party makes a promise, are equally valid but depend upon performance of the promise to be binding. If Charles says to Fran, “I will pay you five dollars if you wash my car,” Charles is contractually bound to pay once Fran washes the car. Fran never makes a promise, but by actually performing she makes Charles liable to pay. A common example of a unilateral contract is the offer “\$50 for the return of my lost dog.” Frances never makes a promise to the offeror, but if she looks for the dog and finds it, she is entitled to the \$50.

### **8.6 Enforceability**

Not every agreement between two people is a binding contract. An agreement that is lacking one of the legal elements of a contract is said to be void—that is, not a contract at all. An agreement that is illegal—for example, a promise to commit a crime in return for a money payment—is void. Neither party to a void “contract” may enforce it.

By contrast, a voidable contract is one that is unenforceable by one party but enforceable by the other. For example, a minor (any person under eighteen, in most states) may “avoid” a contract with an adult; the adult may not enforce the contract against the minor, if the minor

refuses to carry out the bargain. But the adult has no choice if the minor wishes the contract to be performed. (A contract may be voidable by both parties if both are minors.) Ordinarily, the parties to a voidable contract are entitled to be restored to their original condition. Suppose you agree to buy your seventeen-year-old neighbor's car. He delivers it to you in exchange for your agreement to pay him next week. He has the legal right to terminate the deal and recover the car, in which case you will of course have no obligation to pay him. If you have already paid him, he still may legally demand a return to the *status quo ante* (previous state of affairs). You must return the car to him; he must return the cash to you.

A voidable contract remains a valid contract until it is voided. Thus, a contract with a minor remains in force unless the minor decides he does not wish to be bound by it. When the minor reaches his majority, he may "ratify" the contract—that is, agree to be bound by it—in which case the contract will no longer be voidable and will thereafter be fully enforceable.

An unenforceable contract is one that some rule of law bars a court from enforcing. For example, Tom owes Pete money, but Pete has waited too long to collect it and the statute of limitations has run out. The contract for repayment is unenforceable and Pete is out of luck, unless Tom makes a new promise to pay or actually pays part of the debt. (However, if Pete is holding collateral as security for the debt, he is entitled to keep it; not all rights are extinguished because a contract is unenforceable.)

An agreement consisting of a set of promises is called an executory contract before either promise is carried out. Most executory contracts are enforceable. If one promise or set of terms has been fulfilled—if, for example, John had delivered the wheat to Humphrey—the contract is called partially executed. A contract that has been carried out fully by both parties is called an executed contract.

### **Unilateral Contract**

Mutual promises are not necessary to constitute a contract. Unilateral contracts, in which one party performs an act in exchange for the other party's promise, are equally valid. An offer of a

reward—for catching a criminal or for returning a lost cat—is an example of a unilateral contract: there is an offer on one side, and the other side accepts by taking the action requested.

## **Enforceability**

### **Void**

Not every agreement between two people is a binding contract. An agreement that is lacking one of the legal elements of a contract is said to be a void contract—that is, not a contract at all. An agreement that is illegal—for example, a promise to commit a crime in return for a money payment—is void. Neither party to a void “contract” may enforce it.

### **Voidable**

By contrast, a voidable contract is one that may become unenforceable by one party but can be enforced by the other. For example, a minor (any person under eighteen, in most states) may “avoid” a contract with an adult; the adult may not enforce the contract against the minor if the minor refuses to carry out the bargain. But the adult has no choice if the minor wishes the contract to be performed. (A contract may be voidable by both parties if both are minors.)

Ordinarily, the parties to a voidable contract are entitled to be restored to their original condition. Suppose you agree to buy your seventeen-year-old neighbor’s car. He delivers it to you in exchange for your agreement to pay him next week. He has the legal right to terminate the deal and recover the car, in which case you will of course have no obligation to pay him. If you have already paid him, he still may legally demand a return to the status quo ante (previous state of affairs). You must return the car to him; he must return the cash to you.

A voidable contract remains a valid contract until it is voided. Thus a contract with a minor remains in force unless the minor decides he or she does not wish to be bound by it. When the minor reaches majority, he or she may “ratify” the contract—that is, agree to be bound by it—in which case the contract will no longer be voidable and will thereafter be fully enforceable.

## Unenforceable

An unenforceable contract is one that some rule of law bars a court from enforcing. For example, Tom owes Pete money, but Pete has waited too long to collect it and the statute of limitations has run out. The contract for repayment is unenforceable and Pete is out of luck, unless Tom makes a new promise to pay or actually pays part of the debt. (However, if Pete is holding collateral as security for the debt, he is entitled to keep it; not all rights are extinguished because a contract is unenforceable.) A debt becomes unenforceable, too, when the debtor declares bankruptcy.

A bit more on enforceability is in order. A promise or what seems to be a promise is usually enforceable only if it is otherwise embedded in the elements necessary to make that promise a contract. Those elements are mutual assent, real assent, consideration, capacity, and legality. Sometimes, though, people say things that seem like promises, and on which another person relies. In the early twentieth century, courts began, in some circumstances, to recognize that insisting on the existence of the traditional elements of contract to determine whether a promise is enforceable could work an injustice where there has been reliance. Thus developed the equitable doctrine of promissory estoppel, which has become an important adjunct to contract law. The Restatement (Section 90) puts it this way: "A promise which the promisor should reasonably expect to induce action or forbearance on the part of the promisee or a third person and which does induce such action or forbearance is binding if injustice can be avoided only by enforcement of the promise. The remedy granted for breach may be limited as justice requires."

To be "estopped" means to be prohibited from denying now the validity of a promise you made before.

The doctrine has an interesting background. In 1937, High Trees House Ltd. (a British corporation) leased a block of London apartments from Central London Properties. As World War II approached, vacancy rates soared because people left the city. In 1940 the parties

agreed to reduce the rent rates by half, but no term was set for how long the reduction would last. By mid-1945, as the war was ending, occupancy was again full, and Central London sued for the full rental rates from June on. The English court, under Judge Alfred Thompson Denning (1899–1999), had no difficulty finding that High Trees owed the full amount once full occupancy was again achieved, but Judge Denning went on. In an aside (called a dicta—a statement “by the way”—that is, not necessary as part of the decision), he mused about what would have happened if in 1945 Central London had sued for the full-occupancy rate back to 1940. Technically, the 1940 amendment to the 1937 contract was not binding on Central London—it lacked consideration—and Central London could have reached back to demand full-rate payment. But Judge Denning said that High Trees would certainly have relied on Central London’s promise that a reduced-rate rent would be acceptable, and that would have been enough to bind it, to prevent it from acting inconsistently with the promise. He wrote, “The courts have not gone so far as to give a cause of action in damages for the breach of such a promise, but they have refused to allow the party making it to act inconsistently with it.” *Central London Property Trust Ltd. v. High Trees House Ltd.* (1947) KB 130.

In the years since, though, courts *have* gone so far as to give a cause of action in damages for various noncontract promises. Contract protects agreements; promissory estoppel protects reliance, and that’s a significant difference. The law of contracts continues to evolve.

### **Degree of Completion**

An agreement consisting of a set of promises is called an executory contract before any promises are carried out. Most executory contracts are enforceable. If John makes an agreement to deliver wheat to Humphrey and does so, the contract is called a partially executed contract: one side has performed, the other has not. When John pays for the wheat, the contract is fully performed. A contract that has been carried out fully by both parties is called an executed contract.

### **Terminology: Suffixes Expressing Relationships**

Although not really part of the taxonomy of contracts (i.e., the orderly classification of the subject), an aspect of contractual—indeed, legal—terminology should be highlighted here. *Suffixes* (the end syllables of words) in the English language are used to express relationships between parties in legal terminology. Here are examples:

- **Offeror.** One who makes an offer.
- **Offeree.** One to whom an offer is made.
- **Promisor.** One who makes a promise.
- **Promisee.** One to whom a promise is made.
- **Obligor.** One who makes and has an obligation.
- **Obligee.** One to whom an obligation is made.
- **Transferor.** One who makes a transfer.
- **Transferee.** One to whom a transfer is made.

## **CHAPTER 8 CASE: (See)**

### **Unilateral Contract and At-Will Employment**

Woolley v. Hoffmann-La Roche, Inc. 491 A.2d 1257 (N.J. 1985)

## Chapter 9 The Agreement

In this chapter, we begin the first of the four broad inquiries of contract law mentioned in [Chapter 8 "Introduction to Contract Law"](#): Did the parties create a valid contract? The answer is not always obvious; the range of factors that must be taken into account can be large, and their relationships subtle. Since businesspeople frequently conduct contract negotiations without the assistance of a lawyer, it is important to attend to the nuances in order to avoid legal trouble at the outset. Whether a contract has been formed depends in turn on whether

1. the parties reached an agreement (the focus of this chapter);
2. consideration was present;
3. the agreement was legal; and
4. the parties entered into the contract of their own free will, with knowledge of the facts, and with the capacity to make a contract.

Factors 2, 3, and 4 are the subjects of subsequent chapters.

### 9.1 The Agreement in General

#### Learning Objectives

1. Recognize that not all agreements or promises are contracts.
2. Understand that whether a contract exists is based on an objective analysis of the parties' interaction, not on a subjective one.

## 1.1 The Significance of Agreement

The core of a legal contract is the agreement between the parties. This is not a necessary ingredient; in Communist nations, contracts were (or are, in the few remaining Communist countries) routinely negotiated between parties who had the terms imposed on them. But in the West, and especially in the United States, agreement is of the essence. That is not merely a matter of convenience; it is at the heart of our philosophical and psychological beliefs. As the great student of contract law Samuel Williston put it, “It was a consequence of the emphasis laid on the ego and the individual will that the formation of a contract should seem impossible unless the wills of the parties concurred. Accordingly we find at the end of the eighteenth century, and the beginning of the nineteenth century, the prevalent idea that there must be a “meeting of the minds” (a new phrase) in order to form a contract.” Samuel Williston, “Freedom of Contract,” *Cornell Law Quarterly* 6 (1921), 365.

Although agreements may take any form, including unspoken conduct between the parties, they are usually structured in terms of an offer and an acceptance. Uniform Commercial Code, Section 2-204(1). These two components will be the focus of our discussion. Note, however, that not every agreement, in the broadest sense of the word, need consist of an offer and an acceptance, and that it is entirely possible, therefore, for two persons to reach agreement without forming a contract. For example, people may agree that the weather is pleasant or that it would be preferable to go out for Chinese food rather than to see a foreign film; in neither case has a contract been formed. One of the major functions of the law of contracts is to sort out those agreements that are legally binding—those that are contracts—from those that are not.

## 1.2 The Objective Test

In interpreting agreements, courts generally apply an objective standard (outwardly, as an observer would interpret; not subjectively). The Restatement (Second) of Contracts defines *agreement* as a “manifestation of mutual assent by two or more persons to one another.” Uniform Commercial Code, Section 3. The Uniform Commercial Code defines *agreement* as “the

bargain of the parties in fact as found in their language or by implication from other circumstances including course of dealing or usage of trade or course of performance.” Uniform Commercial Code, Section 1-201(3). The critical question is what the parties said or did, not what they thought they said or did, or not what impression they thought they were making.

The distinction between objective and subjective standards crops up occasionally when one person claims he spoke in jest. The vice president of a company that manufactured punchboards, used in gambling, testified to the Washington State Game Commission that he would pay \$100,000 to anyone who found a “crooked board.” Barnes, a bartender, who had purchased two boards that were crooked some time before, brought one to the company office and demanded payment. The company refused, claiming that the statement was made in jest (the audience at the commission hearing had laughed when the offer was made). The court disagreed, holding that it was reasonable to interpret the pledge of \$100,000 as a means of promoting punchboards:

[I]f the jest is not apparent and a reasonable hearer would believe that an offer was being made, then the speaker risks the formation of a contract which was not intended. It is the objective manifestations of the offeror that count and not secret, unexpressed intentions. If a party’s words or acts, judged by a reasonable standard, manifest an intention to agree in regard to the matter in question, that agreement is established, and it is immaterial what may be the real but unexpressed state of the party’s mind on the subject. *Barnes v. Treece*, 549 P.2d 1152 (Wash. App. 1976).

(See Cases: *Lucy v. Zehmer*; at the end of the chapter) illustrates that a party’s real state of mind must be expressed to the other party, rather than in an aside to one’s spouse.

## 9.2 The Offer

### Learning Objectives

1. Know the definition of *offer*.
2. Recognize that some proposals are not offers.

3. Understand the three essentials of an offer: intent, communication, and definiteness.
4. Know when an offer expires and can no longer be accepted.

Offer and acceptance may seem to be straightforward concepts, as they are when two people meet face-to-face. But in a commercial society, the ways of making offers and accepting them are nearly infinite. A retail store advertises its merchandise in the newspaper. A seller makes his offer by mail or over the Internet. A telephone caller states that his offer will stand for ten days. An offer leaves open a crucial term. An auctioneer seeks bids. An offeror gives the offeree a choice. All these situations can raise tricky questions, as can corresponding situations involving acceptances.

## 2.1 The Definition of *Offer*

The Restatement defines offer as “the manifestation of willingness to enter into a bargain, so made as to justify another person in understanding that his assent to that bargain is invited and will conclude it.” Restatement (Second) of Contracts, Section 24. Two key elements are implicit in that definition: the offer must be communicated, and it must be definite. Before considering these requirements, we examine the threshold question of whether an offer was intended. Let us look at proposals that may look like, but are not, offers.

## 2.2 Proposals That Are Not Offers

### **Advertisements**

Most advertisements, price quotations, and invitations to bid are not construed as offers. A notice in the newspaper that a bicycle is on sale for \$800 is normally intended only as an invitation to the public to come to the store to make a purchase. Similarly, a statement that a seller can “quote” a unit price to a prospective purchaser is not, by itself, of sufficient definiteness to constitute an offer; quantity, time of delivery, and other important factors are missing from such a statement. Frequently, in order to avoid construction of a statement about price and quantity as an offer, a seller or buyer may say, “Make me an offer.” Such a statement obviously suggests that no offer has yet been made. This principle usually applies to invitations

for bids (e.g., from contractors on a building project). Many forms used by sales representatives as contracts indicate that by signing, the customer is making an offer to be accepted by the home office and is not accepting an offer made by the sales representative.

Although advertisements, price quotations, and the like are generally not offers, the facts in each case are important. Under the proper circumstances, an advertised statement can be construed as an offer, as shown in the well-known *Lefkowitz* case (CASES), in which the offended customer acted as his own lawyer and pursued an appeal to the Minnesota Supreme Court against a Minneapolis department store that took back its advertised offer.

Despite the common-law rule that advertisements are normally to be considered invitations rather than offers, legislation and government regulations may offer redress. For many years, retail food stores have been subject to a rule, promulgated by the Federal Trade Commission (FTC), that goods advertised as “specials” must be available and must be sold at the price advertised. It is unlawful for a retail chain not to have an advertised item in each of its stores and in sufficient quantity, unless the advertisement specifically states how much is stocked and which branch stores do not carry it. Many states have enacted consumer protection statutes that parallel the FTC rule.

### **Invitations to Bid**

Invitations to bid are also not generally construed as offers. An auctioneer does not make offers but solicits offers from the crowd: “May I have an offer? —\$500? \$450? \$450! I have an offer for \$450. Do I hear \$475? May I have an offer?”

### **2.3 Communication**

A contract is an agreement in which each party assents to the terms of the other party. Without mutual assent there cannot be a contract, and this implies that the assent each person gives must be with reference to that of the other. If Toni places several alternative offers on the

table, only one of which can be accepted, and invites Sandy to choose, no contract is formed if Sandy says merely, "I accept your terms." Sandy must specify which offer she is assenting to.

From this general proposition, it follows that no contract can be legally binding unless an offer is in fact communicated to the offeree. If you write an e-mail to a friend with an offer to sell your car for a certain sum and then get distracted and forget to send it, no offer has been made. If your friend coincidentally e-mails you the following day and says that she wants to buy your car and names the same sum, no contract has been made. Her e-mail to you is not an acceptance, since she did not know of your offer; it is, instead, an offer or an invitation to make an offer. Nor would there have been a contract if you had sent your communication and the two e-mails crossed in cyberspace. Both e-mails would be offers, and for a valid contract to be formed, it would still be necessary for one of you to accept the other's offer. An offer is not effective until it is received by the offeree (and that's also true of a revocation of the offer, and a rejection of the offer by the offeree).

The requirement that an offer be communicated does not mean that every term must be communicated. You call up your friend and offer to sell him your car. You tell him the price and start to tell him that you will throw in the snow tires but will not pay for a new inspection, and that you expect to keep the car another three weeks. Impatiently, he cuts you off and says, "Never mind about all that; I'll accept your offer on whatever terms you want." You and he have a contract.

These principles apply to unknown offers of reward. An offer of a reward constitutes a unilateral contract that can be made binding only by performing the task for which the reward is offered. Suppose that Bonnie posts on a tree a sign offering a reward for returning her missing dog. If you saw the sign, found the dog, and returned it, you would have fulfilled the essentials of the offer. But if you chanced upon the dog, read the tag around its neck, and returned it without ever having been aware that a reward was offered, then you have not responded to the offer, even if you acted in the hope that the owner would reward you. There is no contractual obligation.

In many states, a different result follows from an offer of a reward by a governmental entity. Commonly, local ordinances provide that a standing reward of, say, \$1,000 will be paid to anyone providing information that leads to the arrest and conviction of arsonists. To collect the reward, it is not necessary for a person who does furnish local authorities with such information to know that a reward ordinance exists. In contract terms, the standing reward is viewed as a means of setting a climate in which people will be encouraged to act in certain ways in the expectation that they will earn unknown rewards. It is also possible to view the claim to a reward as noncontractual; the right to receive it is guaranteed, instead, by the local ordinance.

Although a completed act called for by an unknown private offer does not give rise to a contract, partial performance usually does. Suppose Apex Bakery posts a notice offering a one-week bonus to all bakers who work at least six months in the kitchen. Charlene works two months before discovering the notice on the bulletin board. Her original ignorance of the offer will not defeat her claim to the bonus if she continues working, for the offer serves as an inducement to complete the performance called for.

## 2.4 Definiteness

The common law reasonably requires that an offer spell out the essential proposed terms with sufficient definiteness—certainty of terms that enables a court to order enforcement or measure damages in the event of a breach. As it has often been put, “The law does not make contracts for the parties; it merely enforces the duties which they have undertaken” (Simpson, 1965, p. 19). Thus a supposed promise to sell “such coal as the promisor may wish to sell” is not an enforceable term because the seller, the coal company, undertakes no duty to sell anything unless it wishes to do so. Essential terms certainly include price and the work to be done. But not every omission is fatal; for example, as long as a missing term can be fixed by referring to some external standard—such as “no later than the first frost”—the offer is sufficiently definite.

In major business transactions involving extensive negotiations, the parties often sign a preliminary “agreement in principle” before a detailed contract is drafted. These preliminary agreements may be definite enough to create contract liability even though they lack many of the terms found in a typical contract. For example, in a famous 1985 case, a Texas jury concluded that an agreement made “in principle” between the Pennzoil Company and the Getty Oil Company and not entirely finished was binding and that Texaco had unlawfully interfered with their contract. As a result, Texaco was held liable for over \$10 billion, which was settled for \$3 billion after Texaco went into bankruptcy.

Offers that state alternatives are definitive if each alternative is definite. David offers Sheila the opportunity to buy one of two automobiles at a fixed price, with delivery in two months and the choice of vehicle left to David. Sheila accepts. The contract is valid. If one of the cars is destroyed in the interval before delivery, David is obligated to deliver the other car. Sometimes, however, what appears to be an offer in the alternative may be something else. Charles makes a deal to sell his business to Bernie. As part of the bargain, Charles agrees not to compete with Bernie for the next two years, and if he does, to pay \$25,000. Whether this is an alternative contract depends on the circumstances and intentions of the parties. If it is, then Charles is free to compete as long as he pays Bernie \$25,000. On the other hand, the intention might have been to prevent Charles from competing in any event; hence a court could order payment of the \$25,000 as damages for a breach and still order Charles to refrain from competition until the expiration of the two-year period.

## 2.5 The UCC Approach

The Uniform Commercial Code (UCC) is generally more liberal in its approach to definiteness than is the common law—at least as the common law was interpreted in the heyday of classical contract doctrine. Section 2-204(3) states the rule: “Even though one or more terms are left open, a contract for sale does not fail for indefiniteness if the parties have intended to make a contract and there is a reasonably certain basis for giving an appropriate remedy.”

The drafters of the UCC sought to give validity to as many contracts as possible and grounded that validity on the intention of the parties rather than on formalistic requirements. As the official comment to Section 2-204(3) notes, "If the parties intend to enter into a binding agreement, this subsection recognizes that agreement as valid in law, despite missing terms, if there is any reasonably certain basis for granting a remedy....Commercial standards on the point of 'indefiniteness' are intended to be applied." Other sections of the UCC spell out rules for filling in such open provisions as price, performance, and remedies. Chiefly, Uniform Commercial Code, Sections 2-305 through 2-310.

One of these sections, Section 2-306(1), provides that a contract term under which a buyer agrees to purchase the seller's entire output of goods (an "outputs contract") or a seller agrees to meet all the buyer's requirements (a "requirements" or "needs" contract) means output or requirements that occur in good faith. A party to such a contract cannot offer or demand a quantity that is "unreasonably disproportionate" to a stated estimate or past quantities.

## **2.6 Duration of Offer**

An offer need not be accepted on the spot. Because there are numerous ways of conveying an offer and numerous contingencies that may be part of the offer's subject matter, the offeror might find it necessary to give the offeree considerable time to accept or reject the offer. By the same token, an offer cannot remain open forever, so that once given, it never lapses and cannot be terminated. The law recognizes seven ways by which the offer can expire (besides acceptance, of course): revocation, rejection by the offeree, counteroffer, acceptance with counteroffer, lapse of time, death or insanity of a person or destruction of an essential term, and illegality. We will examine each of these in turn.

### **Revocation**

People are free to make contracts and, in general, to revoke them.

### **Revocability**

The general rule, both in common law and under the UCC, is that the offeror may revoke his or her offer at any time before acceptance, even if the offer states that it will remain open for a specified period of time. Neil offers Arlene his car for \$5,000 and promises to keep the offer open for ten days. Two days later, Neil calls Arlene to revoke the offer. The offer is terminated, and Arlene's acceptance thereafter, though within the ten days, is ineffective. But if Neil had sent his revocation (the taking back of an offer before it is accepted) by mail, and if Arlene, before she received it, had telephoned her acceptance, there would be a contract, since revocation is effective only when the offeree actually receives it. There is an exception to this rule for offers made to the public through newspaper or like advertisements. The offeror may revoke a public offering by notifying the public by the same means used to communicate the offer. If no better means of notification is reasonably available, the offer is terminated even if a particular offeree had no actual notice.

Revocation may be communicated indirectly. If Arlene had learned from a friend that Neil had sold his car to someone else during the ten-day period, she would have had sufficient notice. Any attempt to accept Neil's offer would have been futile.

### **Irrevocable Offers**

Not every type of offer is revocable. One type of offer that cannot be revoked is the option contract (the promisor explicitly agrees for consideration to limit his right to revoke). Arlene tells Neil that she cannot make up her mind in ten days but that she will pay him \$25 to hold the offer open for thirty days. Neil agrees. Arlene has an option to buy the car for \$5,000; if Neil should sell it to someone else during the thirty days, he will have breached the contract with Arlene. Note that the transactions involving Neil and Arlene consist of two different contracts. One is the promise of a thirty-day option for the promise of \$25. It is this contract that makes

the option binding and is independent of the original offer to sell the car for \$5,000. The offer can be accepted and made part of an independent contract during the option period.

Partial performance of a unilateral contract creates an option. Although the option is not stated explicitly, it is recognized by law in the interests of justice. Otherwise, an offeror could induce the offeree to go to expense and trouble without ever being liable to fulfill his or her part of the bargain. Before the offeree begins to carry out the contract, the offeror is free to revoke the offer. But once performance begins, the law implies an option, allowing the offeree to complete performance according to the terms of the offer. If, after a reasonable time, the offeree does not fulfill the terms of the offer, then it may be revoked.

### **Revocability under the UCC**

The UCC changes the common-law rule for offers by merchants. Under Section 2-205, a firm offer (a written and signed promise by a merchant to hold an offer to buy or sell goods for some period of time) is irrevocable. That is, an option is created, but no consideration is required. The offer must remain open for the time period stated or, if no time period is given, for a reasonable period of time, which may not exceed three months.

### **Irrevocability by Law**

By law, certain types of offers may not be revoked (statutory irrevocability), despite the absence of language to that effect in the offer itself. One major category of such offers is that of the contractor submitting a bid to a public agency. The general rule is that once the period of bidding opens, a bidder on a public contract may not withdraw his or her bid unless the contracting authority consents. The contractor who purports to withdraw is awarded the contract based on the original bid and may be sued for damages for nonperformance.

## **Rejection by the Offeree**

Rejection (a manifestation of refusal to agree to the terms of an offer) of the offer is effective when the offeror receives it. A subsequent change of mind by the offeree cannot revive the offer. Donna calls Chuck to reject Chuck's offer to sell his lawn mower. Chuck is then free to sell it to someone else. If Donna changes her mind and calls Chuck back to accept after all, there still is no contract, even if Chuck has made no further effort to sell the lawn mower. Having rejected the original offer, Donna, by her second call, is not accepting but making an offer to buy. Suppose Donna had written Chuck to reject, but on changing her mind, decided to call to accept before the rejection letter arrived. In that case, the offer would have been accepted.

## **Counteroffer**

A counteroffer, a response that varies the terms of an offer, is a rejection. Jones offers Smith a small parcel of land for \$10,000 and says the offer will remain open for one month. Smith responds ten days later, saying he will pay \$5,000. Jones's original offer has thereby been rejected. If Jones now declines Smith's counteroffer, may Smith bind Jones to his original offer by agreeing to pay the full \$10,000? He may not, because once an original offer is rejected, all the terms lapse. However, an inquiry by Smith as to whether Jones would consider taking less is not a counteroffer and would not terminate the offer.

## **Acceptance with Counteroffer**

This is not really an acceptance at all but is a counteroffer: an acceptance that changes the terms of the offer is a counteroffer and terminates the offer. The common law imposes a mirror image rule: the acceptance must match the offer in all its particulars or the offer is rejected. However, if an acceptance that requests a change or an addition to the offer does not require the offeror's assent, then the acceptance is valid. The broker at Friendly Real Estate offers you a house for \$320,000. You accept but include in your acceptance "the vacant lot next door." Your

acceptance is a counteroffer, which serves to terminate the original offer. If, instead, you had said, "It's a deal, but I'd prefer it with the vacant lot next door," then there is a contract because you are not demanding that the broker abide by your request. If you had said, "It's a deal, and I'd also like the vacant lot next door," you have a contract, because the request for the lot is a separate offer, not a counteroffer rejecting the original proposal.

### **The UCC and Counteroffers**

The UCC is more liberal than the common law in allowing contracts to be formed despite counteroffers and in incorporating the counteroffers into the contracts. This UCC provision is necessary because the use of routine forms for contracts is very common, and if the rule were otherwise, much valuable time would be wasted by drafting clauses tailored to the precise wording of the routine printed forms. A buyer and a seller send out documents accompanying or incorporating their offers and acceptances, and the provisions in each document rarely correspond precisely. Indeed, it is often the case that one side's form contains terms favorable to it but inconsistent with terms on the other side's form. Section 2-207 of the UCC attempts to resolve this "battle of the forms" by providing that additional terms or conditions in an acceptance operate as such unless the acceptance is conditioned on the offeror's consent to the new or different terms. The new terms are construed as offers but are automatically incorporated in any contract between merchants for the sale of goods unless "(a) the offer expressly limits acceptance to the terms of the offer; (b) [the terms] materially alter it; or (c) notification of objection to them has already been given or is given within a reasonable time after notice of them is received."

An example of terms that become part of the contract without being expressly agreed to are clauses providing for interest payments on overdue bills. Examples of terms that would materially alter the contract and hence need express approval are clauses that negate the standard warranties that sellers give buyers on their merchandise.

Frequently, parties use contract provisions to prevent the automatic introduction of new terms. A typical seller's provision is as follows:

#### *Amendments*

*Any modification of this document by the Buyer, and all additional or different terms included in Buyer's purchase order or any other document responding to this offer, are hereby objected to. BY ORDERING THE GOODS HERE FOR SHIPMENT, BUYER AGREES TO ALL THE TERMS AND CONDITIONS CONTAINED ON BOTH SIDES OF THIS DOCUMENT.*

Section 2-207 of the UCC, liberalizing the mirror image rule, is pervasive, covering all sorts of contracts, from those between industrial manufacturers to those between friends.

#### **Lapse of Time**

Offers are not open-ended; they lapse after some period of time. An offer may contain its own specific time limitation—for example, “until close of business today.”

In the absence of an expressly stated time limit, the common-law rule is that the offer expires at the end of a “reasonable” time. Such a period is a factual question in each case and depends on the particular circumstances, including the nature of the service or property being contracted for, the manner in which the offer is made, and the means by which the acceptance is expected to be made. Whenever the contract involves a speculative transaction—the sale of securities or land, for instance—the time period will depend on the nature of the security and the risk involved. In general, the greater the risk to the seller, the shorter the period of time. Karen offers to sell Gary a block of oil stocks that are fluctuating rapidly hour by hour. Gary receives the offer an hour before the market closes; he accepts by fax two hours after the market has opened the next morning and after learning that the stock has jumped up significantly. The time period has lapsed if Gary was accepting a fixed price that Karen set, but it may still be open if the price is market price at time of delivery. (Under Section 41 of the

Restatement, an offer made by mail is “seasonably accepted if an acceptance is mailed at any time before midnight on the day on which the offer is received.”)

For unilateral contracts, both the common law and the UCC require the offeree to notify the offeror that he has begun to perform the terms of the contract. Without notification, the offeror may, after a reasonable time, treat the offer as having lapsed.

### **Death or Insanity of the Offeror**

The death or insanity of the offeror prior to acceptance terminates the offer; the offer is said to die with the offeror. (Notice, however, that the death of a party to a *contract* does not necessarily terminate the contract: the estate of a deceased person may be liable on a contract made by the person before death.)

### **Destruction of Subject Matter Essential to the Offer**

Destruction of something essential to the contract also terminates the offer. You offer to sell your car, but the car is destroyed in an accident before your offer is accepted; the offer is terminated.

### **Postoffer Illegality**

A statute making unlawful the object of the contract will terminate the offer if the statute takes effect after the offer was made. Thus an offer to sell a quantity of herbal weight-loss supplements will terminate if the Food and Drug Administration outlaws the sale of such supplements.

## **9.3 The Acceptance**

### **Learning Objectives**

1. Define *acceptance*.
2. Understand who may accept an offer.

3. Know when the acceptance is effective.
4. Recognize when silence is acceptance.

### 3.1 General Definition of *Acceptance*

To result in a legally binding contract, an offer must be accepted by the offeree. Just as the law helps define and shape an offer and its duration, so the law governs the nature and manner of acceptance. The Restatement defines acceptance of an offer as “a manifestation of assent to the terms thereof made by the offeree in a manner invited or required by the offer.

”Restatement (Second) of Contracts, Section 24. The assent may be either by the making of a mutual promise or by performance or partial performance. If there is doubt about whether the offer requests a return promise or a return act, the Restatement, Section 32, provides that the offeree may accept with either a promise or performance. The Uniform Commercial Code (UCC) also adopts this view; under Section 2-206(1)(a), “an offer to make a contract shall be construed as inviting acceptance in any manner and by any medium reasonable in the circumstances” unless the offer unambiguously requires a certain mode of acceptance.

### 3.2 Who May Accept?

The identity of the offeree is usually clear, even if the name is unknown. The person to whom a promise is made is ordinarily the person whom the offeror contemplates will make a return promise or perform the act requested. But this is not invariably so. A promise can be made to one person who is not expected to do anything in return. The consideration necessary to weld the offer and acceptance into a legal contract can be given by a third party. Under the common law, whoever is invited to furnish consideration to the offeror is the offeree, and only an offeree may accept an offer. A common example is sale to a minor. George promises to sell his automobile to Bartley, age seventeen, if Bartley’s father will promise to pay \$3,500 to George. Bartley is the promisee (the person to whom the promise is made) but not the offeree; Bartley cannot legally accept George’s offer. Only Bartley’s father, who is called on to pay for the car, can accept, by making the promise requested. And notice what might seem obvious: a *promise* to perform as requested in the offer is itself a binding acceptance.

### 3.3 When Is Acceptance Effective?

As noted previously, an offer, a revocation of the offer, and a rejection of the offer are not effective until received. The same rule does not always apply to the acceptance.

#### **Instantaneous Communication**

Of course, in many instances the moment of acceptance is not in question: in face-to-face deals or transactions negotiated by telephone, the parties extend an offer and accept it instantaneously during the course of the conversation. But problems can arise in contracts negotiated through correspondence.

#### **Stipulations as to Acceptance**

One common situation arises when the offeror stipulates the mode of acceptance (e.g., return mail, fax, or carrier pigeon). If the offeree uses the stipulated mode, then the acceptance is deemed effective when sent. Even though the offeror has no knowledge of the acceptance at that moment, the contract has been formed. Moreover, according to the Restatement, Section 60, if the offeror says that the offer can be accepted only by the specified mode, that mode must be used. (It is said that “the offeror is the master of the offer.”)

If the offeror specifies no particular mode, then acceptance is effective when transmitted, as long as the offeree uses a reasonable method of acceptance. It is implied that the offeree can use the same means used by the offeror or a means of communication customary to the industry.

#### **The “Mailbox Rule”**

The use of the postal service is customary, so acceptances are considered effective when mailed, regardless of the method used to transmit the offer. Indeed, the so-called mailbox rule has a lineage tracing back more than one hundred years to the English courts. *Adams v. Lindsell*, 1 Barnewall & Alderson 681 (K.B. 1818).

The mailbox rule may seem to create particular difficulties for people in business, since the acceptance is effective even though the offeror is unaware of the acceptance, and even if the letter is lost and never arrives. But the solution is the same as the rationale for the rule. In contracts negotiated through correspondence, there will always be a burden on one of the parties. If the rule were that the acceptance is not effective until received by the offeror, then the offeree would be on tenterhooks, rather than the other way around, as is the case with the present rule. As between the two, it seems fairer to place the burden on the offeror, since he or she alone has the power to fix the moment of effectiveness. All the offeror need do is specify in the offer that acceptance is not effective until received.

In all other cases—that is, when the offeror fails to specify the mode of acceptance and the offeree uses a mode that is not reasonable—acceptance is deemed effective only when received.

### **Acceptance “Outruns” Rejection**

When the offeree sends a rejection first and then later transmits a superseding acceptance, the “effective when received” rule also applies. Suppose a seller offers a buyer two cords of firewood and says the offer will remain open for a week. On the third day, the buyer writes the seller, rejecting the offer. The following evening, the buyer rethinks his firewood needs, and on the morning of the fifth day, he sends an e-mail accepting the seller’s terms. The previously mailed letter arrives the following day. Since the letter had not yet been received, the offer had not been rejected. For there to be a valid contract, the e-mailed acceptance must arrive before the mailed rejection. If the e-mail were hung up in cyberspace, although through no fault of the buyer, so that the letter arrived first, the seller would be correct in assuming the offer was terminated—even if the e-mail arrived a minute later. In short, where “the acceptance outruns the rejection” the acceptance is effective.

### 3.4 Electronic Communications

Electronic communications have, of course, become increasingly common. Many contracts are negotiated by e-mail, accepted and “signed” electronically. Generally speaking, this does not change the rules. The Uniform Electronic Transactions Act (UETA) was promulgated (i.e., disseminated for states to adopt) in 1999. It is one of a number of uniform acts, like the Uniform Commercial Code. As of June 2010, forty-seven states and the US Virgin Islands had adopted the statute. The introduction to the act provides that “the purpose of the UETA is to remove barriers to electronic commerce by validating and effectuating electronic records and signatures.” The National Conference of Commissioners on Uniform State Laws, *Uniform Electronic Transactions Act (1999)* (Denver: National Conference of Commissioners on Uniform State Laws, 1999), accessed March 29, 2011,

[http://www.uniformlaws.org/shared/docs/electronic%20transactions/ueta\\_final\\_99.pdf](http://www.uniformlaws.org/shared/docs/electronic%20transactions/ueta_final_99.pdf). In

general, the UETA provides the following:

1. A record or signature may not be denied legal effect or enforceability solely because it is in electronic form.
2. A contract may not be denied legal effect or enforceability solely because an electronic record was used in its formation.
3. If a law requires a record to be in writing, an electronic record satisfies the law.
4. If a law requires a signature, an electronic signature satisfies the law.

The UETA, though, doesn’t address all the problems with electronic contracting. Clicking on a computer screen may constitute a valid acceptance of a contractual offer, but only if the offer is clearly communicated. In *Specht v. Netscape Communications Corp.*, customers who had downloaded a free online computer program complained that it effectively invaded their privacy by inserting into their machines “cookies”; they wanted to sue, but the defendant said they were bound to arbitration. *Specht v. Netscape Communications Corp.*, 306 F.3d 17 (2d Cir. 2002). They had clicked on the Download button, but hidden below it were the licensing terms, including the arbitration clause. The federal court of appeals held that there was no valid

acceptance. The court said, “We agree with the district court that a reasonably prudent Internet user in circumstances such as these would not have known or learned of the existence of the license terms before responding to defendants’ invitation to download the free software, and that defendants therefore did not provide reasonable notice of the license terms. In consequence, the plaintiffs’ bare act of downloading the software did not unambiguously manifest assent to the arbitration provision contained in the license terms.”

If a faxed document is sent but for some reason not received or not noticed, the emerging law is that the mailbox rule does not apply. A court would examine the circumstances with care to determine the reason for the nonreceipt or for the offeror’s failure to notice its receipt. A person has to have fair notice that his or her offer has been accepted, and modern communication makes the old-fashioned mailbox rule—that acceptance is effective upon dispatch—problematic. See, for example, *Clow Water Systems Co. v. National Labor Relations Board*, 92 F.3d 441 (6th Cir. 1996).

### 3.5 Silence as Acceptance

#### **General Rule: Silence Is Not Acceptance**

Ordinarily, for there to be a contract, the offeree must make some positive manifestation of assent to the offeror’s terms. The offeror cannot usually word his offer in such a way that the offeree’s failure to respond can be construed as an acceptance.

#### **Exceptions**

The Restatement, Section 69, gives three situations, however, in which silence can operate as an acceptance. The first occurs when the offeree avails himself of services proffered by the offeror, even though he could have rejected them and had reason to know that the offeror offered them expecting compensation. The second situation occurs when the offer states that the offeree may accept without responding and the offeree, remaining silent, intends to accept. The third situation is that of previous dealings, in which only if the offeree intends not to accept is it reasonable to expect him to say so.

As an example of the first type of acceptance by silence, assume that a carpenter happens by your house and sees a collapsing porch. He spots you in the front yard and points out the deterioration. "I'm a professional carpenter," he says, "and between jobs. I can fix that porch for you. Somebody ought to." You say nothing. He goes to work. There is an implied contract, with the work to be done for the carpenter's usual fee.

To illustrate the second situation, suppose that a friend has left her car in your garage. The friend sends you a letter in which she offers you the car for \$4,000 and adds, "If I don't hear from you, I will assume that you have accepted my offer." If you make no reply, with the intention of accepting the offer, a contract has been formed.

The third situation is illustrated by [Section 9.3.5 "Silence as Acceptance"](#), a well-known decision made by Justice Oliver Wendell Holmes Jr. when he was sitting on the Supreme Court of Massachusetts.

## Chapter 10 Consideration (Hardcover chapter11) Consideration

### Learning Objectives

After reading this chapter, you should understand the following:

1. What “consideration” is in contract law, what it is not, and what purposes it serves
2. How the sufficiency of consideration is determined
3. In what common situations an understanding of consideration is important
4. What promises are enforceable without consideration

### General Perspectives on Consideration

#### Learning Objectives

1. Understand what “consideration” is in contract law.
2. Recognize what purposes the doctrine serves.
3. Understand how the law determines whether consideration exists.
4. Know the elements of consideration.

#### 10.1 The Purpose of Consideration

This chapter continues our inquiry into whether the parties created a valid contract. In [Chapter 9 "The Agreement"](#), we saw that the first requisite of a valid contract is an agreement: offer and acceptance. In this chapter, we assume that agreement has been reached and concentrate on one of its crucial aspects: the existence of consideration. Which of the following, if any, is a contract?

1. Betty offers to give a book to Lou. Lou accepts.
2. Betty offers Lou the book in exchange for Lou’s promise to pay twenty-five dollars. Lou accepts.
3. Betty offers to give Lou the book if Lou promises to pick it up at Betty’s house. Lou agrees.

In American law, only the second situation is a binding contract, because only that contract contains consideration, a set of mutual promises in which each party agrees to give up something to the benefit of the other. This chapter will explore the meaning and rationale of that statement.

The question of what constitutes a binding contract has been answered differently throughout history and in other cultures. For example, under Roman law, a contract without consideration was binding if certain formal requirements were met. And in the Anglo-American tradition, the presence of a seal—the wax impression affixed to a document—was once sufficient to make a contract binding without any other consideration. The seal is no longer a substitute for consideration, although in some states it creates a presumption of consideration; in forty-nine states, the Uniform Commercial Code (UCC) has abolished the seal on contracts for the sale of goods. (Louisiana has not adopted UCC Article 2.)

Whatever its original historical purposes, and however apparently arcane, the doctrine of consideration serves some still-useful purposes. It provides objective evidence for asserting that a contract exists; it distinguishes between enforceable and unenforceable bargains; and it is a check against rash, unconsidered action, against thoughtless promise making. Lon L. Fuller, “Consideration and Form,” *Columbia Law Review* 41 (1941): 799.

## 10.2 A Definition of Consideration

Consideration is said to exist when the promisor receives some benefit for his promise and the promisee gives up something in return; it is the bargained-for price you pay for what you get. That may seem simple enough. But as with much in the law, the complicating situations are never very far away. The “something” that is promised or delivered cannot be just anything, such as a feeling of pride, warmth, amusement, or friendship; it must be something known as a legal detriment—an act, forbearance, or a promise of such from the promisee. The detriment need not be an actual detriment; it may in fact be a benefit to the promisee, or at least not a loss. The detriment to one side is usually a legal benefit to the other, but the detriment to the promisee need not confer a tangible benefit on the promisor; the promisee can agree to forego

something without that something being given to the promisor. Whether consideration is legally sufficient has nothing to do with whether it is morally or economically adequate to make the bargain a fair one. Moreover, legal consideration need not even be certain; it can be a promise contingent on an event that may never happen. Consideration is a legal concept, and it centers on the giving up of a legal right or benefit.

Consideration has two elements. The first, as just outlined, is whether the promisee has incurred a legal detriment—given up something, paid some “price,” though it may be, for example, the promise to do something, like paint a house. (Some courts—although a minority—take the view that a bargained-for legal benefit to the promisor is sufficient consideration.) The second element is whether the legal detriment was bargained for: did the promisor specifically intend the act, forbearance, or promise in return for his promise? Applying this two-pronged test to the three examples given at the outset of the chapter, we can easily see why only in the second is there legally sufficient consideration. In the first, Lou incurred no legal detriment; he made no pledge to act or to forbear from acting, nor did he in fact act or forbear from acting. In the third example, what might appear to be such a promise is not really so. Betty made a promise on a condition that Lou comes to her house; the intent clearly is to make a gift.

### 10.3 Legal Sufficiency

#### Learning Objectives

1. Know in general what “legal sufficiency” means when examining consideration.
2. Recognize how the concept operates in such common situations as threat of litigation, and accord and satisfaction.
3. Understand why illusory promises are unenforceable, and how courts deal with needs, outputs, and exclusive dealings contracts.

#### 3.1 The Concept of Legal Sufficiency

As suggested in [Section 10.1 "General Perspectives on Consideration"](#), what is required in contract is the exchange of a legal detriment and a legal benefit; if that happens, the consideration is said to have legal sufficiency.

### **Actual versus Legal Detriment**

Suppose Phil offers George \$500 if George will quit smoking for one year. Is Phil's promise binding? Because George is presumably benefiting by making and sticking to the agreement—surely his health will improve if he gives up smoking—how can his act be considered a legal detriment? The answer is that there is forbearance on George's part: George is legally entitled to smoke, and by contracting not to, he suffers a loss of his legal right to do so. This is a legal detriment; consideration does not require an actual detriment.

### **Adequacy of Consideration**

Scrooge offers to buy Caspar's motorcycle, worth \$700, for \$10 and a shiny new fountain pen (worth \$5). Caspar agrees. Is this agreement supported by adequate consideration? Yes, because both have agreed to give up something that is theirs: Scrooge, the cash and the pen; Caspar, the motorcycle. Courts are not generally concerned with the economic adequacy of the consideration but instead with whether it is present. As Judge Richard A. Posner puts it, "To ask whether there is consideration is simply to inquire whether the situation is one of exchange and a bargain has been struck. To go further and ask whether the consideration is adequate would require the court to do what...it is less well equipped to do than the parties—decide whether the price (and other essential terms) specified in the contract are reasonable. "Richard A. Posner, *Economic Analysis of Law*" (New York: Aspen, 1973), 46. In short, "courts do not inquire into the adequacy of consideration."

Of course, normally, parties to contracts will not make such a one-sided deal as Scrooge and Caspar's. But there is a common class of contracts in which nominal consideration—usually one dollar—is recited in printed forms. Usually these are option contracts, in which "in consideration of one dollar in hand paid and receipt of which is hereby acknowledged" one

party agrees to hold open the right of the other to make a purchase on agreed terms. The courts will enforce these contracts if the dollar is intended “to support a short-time option proposing an exchange on fair terms. *Restatement (Second) of Contracts, Section 87(b)*. If, however, the option is for an unreasonably long period of time and the underlying bargain is unfair (the Restatement gives as an example a ten-year option permitting the optionee to take phosphate rock from a widow’s land at a per-ton payment of only one-fourth the prevailing rate), then the courts are unlikely to hold that the nominal consideration makes the option irrevocable.

Because the consideration on such option contracts is nominal, its recital in the written instrument is usually a mere formality, and it is frequently never paid; in effect, the recital of nominal consideration is false. Nevertheless, the courts will enforce the contract—precisely because the recital has become a formality and nobody objects to the charade. Moreover, it would be easy enough to upset an option based on nominal consideration by falsifying oral testimony that the dollar was never paid or received. In a contest between oral testimonies where the incentive to lie is strong and there is a written document clearly incorporating the parties’ agreement, the courts prefer the latter. However, as [Section 10.4.1 "Consideration for an Option"](#), *Board of Control of Eastern Michigan University v. Burgess*, demonstrates, the state courts are not uniform on this point, and it is a safe practice always to deliver the consideration, no matter how nominal.

## 2.2 Applications of the Legal Sufficiency Doctrine

This section discusses several common circumstances where the issue of whether the consideration proffered (offered up) is adequate.

### **Threat of Litigation: Covenant Not to Sue**

Because every person has the legal right to file suit if he or she feels aggrieved, a promise to refrain from going to court is sufficient consideration to support a promise of payment or performance. In *Dedeaux v. Young*, Dedeaux purchased property and promised to make certain payments to Young, the broker. *Dedeaux v. Young*, 170 So.2d 561 (1965). But Dedeaux thereafter failed to make these payments, and Young threatened suit; had he filed papers in court, the transfer of title could have been blocked. To keep Young from suing, Dedeaux promised to pay a 5 percent commission if Young would stay out of court. Dedeaux later resisted paying on the ground that he had never made such a promise and that even if he had, it did not amount to a contract because there was no consideration from Young. The court disagreed, holding that the evidence supported Young's contention that Dedeaux had indeed made such a promise and upholding Young's claim for the commission because "a request to forbear to exercise a legal right has been generally accepted as sufficient consideration to support a contract." If Young had had no grounds to sue—for example, if he had threatened to sue a stranger, or if it could be shown that Dedeaux had no obligation to him originally—then there would have been no consideration because Young would not have been giving up a legal right. A promise to forebear suing in return for settlement of a dispute is called a covenant not to sue (*covenant* is another word for agreement).

### **Illusory Promises**

Not every promise is a pledge to do something. Sometimes it is an illusory promise, where the terms of the contract really bind the promisor to give up nothing, to suffer no detriment. For example, Lydia offers to pay Juliette \$10 for mowing Lydia's lawn. Juliette promises to mow the lawn if she feels like it. May Juliette enforce the contract? No, because Juliette has incurred no legal detriment; her promise is illusory, since by doing nothing she still falls within the literal wording of her promise. The doctrine that such bargains are unenforceable is sometimes referred to as the rule of mutuality of obligation: if one party to a contract has not made a binding obligation, neither is the other party bound. Thus if A contracts to hire B for a year at \$6,000 a month, reserving the right to dismiss B at any time (an "option to cancel" clause), and

B agrees to work for a year, A has not really promised anything; A is not bound to the agreement, and neither is B.

The illusory promise presents a special problem in agreements for exclusive dealing, outputs, and needs contracts.

### **Outputs Contracts and Needs Contracts**

A similar issue arises with outputs contracts and needs contracts. In an outputs contract, the seller—say a coal company—agrees to sell its entire yearly output of coal to an electric utility. Has it really agreed to produce and sell any coal at all? What if the coal-mine owner decides to shut down production to take a year’s vacation—is that a violation of the agreement? Yes. The law imposes upon the seller here a duty to produce and sell a reasonable amount. Similarly, if the electric utility contracted to buy all its requirements of coal from the coal company—a needs contract—could it decide to stop operation entirely and take no coal? No, it is required to take a reasonable amount.

## **10.3 Promises Enforceable without Consideration**

### **Learning Objective**

1. Understand the exceptions to the requirement of consideration.

For a variety of policy reasons, courts will enforce certain types of promises even though consideration may be absent. Some of these are governed by the Uniform Commercial Code (UCC); others are part of the established common law.

### **3.1 Promises Enforceable without Consideration at Common Law**

#### **Past Consideration**

Ordinarily, past consideration is not sufficient to support a promise. By past consideration, the courts mean an act that could have served as consideration if it had been bargained for at the time but that was not the subject of a bargain. For example, Mrs. Ace’s dog Fluffy escapes from

her mistress's condo at dusk. Robert finds Fluffy, sees Mrs. Ace, who is herself out looking for her pet, and gives Fluffy to her. She says, "Oh, thank you for finding my dear dog. Come by my place tomorrow morning and I'll give you fifty dollars as a reward." The next day Robert stops by Mrs. Ace's condo, but she says, "Well, I don't know. Fluffy soiled the carpet again last night. I think maybe a twenty-dollar reward would be plenty." Robert cannot collect the fifty dollars. Even though Mrs. Ace might have a moral obligation to pay him and honor her promise, there was no consideration for it. Robert incurred no legal detriment; his contribution—finding the dog—was paid out before her promise, and his past consideration is invalid to support a contract. There was no bargained-for exchange.

However, a valid consideration, given in the past to support a promise, can be the basis for another, later contract under certain circumstances. These occur when a person's duty to act for one reason or another has become no longer binding. If the person then makes a new promise based on the unfulfilled past duty, the new promise is binding without further consideration. Three types of cases follow.

### **3.2 Promise Revived after Statute of Limitations Has Passed**

A statute of limitations is a law requiring a lawsuit to be filed within a specified period of years. For example, in many states a contract claim must be sued on within six years; if the plaintiff waits longer than that, the claim will be dismissed, regardless of its merits. When the time period set forth in the statute of limitations has lapsed, the statute is said to have "run." If a debtor renews a promise to pay or acknowledges a debt after the running of a statute of limitations, then under the common law the promise is binding, although there is no consideration in the usual sense. In many states, this promise or acknowledgment must be in writing and signed by the debtor. Also, in many states, the courts will imply a promise or acknowledgment if the debtor makes a partial payment after the statute has run.

## Voidable Duties

Some promises that might otherwise serve as consideration are voidable by the promisor, for a variety of reasons, including infancy, fraud, duress, or mistake. But a voidable contract does not automatically become void, and if the promisor has not avoided the contract but instead thereafter renews his promise, it is binding. For example, Mr. Melvin sells his bicycle to Seth, age thirteen. Seth promises to pay Mr. Melvin one hundred dollars. Seth may repudiate the contract, but he does not. When he turns eighteen, he renews his promise to pay the one hundred dollars. This promise is binding. (However, a promise made up to the time he turned eighteen would not be binding, since he would still have been a minor.)

## Promissory Estoppel

We examined the meaning of this forbidding phrase in [Chapter 8 "Introduction to Contract Law"](#) (recall the English *High Trees* case). It represents another type of promise that the courts will enforce without consideration. Simply stated, promissory estoppel means that the courts will stop the promisor from claiming that there was no consideration. The doctrine of promissory estoppel is invoked in the interests of justice when three conditions are met: (1) the promise is one that the promisor should reasonably expect to induce the promisee to take action or forbear from taking action of a definite and substantial character; (2) the action or forbearance is taken; and (3) injustice can be avoided only by enforcing the promise. (The complete phraseology is “promissory estoppel with detrimental reliance.”)

Timko served on the board of trustees of a school. He recommended that the school purchase a building for a substantial sum of money, and to induce the trustees to vote for the purchase, he promised to help with the purchase and to pay at the end of five years the purchase price less the down payment. At the end of four years, Timko died. The school sued his estate, which defended on the ground that there was no consideration for the promise. Timko was promised or given nothing in return, and the purchase of the building was of no direct benefit to him (which would have made the promise enforceable as a unilateral contract). The court ruled that

under the three-pronged promissory estoppel test, Timko's estate was liable. *Estate of Timko v. Oral Roberts Evangelistic Assn.*, 215 N.W.2d 750 (Mich. App. 1974).

Cases involving pledges of charitable contributions have long been troublesome to courts. Recognizing the necessity to charitable institutions of such pledges, the courts have also been mindful that a mere pledge of money to the general funds of a hospital, university, or similar institution does not usually induce substantial action but is, rather, simply a promise without consideration. When the pledge does prompt a charitable institution to act, promissory estoppel is available as a remedy. In about one-quarter of the states, another doctrine is available for cases involving simple pledges: the "mutual promises" theory, whereby the pledges of many individuals are taken as consideration for each other and are binding against each promisor. This theory was not available to the plaintiff in *Timko* because his was the only promise.

### **Moral Obligation**

The Restatement allows, under some circumstances, the enforcement of past-consideration contracts. It provides as follows in Section 86, "Promise for Benefit Received":

A promise made in recognition of a benefit previously received by the promisor from the promisee is binding to the extent necessary to prevent injustice.

A promise is not binding under Subsection (1)

if the promisee conferred the benefit as a gift or for other reasons the promisor has not been unjustly enriched; or

to the extent that its value is disproportionate to the benefit.

### **3.3 Promises Enforceable without Consideration by Statute**

We have touched on several common-law exceptions to the consideration requirement. Some also are provided by statute.

## Under the UCC

The UCC permits one party to discharge, without consideration, a claim or right arising out of an alleged breach of contract by the other party. This is accomplished by delivering to the other party a signed written waiver or renunciation. Uniform Commercial Code, Section 1-107. This provision applies to any contract governed by the UCC and is not limited to the sales provisions of Article 2.

The UCC also permits a party to discharge the other side without consideration when there is no breach, and it permits parties to modify their Article 2 contract without consideration. Uniform Commercial Code, Sections 2-209(4) and 2-209(1). The official comments to the UCC section add the following: “However, modifications made thereunder must meet the test of good faith imposed by this Act. The effective use of bad faith to escape performance on the original contract terms is barred, and the extortion of a “modification” without legitimate commercial reason is ineffective as a violation of the duty of good faith.”

Seller agrees to deliver a ton of coal within seven days. Buyer needs the coal sooner and asks Seller to deliver within four days. Seller agrees. This promise is binding even though Seller received no additional consideration beyond the purchase price for the additional duty agreed to (the duty to get the coal to Buyer sooner than originally agreed). The UCC allows a merchant’s firm offer, signed, in writing, to bind the merchant to keep the offer to buy or sell open without consideration. Uniform Commercial Code, Section 2-205. This is the UCC’s equivalent of a common-law option, which, as you recall, does require consideration.

Section 1-207 of the UCC allows a party a reservation of rights while performing a contract. This section raises a difficult question when a debtor issues an in-full-payment check in payment of a disputed debt. As noted earlier in this chapter, because under the common law the creditor’s acceptance of an in-full-payment check in payment of a disputed debt constitutes an accord and satisfaction, the creditor cannot collect an amount beyond the check. But what if the creditor, in cashing the check, reserves the right (under Section 1-207) to sue for an amount

beyond what the debtor is offering? The courts are split on the issue: regarding the sale of goods governed by the UCC, some courts allow the creditor to sue for the unpaid debt notwithstanding the check being marked "paid in full," and others do not.

## Chapter 11 Real Assent (Hardbound chapter10)

### 11.1 Real Assent

#### Learning Objectives

After reading this chapter, you should understand the following:

1. Contracts require “a meeting of the minds” between competent parties, and if there is no such “meeting,” the agreement is usually voidable.
2. Parties must enter the contract voluntarily, without duress or undue influence.
3. Misrepresentation or fraud, when proven, vitiates a contract.
4. A mistake may make a contract voidable.
5. Parties to a contract must have capacity—that is, not labor under infancy, intoxication, or insanity.

We turn to the second of the four requirements for a valid contract. In addition to manifestation of assent, a party’s assent must be real; he or she must consent to the contract freely, with adequate knowledge, and must have capacity. The requirement of real assent raises the following major questions:

1. Did the parties enter into the contract of their own free will, or was one forced to agree under duress or undue influence?
2. Did the parties enter into the contract with full knowledge of the facts, or was one or both led to the agreement through fraud or mistake?
3. Did both parties have the capacity to make a contract?

### 11.2 Duress and Undue Influence

#### Learning Objectives

1. Recognize that if a person makes an agreement under duress (being forced to enter a contract against his or her will), the agreement is void.

2. Understand what undue influence is and what the typical circumstances are when it arises to make a contract voidable.

## 1.1 Duress

When a person is forced to do something against his or her will, that person is said to have been the victim of duress—compulsion. There are two types of duress: physical duress and duress by improper threat. A contract induced by physical violence is void.

### Physical Duress

If a person is forced into entering a contract on threat of physical bodily harm, he or she is the victim of physical duress. It is defined by the Restatement (Second) of Contracts in Section 174: “If conduct that appears to be a manifestation of assent by a party who does not intend to engage in that conduct is physically compelled by duress, the conduct is not effective as a manifestation of assent.”

Comment (a) to Section 174 provides in part, “This Section involves an application of that principle to those *relatively rare situations in which actual physical force* has been used to compel a party to appear to assent to a contract....The essence of this type of duress is that a party is compelled by physical force to do an act that he has no intention of doing. He is, it is sometimes said, ‘a mere mechanical instrument.’ The result is that there is no contract at all, or a ‘void contract’ as distinguished from a voidable one” (emphasis added).

The Restatement is undoubtedly correct that there are “relatively rare situations in which actual physical force” is used to compel assent to a contract. Extortion is a crime.

### Duress by Threat

The second kind of duress is *duress by threat*; it is more common than physical duress. Here the perpetrator threatens the victim, who feels there is no reasonable alternative but to assent to the contract. It renders the contract voidable. This rule contains a number of elements.

First, the threat must be improper. Second, there must be no reasonable alternative. If, for example, a supplier threatens to hold up shipment of necessary goods unless the buyer agrees to pay more than the contract price, this would not be duress if the buyer could purchase identical supplies from someone else. Third, the test for inducement is subjective. It does not matter that the person threatened is unusually timid or that a reasonable person would not have felt threatened. The question is whether the threat in fact induced assent by the victim. Such facts as the victim's belief that the threatener had the ability to carry out the threat and the length of time between the threat and assent are relevant in determining whether the threat did prompt the assent.

There are many types of improper threats that might induce a party to enter into a contract: threats to commit a crime or a tort (e.g., bodily harm or taking of property), to instigate criminal prosecution, to instigate civil proceedings when a threat is made in bad faith, to breach a "duty of good faith and fair dealing under a contract with the recipient," or to disclose embarrassing details about a person's private life.

Jack buys a car from a local used-car salesman, Mr. Olson, and the next day realizes he bought a lemon. He threatens to break windows in Olson's showroom if Olson does not buy the car back for \$2,150, the purchase price. Mr. Olson agrees. The agreement is voidable, even though the underlying deal is fair, if Olson feels he has no reasonable alternative and is frightened into agreeing. Suppose Jack knows that Olson has been tampering with his cars' odometers, a federal offense, and threatens to have Olson prosecuted if he will not repurchase the car. Even though Olson may be guilty, this threat makes the repurchase contract voidable, because it is a misuse for personal ends of a power (to go to the police) given each of us for other purposes. If these threats failed, suppose Jack then tells Olson, "I'm going to haul you into court and sue your pants off." If Jack means he will sue for his purchase price, this is not an improper threat, because everyone has the right to use the courts to gain what they think is rightfully theirs. But if Jack meant that he would fabricate damages done him by a (falsely) claimed odometer manipulation, that would be an improper threat. Although Olson could defend against the suit, his reputation would suffer in the meantime from his being accused of odometer tampering.

A threat to breach a contract that induces the victim to sign a new contract could be improper. Suppose that as part of the original purchase price, Olson agrees to make all necessary repairs and replace all failed parts for the first ninety days. At the end of one month, the transmission dies, and Jack demands a replacement. Olson refuses to repair the car unless Jack signs a contract agreeing to buy his next car from Olson. Whether this threat is improper depends on whether Jack has a reasonable alternative; if a replacement transmission is readily available and Jack has the funds to pay for it, he might have an alternative in suing Olson in small claims court for the cost. But if Jack needs the car immediately and he is impecunious, then the threat would be improper and the contract voidable. A threat to breach a contract is not necessarily improper, however. It depends on whether the new contract is fair and equitable because of unanticipated circumstances. If, for example, Olson discovers that he must purchase a replacement transmission at three times the anticipated cost, his threat to hold up work unless Jack agrees to pay for it might be reasonable.

## 1.2 Undue Influence

The Restatement of Contracts (Second) characterizes undue influence as “unfair persuasion.” Restatement (Second) of Contracts, Section 177. It is a milder form of duress than physical harm or threats. The unfairness does not lie in any misrepresentation; rather, it occurs when the victim is under the domination of the persuader or is one who, in view of the relationship between them, is warranted in believing that the persuader will act in a manner detrimental to the victim’s welfare if the victim fails to assent. It is the improper use of trust or power to deprive a person of free will and substitute instead another’s objective. Usually the fact pattern involves the victim being isolated from receiving advice except from the persuader. Falling within this rule are situations where, for example, a child takes advantage of an infirm parent, a doctor takes advantage of an ill patient, or a lawyer takes advantage of an unknowledgeable client. If there has been undue influence, the contract is voidable by the party who has been unfairly persuaded. Whether the relationship is one of domination and the persuasion is unfair is a factual question. The answer hinges on a host of variables, including “the unfairness of the

resulting bargain, the unavailability of independent advice, and the susceptibility of the person persuaded. *Restatement (Second) of Contracts, Section 177(b)*.

## 11.2 Misrepresentation

### Learning Objectives

1. Understand the two types of misrepresentation: fraudulent and nonfraudulent.
2. Distinguish between fraudulent misrepresentation in the execution and fraudulent misrepresentation in the inducement.
3. Know the elements necessary to prove fraudulent and nonfraudulent misrepresentation.
4. Recognize the remedies for misrepresentation.

### 2.1 General Description

Misrepresentation is a statement of fact that is not consistent with the truth. If misrepresentation is intentional, it is fraudulent misrepresentation; if it is not intentional, it is nonfraudulent misrepresentation, which can be either negligent or innocent.

In further taxonomy, courts distinguish between fraud in the execution and fraud in the inducement. Fraud in the execution is defined by the Restatement as follows: “If a misrepresentation as to the character or essential terms of a proposed contract induces conduct that appears to be a manifestation of assent by one who neither knows nor has reasonable opportunity to know of the character or essential terms of the proposed contract, his conduct is not effective as a manifestation of assent.” *Restatement (Second) of Contracts, Section 163*. For example, Alphonse and Gaston decide to sign a written contract incorporating terms to which they have agreed. It is properly drawn up, and Gaston reads it and approves it. Before he can sign it, however, Alphonse shrewdly substitutes a different version to which Gaston has not agreed. Gaston signs the substitute version. There is no contract. There has been fraud in the execution.

Fraud in the inducement is more common. It involves some misrepresentation about the subject of the contract that induces assent. Alphonse tells Gaston that the car Gaston is buying from Alphonse has just been overhauled—which pleases Gaston—but it has not been. This renders the contract voidable.

## 2.2 Fraudulent Misrepresentation

Necessary to proving fraudulent misrepresentation (usually just “fraud,” though technically “fraud” is the crime and “fraudulent misrepresentation” is the civil wrong) is a misstatement of fact that is intentionally made and justifiably relied upon.

## 2.3 Misstatement of Fact

Again, generally, any statement not in accord with the facts (a fact is something amenable to testing as true) is a misrepresentation. Falsity does not depend on intent. A typist’s unnoticed error in a letter (inadvertently omitting the word “not,” for example, or transposing numbers) can amount to a misrepresentation on which the recipient may rely (it is not fraudulent misrepresentation). A half-truth can amount to a misrepresentation, as, for example, when the seller of a hotel says that the income is from both permanent and transient guests but fails to disclose that the bulk of the income is from single-night stopovers by seamen using the hotel as a brothel. *Ikeda v. Curtis*, 261 P.2d 684 (Wash. 1951).

## 2.4 Concealment

Another type of misrepresentation is concealment. It is an act that is equivalent to a statement that the facts are to the contrary and that serves to prevent the other party from learning the true statement of affairs; it is hiding the truth. A common example is painting over defects in a building—by concealing the defects, the owner is misrepresenting the condition of the property. The act of concealment need not be direct; it may consist of sidetracking the other

party from gaining necessary knowledge by, for example, convincing a third person who has knowledge of the defect not to speak. Concealment is always a misrepresentation.

## 2.5 Nondisclosure

A more passive type of concealment is nondisclosure. Although generally the law imposes no obligation on anyone to speak out, nondisclosure of a fact can operate as a misrepresentation under certain circumstances. This occurs, for example, whenever the other party has erroneous information, or, as *Reed v. King* shows, where the nondisclosure amounts to a failure to act in good faith, or where the party who conceals knows or should know that the other side cannot, with reasonable diligence, discover the truth.

In a remarkable 1991 case out of New York, a New York City stockbroker bought an old house upstate (basically anyplace north of New York City) in the village of Nyack, north of New York City, and then wanted out of the deal when he discovered—the defendant seller had not told him—that it was “haunted.” The court summarized the facts: “Plaintiff, to his horror, discovered that the house he had recently contracted to purchase was widely reputed to be possessed by poltergeists [ghosts], reportedly seen by defendant seller and members of her family on numerous occasions over the last nine years. Plaintiff promptly commenced this action seeking rescission of the contract of sale. Supreme Court reluctantly dismissed the complaint, holding that plaintiff has no remedy at law in this jurisdiction.”

The high court of New York ruled he could rescind the contract because the house was “haunted as a matter of law”: the defendant had promoted it as such on village tours and in *Reader’s Digest*. She had concealed it, and no reasonable buyer’s inspection would have revealed the “fact.” The dissent basically hooted, saying, “The existence of a poltergeist is no more binding upon the defendants than it is upon this court.” *Stambovsky v. Ackley*, 169 A.D.2d 254 (N.Y. 1991).

### **Statement Made False by Subsequent Events**

If a statement of fact is made false by later events, it must be disclosed as false. For example, in idle chatter one day, Alphonse tells Gaston that he owns thirty acres of land. In fact, Alphonse owns only twenty-seven, but he decided to exaggerate a little. He meant no harm by it, since the conversation had no import. A year later, Gaston offers to buy the “thirty acres” from Alphonse, who does not correct the impression that Gaston has. The failure to speak is a nondisclosure—presumably intentional, in this situation—that would allow Gaston to rescind a contract induced by his belief that he was purchasing thirty acres.

### **Statements of Opinion**

An opinion, of course, is not a fact; neither is sales puffery. For example, the statements “In my opinion this apple is very tasty” and “These apples are the best in the county” are not facts; they are not expected to be taken as true. Reliance on opinion is hazardous and generally not considered justifiable.

If Jack asks what condition the car is in that he wishes to buy, Mr. Olson’s response of “Great!” is not ordinarily a misrepresentation. As the Restatement puts it: “The propensity of sellers and buyers to exaggerate the advantages to the other party of the bargains they promise is well recognized, and to some extent their assertions must be discounted. *Restatement (Second) of Contracts, Section 168(d)*. Vague statements of quality, such as that a product is “good,” ought to suggest nothing other than that such is the personal judgment of the opinion holder.

Despite this general rule, there are certain exceptions that justify reliance on opinions and effectively make them into facts. Merely because someone is less astute than the one with whom she is bargaining does not give rise to a claim of justifiable reliance on an unwarranted opinion. But if the person is inexperienced and susceptible or gullible to blandishments, the contract can be voided, as illustrated in *Vokes v. Arthur Murray, Inc.*

## **Misstatement of Law**

Incorrect assertions of law usually do not give rise to any relief, but sometimes they do. An assertion that “the city has repealed the sales tax” or that a court has cleared title to a parcel of land is a statement of fact; if such assertions are false, they are governed by the same rules that govern misrepresentations of fact generally. An assertion of the legal consequences of a given set of facts is generally an opinion on which the recipient relies at his or her peril, especially if both parties know or assume the same facts. Thus, if there is a lien on a house, the seller’s statement that “the courts will throw it out, you won’t be bothered by it” is an opinion. A statement that “you can build a five-unit apartment on this property” is not actionable because, at common law, people are supposed to know what the local and state laws are, and nobody should rely on a layperson’s statement about the law. However, if the statement of law is made by a lawyer or real estate broker, or some other person on whom a layperson may justifiably rely, then it may be taken as a fact and, if untrue, as the basis for a claim of misrepresentation. (Assertions about foreign laws are generally held to be statements of fact, not opinion.)

## **Assertions of Intention**

Usually, assertions of intention are not considered facts. The law allows considerable leeway in the honesty of assertions of intention. The Restatement talks in terms of “a misrepresentation of intention...consistent with reasonable standards of fair dealing. *Restatement (Second) of Contracts, Section 171(1)*. The right to misstate intentions is useful chiefly in the acquisition of land; the cases permit buyers to misrepresent the purpose of the acquisition so as not to arouse the suspicion of the seller that the land is worth considerably more than his asking price. To be a misrepresentation that will permit rescission, an assertion of intention must be false at the time made; that is, the person asserting an intention must not then have intended it. That later he or she does not carry out the stated intention is not proof that there was no intention at the time asserted. Moreover, to render a contract voidable, the false assertion of intention must be harmful in some way to other interests of the recipient. Thus, in the common example, the buyer of land tells the seller that he intends to build a residence on the lot, but he actually

intends to put up a factory and has lied because he knows that otherwise the seller will not part with it because her own home is on an adjacent lot. The contract is voidable by the seller. So a developer says, as regards the picturesque old barn on the property, “I’ll sure try to save it,” but after he buys the land he realizes it would be very expensive (and in the way), so he does not try to save it. No misrepresentation.

### **Intentionally Made Misrepresentation**

The second element necessary to prove fraud is that the misrepresentation was intentionally made. A misrepresentation is intentionally made “if the maker intends his assertion to induce a party to manifest his assent and the maker (a) knows or believes that the assertion is not in accord with the facts, or (b) does not have the confidence that he states or implies in the truth of the assertion, or (c) knows that he does not have the basis that he states or implies for the assertion. *Restatement (Second) of Contracts, Section 162(1)*.

The question of intent often has practical consequences in terms of the remedy available to the plaintiff. If the misrepresentation is fraudulent, the plaintiff may, as an alternative to avoiding the contract, recover damages. Some of this is discussed in [Section 10.2.4 "Remedies"](#) and more fully in [Chapter 15 "Remedies"](#), where we see that some states would force the plaintiff to elect one of these two remedies, whereas other states would allow the plaintiff to pursue both remedies (although only one type of recovery would eventually be allowed). If the misrepresentation is not intentional, then the common law allowed the plaintiff only the remedy of rescission. But the Uniform Commercial Code (UCC), Section 2-721, allows both remedies in contracts for the sale of goods, whether the misrepresentation is fraudulent or not, and does not require election of remedies.

### **Reliance**

The final element necessary to prove fraud is reliance by the victim. He or she must show that the misrepresentation induced assent—that is, he or she relied on it. The reliance need not be solely on the false assertion; the defendant cannot win the case by demonstrating that the

plaintiff would have assented to the contract even without the misrepresentation. It is sufficient to avoid the contract if the plaintiff weighed the assertion as one of the important factors leading him to make the contract, and he believed it to be true. The person who asserts reliance to avoid a contract must have acted in good faith and reasonably in relying on the false assertion. Thus if the victim failed to read documents given him that truly stated the facts, he cannot later complain that he relied on a contrary statement, as, for example, when the purchaser of a car dealership was told the inventory consisted of new cars, but the supporting papers, receipt of which he acknowledged, clearly stated how many miles each car had been driven. If Mr. Olson tells Jack that the car Jack is interested in is “a recognized classic,” and if Jack doesn’t care a whit about that but buys the car because he likes its tail fins, he will have no case against Mr. Olson when he finds out the car is not a classic: it didn’t matter to him, and he didn’t rely on it.

Ordinarily, the person relying on a statement need not verify it independently. However, if verification is relatively easy, or if the statement is one that concerns matters peculiarly within the person’s purview, he or she may not be held to have justifiably relied on the other party’s false assertion. Moreover, usually the rule of reliance applies to statements about past events or existing facts, not about the occurrence of events in the future.

### **Nonfraudulent Misrepresentation**

Nonfraudulent misrepresentation may also be grounds for some relief. There are two types: negligent misrepresentation and innocent misrepresentation.

### **Negligent Misrepresentation**

Where representation is caused by carelessness, it is negligent misrepresentation. To prove it, a plaintiff must show a negligent misstatement of fact that is material and justifiably relied upon.

## **Negligent**

As an element of misrepresentation, “negligent” here means the party who makes the representation was careless. A potential buyer of rural real estate asks the broker if the neighborhood is quiet. The broker assures her it is. In fact, the neighbors down the road have a whole kennel of hunting hounds that bark a lot. The broker didn’t know that; she just assumed the neighborhood was quiet. That is negligence: failure to use appropriate care.

## **Misstatement of Fact**

Whether a thing is a fact may be subject to the same general analysis used in discussing fraudulent misrepresentation. (A person could negligently conceal a fact, or negligently give an opinion, as in legal malpractice.)

## **Materiality**

A material misrepresentation is one that “would be likely to induce a reasonable person to manifest his assent” or that “the maker knows...would be likely to induce the recipient to do so. *Restatement (Second) of Contracts, Section 162(2)*. An honestly mistaken statement that the house for sale was built in 1922 rather than 1923 would not be the basis for avoiding the contract because it is not material unless the seller knew that the buyer had sentimental or other reasons for purchasing a house built in 1922.

We did not mention materiality as an element of fraud; if the misrepresentation is fraudulent, the victim can avoid the contract, no matter the significance of the misrepresentation. So although materiality is not technically required for fraudulent misrepresentation, it is usually a crucial factor in determining whether the plaintiff did rely. Obviously, the more immaterial the false assertion, the less likely it is that the victim relied on it to his detriment. This is especially the case when the defendant knows that he does not have the basis that he states for an assertion but believes that the particular point is unimportant and therefore immaterial. And of course it is usually not worth the plaintiff’s while to sue over an immaterial fraudulent

misrepresentation. Consequently, for practical purposes, materiality is an important consideration in most cases. *Reed v. King* discusses materiality (as well as nondisclosure).

### **Justifiable Reliance**

The issues here for negligent misrepresentation are the same as those set out for fraudulent misrepresentation.

Negligent misrepresentation implies culpability and is usually treated the same as fraudulent misrepresentation; if the representation is not fraudulent, however, it cannot be the basis for rescission unless it is also material.

### **Innocent Misrepresentation**

The elements necessary to prove innocent misrepresentation are, reasonably enough, based on what we've looked at so far, as follows: an innocent misstatement of fact that is material and justifiably relied upon.

It is not necessary here to go over the elements in detail. The issues are the same as previously discussed, except now the misrepresentation is innocent. The plaintiffs purchased the defendants' eighteen-acre parcel on the defendants' representation that the land came with certain water rights for irrigation, which they believed was true. It was not true. The plaintiffs were entitled to rescission on the basis of innocent misrepresentation. *Leshner v. Strid*, 996 P.2d 988 (Or. Ct. App. 2000).

### 11.3 Remedies

Remedies will be taken up in [Chapter 15 "Remedies"](#), but it is worth noting the difference between remedies for fraudulent misrepresentation and remedies for nonfraudulent misrepresentation.

Fraudulent misrepresentation has traditionally given the victim the right to rescind the contract promptly (return the parties to the before-contract status) *or* affirm it and bring an action for damages caused by the fraud, but not both. *Merritt v. Craig*, 753 A.2d 2 (Md. Ct. App. 2000). The UCC (Section 2-721) has rejected the “election of remedies” doctrine; it allows cumulative damages, such that the victim can both return the goods and sue for damages. And this is the modern trend for fraudulent misrepresentation: victims may first seek damages, and if that does not make them whole, they may seek rescission. *Ehrman v. Mann*, 979 So.2d 1011 (Fla. Ct. App. 2008). In egregious cases of fraud where the defendant has undertaken a pattern of such deceit, the rare civil remedy of punitive damages may be awarded against the defendant.

One further note: the burden of proof for fraudulent misrepresentation is that it must be proved not just “by a preponderance of the evidence,” as in the typical civil case, but rather “by clear, cogent, and convincing evidence”; the fact finder must believe the claim of fraud is very probably true. *Kirkham v. Smith*, 23 P.3d 10 (Wash. Ct. App. 2001).

### 11.4 Mistake

#### Learning Objectives

1. Recognize under what circumstances a person may be relieved of a unilateral mistake.
2. Recognize when a mutual mistake will be grounds for relief, and the types of mutual mistakes.

In discussing fraud, we have considered the ways in which trickery by the other party makes a contract void or voidable. We now examine the ways in which the parties might “trick” themselves by making assumptions that lead them mistakenly to believe that they have agreed

to something they have not. A mistake is “a belief about a fact that is not in accord with the truth. *Restatement (Second) of Contracts, Section 151*.

## **4.1 Mistake by One Party**

### **Unilateral Mistake**

Where one party makes a mistake, it is a unilateral mistake. The rule: ordinarily, a contract is not voidable because one party has made a mistake about the subject matter (e.g., the truck is not powerful enough to haul the trailer; the dress doesn't fit).

### **Exceptions**

If one side *knows or should know* that the other has made a mistake, he or she may not take advantage of it. A person who makes the mistake of not reading a written document will usually get no relief, nor will relief be afforded to one whose mistake is caused by negligence (a contractor forgets to add in the cost of insulation) unless the negligent party would suffer unconscionable hardship if the mistake were not corrected. Courts will allow the correction of drafting errors in a contract (“reformation”) in order to make the contract reflect the parties’ intention. *Sikora v. Vanderploeg*, 212 S.W.3d 277 (Tenn. Ct. App. 2006).

## **4.2 Mutual Mistake**

In the case of mutual mistake—both parties are wrong about the subject of the contract—relief may be granted.

The Restatement sets out three requirements for successfully arguing mutual mistake.

*Restatement (Second) of Contracts, Section 152*. The party seeking to avoid the contract must prove that

1. the mistake relates to a “basic assumption on which the contract was made,”
2. the mistake has a material effect on the agreed exchange of performances,
3. the party seeking relief does not bear the risk of the mistake.

*Basic assumption* is probably clear enough. In the famous “cow case,” the defendant sold the plaintiff a cow—Rose of Abalone—believed by both to be barren and thus of less value than a fertile cow (a promising young dairy cow in 2010 might sell for \$1,800). *Sherwood v. Walker*, 33 N.W. 919 (1887). Just before the plaintiff was to take Rose from the defendant’s barn, the defendant discovered she was “large with calf”; he refused to go on with the contract. The court held this was a mutual mistake of fact—“a barren cow is substantially a different creature than a breeding one”—and ruled for the defendant. That she was infertile was “a basic assumption,” but—for example—that hay would be readily available to feed her inexpensively was not, and had hay been expensive, that would not have vitiated the contract.

### **Material Effect on the Agreed-to Exchange of Performance**

“Material effect on the agreed-to exchange of performance” means that because of the mutual mistake, there is a significant difference between the value the parties thought they were exchanging compared with what they would exchange if the contract were performed, given the standing facts. Again, in the cow case, had the seller been required to go through with the deal, he would have given up a great deal more than he anticipated, and the buyer would have received an unagreed-to windfall.

### **Party Seeking Relief Does Not Bear the Risk of the Mistake**

Assume a weekend browser sees a painting sitting on the floor of an antique shop. The owner says, “That old thing? You can have it for \$100.” The browser takes it home, dusts it off, and hangs it on the wall. A year later a visitor, an expert in art history, recognizes the hanging as a famous lost El Greco worth \$1 million. The story is headlined; the antique dealer is chagrined and claims the contract for sale should be voided because both parties mistakenly thought they were dickering over an “old, worthless” painting. The contract is valid. The owner is said to bear the risk of mistake because he contracted with conscious awareness of his ignorance: he knew he didn’t know what the painting’s possible value might be, but he didn’t feel it worthwhile to have it appraised. He gambled it wasn’t worth much, and lost.

## 11.5 Capacity

### Learning Objectives

1. Understand that infants may avoid their contracts, with limitations.
2. Understand that insane or intoxicated people may avoid their contracts, with limitations.
3. Understand the extent to which contracts made by mentally ill persons are voidable, void, or effectively enforceable.
4. Recognize that contracts made by intoxicated persons may be voidable.

A contract is a meeting of minds. If someone lacks mental capacity to understand what he is assenting to—or that he is assenting to anything—it is unreasonable to hold him to the consequences of his act. At common law there are various classes of people who are presumed to lack the requisite capacity. These include infants (minors), the mentally ill, and the intoxicated.

### 5.1 Minors (or “Infants”)

#### The General Rule

The general rule is this: minors (or more legalistically “infants”) are in most states persons younger than seventeen years old; they can avoid their contracts, up to and within a reasonable time after reaching majority, subject to some exceptions and limitations. The rationale here is that infants do not stand on an equal footing with adults, and it is unfair to require them to abide by contracts made when they have immature judgment.

#### Exceptions and Complications

There are exceptions and complications here. We call out six of them.

## **Necessities**

First, as an exception to the general rule, infants are generally liable for the reasonable cost of necessities (for the reason that denying them the right to contract for necessities would harm them, not protect them). At common law, a necessity was defined as food, medicine, clothing, or shelter. In recent years, however, the courts have expanded the concept, so that in many states today, necessities include property and services that will enable the infant to earn a living and to provide for those dependent on him. If the contract is executory, the infant can simply disaffirm. If the contract has been executed, however, the infant must face more onerous consequences. Although he will not be required to perform under the contract, he will be liable under a theory of “quasi-contract” for the reasonable value of the necessity. In *Gastonia Personnel Corp. v. Rogers*, an emancipated infant, nineteen years old (before the age of minority was reduced), needed employment; he contracted with a personnel company to find him a job, for which it would charge him a fee. *Gastonia Personnel Corp. v. Rogers*, 172 S.E.2d 19 (N.C. 1970). The company did find him a job, and when he attempted to disaffirm his liability for payment on the grounds of infancy, the North Carolina court ruled against him, holding that the concepts of necessities “should be enlarged to include such...services as are reasonable and necessary to enable the infant to earn the money required to provide the necessities of life for himself” and his dependents.

## **Nonvoidable Contracts**

Second, state statutes variously prohibit disaffirmation for such contracts as insurance, education or medical care, bonding agreements, stocks, or bank accounts. In addition, an infant will lose her power to avoid the contract if the rights of third parties intervene. Roberta, an infant, sells a car to Oswald; Oswald, in turn, shortly thereafter sells it to Byers, who knows nothing of Roberta. May Roberta—still an infant—recover it from Byers? No: the rights of the third party have intervened. To allow the infant seller recovery in this situation would undermine faith in commercial transactions.

## **Misrepresentation of Age**

A third exception involves misrepresentation of age. Certainly, that the adult reasonably believed the infant was an adult is of no consequence in a contract suit. In many states, an infant may misrepresent his age and disaffirm in accordance with the general rule. But it depends. If an infant affirmatively lies about his age, the trend is to deny disaffirmation. A Michigan statute, for instance, prohibits an infant from disaffirming if he has signed a “separate instrument containing only the statement of age, date of signing and the signature.” And some states estop him from claiming to be an infant even if he less expressly falsely represented himself as an adult. Estoppel is a refusal by the courts on equitable grounds to allow a person to escape liability on an otherwise valid defense; unless the infant can return the consideration, the contract will be enforced. It is a question of fact how far a nonexpress (an implied) misrepresentation will be allowed to go before it is considered so clearly misleading as to range into the prohibited area. Some states hold the infant liable for damages for the tort of misrepresentation, but others do not. As William Prosser, the noted torts scholar, said of cases paying no attention to an infant’s lying about his age, “The effect of the decisions refusing to recognize tort liability for misrepresentation is to create a privileged class of liars who are a great trouble to the business world. William L. Prosser, *Handbook of the Law of Torts*, 4th ed. (St. Paul, MN: West, 1971), 999.

## **Ratification**

Fourth, when the infant becomes an adult, she has two choices: she may ratify the contract or disaffirm it. She may ratify explicitly; no further consideration is necessary. She may also do so by implication—for instance, by continuing to make payments or retaining goods for an unreasonable period of time. If the child has not disaffirmed the contract while still an infant, she may do so within a reasonable time after reaching majority; what is a “reasonable time” depends on the circumstances.

## **Duty to Return Consideration Received**

Fifth, in most cases of disavowal, the infant's only obligation is to return the goods (if he still has them) or repay the consideration (unless it has been dissipated); he does not have to account for what he wasted, consumed, or damaged during the contract. But since the age of majority has been lowered to eighteen or nineteen, when most young people have graduated from high school, some courts require, if appropriate to avoid injustice to the adult, that the infant account for what he got. (In *Dodson v. Shrader*, the supreme court of Tennessee held that an infant would—if the contract was fair—have to pay for the pickup truck he bought and wrecked.) *Dodson v. Shrader*, 824 S.W.2d 545 (Tenn. 1992).

## **Tort Connected with a Contract**

Sixth, the general rule is that infants are liable for their torts (e.g., assault, trespass, nuisance, negligence) unless the tort suit is only an indirect method of enforcing a contract. Henry, age seventeen, holds himself out to be a competent mechanic. He is paid \$500 to overhaul Baker's engine, but he does a careless job and the engine is seriously damaged. He offers to return the \$500 but disaffirms any further contractual liability. Can Baker sue him for his negligence, a tort? No, because such a suit would be to enforce the contract.

## **5.2 Persons Who Are Mentally Ill or Intoxicated**

### **Mentally Ill Persons**

The general rule is that a contract made by person who is mentally ill is voidable by the person when she regains her sanity, or, as appropriate, by a guardian. If, though, a guardian has been legally appointed for a person who is mentally ill, any contract made by the mentally ill person is void, but may nevertheless be ratified by the ward (the incompetent person who is under a guardianship) upon regaining sanity or by the guardian. *Restatement (Second) of Contracts, Section 13*.

However, if the contract was for a necessity, the other party may have a valid claim against the estate of the one who is mentally ill in order to prevent unjust enrichment. In other cases, whether a court will enforce a contract made with a person who is mentally ill depends on the circumstances. Only if the mental illness impairs the competence of the person in the particular transaction can the contract be avoided; the test is whether the person understood the nature of the business at hand. Upon avoidance, the mentally ill person must return any property in her possession. And if the contract was fair and the other party had no knowledge of the mental illness, the court has the power to order other relief.

### **Intoxicated Persons**

If a person is so drunk that he has no awareness of his acts, and if the other person knows this, there is no contract. The intoxicated person is obligated to refund the consideration to the other party unless he dissipated it during his drunkenness. If the other person is unaware of his intoxicated state, however, an offer or acceptance of fair terms manifesting assent is binding.

If a person is only partially inebriated and has some understanding of his actions, “avoidance depends on a showing that the other party induced the drunkenness or that the consideration was inadequate or that the transaction departed from the normal pattern of similar transactions; if the particular transaction is one which a reasonably competent person might have made, it cannot be avoided even though entirely executory.” Restatement (Second) of Contracts, Section 16(b). A person who was intoxicated at the time he made the contract may nevertheless subsequently ratify it. Thus where Mervin Hyland, several times involuntarily committed for alcoholism, executed a promissory note in an alcoholic stupor but later, while sober, paid the interest on the past-due note, he was denied the defense of intoxication; the court said he had ratified his contract. *First State Bank of Sinai v. Hyland*, 399 N.W.2d 894 (S.D. 1987). In any event, intoxicated is a disfavored defense on public policy grounds.

## Chapter 12 [Legality](#)

### **Learning Objectives**

After reading this chapter, you should understand the following:

1. The types of contracts (bargains) that are deemed illegal
2. How courts deal with disputes concerning illegal contracts
3. Under what circumstances courts will enforce otherwise illegal contracts

## 12.1 General Perspectives on Illegality

### Learning Objectives

1. Understand why courts refuse to enforce illegal agreements.
2. Recognize the rationale behind exceptions to the rule.

We have discussed the requirements of mutual assent, real assent, and consideration. We now turn to the fourth of the five requirements for a valid contract: the legality of the underlying bargain. The basic rule is that courts will not enforce an illegal bargain. (The term *illegal bargain* is better than *illegal contract* because a contract is by definition a legal agreement, but the latter terminology prevails in common usage.) Why should this be? Why should the courts refuse to honor contracts made privately by people who presumably know what they are doing—for example, a wager on the World Series or a championship fight? Two reasons are usually given. One is that refusal to enforce helps discourage unlawful behavior; the other is that honoring such contracts would demean the judiciary. Are these reasons valid? Yes and no, in the opinion of one contracts scholar:

[D]enying relief to parties who have engaged in an illegal transaction...helps to effectuate the public policy involved by discouraging the conduct that is disapproved. Mere denial of contractual and quasi-contractual remedy [however] rarely has a substantial effect in discouraging illegal conduct. A man who is hired to perform a murder is not in the least deterred by the fact that the courts are not open to him to collect his fee. Such a man has other methods of enforcement, and they are in fact more effective than legal process. The same is true in varying degrees where less heinous forms of illegal conduct are involved. Even in the matter of usury it was found that mere denial of enforcement was of little value in the effort to eliminate the loan shark. And restraints of trade were not curbed to an appreciable extent until contracts in restraint of trade were made criminal.

In most instances, then, the protection of the good name of the judicial institution must provide the principal reason for the denial of a remedy to one who has trafficked in the forbidden. This

is, moreover, a very good reason. The first duty of an institution is to preserve itself, and if the courts to any appreciable extent busied themselves with “justice among thieves,” the community...would be shocked and the courts would be brought into disrepute. *Harold C. Havighurst*, review of *Corbin on Contracts*, by Arthur L. Corbin, *Yale Law Journal* 61 (1952): 1143, 1144–45.

Strictly enforced, the rule prohibiting courts from ordering the parties to honor illegal contracts is harsh. It means that a promisee who has already performed under the contract can neither obtain performance of the act for which he bargained nor recover the money he paid or the value of the performance he made. The court will simply leave the parties where it finds them, meaning that one of the parties will have received an uncompensated benefit.

Not surprisingly, the severity of the rule against enforcement has led courts to seek ways to moderate its impact, chiefly by modifying it according to the principle of restitution. In general, restitution requires that one who has conferred a benefit or suffered a loss should not unfairly be denied compensation.

Pursuing this notion, the courts have created several exceptions to the general rule. Thus a party who is excusably ignorant that his promise violates public policy and a party who is not equally in the wrong may recover. Likewise, when a party “would otherwise suffer a forfeiture that is disproportionate in relation to the contravention of public policy involved,” restitution will be allowed. *Restatement (Second) of Contracts*, Section 197(b). Other exceptions exist when the party seeking restitution withdraws from the transaction contemplated in the contract before the illegal purpose has been carried out and when “allowing the claim would put an end to a continuing situation that is contrary to the public interest. *Restatement (Second) of Contracts*, Section 197(b). An example of the latter situation occurs when two bettors place money in the hands of a stakeholder. If the wager is unlawful, the loser of the bet has the right to recover his money from the stakeholder before it is paid out to the winner.

Though by and large courts enforce contracts without considering the worth or merits of the bargain they incorporate, freedom of contract can conflict with other public policies. Tensions arise between the desire to let people pursue their own ends and the belief that certain kinds of conduct should not be encouraged. Thus a patient may agree to be treated by an herbalist, but state laws prohibit medical care except by licensed physicians. Law and public policies against usury, gambling, obstructing justice, bribery, corrupt influence, perjury, restraint of trade, impairment of domestic relations, and fraud all significantly affect the authority and willingness of courts to enforce contracts.

In this chapter, we will consider two types of illegality: (1) that which results from a bargain that violates a statute and (2) that which the courts deem contrary to public policy, even though not expressly set forth in statutes.

## 12.2 Agreements in Violation of Statute

### Learning Objectives

1. Understand that various types of bargains may be made illegal by statute, including gambling, some service-for-fee agreements involving unlicensed practitioners, and usury.
2. Recognize that while gambling contracts are often illegal, some agreements that might appear to involve gambling are not.

### 2.1 Overview

Any bargain that violates the criminal law—including statutes that govern extortion, robbery, embezzlement, forgery, some gambling, licensing, and consumer credit transactions—is illegal. Thus determining whether contracts are lawful may seem to be an easy enough task. Clearly, whenever the statute itself explicitly forbids the making of the contract or the performance agreed upon, the bargain (such as a contract to sell drugs) is unlawful. But when the statute does not expressly prohibit the making of the contract, courts examine a number of factors, as discussed in *Bovard v. American Horse Enterprises*, 247 Cal. Rptr. 340 (1988); involving the

apparently innocent sale of a jewelry manufacturing firm whose real business was making marijuana-smoking paraphernalia.

## 2.2 Types of Bargains Made Illegal by Statute

### Gambling Contracts

All states have regulations affecting gambling (wagering) contracts because gambling tends to be an antiutilitarian activity most attractive to those who can least afford it, because gambling tends to reinforce fatalistic mind-sets fundamentally incompatible with capitalism and democracy, because gambling can be addictive, and because gambling inevitably attracts criminal elements lured by readily available money. With the spread of antitax enthusiasms over the last thirty-some years, however, some kinds of gambling have been legalized and regulated, including state-sponsored lotteries. Gambling is betting on an outcome of an event over which the bettors have no control where the purpose is to play with the risk.

But because the outcome is contingent on events that lie outside the power of the parties to control does not transform a bargain into a wager. For example, if a gardener agrees to care for the grounds of a septuagenarian for life in return for an advance payment of \$10,000, the uncertainty of the date of the landowner's death does not make the deal a wager. The parties have struck a bargain that accurately assesses, to the satisfaction of each, the risks of the contingency in question. Likewise, the fact that an agreement is phrased in the form of a wager does not make it one. Thus a father says to his daughter, "I'll bet you can't get an A in organic chemistry. If you do, I'll give you \$50." This is a unilateral contract, the consideration to the father being the daughter's achieving a good grade, a matter over which she has complete control.

Despite the general rule against enforcing wagers, there are exceptions, most statutory but some rooted in the common law. The common law permits the sale or purchase of securities: Sally invests \$6,000 in stock in Acme Company, hoping the stock will increase in value, though she has no control over the firm's management. It is not called gambling; it is considered respectable risk taking in the capitalist system, or "entrepreneurialism." (It really is gambling,

though, similar to horse-race gambling.) But because there are speculative elements to some agreements, they are subject to state and federal regulation.

Insurance contracts are also speculative, but unless one party has no insurable interest (a concern for the person or thing insured) in the insured, the contract is not a wager. Thus if you took out a life insurance contract on the life of someone whose name you picked out of the phone book, the agreement would be void because you and the insurance company would have been gambling on a contingent event. (You bet that the person would die within the term of the policy, the insurance company that she would not.) If, however, you insure your spouse, your business partner, or your home, the contingency does not make the policy a wagering agreement because you will have suffered a direct loss should it occur, and the agreement, while compensating for a possible loss, does not create a new risk just for the “game.”

### **Sunday Contracts**

At common law, contracts entered into on Sundays, as well as other commercial activities, were valid and enforceable. But a separate, religious tradition that traces to the Second Commandment frowned on work performed on “the Lord’s Day.” In 1781 a New Haven city ordinance banning Sunday work was printed on blue paper, and since that time such laws have been known as blue laws. The first statewide blue law was enacted in the United States in 1788; it prohibited travel, work, sports and amusements, and the carrying on of any business or occupation on Sundays. The only exceptions in most states throughout most of the nineteenth century were mutual promises to marry and contracts of necessity or charity. As the Puritan fervor wore off, and citizens were, more and more, importuned to consider themselves “consumers” in a capitalistic economic system, the laws have faded in importance and are mostly repealed, moribund, or unenforced. Washington State, up until 2008, completely prohibited hard alcohol sales on Sunday, and all liquor stores were closed, but subsequently the state—desperate for tax revenue—relaxed the prohibition.

### **Usury**

A usury statute is one that sets the maximum allowable interest that may be charged on a loan; usury is charging illegal interest rates. Formerly, such statutes were a matter of real importance because the penalty levied on the lender—ranging from forfeiture of the interest, or of both the principal and the interest, or of some part of the principal—was significant. But usury laws, like Sunday contract laws, have been relaxed to accommodate an ever-more-frenzied consumer society. There are a number of transactions to which the laws do not apply, varying by state: small consumer loans, pawn shop loans, payday loans, and corporate loans. In *Marquette v. First Omaha Service Corp.*, the Supreme Court ruled that a national bank could charge the highest interest rate allowed in its home state to customers living anywhere in the United States, including states with restrictive interest caps. *Marquette v. First Omaha Service Corp.*, 439 US 299 (1978). Thus it was that in 1980 Citibank moved its credit card headquarters from cosmopolitan New York City to the somewhat less cosmopolitan Sioux Falls, South Dakota. South Dakota had recently abolished its usury laws, and so, as far as credit-card interest rates, the sky was the limit. That appealed to Citibank and a number of other financial institutions, and to the state: it became a major player in the US financial industry, garnering many jobs. See Thomas M. Reardon, “T. M. Reardon’s first-hand account of Citibank’s move to South Dakota,” ([available through the LBCC Library](#)). *NorthWestern Financial Review*, September 15, 2004. Mr. Reardon was a member of the South Dakota Bankers’ Association.

### **Licensing Statutes**

To practice most professions and carry on the trade of an increasing number of occupations, states require that providers of services possess licenses—hairdressers, doctors, plumbers, real estate brokers, and egg inspectors are among those on a long list. As sometimes happens, though, a person may contract for the services of one who is unlicensed either because he is unqualified and carrying on his business without a license or because for technical reasons (e.g., forgetting to mail in the license renewal application) he does not possess a license at the moment. Robin calls Paul, a plumber, to install the pipes for her new kitchen. Paul, who has no license, puts in all the pipes and asks to be paid. Having discovered that Paul is unlicensed, Robin refuses to pay. May Paul collect?

To answer the question, a three-step analysis is necessary. First, is a license required? Some occupations may be performed without a license (e.g., lawn mowing). Others may be performed with or without certain credentials, the difference lying in what the professional may tell the public. (For instance, an accountant need not be a certified public accountant to carry on most accounting functions.) Let us assume that the state requires everyone who does any sort of plumbing for pay to have a valid license.

The second step is to determine whether the licensing statute explicitly bars recovery by someone who has performed work while unlicensed. Some do; many others contain no specific provision on the point. Statutes that do bar recovery must of course govern the courts when they are presented with the question.

If the statute is silent, courts must, in the third step of the analysis, distinguish between “regulatory” and “revenue” licenses. A regulatory license is intended to protect the public health, safety, and welfare. To obtain these licenses, the practitioner of the art must generally demonstrate his or her abilities by taking some sort of examination, like the bar exam for lawyers or the medical boards for doctors. A plumber’s or electrician’s licensing requirement might fall into this category. A revenue license generally requires no such examination and is imposed for the sake of raising revenue and to ensure that practitioners register their address so they can be found if a disgruntled client wants to serve them legal papers for a lawsuit. Some revenue licenses, in addition to requiring registration, require practitioners to demonstrate that they have insurance. A license to deliver milk, open to anyone who applies and pays the fee, would be an example of a revenue license. (In some states, plumbing licenses are for revenue purposes only.)

Generally speaking, failure to hold a regulatory license bars recovery, but the absence of a revenue or registration license does not—the person may obtain the license and then move to recover.

## 12.3 Bargains Made Illegal by Common Law

### Learning Objective

1. Understand what contracts or bargains have been declared illegal by courts.

### 3.1 Overview

Public policy is expressed by courts as well as legislatures. In determining whether to enforce a contract where there is no legislative dictate, courts must ordinarily balance the interests at stake. To strike the proper balance, courts must weigh the parties' expectations, the forfeitures that would result from denial of enforcement, and the public interest favoring enforcement against these factors: the strength of the policy, whether denying enforcement will further the policy, the seriousness and deliberateness of the violation, and how direct the connection is between the misconduct and the contractual term to be enforced. *Restatement (Second) of Contracts, Section 178.*

### 3.2 Types of Bargains Made Illegal by Common Law

#### Common-Law Restraint of Trade

One of the oldest public policies evolved by courts is the common-law prohibition against restraint of trade. From the early days of industrialism, the courts took a dim view of ostensible competitors who agreed among themselves to fix prices or not to sell in each other's territories. Since 1890, with the enactment of the Sherman Act, the law of restraint of trade has been absorbed by federal and state antitrust statutes. But the common-law prohibition still exists. Though today it is concerned almost exclusively with promises not to compete in sales of businesses and employment contracts, it can arise in other settings. For example, George's promise to Arthur never to sell the parcel of land that Arthur is selling to him is void because it unreasonably restrains trade in the land.

The general rule is one of reason: not every restraint of trade is unlawful; only unreasonable ones are. As the Restatement puts it, “Every promise that relates to business dealings or to a professional or other gainful occupation operates as a restraint in the sense that it restricts the promisor’s future activity. Such a promise is not however, unenforceable, unless the restraint that it imposes is unreasonably detrimental to the smooth operation of a freely competitive private economy. Restatement (Second) of Contracts, Section 186(a). An agreement that restrains trade will be construed as unreasonable unless it is ancillary to a legitimate business interest and is no greater than necessary to protect the legitimate interest. Restraint-of-trade cases usually arise in two settings: (1) the sale of a business and an attendant agreement not to compete with the purchasers and (2) an employee’s agreement not to compete with the employer should the employee leave for any reason.

### **Sale of a Business**

A first common area where a restraint-of-trade issue may arise is with the sale of a business. Regina sells her lingerie store to Victoria and promises not to establish a competing store in town for one year. Since Victoria is purchasing Regina’s goodwill (the fact that customers are used to shopping at her store), as well as her building and inventory, there is clearly a property interest to be protected. And the geographical limitation (“in town”) is reasonable if that is where the store does business. But if Regina had agreed not to engage in any business in town, or to wait ten years before opening up a new store, or not to open up a new store anywhere within one hundred miles of town, she could avoid the noncompetition terms of the contract because the restraint in each case (nature, duration, and geographic area of restraint) would have been broader than necessary to protect Victoria’s interest. Whether the courts will uphold an agreement not to compete depends on all the circumstances of the particular case.

### **Employment Noncompete Agreements**

A second common restraint-of-trade issue arises with regard to noncompete agreements in employment contracts. As a condition of employment by the research division of a market

research firm, Bruce, a product analyst, is required to sign an agreement in which he promises, for a period of one year after leaving the company, not to “engage, directly or indirectly, in any business competing with the company and located within fifty miles of the company’s main offices.” The principal reason recited in the agreement for this covenant not to compete is that by virtue of the employment, Bruce will come to learn a variety of internal secrets, including client lists, trade or business secrets, reports, confidential business discussions, ongoing research, publications, computer programs, and related papers. Is this agreement a lawful restraint of trade?

Here both the property interest of the employer and the extent of the restraint are issues. Certainly an employer has an important competitive interest in seeing that company information not walk out the door with former employees. Nevertheless, a promise by an employee not to compete with his or her former employer is scrutinized carefully by the courts, and an injunction (an order directing a person to stop doing what he or she should not do) will be issued cautiously, partly because the prospective employee is usually confronted with a contract of adhesion (take it or leave it) and is in a weak bargaining position compared to the employer, and partly because an injunction might cause the employee’s unemployment. Many courts are not enthusiastic about employment noncompete agreements. The California Business and Professions Code provides that “every contract by which anyone is restrained from engaging in a lawful profession, trade, or business of any kind is to that extent void.” California Business and Professions Code, Section 16600. As a result of the statute, and to promote entrepreneurial robustness, California courts typically interpret the statute broadly and refuse to enforce noncompete agreements. Other states are less stingy, and employers have attempted to avoid the strictures of no-enforcement state rulings by providing that their employment contracts will be interpreted according to the law of a state where noncompete agreements are favorably viewed.

If a covenant not to compete is ruled unlawful, the courts can pursue one of three courses by way of remedy. A court can refuse to enforce the entire covenant, freeing the employee to compete thenceforth. The court could delete from the agreement only that part that is

unreasonable and enforce the remainder (the “blue pencil” rule). In some states, the courts have moved away from this rule and have actually taken to rewriting the objectionable clause themselves. Since the parties intended that there be some form of restriction on competition, a reasonable modification would achieve a more just result. *Raimondo v. Van Vlerah*, 325 N.E.2d 544 (Ohio 1975).

### **Unconscionable Contracts**

Courts may refuse to enforce unconscionable contracts, those that are very one-sided, unfair, the product of unequal bargaining power, or oppressive; a court may find the contract divisible and enforce only the parts that are not unconscionable.

The common-law rule is reflected in Section 208 of the Restatement: “If a contract or term thereof is unconscionable at the time the contract is made a court may refuse to enforce the contract, or may enforce the remainder of the contract without the unconscionable term, or may so limit the application of any unconscionable term as to avoid any unconscionable result.”

And the Uniform Commercial Code (UCC) (again, of course, a statute, not common law) provides a similar rule in Section 2-302(1): “If the court as a matter of law finds the contract or any clause of the contract to have been unconscionable at the time it was made the court may refuse to enforce the contract, or it may enforce the remainder of the contract without the unconscionable clause, or it may so limit the application of any unconscionable clause as to avoid any unconscionable result.”

*Unconscionable* is not defined in the Restatement or the UCC, but cases have given gloss to the meaning, as in *Williams v. Walker-Thomas Furniture Co.*, a well-known early interpretation of the section by the DC Court of Appeals.

Unconscionability may arise procedurally or substantively. A term is procedurally unconscionable if it is imposed upon the “weaker” party because of fine or inconspicuous print, unexpected placement in the contract, lack of opportunity to read the term, lack of education

or sophistication that precludes understanding, or lack of equality of bargaining power. Substantive unconscionability arises where the affected terms are oppressive and harsh, where the term deprives a party of any real remedy for breach. Most often—but not always—courts find unconscionable contracts in the context of consumer transactions rather than commercial transactions. In the latter case, the assumption is that the parties tend to be sophisticated businesspeople able to look out for their own contract interests.

## 12.4 Effect of Illegality and Exceptions

### Learning Objectives

1. Recognize that courts will not enforce illegal bargains.
2. Know that there are exceptions to that rule.

#### 4.1 Effect of Illegality

The general rule is this: courts will not enforce illegal bargains. The parties are left where the court found them, and no relief is granted: it's a hands-off policy. The illegal agreement is void, and that a wrongdoer has benefited to the other's detriment does not matter.

For example, suppose a specialty contractor, statutorily required to have a license, constructs a waterslide for Plaintiff, when the contractor knew or should have known he was unlicensed. Plaintiff discovers the impropriety and refuses to pay the contractor \$80,000 remaining on the deal. The contractor will not get paid. *Pacific Custom Pools, Inc. v. Turner Construction*, 94 Cal. Rptr. 2d 756 (Calif. 2000). In another example, a man held himself out to be an architect in a jurisdiction requiring that architects pass a test to be licensed. He was paid \$80,000 to design a house costing \$900,000. The project was late and over budget, and the building violated relevant easement building-code rules. The unlicensed architect was not allowed to keep his fee. *Ransburg v. Haase*, 586 N.E. 2d 1295 (Ill. Ct. App. 1992).

## Chapter 13 Form and Meaning

### Learning Objectives

After reading this chapter, you should understand the following:

1. What kinds of contracts must be evidenced by some writing under the Statute of Frauds, what the exceptions to the requirements are, and what satisfies a writing requirement
2. What effect prior or contemporaneous “side” agreements have on a written contract
3. How a contract is to be interpreted if its meaning is disputed

In four chapters, we have focused on the question of whether the parties created a valid contract and have examined the requirements of (1) agreement (offer and acceptance), (2) real consent (free will, knowledge, and capacity), (3) consideration, and (4) legality. Assuming that these requirements have been met, we now turn to the form and meaning of the contract itself. Does the contract have to be in a written form, and—if there is a dispute—what does the contract mean?

### 13.1 The Statute of Frauds

#### Learning Objectives

1. Know which contracts are required to be evidenced by some writing to be enforceable.
2. Understand the exceptions to that requirement.
3. Recognize what the writing requirement means.
4. Understand the effect of noncompliance with the Statute of Frauds.

#### 1.1 Overview of the Statute of Frauds

The general rule is this: a contract need not be in writing to be enforceable. An oral agreement to pay a high-fashion model \$2 million to pose for photographs is as binding as if the language of the deal were printed on vellum and signed in the presence of twenty bishops. For three centuries, however, a large exception grew up around the Statute of Frauds, first enacted in

England in 1677 under the formal name “An Act for the Prevention of Frauds and Perjuries.” The Statute of Frauds requires that some contracts be evidenced by a writing, signed by the party to be bound. The English statute’s two sections dealing with contracts read as follows:

[Sect. 4]...no action shall be brought

1. whereby to charge any executor or administrator upon any special promise, to answer damages out of his own estate;
2. or whereby to charge the defendant upon any special promise to answer for the debt, default or miscarriages of another person;
3. or to charge any person upon any agreement made upon consideration of marriage;
4. or upon any contract or sale of lands, tenements or hereditaments, or any interest in or concerning them;
5. or upon any agreement that is not to be performed within the space of one year from the making thereof;

Unless the agreement upon which such action shall be brought, or some memorandum or note thereof, shall be in writing, and signed by the party to be charged therewith, or some other person thereunto by him lawfully authorized.

[Sect. 17]...no contract for the sale of any goods, wares and merchandizes, for the price of ten pounds sterling or upwards, shall be allowed to be good, except the buyer shall accept part of the goods so sold, and actually receive the same, or give something in earnest to bind the bargain or in part of payment, or that some note or memorandum in writing of the said bargain be made and signed by the parties to be charged by such contract, or their agents thereunto lawfully authorized.

As may be evident from the title of the act and its language, the general purpose of the law is to provide evidence, in areas of some complexity and importance, that a contract was actually made. To a lesser degree, the law serves to caution those about to enter a contract and “to create a climate in which parties often regard their agreements as tentative until there is a

signed writing. *Restatement (Second) of Contracts, Chapter 5*, statutory note. Notice, of course, that this is a *statute*; it is a legislative intrusion into the common law of contracts. The name of the act is somewhat unfortunate: insofar as it deals with fraud at all, it does not deal with fraud as we normally think of it. It tries to avoid the fraud that occurs when one person attempts to impose on another a contract that never was agreed to.

The Statute of Frauds has been enacted in form similar to the seventeenth-century act in every state but Maryland and New Mexico, where judicial decisions have given it legal effect, and Louisiana. With minor exceptions in Minnesota, Wisconsin, North Carolina, and Pennsylvania, the laws all embrace the same categories of contracts that are required to be in writing. Early in the twentieth century, Section 17 was replaced by a section of the Uniform Sales Act, and this in turn has now been replaced by provisions in the Uniform Commercial Code (UCC).

However ancient, the Statute of Frauds is alive and well in the United States. Today it is used as a technical defense in many contract actions, often with unfair results: it can be used by a person to wriggle out of an otherwise perfectly fine oral contract (it is said then to be used “as a sword instead of a shield”). Consequently, courts interpret the law strictly and over the years have enunciated a host of exceptions—making what appears to be simple quite complex. Indeed, after more than half a century of serious scholarly criticism, the British Parliament repealed most of the statute in 1954. As early as 1885, a British judge noted that “in the vast majority of cases [the statute’s] operation is simply to enable a man to break a promise with impunity because he did not write it down with sufficient formality.” A proponent of the repeal said on the floor of the House of Commons that “future students of law will, I hope, have their labours lightened by the passage of this measure.” In the United States, students have no such reprieve from the Statute of Frauds, to which we now turn for examination.

## 1.2 Types of Contracts Required in Writing and Exceptions

### Contracts Affecting an Interest in Real Estate

**The rule:** almost all contracts involving an interest in real estate are subject to the Statute of Frauds. “An interest in land” is a broad description, including the sale, mortgaging, and leasing

of real property (including homes and buildings); profits from the land; the creation of easements; and the establishment of other interests through restrictive covenants and agreements concerning use. Short-term leases, usually for a term of one year or less, are exempt from the provision.

**The exception:** the part performance doctrine. The name here is a misnomer, because it is a doctrine of reliance, and the acts taken in reliance on the contract are not necessarily partial performances under it. As in all such cases, the rationale is that it is unjust not to give the promisee specific performance if he or she acted in reasonable reliance on the contract and the promisor has continued to manifest assent to its terms. An oral contract to sell land is not binding simply because the buyer has paid the purchase price; payment is not by itself reliance, and if the seller refuses to transfer title, the buyer may recover the purchase price. However, if the buyer has taken possession and made improvements on the property, courts will usually say the case is out of the statute, and the party claiming an oral contract can attempt to prove the existence of the oral contract.

### **The One-Year Rule**

**The rule:** any agreement that cannot be performed within one year from its making must be evidenced by some writing to be enforceable. The purpose of this part is perhaps more obvious than most of the statute's provisions: memories fade regarding the terms of oral contracts made long ago; people die; disputes are not uncommon. Notice the critical time frame is not how long it will take to perform the contract, but how long from the time it is made until performance is complete. If a contract is made on January 1 for a house to be constructed starting on June 1 and to be completed on February 1 of the next year, the performance will be completed in eight months from the time it was begun, but thirteen months from the time the contract was made. It falls within the statute.

**The exception:** the possibility test. The statute's one-year rule has been universally interpreted to mean a contract that is impossible to be fully performed within one year; if there is even the

slightest chance of carrying out the agreement completely within the year, an oral contract is enforceable. Thus an oral agreement to pay a sum of money on a date thirteen months hence is within the statute and not enforceable, but one calling for payment “within thirteen months” would be enforceable, since it is possible under the latter contract to pay in less than a year. Because in many cases strict application of the statute would dictate harsh results, the courts often strain for an interpretation that finds it possible to perform the agreement within the year. Courts will even hold that because any person may die within the year, a contract without a fixed term may be fully performed in under a year and does not, therefore, fall within the statute.

### **Under the UCC**

**The rule:** contracts for the sale of goods in an amount greater than \$500 must be evidenced by some writing to be enforceable. Section 2-201 of the UCC requires all contracts for the sale of goods for the price of \$500 or more to be in writing, but oral agreements for the sale of goods valued at less than \$500 are fully enforceable without exception.

### **Other Writing Requirements**

In addition to these requirements, the UCC provides that agreements for the sale of securities (e.g., most stocks and bonds) usually need to be evidenced by a writing, and agreements for property not included in the sales or securities articles of the UCC that exceed \$5,000 in value need to be so evidenced. Uniform Commercial Code, Sections 8-319 and 1-206. Included here would be intangible property such as rights to royalties and to mortgage payments, and other rights created by contract. And in many states, other statutes require a writing for several different kinds of contracts. These include agreements to pay commissions to real estate brokers, to make a will, to pay debts already discharged in bankruptcy, to arbitrate rather than litigate, to make loans, and to make installment contracts.

### **Exceptions under the UCC**

There are four exceptions to the UCC's Statute of Frauds requirement that are relevant here.

### **The Ten-Day-Reply Doctrine**

This provides that, as between merchants, if an oral agreement is reached and one party sends the other a written statement confirming it, the other party has ten days to object in writing or the agreement is enforceable. Uniform Commercial Code, Section 2-201(2).

### **"Specially Manufactured Goods"**

This exception provides that a seller who has manufactured goods to the buyer's specifications or who has made "either a substantial beginning of their manufacture or commitments for their procurement" will not be stuck if the buyer repudiates, assuming that the goods are unsuitable for sale to others. Uniform Commercial Code, Section 2-201(3)(a).

### **The "Admission" Exception**

This exception arises—reasonably enough—when the party against whom enforcement is sought admits in testimony or legal papers that a contract was in fact made. Uniform Commercial Code, Section 2-201(3)(b). However, the admission will not permit enforcement of all claimed terms of the contract; enforcement is limited to the quantity of goods admitted.

### **The "Payment or Delivery and Acceptance" Exception**

The UCC provides that an oral contract for goods in excess of \$500 will be upheld if payment has already been made and accepted, or if the goods have been received and accepted. Uniform Commercial Code, Section 2-201(3)(c).

## **Sufficiency of the Required Writing**

### **At Common Law**

We have been careful not to say “the contract needs to be in writing.” We have said, “a contractual intention must be evidenced by some writing, signed by the party to be bound.” A signed contract is not required. What is required in most states, following the wording of the original statute, is that there be at least some memorandum or note concerning the agreement—a logical consequence of the statute’s purpose to evidence the making of the contract. The words need not appear in a formal document; they are sufficient in any form in a will, or on a check or receipt, or in longhand on the back of an envelope—so long as the document is signed by the party to be charged (i.e., the party being sued on the contract).

Although the writing need not contain every term, it must recite the subject matter of the contract. It need not do so, however, in terms comprehensible to those who were not party to the negotiations; it is enough if it is understandable in context. A written agreement to buy a parcel of land is usually sufficiently definitive if it refers to the parcel in such a way that it could be mistaken for no other—for example, “seller’s land in Tuscaloosa,” assuming that the seller owned only one parcel there. Beyond the subject matter, the essential terms of promises to be performed must be written out; all details need not be. If an essential term is missing, it cannot be enforced, unless it can be inferred or imposed by rule of law. A written contract for the sale of land containing every term but the time for payment, which the parties orally agreed would be upon delivery of the deed, is sufficient. (A contract that omitted the selling price would not be.)

The parties must be named in the writing in a manner sufficient to identify them. Their whole names need not be given if initials or some other reference makes it inescapable that the writing does concern the actual parties. Reference to the agent of a party identifies the party. Possession of the writing may even be sufficient: if a seller gives a memorandum of an oral agreement for the sale of his land, stating all the terms, to the buyer, the latter may seek

specific performance even though the writing omits to name or describe him or his agent. *Restatement (Second) of Contracts, Section 207(f)*.

In a few states, consideration for the promise must be stated in writing, even if the consideration has already been given. Consequently, written contracts frequently contain such language as “for value received.” But in most states, failure to refer to consideration already given is unnecessary: “the prevailing view is that error or omission in the recital of past events does not affect the sufficiency of a memorandum. *Restatement (Second) of Contracts, Section 207(h)*. The situation is different, however, when the consideration is a return promise yet to be performed. Usually the return promise is an essential term of the agreement, and failure to state it will vitiate the writing.

### **Under the UCC**

In contracts for the sale of goods, the writing must be signed by the party to be charged, and the parties must be sufficiently identified. Uniform Commercial Code, Section 2-210(1). But consideration, including the selling price, need not be set forth for the memorandum to meet the requirements of the UCC (“a writing is not insufficient because it omits or incorrectly states a term agreed upon”), though obviously it makes sense to do so whenever possible. By contrast, UCC Sections 1-206 and 3-319 concerning intangible personal property and investment securities require “a defined or stated price.”

### **1.3 Effect of Noncompliance and Exceptions; Oral Rescission**

The basic rule is that contracts governed by the Statute of Frauds are unenforceable if they are not sufficiently written down. If the agreement contains several promises, the unenforceability of one will generally render the others unenforceable also.

The Statute of Frauds can work injustices. In addition to the exceptions already noted, there are some general exceptions.

### **Full Performance**

First, certainly, if the contract has been performed fully by both sides, its unenforceability under the statute is moot. Having fulfilled its function (neither side having repudiated the contract), the agreement cannot be rescinded on the ground that it should have been, but was not, reduced to writing.

### **Detrimental Reliance**

Second, some relief may be granted to one who has relied on an oral contract to her detriment (similar to the part performance doctrine mentioned already). For a partially performed contract unenforceable under the Statute of Frauds, restitution may be available. Suppose George agrees orally to landscape Arthur's fifteen acres, in return for which George is to receive title to one acre at the far end of the lot. George is not entitled to the acre if Arthur defaults, but he may recover for the reasonable value of the services he has performed up to the time of repudiation. Somewhat related, if one side has reasonably and foreseeably relied upon a promise in such a way that injustice can only be avoided by enforcing it, some courts will use promissory estoppel to preclude the necessity of a writing, but the connection between the alleged oral contract and the detrimental reliance must be convincing.

### **Oral Rescission**

Third, most contracts required to be in writing may be rescinded orally. The new agreement is treated in effect as a modification of the old one, and since a complete rescission will not usually trigger any action the statute requires to be in writing, the rescission becomes effective in the absence of any signed memorandum.

Some agreements, however, may not be rescinded orally. Those that by their terms preclude oral rescission are an obvious class. Under the UCC, certain agreements for the sale of goods may not be orally rescinded, depending on the circumstances. For instance, if title has already passed to the buyer under a written agreement that satisfies the statute, the contract can be rescinded only by a writing. Contracts for the sale of land are another class of agreements that generally may not be orally rescinded. If title has already been transferred, or if there has been

a material change of position in reliance on the contract, oral agreements to rescind are unenforceable. But a contract that remains wholly executory, even though enforceable because in writing, may be rescinded orally in most states.

### **Contract Modification**

Fourth, contracts governed by the Statute of Frauds may be modified orally if the resulting contract, taken as a whole, falls outside the statute. The same rule applies under the UCC. Uniform Commercial Code, Section 2-209(3). Thus a written contract for the sale of a new bicycle worth \$1,200 may be orally modified by substituting the sale of a used bicycle worth \$450, but not by substituting the sale of a used bike worth \$600. The modified contract effectively rescinds the original contract.

## **13.2 The Parol Evidence Rule**

### **Learning Objectives**

1. Understand the purpose and operation of the parol evidence rule, including when it applies and when it does not.
2. Know how the Uniform Commercial Code (UCC) deals with evidence to show a contract's meaning.

#### **2.1 The Purpose of the Rule**

The examination of writings and effect of oral statements surrounding the formation of the writing.

#### **2.2 Parol Evidence at Common-Law**

##### **The Rule**

The rule at common law is this: a written contract intended to be the parties' complete understanding discharges all prior or contemporaneous promises, statements, or agreements that add to, vary, or conflict with it.

The parol evidence rule (*parol* means oral; it is related to *parliament* and *parly*—talking) is a substantive rule of law that operates to bar the introduction of evidence intended to show that the parties had agreed to something different from what they finally arrived at and wrote down. It applies to prior written as well as oral discussions that don't make it into the final written agreement. Though its many apparent exceptions make the rule seem difficult to apply, its purposes are simple: to give freedom to the parties to negotiate without fear of being held to the consequences of asserting preliminary positions, and to give finality to the contract.

The rule applies to all written contracts, whether or not the Statute of Frauds requires them to be in writing. The Statute of Frauds gets to whether there was a contract at all; the parol evidence rule says, granted there was a written contract, does it express the parties' understanding? But the rule is concerned only with events that transpired before the contract in dispute was signed. It has no bearing on agreements reached subsequently that may alter the terms of an existing contract.

## 2.3 The Exemptions and Exceptions

### **Not an Integrated Contract**

If the parties never intended the written contract to be their full understanding—if they intended it to be partly oral—then the rule does not apply. If the document is fully integrated, no extrinsic evidence will be permitted to modify the terms of the agreement, even if the modification is in addition to the existing terms, rather than a contradiction of them. If the contract is partially integrated, prior consistent additional terms may be shown. It is the duty of the party who wants to exclude the parol evidence to show the contract was intended to be integrated. That is not always an easy task. To prevent a party later from introducing extrinsic evidence to show that there were prior agreements, the contract itself can recite that there were none. Here, for example, is the final clause in the National Basketball Association Uniform Player Contract: "This agreement contains the entire agreement between the parties and there are no oral or written inducements, promises or agreements except as contained herein." Such a clause is known as a merger clause.

## 2.4 The UCC Approach

Under Section 2-202 of the UCC, a course of dealing, a usage of trade, or a course of performance can be introduced as evidence to explain or supplement any written contract for the sale of goods. A course of dealing is defined as “a sequence of previous conduct between the parties to a particular transaction which is fairly to be regarded as establishing a common basis of understanding for interpreting their expressions and other conduct.” A usage of trade is “any practice or method of dealing having such regularity of observance in a place, vocation or trade as to justify an expectation that it will be observed with respect to the transaction in question.” A course of performance is the conduct of a party in response to a contract that calls for repeated action (e.g., a purchase

## Chapter 14 Discharge of Obligations(Hardbound Ch. 15)

### Learning Objectives

After reading this chapter, you should understand the following:

1. What is meant by discharge of contract obligations

### 14.1 Discharge of Contract Duties

#### Learning Objectives

1. Understand how performance, partial performance, or no performance may discharge contractual obligations.
2. Recognize what rights accrue to the nonbreaching party when the other side announces, before the time for performance, that performance will not be forthcoming—anticipatory breach.
3. Understand the concept of the right to adequate assurances, and the consequences if no such assurances are forthcoming.

A person is liable to perform agreed-to contract duties until or unless he or she is discharged. If the person fails to perform without being discharged, liability for damages arises. Here we deal with the second-to-the-last of the four broad themes of contract law: how contract duties are discharged.

#### 1.1 Discharge by Performance (or Nonperformance) of the Duty

A contract can be discharged by complete performance or material nonperformance of the contractual duty. Note, in passing, that the modern trend at common law (and explicit under the Uniform Commercial Code [UCC], Section 1-203) is that the parties have a good-faith duty to perform to each other. There is in every contract “an implied covenant of good faith” (honesty in fact in the transaction) that the parties will deal fairly, keep their promises, and not frustrate the other party’s reasonable expectations of what was given and what received.

## Full Performance

Full performance of the contractual obligation discharges the duty. If Ralph does a fine job of plumbing Betty's new bathroom, she pays him. Both are discharged.

## Nonperformance, Material Breach

If Ralph doesn't do any work at all on Betty's bathroom, or almost none, then Betty owes him nothing. She—the nonbreaching party—is discharged, and Ralph is liable for breach of contract.

Under UCC Section 2-106(4), a party that ends a contract breached by the other party is said to have effected a cancellation. The cancelling party retains the right to seek a remedy for breach of the whole contract or any unperformed obligation. The UCC distinguishes cancellation from termination, which occurs when either party exercises a lawful right to end the contract other than for breach. When a contract is terminated, all executory duties are discharged on both sides, but if there has been a partial breach, the right to seek a remedy survives. Uniform Commercial Code, Section 2-106(3).

## Substantial Performance

Logically, anything less than full performance, even a slight deviation from what is owed, is sufficient to prevent the duty from being discharged and can amount to a breach of contract. So if Ralph does all the plumbing for Betty's new bathroom *except* hook up the toilet feed, he has not really "plumbed the new bathroom." He has only plumbed part of it. At classic common law, that was it: either you did the thing you promised completely or you had materially breached. But under modern theories, an ameliorative doctrine has developed, called substantial performance: if one side has substantially, but not completely, performed, so that the other side has received a benefit, the nonbreaching party owes something for the value received. The Restatement (Second) of Contracts puts it this way: *Restatement (Second) of Contracts, Section 237(d)*.

*Substantial Performance- In an important category of disputes over failure of performance, one party asserts the right to payment on the ground that he has completed his performance, while the other party refuses to pay on the ground that there is an uncured material failure of performance....In such cases it is common to state the issue...in terms of whether there has been substantial performance....If there has been substantial although not full performance, the building contractor has a claim for the unpaid balance and the owner has a claim only for damages. If there has not been substantial performance, the building contractor has no claim for the unpaid balance, although he may have a claim in restitution.*

The contest here is between the one who claims discharge by the other's material breach and the one who asserts there has been substantial performance. What constitutes substantial performance is a question of fact, as illustrated in *TA Operating Corp. v. Solar Applications Engineering, Inc.*, 191 S.W.173 (Tex. Ct. App.2005). The doctrine has no applicability where the breaching party willfully failed to follow the contract, as where a plumber substitutes a different faucet for the one ordered; installation of the incorrect faucet is a breach, even if it is of equal or greater value than the one ordered.

Under the UCC, there is no such thing as substantial performance. Section 2-601 requires that the goods delivered according to the contract be the exact things ordered—that there be a perfect tender (unless the parties agree otherwise).

### **Anticipatory Breach and Demand for Reasonable Assurances**

When a promisor announces before the time his performance is due that he will not perform, he is said to have committed an anticipatory breach (or repudiation). Of course a person cannot fail to perform a duty before performance is due, but the law allows the promisee to treat the situation as a material breach that gives rise to a claim for damages and discharges the obligee from performing duties required of him under the contract. The common-law rule was first recognized in the well-known 1853 British case *Hochster v. De La Tour*. In April, De La Tour hired Hochster as his courier, the job to commence in June. In May, De La Tour changed his mind and told Hochster not to bother to report for duty. Before June, Hochster secured an appointment as courier to Lord Ashburton, but that job was not to begin until July. Also in May, Hochster sued De La Tour, who argued that he should not have to pay Hochster because Hochster had

not stood ready and willing to begin work in June, having already agreed to work for Lord Ashburton. The court ruled for the plaintiff Hochster:

*[I]t is surely much more rational, and more for the benefit of both parties, that, after the renunciation of the agreement by the defendant, the plaintiff should be at liberty to consider himself absolved from any future performance of it, retaining his right to sue for any damage he has suffered from the breach of it. Thus, instead of remaining idle and laying out money in preparations which must be useless, he is at liberty to seek service under another employer, which would go in mitigation of the damages to which he would otherwise be entitled for a breach of the contract. It seems strange that the defendant, after renouncing the contract, and absolutely declaring that he will never act under it, should be permitted to object that faith is given to his assertion, and that an opportunity is not left to him of changing his mind. Hochster v. De La Tour, 2 Ellis & Blackburn 678 (Q.B. 1853).*

### 1.3 Discharge by Agreement of the Parties

#### Learning Objective

1. Recognize that there are various ways the parties may agree between themselves to terminate mutual obligations under the contract.

Parties are free to agree to almost any contract they want, and they are free to agree to end the contract whenever they want. There are several ways this is done.

#### Mutual Rescission

The parties may agree to give up the duties to perform, called mutual rescission. This may be by a formal written release saying the obligor is discharged upon delivery of the writing or upon occurrence of a condition. Or an obligation may be discharged by a contract not to sue about it.

The Restatement terms this an agreement of rescission. Restatement (Second) of Contracts, Section 283. An agreement to rescind will be given effect even though partial performance has been made or one or both parties have a claim for partial breach. The agreement need not be in writing or even expressed in words. By their actions, such as failure to take steps to perform or enforce, the parties may signal their mutual intent to rescind. Andy starts to mow Anne's lawn as they agreed. He begins the job, but it is unbearably hot. She sees how uncomfortable he is and readily agrees with him when he says, "Why don't we just forget the whole thing?" Andy's duty to finish mowing is discharged, as is Anne's duty to pay Andy, either for the whole job or for the part he has done.

Business executives live by contracts, but they do not necessarily die by them. A sociologist who studied business behavior under contract discovered a generation ago—and it is still valid—that in the great majority of cases in which one party wishes to "cancel an order," the other party permits it without renegotiation, even though the cancellation amounts to a repudiation of a contract. As one lawyer was quoted as saying,

Often business[people] do not feel they have "a contract"—rather they have an "order." They speak of "cancelling the order" rather than "breaching our contract." When I began practice I referred to order cancellations as breaches of contract, but my clients objected since they do not think of cancellation as wrong. Most clients, in heavy industry at least, believe that there is a right to cancel as part of the buyer-seller relationship. There is a widespread attitude that one can back out of any deal within some very vague limits. Lawyers are often surprised by this attitude. Stewart Macaulay, "Non-contractual Relations in Business: A Preliminary Study," *American Sociological Review* 28, no. 1 (1963): 55, 61.

This attitude is understandable. People who depend for their economic survival on continuing relationships will be loath to react to every change in plans with a lawsuit. The legal consequences of most of these cancellations are an agreement of rescission. Under UCC Section 2-720, the use of a word like "cancellation" or "rescission" does not by itself amount to a renunciation of the right to sue for breach of a provision that occurred before the rescission.

If the parties mean to discharge each other fully from all duties owed, they must say so explicitly. Actions continue to speak more loudly than words, however, and in law, so can inactions. Legal rights under contracts may be lost by both parties if they fail to act; by abandoning their claims, they can affect rescission.

### **Waiver**

A second means of discharge is by waiver, whereby a party voluntarily gives up a right she has under a contract but doesn't give up the entire right to performance by the other side. Tenant is supposed to pay rent on the first of the month, but because his employer pays on the tenth, Tenant pays Landlady on that day. If Landlady accepts the late payment without objection, she has waived her right to insist on payment by the first of the month, unless the lease provides that no waiver occurs from the acceptance of any late payments., *Minor v. Chase Auto Finance Corporation*, \_\_\_ S.W. 3d. \_\_\_ (2010 Westlaw). A "waiver" is permission to deviate from the contract; a "release" means to let go of the whole thing.

### **Substituted Agreement**

Discharge by substituted agreement is a third way of mutual rescission. The parties may enter into a novation, either a new contract or one whereby a new person is substituted for the original obligor, and the latter is discharged. If Mr. Olson is obligated to deliver a car to Jack, Jack and Mr. Olson may agree that Dewey Dealer should deliver the car to Jack instead of Mr. Olson; the latter is discharged by this novation. A substituted agreement may also simply replace the original one between the original parties.

### **Accord and Satisfaction**

Discharge by accord and satisfaction is a fourth way of mutual rescission. Here the parties to a contract (usually a disputed one) agree to substitute some performance different from what was originally agreed, and once this new agreement is executed, the original contract (as well as the more recent accord) is satisfied. But before then, the original agreement is only

suspended: if the obligor does not satisfy the accord, the other side can sue on the original obligation or on the accord.

### **Key Takeaway**

Parties to a contract may agree to give it up. This may be by mutual rescission, release, waiver, novation, substituted agreement, or accord and satisfaction.

### **Exercises**

1. How does mutual rescission discharge a common-law contract without apparent new consideration?
2. What is the difference between a substituted agreement and a novation?
3. What happens if the parties negotiate an accord and satisfaction and one side fails to perform it?
4. If an obligee accepts performance from the obligor that deviates from the contract, under what circumstances can the obligee nevertheless insist on strict compliance in the future?

## **1.4 Discharge When Performance Becomes Impossible or Very Difficult**

### **Learning Objective**

1. Recognize that there are several circumstances when performance of the contract becomes variously impossible, very difficult, or useless, and that these may give rise to discharge.

There are at least five circumstances in which parties may be discharged from contractual obligations because performance is impossible, difficult, or useless.

### **Overview**

Every contract contains some element of risk: the buyer may run out of money before he can pay; the seller may run out of goods before he can deliver; the cost of raw materials may

skyrocket, throwing off the manufacturer's fine financial calculations. Should the obligor's luck run out, he is stuck with the consequences—or, in the legal phrase, his liability is strict: he must either perform or risk paying damages for breach of contract, even if his failure is due to events beyond his control. Of course, an obligor can always limit his liability through the contract itself. Instead of obligating himself to deliver one million units, he can restrict his obligation to “one million units or factory output, whichever is less.” Instead of guaranteeing to finish a job by a certain date, he can agree to use his “best efforts” to do so. Similarly, damages in the event of breach can be limited. A party can even include a clause canceling the contract in the event of an untoward happening. But if these provisions are absent, the obligor is generally held to the terms of his bargain.

Exceptions include the concepts of impossibility, impracticability, and frustration of purpose.

### **Impossibility**

If performance is impossible, the duty is discharged. The categories here are death or incapacity of a personal services contractor, destruction of a thing necessary for performance, and performance prohibited by government order.

#### **Death or Incapacity of a Personal Services Contractor**

If Buyer makes a contract to purchase a car and dies before delivery, Buyer's estate could be held liable; it is not impossible (for the estate) to perform. The estate of a painter hired to do a portrait cannot be sued for damages because the painter died before she could complete the work.

#### **Destruction or Deterioration of a Thing Necessary for Performance**

When a specific object is necessary for the obligor's performance, its destruction or deterioration making its use impracticable (or its failure to come into existence) discharges the obligor's duty. Diane's Dyers contracts to buy the annual wool output of the Sheepish Ranch, but the sheep die of an epidemic disease before they can be shorn. Since the specific thing for

which the contract was made has been destroyed, Sheepish is discharged from its duty to supply Diane's with wool, and Diane's has no claim against the Ranch. However, if the contract had called for a quantity of wool, without specifying that it was to be from Sheepish's flock, the duty would not be discharged; since wool is available on the open market, Sheepish could buy that and resell it to Diane's.

### **Performance Prohibited by Government Regulation or Order**

When a government promulgates a rule after a contract is made, and the rule either bars performance or will make it impracticable, the obligor's duty is discharged. An obligor is not required to break the law and risk the consequences. Financier Bank contracts to sell World Mortgage Company certain collateralized loan instruments. The federal government, in a bank reform measure, prohibits such sales. The contract is discharged. If the Supreme Court later declared the prohibition unconstitutional, World Mortgage's duty to buy (or Financier Bank's to sell) would not revive.

### **Impracticability**

Less entirely undoable than impossibility, but still grounds for discharge, are common-law impracticability and its relative, commercial impracticability.

### **Common-Law Impracticability**

Impracticability is said to exist when there is a radical departure from the circumstances that the parties reasonably contemplated would exist at the time they entered into the contract; on such facts, the courts might grant relief. They will do so when extraordinary circumstances (often called "acts of God" or "force majeure") make it unjust to hold a party liable for performance. Although the justification for judicial relief could be found in an implied condition in all contracts that extraordinary events shall not occur, the Restatement eschews so obvious a bootstrap logic and adopts the language of UCC Section 2-615(a), which states that the crux of the analysis is whether the nonoccurrence of the extraordinary circumstance was "a basic

assumption on which the contract was made.” Restatement (Second) of Contracts, Section 261. If it was—if, that is, the parties assumed that the circumstance would not occur—then the duty is discharged if the circumstance later does occur.

In one well-known case, *Autry v. Republic Productions*, the famous cowboy movie star Gene Autry had a contract to perform to the defendant. He was drafted into the army in 1942; it was temporarily, at least, impossible for him to perform his movie contractual obligations incurred prior to his service. When he was discharged in 1945, he sued to be relieved of the prewar obligations. The court took notice that there had been a long interruption in Autry’s career and of “the great decrease in the purchasing power of the dollar” —postwar inflation—and determined that to require him to perform under the old contract’s terms would work a “substantial hardship” on him. A world war is an extraordinary circumstance. The temporary impossibility had transformed into impracticability. *Autry v. Republic Productions*, 180 P.2d 144 (Calif. 1947).

Impracticability refers to the performance, not to the party doing it. Only if the performance is impracticable is the obligor discharged. The distinction is between “the thing cannot be done” and “I cannot do it.” The former refers to that which is objectively impracticable, and the latter to that which is subjectively impracticable. That a duty is subjectively impracticable does not excuse it if the circumstances that made the duty difficult are not extraordinary. A buyer is liable for the purchase price of a house, and his inability to raise the money does not excuse him or allow him to escape from a suit for damages when the seller tenders the deed. *Christy v. Pilkinton*, 273 S.W.2d 533 (Ark. 1954). If Andy promises to transport Anne to the football stadium for ten dollars, he cannot wriggle out of his agreement because someone smashed into his car (rendering it inoperable) a half hour before he was due to pick her up. He could rent a car or take her in a taxi, even though that will cost considerably more than the sum she agreed to pay him. But if the agreement was that he would transport her in his car, then the circumstances make his performance **objectively impracticable**—the equivalent of impossible—and he is excused.

## **Commercial Impracticability**

This common-law concept of impracticability has been adopted by the UCC. Uniform Commercial Code, Section 2-615. When performance cannot be undertaken except with extreme difficulty or at highly unreasonable expense, it might be excused on the theory of commercial impracticability. However, “impracticable” (the action is impossible) is not the same as “impractical” (the action would yield an insufficient return or would have little practical value). The courts allow a considerable degree of fluctuation in market prices, inflation, weather, and other economic and natural conditions before holding that an extraordinary circumstance has occurred. A manufacturer that based its selling price on last year’s costs for raw materials could not avoid its contracts by claiming that inflation within the historical range had made it difficult or unprofitable to meet its commitments. Examples of circumstances that could excuse might be severe limitations of supply due to war, embargo, or a natural disaster. Thus a shipowner who contracted with a purchaser to carry goods to a foreign port would be excused if an earthquake destroyed the harbor or if war broke out and the military authorities threatened to sink all vessels that entered the harbor. But if the shipowner had planned to steam through a canal that is subsequently closed when a hostile government seizes it, his duty is not discharged if another route is available, even if the route is longer and consequently more expensive.

## **Frustration of Purpose**

If the parties made a basic assumption, express or implied, that certain circumstances would not arise, but they do arise, then a party is discharged from performing his duties if his principal purpose in making the contract has been “substantially frustrated.” This is not a rule of objective impossibility. It operates even though the parties easily might be able to carry out their contractual duties. The frustration of purpose doctrine comes into play when circumstances make the value of one party’s performance virtually worthless to the other. This rule does not permit one party to escape a contract simply because he will make less money than he had planned or because one potential benefit of the contract has disappeared. The

purpose that is frustrated must be the core of the contract, known and understood by both parties, and the level of frustration must be severe; that is, the value of the contract to the party seeking to be discharged must be destroyed or nearly destroyed.

The classic illustration of frustration of purpose is the litigation that gave birth to the rule: the so-called coronation cases. In 1901, when King Edward VII was due to be crowned following the death of Queen Victoria, a parade route was announced for the coronation. Scores of people rented rooms in buildings that lined the streets of the route to watch the grand spectacle. But the king fell ill, and the procession was canceled. Many expectant viewers failed to pay, and the building owners took them to court; many lessees who had paid took the owners to court to seek refunds. The court declared that the lessees were not liable because the purpose of the contract had been frustrated by the king's illness.

Supervening government regulations (though here different from illegality), floods that destroy buildings in which an event was to take place, and business failures may all contribute to frustration of purpose. But there can be no general rule: the circumstances of each case are determinative. Suppose, for example, that a manufacturer agrees to supply a crucial circuit board to a computer maker who intends to sell his machine and software to the government for use in the international space station's ventilation systems. After the contract is made but before the circuit boards are delivered, the government decides to scrap that particular space station module. The computer manufacturer writes the circuit board maker, canceling the contract. Whether the manufacturer is discharged depends on the commercial prospects for the computer and the circuit board. If the circuit board can be used only in the particular computer, and it in turn is only of use on the space station, the duty to take the boards is discharged. But if the computer can be sold elsewhere, or the circuit boards can be used in other computers that the manufacturer makes, it is liable for breach of contract, since its principal purpose—selling computers—is not frustrated.

As before, the parties can provide in the contract that the duty is absolute and that no supervening event shall give rise to discharge by reason of frustration of purpose.

## Key Takeaway

The obligations to perform under a contract cannot be dismissed lightly, but a person's duty to perform a contract duty may be discharged if it becomes impossible or very difficult to do it. This includes impossibility, common-law impracticability, commercial impracticability under the UCC, and frustration of purpose.

## Exercises

1. If it is possible to perform a contract, why might a party be excused because of frustration of purpose?
2. What is the difference between impractical and impracticable?
3. How would supervening government regulation be different from supervening illegality?

## 1.5 Other Methods of Discharge

### Learning Objectives

1. Recognize when alteration, power of avoidance, the statute of limitations, and bankruptcy discharge parties from contracts.
2. In addition to performance (or lack of it), agreement of the parties, the happening or nonhappening of conditions, and variations on the theme of impossibility, there are several other ways contract duties may be discharged.

### Cancellation, Destruction, or Surrender

An obligee may unilaterally discharge the obligor's duty toward him by canceling, destroying, or surrendering the written document embodying the contract or other evidence of the duty. No consideration is necessary; in effect, the obligee is making a gift of the right that he possesses. No particular method of cancellation, destruction, or surrender is necessary, as long as the obligee manifests his intent that the effect of his act is to discharge the duty. The entire document can be handed over to the obligor with the words, "Here, you don't owe me anything." The obligee can tear the paper into pieces and tell the obligor that he has done so

because he does not want anything more. Or he can mutilate the signatures or cross out the writing.

### **Power of Avoidance**

A contractual duty can be discharged if the obligor can avoid the contract. As discussed in [Chapter 11 "Real Assent"](#), a contract is either void or can be avoided if one of the parties lacked capacity (infancy, insanity); if there has been duress, undue influence, misrepresentation, or mistake; or the contract is determined to be unconscionable. Where a party has a power of avoidance and exercises it, that party is discharged from further obligation.

### **Statute of Limitations**

When an obligor has breached a contract, the obligee has the right to sue in court for a remedy. But that right does not last forever. Every state has statutes of limitations that establish time periods within which the suit must be brought (different time periods are spelled out for different types of legal wrongs: contract breach, various types of torts, and so on). The time period for contract actions under most statutes of limitations ranges between two and six years. The UCC has a four-year statute of limitations. Uniform Commercial Code, Section 2-725. The period begins to run from the day on which the suit could have been filed in court—for example, from the moment of contract breach. An obligee who waits until after the statute has run—that is, does not seek legal relief within the period prescribed by the statute of limitations—is barred from going to court thereafter (unless she is under some incapacity like infancy), but the obligor is not thereby discharged. The effect is simply that the obligee has no legal remedy. If the parties have a continuing relationship, the obligee might be able to recoup—for example, by applying a payment for another debt to the one barred by the statute, or by offsetting a debt the obligee owes to the obligor.

## **Bankruptcy**

Under the federal bankruptcy laws as discussed in (hardbound [Chapter 30 "Bankruptcy"](#)) certain obligations are discharged once a court declares a debtor to be bankrupt. The law spells out the particular types of debts that are canceled upon bankruptcy.

## Chapter 15 Remedies (Hardbound chapter 16)

### Remedies

#### Learning Objectives

After reading this chapter, you should understand the following:

1. The basic theory of contract remedies, and why courts don't just order the promisor to perform as promised
2. The interests that are protected by contract remedies
3. The types of legal remedies
4. The types of equitable remedies
5. The limitations on remedies

We come at last to the question of remedies. A valid agreement has been made, the promisor's duties have not been discharged; he or she has breached the contract. When one party has failed to perform, what are the rights of the parties? Or when the contract has been avoided because of incapacity or misrepresentation and the like, what are the rights of the parties after disaffirmance? These questions form the focus of this chapter. Remedies for breach of contracts for the sale of goods will be considered separately, in [Chapter 17 "Title and Risk of Loss"](#).

### 15.1 Theory of Contract Remedies

#### Learning Objectives

1. Understand the basic purpose of remedies.
2. Recognize that there are two general categories of remedies: legal and equitable.
3. See that courts do not simply order obligors to keep their promise but instead allow them to breach and the nonbreaching party to have remedies for that breach.

## 1.1 Purpose of Remedies

The fundamental purpose of remedies in noncriminal cases is not to punish the breaching party but—if possible—to put the nonbreaching party in the position he or she would have been in had there been no breach. Or, as is said, the purpose is to make the nonbreaching party whole.

There are two general categories of remedies—legal and equitable. In the category of legal remedies are damages. Damages are money paid by one party to another; there are several types of damages. In the category of equitable remedies are these three: specific performance, which means a person is ordered to deliver a unique thing (land or a unique personal property, such as a painting or an antique car); injunction, a judicial order directing a person to stop doing what he or she should not do (such as competing with a former employer in violation of a noncompete agreement); and restitution, which means putting the parties back into the position they were in before the contract was made.

## 15.2 Promisee's Interests Protected by Contract

### Learning Objective

1. Understand that the nonbreaching party to a contract has certain expectations that contract remedies seek to fulfill to make the nonbreaching party whole.

Contract remedies serve to protect three different interests: an expectation interest, a reliance interest, and a restitution interest. A promisee will have one of these and may have two or all three.

An expectation interest is the benefit for which the promisee bargained, and the remedy is to put him in a position as good as that which he would have been in had the contract been performed. A reliance interest is the loss suffered by relying on the contract and taking actions consistent with the expectation that the other party will abide by it; the remedy is reimbursement that restores the promisee to his position before the contract was made. A restitution interest is that which restores to the promisee any benefit he conferred on the

promisor. These interests do not dictate the outcome according to a rigid formula; circumstances and the nature of the contract, as usual, will play a large role. But in general, specific performance is a remedy that addresses the expectation interest, monetary damages address all three interests, and, not surprisingly, restitution addresses the restitution interest.

Consider some simple examples. A landowner repudiates an executory contract with a builder to construct a garage on her property for \$100,000. The builder had anticipated a \$10,000 profit (the garage would have cost him \$90,000 to build). What can he expect to recover in a lawsuit against the owner? The court will not order the garage to be built; such an order would be wasteful, since the owner no longer wants it and may not be able to pay for it. Instead, the court will look to the builder's three possible interests. Since the builder has not yet started his work, he has given the owner nothing, and therefore has no restitution interest. Nor has he any reliance interest, since we are assuming that he has not paid out any money for supplies, hired a work crew, or advanced money to subcontractors. But he anticipated a profit, and so he has an expectation interest of \$10,000.

Now suppose that the builder had dug out the foundation and poured concrete, at a cost of \$15,000. His expectation interest has become \$25,000 (the difference between \$100,000 and \$75,000, the money he will save by not having to finish the job). His reliance interest is \$15,000, because this is the amount he has already spent. He may also have a restitution interest, depending on how much the foundation of the house is worth to the owner. (The value could be more or less than the sum of money actually expended to produce the foundation; for example, the builder might have had to pay his subcontractors for a greater share of the job than they had completed, and those sums therefore would not be reflected in the worth of the foundation.)

Normally, the promisee will choose which of the three interests to pursue. As is to be expected, the choice hinges on the circumstances of the case, his feelings, and the amount at stake.

## 15.3 Legal Remedies: Damages

### Learning Objectives

1. Understand what is meant when it is said that damages are a legal remedy (as opposed to an equitable remedy).
2. Understand the names and purposes of the six types of remedies.
3. Know when liquidated damages will be allowed.
4. Recognize the circumstances that might allow punitive damages.

### 3.1 Overview

The promisee, whom we will hereafter refer to as the nonbreaching party, has the right to damages (a money award), if that is required to make her whole, whenever the other party has breached the contract, unless, of course, the contract itself or other circumstances suspend or discharge that right. **Damages** refers to money paid by one side to the other; it is a legal remedy. For historical and political reasons in the development of the English legal system, the courts of law were originally only able to grant monetary relief. If a petitioner wanted something other than money, recourse to a separate system of equity was required. The courtrooms and proceedings for each were separate. That actual separation is long gone, but the distinction is still recognized; a judge may be said to be “sitting in law” or “sitting in equity,” or a case may involve requests for both money and some action. We take up the legal remedies of damages first.

### 3.2 Types of Damages

There are six different types of damages: compensatory, incidental, consequential, nominal, liquidated, and (sometimes) punitive.

#### Compensatory Damages

Damages paid to directly compensate the nonbreaching party for the value of what was not done or performed are compensatory damages. Sometimes calculating that value of the

promisor's performance is easy—for example, when the nonbreaching party has ascertainable costs and profits, as in the case of the builder who would have earned \$10,000 profit on a \$100,000 house. When the performance is a service, a useful measure of loss is what it would cost to substitute performance by someone else. But the calculation is frequently difficult, especially when the performance is a service that is not easily duplicated. If Rembrandt breached a contract to paint your portrait, the loss could not be measured simply by inquiring how much Van Gogh would charge to do the same thing. Nevertheless, in theory, whatever net value would ultimately have been conferred on the nonbreaching party is the proper measure of compensatory damages. An author whose publisher breaches its contract to publish the book and who cannot find another publisher is entitled to lost royalties (if ascertainable) plus the value that would have accrued from her enhanced reputation.

Since the nonbreaching party usually has obligations under the contract also, a breach by the other party discharges his duty to perform and may result in savings. Or he may have made substitute arrangements and realized at least a partial profit on the substitution. Or, as in the case of the builder, he may have purchased goods intended for the job that can be used elsewhere. In all these situations, the losses he has avoided—savings, profits, or value of goods—are subtracted from the losses incurred to arrive at the net damages. The nonbreaching party may recover his actual losses, not more. Suppose an employer breaches a contract with a prospective employee who was to begin work for a year at a salary of \$35,000. The employee quickly finds other, similar work at a salary of \$30,000. Aside from whatever he might have had to spend searching for the job (incidental damages), his compensatory damages are limited to \$5,000, the difference between what he would have earned and what he is earning.

Lost volume can be a troublesome problem in calculating damages. This problem arises when the nonbreaching party, a supplier of goods or services, enters a second contract when the buyer repudiates. The question is whether the second contract is a substituted performance or an additional one. If it is substituted, damages may be little or nothing; if additional, the entire expectation interest may be recovered. An automobile dealer contracts to sell a car in his inventory. Shortly before the deal is closed, the buyer calls up and repudiates the contract. The

dealer then sells the car to someone else. If the dealer can show that he could have sold an identical car to the second purchaser regardless of what the first purchaser did, then the second sale stands on its own and cannot be used to offset the net profit recoverable from the first purchaser. The factual inquiry in lost volume cases is whether the nonbreaching party would have engaged in the second transaction if the breach had never occurred.

### **Incidental Damages**

In addition to compensatory damages, the nonbreaching party may recover incidental damages. Incidental loss includes expenditures that the nonbreaching party incurs in attempting to minimize the loss that flows from the breach. To arrange for substitute goods or services, the nonbreaching party might have to pay a premium or special fees to locate another supplier or source of work.

### **Consequential Damages**

A consequential loss is addressed with consequential damages. These are damages incurred by the nonbreaching party without action on his part because of the breach. For example, if Ralph does a poor job of plumbing Betty's bathroom and the toilet leaks, damaging the floor, the downstairs ceiling, and the downstairs rug, Ralph would owe for those losses in consequential damages. Or, again, lost sales stemming from a failure to fix a manufacturer's machine in time or physical and property injury due to a defective machine sold by the promisor would be addressed with consequential damages. Note, however, that one obvious, and often large, expenditure occasioned by a breach—namely, legal expenses in bringing a lawsuit to remedy the particular breach—is not an element of damages, unless the contract explicitly states that it is, and cannot be charged to the defendant. There is one situation, however, in which legal costs can be added to damages: when the breach causes the nonbreaching party to be involved in a lawsuit with someone else. Consequential damages will not be allowed if those damages are not foreseeable. This issue is taken up in [Section 15.5 "Limitations on Contract Remedies"](#).

## **Nominal Damages**

In the situation where there has been a breach but the nonbreaching party has really suffered no loss or cannot prove what his loss is, he is entitled to nominal damages. Ricardo contracts to buy a new car from a dealer; the dealer breaches the contract. Ricardo finds and buys the same car from another dealer at the same price that the first one was to sell it for. Ricardo has suffered nominal damages: five dollars, perhaps.

## **Liquidated Damages**

Precisely because damages are sometimes difficult to assess, the parties themselves may specify how much should be paid in the event of a breach. Courts will enforce a liquidated damages provision as long as the actual amount of damages is difficult to ascertain (in which case proof of it is simply made at trial) and the sum is reasonable in light of the expected or actual harm. If the liquidated sum is unreasonably large, the excess is termed a penalty and is said to be against public policy and unenforceable.

## **Punitive Damages**

Punitive damages are those awarded for the purpose of punishing a defendant in a civil action, in which criminal sanctions are of course unavailable. They are proper in cases in which the defendant has acted willfully and maliciously and are thought to deter others from acting similarly. Since the purpose of contract law is compensation, not punishment, punitive damages have not traditionally been awarded, with one exception—when the breach of contract is also a tort for which punitive damages may be recovered. Punitive damages are permitted in the law of torts (in all but four states) when the behavior is malicious or willful (reckless conduct causing physical harm, deliberate defamation of one's character, a knowingly unlawful taking of someone's property), and some kinds of contract breach are also tortious. For example, when a creditor holding collateral as security under a contract for a loan sells the collateral to a good-faith purchaser for value even though the debtor was not in default, he has breached the

contract and committed the tort of conversion; punitive damages may be awarded, assuming the behavior was willful and not merely mistaken.

Punitive damages are not fixed by law. The judge or jury may award at its discretion whatever sum is believed necessary to redress the wrong or deter like conduct in the future. This means that a richer person may be slapped with much heavier punitive damages than a poorer one in the appropriate case. But the judge in all cases may remit (reduce) some or all of a punitive damage award if he or she considers it excessive.

## 15.4 Equitable Remedies

### Learning Objectives

1. Know when equitable (as opposed to legal) remedies will be allowed.
2. Understand the different types of equitable remedies: specific performance, injunction, and restitution.

#### 4.1 Overview

Really the only explanation for the differences between law and equity is to be found in the history and politics of England dating to the twelfth century, but in practical terms, the distinctions are notable. First, juries are not used in equitable cases. Second, equity relies less on precedent and more on the sense that justice should be served. Third, and of most significance, where what is sought by the nonbreaching party is not money—that is, where there is no adequate legal remedy—equity may afford relief. In equity a person may get a judge to order the breaching party to deliver some actual property, or to stop doing something that he should not do, or to return the consideration the nonbreaching party gave so as to return the parties to the precontract status (specific performance, injunction, and restitution, respectively).

#### 4.2 Types of Remedies in Equity

There are three types of equitable remedies: specific performance, injunction, and restitution.

## Specific Performance

Specific performance is a judicial order to the promisor that he undertake the performance to which he obligated himself in a contract. Specific performance is an alternative remedy to damages and may be issued at the discretion of the court, subject to a number of exceptions. Emily signs a contract to sell Charlotte a gold samovar, a Russian antique of great sentimental value because it once belonged to Charlotte's mother. Emily then repudiates the contract while still executory. A court may properly grant Charlotte an order of specific performance against Emily.

Once students understand the basic idea of specific performance, they often want to pounce upon it as the solution to almost any breach of contract. It seems reasonable that the nonbreaching party could ask a court to simply require the promisor to do what she promised she would. But specific performance is a very limited remedy: it is *only* available for breach of contract to sell a unique item, that is, a unique item of personal property (the samovar), or a parcel of real estate (all real estate is unique). But if the item is not unique, so that the nonbreaching party can go out and buy another one, then the legal remedy of money damages will solve the problem. And specific performance will never be used to force a person to perform services against his will, which would be involuntary servitude. A person may be forced to stop doing that which he should not do (injunction), but not forced to do what he will not do.

## Injunction

An **injunction** is the second type of equitable remedy available in contract (it is also available in tort). It is a court order directing a person to stop doing that which she should not do. For example, if an employer has a valid noncompete contract with an employee, and the employee, in breach of that contract, nevertheless undertakes to compete with his former employer, a court may enjoin (issue an order of injunction), directing the former employee to stop such competition. A promise by a person not to do something—in this example, not to compete—is called a **negative** covenant (a covenant is a promise in a contract, itself a contract). Or if Seller

promises to give Buyer the right of first refusal on a parcel of real estate or a unique work of art, but Seller, in breach of a written promise, offers the thing to a third party, a court may enjoin Seller from selling it to the third party. If a person violates an injunction, he may be held in contempt of court and put in jail for a while.

### **Restitution**

The third type of equitable relief is **restitution**. Restitution is a remedy applicable to several different types of cases: those in which the contract was avoided because of incapacity or misrepresentation, those in which the other party breached, and those in which the party seeking restitution breached. As the word implies, *restitution* is a restoring to one party of what he gave to the other. Therefore, only to the extent that the injured party conferred a benefit on the other party may the injured party be awarded restitution. The point is, a person who breaches a contract should not suffer a punishment, and the nonbreaching party should not be unjustly enriched.

### **Total Nonperformance by Breaching Party**

The nonbreaching party is always entitled to restitution in the event of total breach by nonperformance or repudiation, unless both parties have performed all duties except for payment by the other party of a definite sum of money for the injured party's performance. *Restatement (Second) of Contracts, Section 373*. Calhoun, a contractor, agrees to build \$3,000 worth of fences for only \$2,000 and completes the construction. Arlene, the landowner, refuses to pay. Calhoun's only right is to get the \$2,000; he does not have a restitution right to \$2,500, the market price of his services (or \$3,000, the amount by which her property increased in value); he is entitled, instead, only to \$2,000, his contract price. Had Arlene repudiated prior to completion, however, Calhoun would then have been entitled to restitution based either on the market price of the work or on the amount by which he enhanced her property. If the one party breaches, the nonbreaching party is generally entitled to restitution of property that can be

returned. Arlene gives Calhoun a valuable Ming vase in return for his promise to construct the fences. Upon Calhoun's breach, Arlene is entitled to specific restitution of the vase.

### **Part Performance and Then Breach**

A party who has substantially performed and then breached is entitled to restitution of a benefit conferred on the injured party, if the injured party has refused (even though justifiably) to complete his own performance owing to the other's breach. Since the party in breach is liable to the injured party for damages for loss, this rule comes into play only when the benefit conferred is greater than the amount the nonbreaching party has lost. Arlene agrees to sell her property to Calhoun for \$120,000, and Calhoun makes a partial payment of \$30,000. He then repudiates. Arlene turns around and sells the property to a third party for \$110,000. Calhoun—the breaching party—can get his money back, less the damages Arlene suffered as a result of his breach. He gets \$30,000 minus the \$10,000 loss Arlene incurred. He gets \$20,000 in restitution. Otherwise Arlene would be enriched by Calhoun's breach: she'd get \$140,000 in total for real estate worth \$120,000. But if he gets \$20,000 of his \$30,000 back, she receives \$110,000 from the third party and \$10,000 from Calhoun, so she gets \$120,000 total (plus, we hope, incidental damages, at least).

## **15.5 Limitations on Contract Remedies**

### **5.1 Overview**

We have observed that the purpose of remedies in contract law is, where possible, to put the nonbreaching party in as good a position as he would have been in had there been no breach. There are, however, several limitations or restrictions affecting when a person can claim remedies, in both law (damages) and equity. Of course the contract itself may—if not unconscionable—limit remedies. Beyond that, the nonbreaching party must be able to articulate with some degree of certainty what her damages are; the damages must be foreseeable; the nonbreaching party must have made a reasonable effort to mitigate the

damages; she must sometime elect to go with one remedy and forgo another; she cannot seek to avoid a contract if she has lost the power to do so. We turn to these points.

## 5.2 Foreseeability

If the damages that flow from a breach of contract lack foreseeability, they will not be recoverable. Failures to act, like acts themselves, have consequences. As the old fable has it, “For want of a nail, the kingdom was lost.” To put a nonbreaching party in the position he would have been in had the contract been carried out could mean, in some cases, providing compensation for a long chain of events. In many cases, that would be unjust, because a person who does not anticipate a particular event when making a contract will not normally take steps to protect himself (either through limiting language in the contract or through insurance). The law is not so rigid; a loss is not compensable to the nonbreaching party unless the breaching party, at the time the contract was made, understood the loss was foreseeable as a probable result of his breach.

Of course, the loss of the contractual benefit in the event of breach is always foreseeable. A company that signs an employment contract with a prospective employee knows full well that if it breaches, the employee will have a legitimate claim to lost salary. But it might have no reason to know that the employee’s holding the job for a certain length of time was a condition of his grandfather’s gift of \$1 million.

The leading case, perhaps the most studied case, in all the common law is *Hadley v. Baxendale*, decided in England in 1854. Joseph and Jonah Hadley were proprietors of a flour mill in Gloucester. In May 1853, the shaft of the milling engine broke, stopping all milling. An employee went to Pickford and Company, a common carrier, and asked that the shaft be sent as quickly as possible to a Greenwich foundry that would use the shaft as a model to construct a new one. The carrier’s agent promised delivery within two days. But through an error, the shaft was shipped by canal rather than by rail and did not arrive in Greenwich for seven days. The Hadleys sued Joseph Baxendale, managing director of Pickford, for the profits they lost

because of the delay. In ordering a new trial, the Court of Exchequer ruled that Baxendale was not liable because he had had no notice that the mill was stopped:

Where two parties have made a contract which one of them has broken, the damages which the other party ought to receive in respect of such breach of contract should be such as may fairly and reasonably be considered either arising naturally, i.e., according to the usual course of things, from such breach of contract itself, or such as may reasonably be supposed to have been in the contemplation of both parties, at the time they made the contract, as the probable result of the breach of it. *Hadley v. Baxendale* (1854), 9 Ex. 341, 354, 156 Eng.Rep. 145, 151.

Thus when the party in breach has not known and has had no reason to know that the contract entailed a special risk of loss, the burden must fall on the nonbreaching party. As we have seen, damages attributable to losses that flow from events that do not occur in the ordinary course of events are known as consequential or special damages. The exact amount of a loss need not be foreseeable; it is the nature of the event that distinguishes between claims for ordinary or consequential damages. A repair shop agrees to fix a machine that it knows is intended to be resold. Because it delays, the sale is lost. The repair shop, knowing why timeliness of performance was important, is liable for the lost profit, as long as it was reasonable. It would not be liable for an extraordinary profit that the seller could have made because of circumstances peculiar to the particular sale unless they were disclosed.

The special circumstances need not be recited in the contract. It is enough for the party in breach to have actual knowledge of the loss that would occur through his breach. Moreover, the parol evidence rule ([Chapter 13 "Form and Meaning"](#)) does not bar introduction of evidence bearing on the party's knowledge before the contract was signed. So the lesson to a promisee is that the reason for the terms he bargains for should be explained to the promisor—although too much explanation could kill a contract. A messenger who is paid five dollars to deliver a letter across town is not likely to undertake the mission if he is told in advance that his failure for any reason to deliver the letter will cost the sender \$1 million, liability to be placed on the messenger.

Actual knowledge is not the only criterion, because the standard of foreseeability is objective, not subjective. That means that if the party had reason to know—if a reasonable person would have understood—that a particular loss was probable should he breach, then he is liable for damages. What one has reason to know obviously depends on the circumstances of the case, the parties' prior dealings, and industry custom. A supplier selling to a middleman should know that the commodity will be resold and that delay or default may reduce profits, whereas delay in sale to an end user might not. If it was foreseeable that the breach might cause the nonbreaching party to be sued, the other party is liable for legal fees and a resulting judgment or the cost of a settlement.

Even though the breaching party may have knowledge, the courts will not always award full consequential damages. In the interests of fairness, they may impose limitations if such an award would be manifestly unfair. Such cases usually crop up when the parties have dealt informally and there is a considerable disproportion between the loss caused and the benefit the nonbreaching party had agreed to confer on the party who breached. The messenger may know that a huge sum of money rides on his prompt delivery of a letter across town, but unless he explicitly contracted to bear liability for failure to deliver, it is unlikely that the courts would force him to ante up \$1 million when his fee for the service was only five dollars.

*EBWS, LLC v. Britly Corp.*, 928 A. 2d 497 (VT. 2007); is a case that represents a modern application of the rule of *Hadley v. Baxendale* on the issue of foreseeability of consequential damages.

### 5.3 Mitigation of Damages

Contract law encourages the nonbreaching party to avoid loss wherever possible; this is called mitigation of damages. The concept is a limitation on damages in law. So there can be no recovery if the nonbreaching party had an opportunity to avoid or limit losses and failed to take advantage of it. Such an opportunity exists as long as it does not impose, in the Restatement's words, an "undue risk, burden or humiliation." Restatement (Second) of Contracts, Section 350.

The effort to mitigate need not be successful. As long as the nonbreaching party makes a reasonable, good-faith attempt to mitigate his losses, damages are recoverable.

Mitigation crops up in many circumstances. Thus a nonbreaching party who continues to perform after notice that the promisor has breached or will breach may not recover for expenses incurred in continuing to perform. And losses from the use of defective goods delivered in breach of contract are not compensable if the nonbreaching party knew before use that they were defective. Often the nonbreaching party can make substitute arrangements—find a new job or a new employee, buy substitute goods or sell them to another buyer—and his failure to do so will limit the amount of damages he will recover from the party who breaches. Under the general rule, failure to mitigate when possible permits the promisor to deduct from damages the amount of the loss that the nonbreaching party could have avoided. When there is a readily ascertainable market price for goods, damages are equal to the difference between the contract price and the market price.

A substitute transaction is not just any possible arrangement; it must be suitable under the circumstances. Factors to be considered include the similarity, time, and place of performance, and whether the difference between the contracted-for and substitute performances can be measured and compensated. A prospective employee who cannot find substitute work within her field need not mitigate by taking a job in a wholly different one. An advertising salesperson whose employment is repudiated need not mitigate by taking a job as a taxi driver. When the only difference between the original and the substitute performances is price, the nonbreaching party must mitigate, even if the substitute performer is the original promisor.

The nonbreaching party must mitigate in timely fashion, but each case is different. If it is clear that the promisor has unconditionally repudiated before performance is due, the nonbreaching party must begin to mitigate as soon as practicable and should not wait until the day performance is due to look for an alternative.

As long as the nonbreaching party makes a reasonable effort to mitigate, the success of that effort is not an issue in assessing damages. If a film producer's original cameraman breaches the contract, and if the producer had diligently searched for a substitute cameraman, who cost \$150 extra per week and it later came to light that the producer could have hired a cameraman for \$100, the company is entitled nevertheless to damages based on the higher figure. *Shirley MacLaine v. Twentieth Century-Fox Corporation*, [Section 15.5.3 "Limitation on Damages: Mitigation of Damages"](#), is a well-known case involving mitigation of damages.

#### 5.4 Certainty of Damages

A party can recover only that amount of damage in law which can be proved with reasonable certainty. Especially troublesome in this regard are lost profits and loss of goodwill. Alf is convinced that next spring the American public will be receptive to polka-dotted belts with his name monogrammed in front. He arranges for a garment factory to produce 300,000 such belts, but the factory, which takes a large deposit from him in advance, misplaces the order and does not produce the belts in time for the selling season. When Alf discovers the failure, he cannot raise more money to go elsewhere, and his project fails. He cannot recover damages for lost profits because the number is entirely speculative; no one can prove how much he would have made, if anything. He can, instead, seek restitution of the monies advanced. If he had rented a warehouse to store the belts, he would also be able to recover his reliance interest.

Proof of lost profits is not always difficult: a seller can generally demonstrate the profit he would have made on the sale to the buyer who has breached. The problem is more difficult, as Alf's case demonstrates, when it is the seller who has breached. A buyer who contracts for but does not receive raw materials, supplies, and inventory cannot show definitively how much he would have netted from the use he planned to make of them. But he is permitted to prove how much money he has made in the past under similar circumstances, and he may proffer financial and market data, surveys, and expert testimony to support his claim. When proof of profits is difficult or impossible, the courts may grant a nonmonetary award, such as specific performance.

## 5.5 Loss of Power of Avoidance

You will recall that there are several circumstances when a person may avoid a contract: duress, undue influence, misrepresentation (fraudulent, negligent, or innocent), or mistake. But a party may lose the right to avoid, and thus the right to any remedy, in several ways.

### **Delay**

If a party is the victim of fraud, she must act promptly to rescind at common law, or she will lose the right and her remedy will be limited to damages in tort. (This is discussed a bit more in [Section 15.5.7 "Election of Remedies"](#).)

### **Affirmation**

An infant who waits too long to disaffirm (again, delay) will have ratified the contract, as will one who—notwithstanding being the victim of duress, undue influence, mistake, or any other grounds for avoidance—continues to operate under the contract with full knowledge of his right to avoid. Of course the disability that gave rise to the power of avoidance must have passed before affirmation works.

### **Rights of Third Parties**

The intervening rights of third parties may terminate the power to avoid. For example, Michelle, a minor, sells her watch to Betty Buyer. Up to and within a reasonable time after reaching majority, Michelle could avoid—disaffirm—the contract. But if, before that time, Betty sells the watch to a third party, Michelle cannot get it back from the third party. Similarly, Salvador Seller sells his car to Bill Buyer, who pays for it with a bad check. If the check bounces, Salvador can rescind the deal—Bill’s consideration (the money represented by the check) has failed: Salvador could return the check and get his car back. But if, before the check from Bill bounces, Bill in turn sells the car to Pat Purchaser, Salvador cannot avoid the contract. Pat gets to keep the car. There are some exceptions to this rule.

## 5.6 Agreement of the Parties Limiting Remedies

Certainly it is the general rule that parties are free to enter into any kind of a contract they want, so long as it is not illegal or unconscionable. The inclusion into the contract of a liquidated damages clause—mentioned previously—is one means by which the parties may make an agreement affecting damages. But beyond that, as we saw in [Chapter 12 "Legality"](#), it is very common for one side to limit its liability, or for one side to agree that it will pursue only limited remedies against the other in case of breach. Such agree-to limitations on the availability of remedies are generally OK provided they are conspicuous, bargained-for, and not unconscionable. In consumer transactions, courts are more likely to find a contracted-for limitation of remedies unconscionable than in commercial transactions, and under the Uniform Commercial Code (UCC) there are further restrictions on contractual remedy limitations.

For example, Juan buys ten bags of concrete to make a counter and stand for his expensive new barbecue. The bags have this wording in big print: “Attention. Our sole liability in case this product is defective will be to provide you with a like quantity of nondefective material. We will not be liable for any other damages, direct or indirect, express or implied.” That’s fine. If the concrete is defective, the concrete top breaks, and Juan’s new barbecue is damaged, he will get nothing but some new bags of good concrete. He could have shopped around to find somebody who would deliver concrete with no limitation on liability. As it is, his remedies are limited by the agreement he entered into.

## 5.7 Election of Remedies

### **At Common Law**

Another limitation on remedies—at common law—is the concept of election of remedies. The nature of a loss resulting from a contract breach may be such as to entitle one party to a choice among two or more means to redress the grievance, where the choices are mutually exclusive.

At classic common law, a person who was defrauded had an election of remedies: she could, immediately upon discovering the fraud, rescind, or she could retain the item (real estate or

personal property) and attempt to remedy the fraudulently defective performance by suing for damages, but not both. Buyer purchases real estate from Seller for \$300,000 and shortly discovers that Seller fraudulently misrepresented the availability of water. Buyer spends \$60,000 trying to drill wells. Finally he gives up and sues Seller for fraud, seeking \$360,000. Traditionally at common law, he would not get it. He should have rescinded upon discovery of the fraud. Now he can only get \$60,000 in damages in tort. *Merritt v. Craig*, 746 A.2d 923 (Md. 2000). The purpose of the election of remedies doctrine is to prevent the victim of fraud from getting a double recovery, but it has come under increasing criticism. Here is one court's observation: "A host of commentators support elimination of the election of remedies doctrine. A common theme is that the doctrine substitutes labels and formalism for inquiry into whether double recovery results in fact. The rigid doctrine goes to the other extreme, actually resulting in the under compensation of fraud victims and the protection of undeserving wrongdoers. *Head & Seemann, Inc. v. Gregg*, 311 N.W.2d 667 (Wis. App. 1981).

### **Under the UCC**

The doctrine of election of remedy has been rejected by the UCC, which means that the remedies are cumulative in nature. According to Section 2-703(1): "Whether the pursuit of one remedy bars another depends entirely on the facts of the individual case." UCC, Section 2-721, provides that neither demand for rescission of the contract in the case of misrepresentation or fraud, nor the return or rejection of goods, bars a claim for damages or any other remedy permitted under the UCC for nonfraudulent breach (we will examine remedies for breach of sales contracts in [Chapter 17 "Title and Risk of Loss"](#)).

### **Tort versus Contract**

Frequently a contract breach may also amount to tortious conduct. A physician warrants her treatment as perfectly safe but performs the operation negligently, scarring the patient for life. The patient could sue for malpractice (tort) or for breach of warranty (contract). The choice involves at least four considerations:

1. Statute of limitations. Most statutes of limitations prescribe longer periods for contract than for tort actions.
2. Allowable damages. Punitive damages are more often permitted in tort actions, and certain kinds of injuries are compensable in tort but not in contract suits—for example, pain and suffering.
3. Expert testimony. In most cases, the use of experts would be the same in either tort or contract suits, but in certain contract cases, the expert witness could be dispensed with, as, for example, in a contract case charging that the physician abandoned the patient.
4. Insurance coverage. Most policies do not cover intentional torts, so a contract theory that avoids the element of willfulness would provide the plaintiff with a surer chance of recovering money damages.

### **Legal versus Extralegal Remedies**

A party entitled to a legal remedy is not required to pursue it. Lawsuits are disruptive not merely to the individuals involved in the particular dispute but also to the ongoing relationships that may have grown up around the parties, especially if they are corporations or other business enterprises. Buyers must usually continue to rely on their suppliers, and sellers on their buyers. Not surprisingly, therefore, many businesspeople refuse to file suits even though they could, preferring to settle their disputes privately or even to ignore claims that they might easily press. Indeed, the decision whether or not to sue is not one for the lawyer but for the client, who must analyze a number of pros and cons, many of them not legal ones at all.

## Chapter 16 Introduction to Sales and Leases (Hardbound chapter 17)

### Learning Objectives

After reading this chapter, you should understand the following:

1. Why the law of commercial transactions is separate from the common law
2. What is meant by “commercial transactions” and how the Uniform Commercial Code (UCC) deals with them in general
3. The scope of Article 2, Article 2A, and the Convention on Contracts for the International Sale of Goods
4. What obligations similar to the common law’s are imposed on parties to a UCC contract, and what obligations different from the common law’s are imposed
5. The difference between a consumer lease and a finance lease

## 16.1 Commercial Transactions: The Uniform Commercial Code

### 1.1 History

When the American colonies declared independence from Britain, they continued to use British law, including the laws related to commercial transactions. By the early twentieth century, the states had inconsistent rules, making interstate commerce difficult and problematic. Several uniform laws affecting commercial transactions were floated in the late nineteenth century, but few were widely adopted. In 1942, the American Law Institute (ALI) American Law Institute, “ALI Overview,” accessed March 1, 2011, <http://www.ali.org/index.cfm?fuseaction=about.overview>. hired staff to begin work on a rationalized, simplified, and harmonized national body of modern commercial law. The ALI’s first draft of the UCC was completed in 1951. The UCC was adopted by Pennsylvania two years later, and other states followed in the 1950s and 1960s.

In the 1980s and 1990s, the leasing of personal property became a significant factor in commercial transactions, and although the UCC had some sections that were applicable to leases, the law regarding the sale of goods was inadequate to address leases. Article 2A

governing the leasing of goods was approved by the ALI in 1987. It essentially repeats Article 2 but applies to leases instead of sales.

## 1.2 Scope of the UCC and This Text's Presentation of the UCC

Although the UCC comprehensively covers commercial transactions, it does not deal with every aspect of commercial law. Among the subjects not covered are the sale of real property, mortgages, insurance contracts, suretyship transactions (unless the surety is party to a negotiable instrument), and bankruptcy. Moreover, common-law principles of contract law that were examined in previous chapters continue to apply to many transactions covered in a particular way by the UCC. These principles include capacity to contract, misrepresentation, coercion, and mistake. Many federal laws supersede the UCC; these include the Bills of Lading Act, the Consumer Credit Protection Act, the warranty provisions of the Magnuson-Moss Act, and other regulatory statutes.

## **16.2 Introduction to Sales and Lease Law, and the Convention on Contracts for the International Sale of Goods**

### 2.1 Scope of Articles 2 and 2A and Definitions

In dealing with any statute, it is of course very important to understand the statute's scope or coverage.

Article 2 does not govern all commercial transactions, only sales. It does not cover all sales, only the sale of goods. Article 2A governs leases, but only of personal property (goods), not real estate. The Convention on Contracts for the International Sale of Goods (CISG)—kind of an international Article 2—"applies to contracts of sale of goods between parties whose places of business are in different States [i.e., countries]" (CISG, Article 1). So we need to consider the definitions of *sale*, *goods*, and *lease*.

## **Definition of *Sale***

A sale “consists in the passing of title from the seller to the buyer for a price.” Uniform Commercial Code, Section 2-106.

Sales are distinguished from gifts, bailments, leases, and secured transactions. Article 2 sales should be distinguished from gifts, bailments, leases, and secured transactions. A gift is the transfer of title without consideration, and a “contract” for a gift of goods is unenforceable under the Uniform Commercial Code (UCC) or otherwise (with some exceptions). A bailment is the transfer of possession but not title or use; parking your car in a commercial garage often creates a bailment with the garage owner. A lease (see the formal definition later in this chapter) is a fixed-term arrangement for possession and use of something—computer equipment, for example—and does not transfer title. In a secured transaction, the owner-debtor gives a security interest in collateral to a creditor that allows the creditor to repossess the collateral if the owner defaults.

## **Definition of *Goods***

Even if the transaction is considered a sale, the question still remains whether the contract concerns the sale of goods. Article 2 applies only to goods; sales of real estate and services are governed by non-UCC law. Section 2-105(1) of the UCC defines goods as “all things...which are movable at the time of identification to the contract for sale other than the money in which the price is to be paid.” Money can be considered goods subject to Article 2 if it is the object of the contract—for example, foreign currency.

## **Real Estate versus Goods**

The dilemma is this: A landowner enters into a contract to sell crops, timber, minerals, oil, or gas. If the items have already been detached from the land—for example, timber has been cut and the seller agrees to sell logs—they are goods, and the UCC governs the sale. But what if, at

the time the contract is made, the items are still part of the land? Is a contract for the sale of uncut timber governed by the UCC or by real estate law?

The UCC governs under either of two circumstances: (1) if the contract calls for the seller to sever the items or (2) if the contract calls for the buyer to sever the items and if the goods can be severed without material harm to the real estate. Uniform Commercial Code, Section 2-107. The second provision specifically includes growing crops and timber. By contrast, the law of real property governs if the buyer's severance of the items will materially harm the real estate; for example, the removal of minerals, oil, gas, and structures by the buyer will cause the law of real property to govern.

### **Goods versus Services**

Distinguishing goods from services is the other major difficulty that arises in determining the nature of the object of a sales contract. The problem: how can goods and services be separated in contracts calling for the seller to deliver a combination of goods and services? That issue is examined in Case (*Pittsley v. Houser*, 875 P. 2d. 232 (Idaho App. 1994)), where the court applied the common "predominant factor" (also sometimes "predominate purpose" or "predominant thrust") test—that is, it asked whether the transaction was predominantly a contract for goods or for services. However, the results of this analysis are not always consistent.

In two areas, state legislatures have taken the goods-versus-services issue out of the courts' hands and resolved the issue through legislation. Food sold in restaurants is a sale of goods, whether it is to be consumed on or off the premises. Blood transfusions (really the sale of blood) in hospitals have been legislatively declared a service, not a sale of goods, in more than forty states, thus relieving the suppliers and hospitals of an onerous burden for liability from selling blood tainted with the undetectable hepatitis virus.

## **Definition of *Lease***

Section 2A-103(j) of the UCC defines a lease as “a transfer of the right to possession and use of goods for a term in return for consideration.” The lessor is the one who transfers the right to possession to the lessee. If Alice rents a party canopy from Equipment Supply, Equipment Supply is the lessor and Alice is the lessee.

## **Two Types of Leases**

The UCC recognizes two kinds of leases: consumer leases and finance leases. A consumer lease is used when a lessor leases goods to “an individual...primarily for personal, family, or household purposes,” where total lease payments are less than \$25,000. Uniform Commercial Code, Section 2A-103(e). The UCC grants some special protections to consumer lessees. A finance lease is used when a lessor “acquires the goods or the right to [them]” and leases them to the lessee. Uniform Commercial Code, Section 2A-103(g). The person from whom the lessor acquires the goods is a supplier, and the lessor is simply financing the deal. Jack wants to lease a boom lift (personnel aerial lift, also known as a cherry picker) for a commercial roof renovation. First Bank agrees to buy (or itself lease) the machine from Equipment Supply and in turn lease it to Jack. First Bank is the lessor, Jack is the lessee, and Equipment Supply is the supplier.

## **16.3 Sales Law Compared with Common-Law Contracts**

### **3.1 Mutual Assent: Offer and Acceptance**

#### **Definiteness of the Offer**

The common law requires more definiteness than the UCC. Under the UCC, a contractual obligation may arise even if the agreement has open terms. Under Section 2-204(3), such an agreement for sale is not voidable for indefiniteness, as in the common law, if the parties have intended to make a contract and the court can find a reasonably certain basis for giving an appropriate remedy. Perhaps the most important example is the open price term.

The open price term is covered in detail in Section 2-305. At common law, a contract that fails to specify price or a means of accurately ascertaining price will almost always fail. This is not so under the UCC provision regarding open price terms. If the contract says nothing about price, or if it permits the parties to agree on price but they fail to agree, or if it delegates the power to fix price to a third person who fails to do so, then Section 2-305(1) “plugs” the open term and decrees that the price to be awarded is a “reasonable price at the time for delivery.” When one party is permitted to fix the price, Section 2-305(2) requires that it be fixed in good faith. However, if the parties *intend* not to be bound unless the price is first fixed or agreed on, and it is not fixed or agreed on, then no contract results. Uniform Commercial Code, Section 2-305(4).

Another illustration of the open term is in regard to particulars of performance. Section 2-311(1) provides that a contract for sale of goods is not invalid just because it leaves to one of the parties the power to specify a particular means of performing. However, “any such specification must be made in good faith and within limits set by commercial reasonableness.”

### **Acceptance Varying from Offer: Battle of the Forms**

The concepts of offer and acceptance are basic to any agreement, but the UCC makes a change from the common law in its treatment of an acceptance that varies from the offer (this was discussed in [Chapter 8 "Introduction to Contract Law"](#)). At common law, where the “mirror image rule” reigns, if the acceptance differs from the offer, no contract results. If that were the rule for sales contracts, with the pervasive use of form contracts—where each side’s form tends to favor that side—it would be very problematic.

Section 2-207 of the UCC attempts to resolve this “battle of the forms” by providing that additional terms or conditions in an acceptance operate as such unless the acceptance is conditioned on the offeror’s consent to the new or different terms. The new terms are construed as offers but are automatically incorporated in any contract between merchants for the sale of goods unless “(a) the offer expressly limits acceptance to the terms of the offer; (b) [the terms] materially alter it; or (c) notification of objection to them has already been given or

is given within a reasonable time after notice of them is received.” In any case, Section 2-207 goes on like this: “Conduct by both parties which recognizes the existence of a contract is sufficient to establish a contract for sale although the writings of the parties do not otherwise establish a contract. In such case the terms of the particular contract consist of those terms on which the writings of the parties agree, together with any supplementary terms incorporated under any other provisions of this Act.” This section of the UCC is one of the most confusing and fiercely litigated sections; Professor Grant Gilmore once called it a “miserable, bungled, patched-up job” and “arguably the greatest statutory mess of all time.” Mark E. Roszkowski, “Symposium on Revised Article 2 of the Uniform Commercial Code—Section-by-Section Analysis,” *SMU Law Review* 54 (Spring 2001): 927, 932, quoting Professor Grant Gilmore to Professor Robert Summers, Cornell University School of Law, September 10, 1980, in *Teaching Materials on Commercial and Consumer Law*, ed. Richard E. Speidel, Robert S Summers, and James J White, 3rd ed. (St. Paul, MN: West, 1981), pp. 54–55. In 2003 the UCC revisionist presented an amendment to this section in an attempt to fix Section 2-207, but no state has adopted this section’s revision. See Commercial Law, “UCC Legislative Update,” March 2, 2010, accessed March 1, 2011, <http://ucclaw.blogspot.com/2010/03/ucc-legislative-update.html>.

### **Revocation of Offer**

Under both common law and the UCC, an offer can be revoked at any time prior to acceptance unless the offeror has given the offeree an option (supported by consideration); under the UCC, an offer can be revoked at any time prior to acceptance unless a merchant gives a “firm offer” (for which no consideration is needed). The CISG (Article 17) provides that an offer is revocable before it is accepted unless, however, “it indicates...that it is irrevocable” or if the offeree reasonably relied on its irrevocability.

## 3.2 Reality of Consent

There is no particular difference between the common law and the UCC on issues of duress, misrepresentation, undue influence, or mistake. As for international sales contracts, the CISG provides (Article 4(a)) that it “governs only the formation of the contract of sale and the rights and obligations of the seller and the buyer arising from such a contract and is not concerned with the validity of the contract or of any of its provisions.”

## 3.3 Consideration

### The UCC

The UCC requires no consideration for modification of a sales contract made in good faith; at common law, consideration is required to modify a contract. Uniform Commercial Code, Section 2-209(1). The UCC requires no consideration if one party wants to forgive another’s breach by written waiver or renunciation signed and delivered by the aggrieved party; under common law, consideration is required to discharge a breaching party. Uniform Commercial Code, Section 1-107. The UCC requires no consideration for a “firm offer” —a writing signed by a merchant promising to hold an offer open for some period of time; at common law an option requires consideration. (Note, however, the person can give an option under either common law or the code.)

## 3.4 Form and Meaning

### Requirement of a Writing

The common law has a Statute of Frauds, and so does the UCC. It requires a writing to enforce a contract for the sale of goods worth \$500 or more, with some exceptions, as discussed in [Chapter 13 "Form and Meaning"](#). Proposed amendments by UCC revisioners presented in 2003 would have raised the amount of money—to take into account inflation since the mid-fifties—to \$5,000, but no state has yet adopted this amendment; Uniform Commercial Code, Section 2-201.

## Parol Evidence

Section 2-202 of the UCC provides pretty much the same as the common law: if the parties have a writing intended to be their final agreement, it “may not be contradicted by evidence of any prior agreement or of a contemporaneous oral agreement.” However, it may be explained by “course of dealing or usage of trade or by course of performance” and “by evidence of consistent additional terms.”

## 16.4 General Obligations under UCC Article 2

Article 2 of the UCC of course has rules governing the obligations of parties specifically as to the offer, acceptance, performance of sales contracts, and so on. But it also imposes some general obligations on the parties. Two are called out here: one deals with unfair contract terms, and the second with obligations imposed on merchants.

### 4.1 Obligation of Good-Faith Dealings in General Under the UCC

Section 1-203 of the UCC provides, “Every contract or duty within this Act imposes an obligation of good faith in its performance or enforcement.” *Good faith* is defined at Section 2-103(j) as “honesty in fact and the observance of reasonable commercial standards of fair dealing.” This is pretty much the same as what is held by common law, which “imposes a duty of good faith and *fair dealing* upon the parties in performing and enforcing the contract.” *Restatement (Second) of Contracts, Section 205.*

The UCC’s good faith in “performance or enforcement” of the contract is one thing, but what if the terms of the contract itself are unfair? Under Section 2-302(1), the courts may tinker with a contract if they determine that it is particularly unfair. The provision reads as follows: “If the court as a matter of law finds the contract or any clause of the contract to have been unconscionable at the time it was made the court may refuse to enforce the contract, or it may enforce the remainder of the contract without the unconscionable clause, or it may so limit the application of any unconscionable clause as to avoid any unconscionable result.”

The court thus has considerable flexibility. It may refuse to enforce the entire contract, strike a particular clause or set of clauses, or limit the application of a particular clause or set of clauses.

And what does “unconscionable” mean? The UCC provides little guidance on this crucial question. According to Section 2-302(1), the test is “whether, in the light of the general commercial background and the commercial needs of the particular trade or case, the clauses involved are so one-sided as to be unconscionable under the circumstances existing at the time of the making of the contract....The principle is one of the prevention of oppression and unfair surprise and not of disturbance of allocation of risks because of superior bargaining power.”

The definition is somewhat circular. For the most part, judges have had to develop the concept with little help from the statutory language. Unconscionability is much like US Supreme Court Justice Potter Stewart’s famous statement about obscenity: “I can’t define it, but I know it when I see it.” In the leading case, *Williams v. Walker-Thomas Furniture Co.*, (set out in [Chapter 12 "Legality"](#)), Judge J. Skelly Wright attempted to develop a framework for analysis. He refined the meaning of unconscionability by focusing on “absence of meaningful choice” (often referred to as procedural unconscionability) and on terms that are “unreasonably favorable” (commonly referred to as substantive unconscionability). An example of procedural unconscionability is the salesperson who says, “Don’t worry about all that little type on the back of this form.” Substantive unconscionability is the harsh term—the provision that permits the “taking of a pound of flesh” if the contract is not honored.

#### 4.2 Obligations Owed by “Merchant” Sellers

Although the UCC applies to all sales of goods (even when you sell your used car to your neighbor), merchants often have special obligations or are governed by special rules.

*As between Merchants:*

The UCC assumes that merchants should be held to particular standards because they are more experienced and have or should have special knowledge. Rules applicable to professionals ought not apply to the casual or inexperienced buyer or seller. For example, we noted previously that the UCC relaxes the mirror image rule and provides that as “between merchants” additional terms in an acceptance become part of the contract, and we have discussed the “ten-day-reply doctrine” that says that, again “as between merchants,” a writing signed and sent to the other binds the recipient as an exception to the Statute of Frauds. Uniform Commercial Code, Sections 2-205 and 2A-205. There are other sections of the UCC applicable “as between merchants,” too.

### Merchant to Nonmerchant

In addition to duties imposed between merchants, the UCC imposes certain duties on a merchant when she sells to a nonmerchant. A merchant who sells her merchandise makes an important implied warranty of merchantability. That is, she promises that goods sold will be fit for the purpose for which such goods are normally intended. A nonmerchant makes no such promise, nor does a merchant who is not selling merchandise—for example, a supermarket selling a display case is not a “merchant” in display cases.

### Who Is a Merchant?

Section 2-104(1) of the UCC defines a merchant as one “who deals in goods of the kind or otherwise by his occupation holds himself out as having knowledge or skill peculiar to the practices or goods involved in the transaction.” A phrase that recurs throughout Article 2—“between merchants”—refers to any transaction in which both parties are chargeable with the knowledge or skill of merchants. Uniform Commercial Code, Section 2-104(3). Not every businessperson is a merchant with respect to every possible transaction. But a person or institution normally not considered a merchant can be one under Article 2 if he employs an agent or broker who holds himself out as having such knowledge or skill. (Thus a university with

a purchasing office can be a merchant with respect to transactions handled by that department.)

#### **4.3 Obligations May Be Determined by Parties Under the UCC**

Under the UCC, the parties to a contract are free to put into their contract pretty much anything they want. Article 1-102 states that “the effect of provisions of this Act may be varied by agreement...except that the obligations of good faith, diligence, reasonableness and care prescribed by this Act may not be disclaimed by agreement but the parties may by agreement determine the standards by which the performance of such obligations is to be measure if such standards are not manifestly unreasonable.” Thus the UCC is the “default” position: if the parties want the contract to operate in a specific way, they can provide for that. If they don’t put anything in their agreement about some aspect of their contract’s operation, the UCC applies. For example, if they do not state where “delivery” will occur, the UCC provides that term. (Section 2-308 says it would be at the “seller’s place of business or if he has none, his residence.”)

## Chapter 17 [Title and Risk of Loss \(Hardbound chapter 18\)](#)

### 17.1 Title and Risk of Loss

#### Learning Objectives

After reading this chapter, you should understand the following:

1. Why title is important and at what point in the contracting relationship the buyer acquires title
2. Why risk of loss is important, when risk of loss passes to the buyer, and when the buyer acquires an insurable interest
3. Under what circumstances the buyer can obtain title when a nonowner sells the goods

Parties to a sales contract will usually agree on the obvious details of a sales transaction—the nature of goods, the price, and the delivery time, as discussed in the next chapter. But there are two other issues of importance lurking in the background of every sale:

1. When does the title pass to the buyer? This question arises more in cases involving third parties, such as creditors and tax collectors. For instance, a creditor of the seller will not be allowed to take possession of goods in the seller's warehouse if the title has already passed to the buyer.
2. If goods are damaged or destroyed, who must bear the loss? The answer has obvious financial significance to both parties. If the seller must bear the loss, then in most cases he must pay damages or send the buyer another shipment of goods. A buyer who bears the loss must pay for the goods even though they are unusable. In the absence of a prior agreement, loss can trigger litigation between the parties.

## 17.2 Transfer of Title

### Learning Objectives

1. Understand why it is important to know who has title in a sales transaction.
2. Be able to explain when title shifts.
3. Understand when a person who has no title can nevertheless pass good title on to a buyer.

### 2.1 Why It Is Important When Title Shifts

There are three reasons why it is important when title shifts from seller to buyer—that is, when the buyer gets title.

#### It Affects Whether a Sale Has Occurred

First, a sale cannot occur without a shift in title. You will recall that a sale is defined by the Uniform Commercial Code (UCC) as a “transfer of title from seller to buyer for a price.” Thus if there is no shift of title, there is no sale. And there are several consequences to there being no sale, one of which is—concerning a merchant-seller—that no implied warranty of merchantability arises. (Again, as discussed in the previous chapter, an implied warranty provides that when a merchant-seller sells goods, the goods are suitable for the ordinary purpose for which such goods are used.) In a lease, of course, title remains with the lessor.

#### Creditors’ Rights

Second, title is important because it determines whether creditors may take the goods. If Creditor has a right to seize Debtor’s goods to satisfy a judgment or because the parties have a security agreement (giving Creditor the right to repossess Debtor’s goods), obviously it won’t do at all for Creditor to seize goods when Debtor doesn’t have title to them—they are somebody else’s goods, and seizing them would be conversion, a tort (the civil equivalent of a theft offense).

## **Insurable Interest**

Third, title is related to who has an **insurable interest**. A buyer cannot legally obtain insurance unless he has an insurable interest in the goods. Without an insurable interest, the insurance contract would be an illegal gambling contract. For example, if you attempt to take out insurance on a ship with which you have no connection, hoping to recover a large sum if it sinks, the courts will construe the contract as a wager you have made with the insurance company that the ship is not seaworthy, and they will refuse to enforce it if the ship should sink and you try to collect. Thus this question arises: under the UCC, at what point does the buyer acquire an insurable interest in the goods? Certainly a person has insurable interest if she has title, but the UCC allows a person to have insurable interest with less than full title. The argument here is often between two insurance companies, each *denying* that its insured had insurable interest as to make it liable.

## **2.2 Goods Identified to the Contract**

### **The Identification Issue**

The UCC at Section 2-401 provides that “title to goods cannot pass under a contract for sale prior to their identification to the contract.” (In a lease, of course, title to the leased goods does not pass at all, only the right to possession and use for some time in return for consideration. Uniform Commercial Code, Section 2A-103(1)(j).) So identification to the contract has to happen before title can shift. Identification to the contract here means that the seller in one way or another picks the goods to be sold out of the mass of inventory so that they can be delivered or held for the buyer.

When are goods “identified”? There are two possibilities as to when identification happens.

### **Parties May Agree**

Section 2-501(1) of the UCC says “identification can be made at any time and in any manner explicated agreed to by the parties.”

## **UCC Default Position**

If the parties do not agree on when identification happens, the UCC default kicks in. Section 2-501(1) of the UCC says identification occurs

1. when the contract is made if it is for the sale of goods already existing and identified;
2. if the contract is for the sale of future goods other than those described in paragraph c., when goods are shipped, marked, or otherwise identified by the seller as goods to which the contract refers;
3. when crops are planted or otherwise become growing crops or the young are conceived if the contract is for the sale of unborn young to be born within twelve months after contract or for the sale of crops to be harvested within twelve months or the next normal harvest seasons after contracting, whichever is longer.

## **2.3 When Title Shifts**

### **Parties May Agree**

Assuming identification is done, when does title shift? The law begins with the premise that the agreement of the parties governs. Section 2-401(1) of the UCC says that, in general, “title to goods passes from the seller to the buyer in any manner and on any conditions explicitly agreed on by the parties.” Many companies specify in their written agreements at what moment the title will pass; here, for example, is a clause that appears in sales contracts of Dow Chemical Company: “Title and risk of loss in all goods sold hereunder shall pass to Buyer upon Seller’s delivery to carrier at shipping point.” Thus Dow retains title to its goods only until it takes them to the carrier for transportation to the buyer.

### **Shipment Contracts**

In a shipment contract, the seller’s obligation is to send the goods to the buyer, but not to a particular destination. The typical choices are set out in the UCC at Section 2-319:

- F.O.B. [place of shipment] (the place from which the goods are to be shipped goes in the brackets, as in “F.O.B. Seattle”). F.O.B. means “free on board”; the seller’s obligation, according to Section 2-504 of the UCC, is to put the goods into the possession of a carrier and make a reasonable contract for their transportation, to deliver any necessary documents so the buyer can take possession, and promptly notify the buyer of the shipment.
- F.A.S. [named port] (the name of the seaport from which the ship is carrying the goods goes in the brackets, as in “F.A.S. Long Beach”). F.A.S means “free alongside ship”; the seller’s obligation is to at his “expense and risk deliver the goods alongside the vessel in the manner usual in that port” and to provide the buyer with pickup instructions. Uniform Commercial Code, Section 2-319(2).
- C.I.F. and C. & F. These are actually not abbreviations for delivery terms, but rather they describe who pays insurance and freight. “C.I.F” means “cost, insurance, and freight”—if this term is used, it means that the contract price “includes in a lump sum the cost of the goods and the insurance and freight to the named destination. “Uniform Commercial Code, Section 2-320. “C. & F.” means that “the price so includes cost and freight to the named destination. “Uniform Commercial Code, Section 2-320.

### **Destination Contracts**

In a destination contract, the seller’s obligation is to see to it that the goods actually arrive at the destination. Here again, the parties may employ the use of abbreviations that indicate the seller’s duties. See the following from the UCC, Section 2-319:

- F.O.B. [destination] means the seller’s obligation is to “at his own expense and risk transport the goods to that place and there tender delivery of them” with appropriate pickup instructions to the buyer.
- Ex-ship “is the reverse of the F.A.S. term.” Uniform Commercial Code, Section 2-322. It means “from the carrying vessel”—the seller’s obligation is to make sure the freight bills

are paid and that “the goods leave the ship’s tackle or are otherwise properly unloaded.”

- No arrival, no sale means the “seller must properly ship conforming goods and if they arrive by any means he must tender them on arrival but he assumes no obligation that the goods will arrive unless he has caused the non-arrival.” Uniform Commercial Code, Section 2-324. If the goods don’t arrive, or if they are damaged or deteriorated through no fault of the seller, the buyer can either treat the contract as avoided, or pay a reduced amount for the damaged goods, with no further recourse against the seller. Uniform Commercial Code, Section 2-613.

### **Goods Not to Be Moved**

It is not uncommon for contracting parties to sell and buy goods stored in a grain elevator or warehouse without physical movement of the goods. There are two possibilities:

1. Goods with documents of title. A first possibility is that the ownership of the goods is manifested by a document of title—“bill of lading, dock warrant, dock receipt, warehouse receipt or order for the delivery of goods, and also any other document which in the regular course of business or financing is treated as adequately evidencing that the person in possession of it is entitled to receive, hold and dispose of the document and the goods it covers. Uniform Commercial Code, Section 1-201(15). In that case, the UCC, Section 2-401(3)(a), says that title passes “at the time when and the place where” the documents are delivered to the buyer.
2. Goods without documents of title. If there is no physical transfer of the goods and no documents to exchange, then UCC, Section 2-401(3)(b), provides that “title passes at the time and place of contracting.”

Here are examples showing how these concepts work.

Suppose the contract calls for Delta Sponge Makers to “ship the entire lot of industrial grade Sponge No. 2 by truck or rail” and that is all that the contract says about shipment. That’s a

“shipment contract,” and the UCC, Section 2-401(2)(a), says that title passes to Very Fast Foods at the “time and place of shipment.” At the moment that Delta turns over the 144 cartons of 1,000 sponges each to a trucker—perhaps Easy Rider Trucking comes to pick them up at Delta’s own factory—title has passed to Very Fast Foods.

Suppose the contract calls for Delta to “deliver the sponges on June 10 at the Maple Street warehouse of Very Fast Foods Inc.” This is a destination contract, and the seller “completes his performance with respect to the physical delivery of the goods” when it pulls up to the door of the warehouse and tenders the cartons. Uniform Commercial Code, Section 2-401(2)(b). “Tender” means that the party—here Delta Sponge Makers—is ready, able, and willing to perform and has notified its obligor of its readiness. When the driver of the delivery truck knocks on the warehouse door, announces that the gross of industrial grade Sponge No. 2 is ready for unloading, and asks where the warehouse foreman wants it, Delta has tendered delivery, and title passes to Very Fast Foods.

Suppose Very Fast Foods fears that the price of industrial sponges is about to soar; it wishes to acquire a large quantity long before it can use them all or even store them all. Delta does not store all of its sponges in its own plant, keeping some of them instead at Central Warehousing. Central is a bailee, one who has rightful possession but not title. (A parking garage often is a bailee of its customers’ cars; so is a carrier carrying a customer’s goods.) Now assume that Central has issued a warehouse receipt (a document of title that provides proof of ownership of goods stored in a warehouse) to Delta and that Delta’s contract with Very Fast Foods calls for Delta to deliver “document of title at the office of First Bank” on a particular day. When the goods are not to be physically moved, that title passes to Very Fast Foods “at the time when and the place where” Delta delivers the document.

### **UCC Default Provision**

If the parties do not stipulate by any means when title shifts, Section 2-401(2) of the UCC provides that “title passes to the buyer at the time and place at which seller completes his

performance with reference to the physical delivery of the goods.” And if the parties have no term in their contract about delivery, the UCC’s default delivery term controls. It says “the place for delivery is the seller’s place of business or if he has none his residence,” and delivery is accomplished at the place when the seller “put[s] and hold[s] conforming goods at the buyer’s disposition and give[s] the buyer any notification reasonably necessary to enable him to take delivery. Code, Sections 2-308 and 2-503.

## **17.3 Title from Nonowners**

### **3.1 The Problem of Title from Nonowners**

We have examined when title transfers from buyer to seller, and here the assumption is, of course, that seller had good title in the first place. But what title does a purchaser acquire when the seller has no title or has at best only a voidable title? This question has often been difficult for courts to resolve. It typically involves a type of eternal triangle with a three-step sequence of events, as follows: (1) The nonowner obtains possession, for example, by loan or theft; (2) the nonowner sells the goods to an innocent purchaser for cash; and (3) the nonowner then takes the money and disappears, goes into bankruptcy, or ends up in jail. The result is that two innocent parties battle over the goods, the owner usually claiming that the purchaser is guilty of conversion (i.e., the unlawful assumption of ownership of property belonging to another) and claiming damages or the right to recover the goods.

### **3.2 The Response to the Problem of Title from Nonowners**

#### **The Basic Rule**

To resolve this dilemma, we begin with a basic policy of jurisprudence: a person cannot transfer better title than he or she had. (The Uniform Commercial Code [UCC] notes this policy in Sections 2-403, 2A-304, and 2A-305.) This policy would apply in a sale-of-goods case in which the nonowner had a void title or no title at all. For example, if a nonowner stole the goods from the owner and then sold them to an innocent purchaser, the owner would be entitled to the goods or to damages. Because the thief had no title, he had no title to transfer to the purchaser. A person cannot get good title to goods from a thief, nor does a person have to

retain physical possession of her goods at all times to retain their ownership—people are expected to leave their cars with a mechanic for repair or to leave their clothing with a dry cleaner.

If thieves could pass on good title to stolen goods, there would be a hugely increased traffic in stolen property; that would be unacceptable. In such a case, the owner can get her property back from whomever the thief sold it to in an action called replevin (an action to recover personal property unlawfully taken). On the other hand, when a buyer in good faith buys goods from an apparently reputable seller, she reasonably expects to get good title, and that expectation cannot be dashed with impunity without faith in the market being undermined. Therefore, as between two innocent parties, sometimes the original owner does lose, on the theory that (1) that person is better able to avoid the problem than the downstream buyer, who had absolutely no control over the situation, and (2) faith in commercial transactions would be undermined by allowing original owners to claw back their property under all circumstances.

### **Sellers with a Voidable Title**

Under the UCC, a person with a voidable title has the power to transfer title to a good-faith purchaser for value. The Code defines *good faith* as “honesty in fact in the conduct or transaction concerned.” Uniform Commercial Code, Section 1-201(19). A “purchaser” is not restricted to one who pays cash; any taking that creates an interest in property, whether by mortgage, pledge, lien, or even gift, is a purchase for purposes of the UCC. And “value” is not limited to cash or goods; a person gives value if he gives any consideration sufficient to support a simple contract, including a binding commitment to extend credit and security for a preexisting claim. Recall from [Chapter 9 "The Agreement"](#) that a “voidable” title is one that, for policy reasons, the courts will cancel on application of one who is aggrieved. These reasons include fraud, undue influence, mistake, and lack of capacity to contract. When a person has a voidable title, title can be taken away from her, but if it is not, she can transfer better title than she has to a good-faith purchaser for value.

Rita, sixteen years old, sells a video game to her neighbor Annie, who plans to give the game to her nephew. Since Rita is a minor, she could rescind the contract; that is, the title that Annie gets is voidable: it is subject to be avoided by Rita's rescission. But Rita does not rescind. Then Annie discovers that her nephew already has that video game, so she sells it instead to an office colleague, Donald. He has had no notice that Annie bought the game from a minor and has only a voidable title. He pays cash. Should Rita—the minor—subsequently decide she wants the game back, it would be too late: Annie has transferred good title to Donald even though Annie's title was voidable.

Suppose Rita was an adult and Annie paid her with a check that later bounced, but Annie sold the game to Donald before the check bounced. Does Donald still have good title? The UCC says he does, and it identifies three other situations in which the good-faith purchaser is protected: (1) when the original transferor was deceived about the identity of the purchaser to whom he sold the goods, who then transfers to a good-faith purchaser; (2) when the original transferor was supposed to but did not receive cash from the intermediate purchaser; and (3) when "the delivery was procured through fraud punishable as larcenous under the criminal law." Uniform Commercial Code, Sections 2-403(1), 2-403(1), 2A-304, and 2A-305.

### **Entrustment**

A merchant who deals in particular goods has the power to transfer all rights of one who entrusts to him goods of the kind to a "buyer in the ordinary course of business" Uniform Commercial Code, Sections 2-403(2), 2A-304(2), and 2A-305(2). The UCC defines such a buyer as a person who buys goods in an ordinary transaction from a person in the business of selling that type of goods, as long as the buyer purchases in "good faith and without knowledge that the sale to him is in violation of the ownership rights or security interest of a third party in the goods." Uniform Commercial Code, Section 1-201(9). Bess takes a pearl necklace, a family heirloom, to Wellborn's Jewelers for cleaning; as the entrustor, she has entrusted the necklace to an trustee. The owner of Wellborn's—perhaps by mistake—sells it to Clara, a buyer, in the ordinary course of business. Bess cannot take the necklace back from Clara, although she has a

cause of action against Wellborn's for conversion. As between the two innocent parties, Bess and Clara (owner and purchaser), the latter prevails. Notice that the UCC only says that the trustee can pass *whatever title the entrustor had* to a good-faith purchaser, not necessarily good title. If Bess's cleaning woman borrowed the necklace, soiled it, and took it to Wellborn's, which then sold it to Clara, Bess could get it back because the cleaning woman had no title to transfer to the trustee, Wellborn's.

## 17. 4 Risk of Loss

### Learning Objectives

1. Understand why who has the risk of loss is important.
2. Know how parties may agree on when the risk of loss shifts.
3. Know when the risk of loss shifts if there is no breach, and if there is a breach.
4. Recognize what "insurable interest" is, why it is important, and how it attaches.

### 4.1 Why Risk of Loss Is Important

"Risk of loss" means who has to pay—who bears the risk—if the goods are lost or destroyed *without the fault of either party*. It is obvious why this issue is important: Buyer contracts to purchase a new car for \$35,000. While the car is in transit to Buyer, it is destroyed in a landslide. Who takes the \$35,000 hit?

### 4.2 When Risk of Loss Passes

#### The Parties May Agree

Just as title passes in accordance with the parties' agreement, so too can the parties fix the risk of loss on one or the other. They may even devise a formula to divide the risk between themselves. Uniform Commercial Code, Section 2-303.

Common terms by which parties set out their delivery obligations that then affect when title shifts (F.O.B., F.A.S., ex-ship, and so on) were discussed earlier in this chapter. Similarly, parties may use common terms to set out which party has the risk of loss; these situations arise with trial sales. That is, sometimes the seller will permit the buyer to return the goods even though the seller had conformed to the contract. When the goods are intended primarily for the buyer's use, the transaction is said to be "sale on approval." When they are intended primarily for resale, the transaction is said to be "sale or return." When the "buyer" is really only a sales agent for the "seller," it is a consignment sale.

### **Sale on Approval**

Under a sale-on-approval contract, risk of loss (and title) remains with the seller until the buyer accepts, and the buyer's trial use of the goods does not in itself constitute acceptance. If the buyer decides to return the goods, the seller bears the risk and expense of return, but a merchant buyer must follow any reasonable instructions from the seller. Very Fast Foods asks Delta for some sample sponges to test on approval; Delta sends a box of one hundred sponges. Very Fast plans to try them for a week, but before that, through no fault of Very Fast, the sponges are destroyed in a fire. Delta bears the loss. Uniform Commercial Code, Section 2-327(1)(a).

### **Sale or Return**

The buyer might take the goods with the expectation of reselling them—as would a women's wear shop buy new spring fashions, expecting to sell them. But if the shop doesn't sell them before summer wear is in vogue, it could arrange with the seller to return them for credit. In contrast to sale-on-approval contracts, sale-or-return contracts have risk of loss (and title too) passing to the buyer, and the buyer bears the risk and expense of returning the goods.

Occasionally the question arises whether the buyer's other creditors may claim the goods when the sales contract lets the buyer retain some rights to return the goods. The answer seems straightforward: in a sale-on-approval contract, where title remains with the seller until

acceptance, the buyer does not own the goods—hence they cannot be seized by his creditors—unless he accepts them, whereas they are the buyer’s goods (subject to his right to return them) in a sale-or-return contract and may be taken by creditors if they are in his possession.

### **Consignment Sales**

In a consignment situation, the seller is a bailee and an agent for the owner who sells the goods for the owner and takes a commission. Under the Uniform Commercial Code (UCC), this is considered a sale or return, thus the consignee (at whose place the goods are displayed for sale to customers) is considered a buyer and has the risk of loss and title. Uniform Commercial Code, Section 2-326(3). The consignee’s creditors can take the goods; that is, unless the parties comply “with an applicable law providing for a consignor’s interest or the like to be evidenced by a sign, or where it is established that the person conducting the business is generally known by his creditors to be substantially engaged in selling the goods of others” (or complies with secured transactions requirements under Article 9, discussed in a later chapter). Uniform Commercial Code, Section 2-326.

## Chapter 18 Performance and Remedies (Hardbound chapter 19)

### Learning Objectives

After reading this chapter, you should understand the following:

1. What performance is expected of the seller in a sales contract
2. What performance is expected of the buyer in a sales contract
3. What rights and duties the buyer has if there is a nonconforming delivery
4. How, in general, the UCC approaches remedies
5. What the seller's remedies are for breach by the buyer
6. What the buyer's remedies are for breach by the seller
7. What excuses the UCC provides for nonperformance

In Part II, we examined contract performance and remedies under common law. In this chapter, we examine performance and remedies under Article 2, the law of sales, of the Uniform Commercial Code (UCC). In the next chapter, we cover special remedies for those damaged or injured by defective products.

The parties often set out in their contracts the details of performance. These include price terms and terms of delivery—where the goods are to be delivered, when, and how. If the parties fail to list these terms, the rules studied in this chapter will determine the parties' obligations: the parties may agree; if they do not, the UCC rules kick in as the default. In any event, the parties have an obligation to act in good faith.

### 18.1 Performance by the Seller

#### Learning Objective

1. Understand what is meant when it is said the seller has a duty to “make a timely delivery of conforming goods.”

### 1.1 The Seller’s Duty in General

The general duty of the seller is this: to make a timely delivery of conforming goods. Uniform Commercial Code, Sections 2-301 and 2-309.

### 1.2 Analysis of the Seller’s Duty

#### **Timing**

By agreement or stipulation, the parties may fix the time when delivery is to be made by including statements in contracts such as “Delivery is due on or before July 8” or “The first of 12 installments is due on or before July 8.” Both statements are clear.

If the parties do not stipulate in their contract when delivery is to occur, the UCC fills the gap. Section 2-309 of the UCC says, “The time for shipment or any other action under a contract if not provided for in this Article or agreed upon shall be a reasonable time.” And what is a “reasonable time” is addressed by comment 1 to this section:

It thus turns on the criteria as to “reasonable time” and on good faith and commercial standards set forth in Sections 1-202, 1-203 and 2-103. It...depends on what constitutes acceptable commercial conduct in view of the nature, purposes and circumstances of the action to be taken.

#### **Delivery**

The parties may agree as to how delivery shall be accomplished; if they do not, the UCC fills the gap.

#### **By Agreement**

The parties may use any language they want to agree on delivery terms.

## If There Is No Agreement

If the parties do not stipulate delivery terms or if their agreement is incomplete or merely formulaic, the UCC describes the seller's obligations or gives meaning to the formulaic language. (Because form contracts are prevalent, formulaic language is customary.) You recall the discussion in [Chapter 17 "Title and Risk of Loss"](#) about when title shifts: we said title shifts when the seller has completed delivery obligations under the contract, and we ran through how those obligations are usually expressed. A quick review here is appropriate.

The contract may be either a *shipment* contract, a *destination* contract, or a contract where the *goods are not to be moved* (being held by a bailee). In any case, unless otherwise agreed, the delivery must be at a reasonable time and the tender (the offer to make delivery) must be kept open for a reasonable time; the buyer must furnish facilities "reasonably suited to the receipt of the goods." Uniform Commercial Code, Section 2-503.

In a shipment contract, the seller has four duties: (1) to deliver the goods to a carrier; (2) to deliver the goods with a reasonable contract for their transportation; (3) to deliver them with proper documentation for the buyer; and (4) to promptly notify the buyer of the shipment (UCC, Section 2-504). The contract may set out the seller's duties using customary abbreviations, and the UCC interprets those: "F.O.B. [insert place where goods are to be shipped from]" means "free on board"—the seller must see to it that the goods are loaded on the vehicle of conveyance at the place of shipment. "F.A.S. [port of shipment inserted here]" means the seller must see to it that the goods are placed along the ship on the dock ready to be loaded (Section 2-319). Price terms include "C.I.F.," which means the sale price includes the cost of the goods, insurance, and freight charges, and "C. & F.," which means the sales price includes the cost of the goods at a cheaper unit price and freight but not insurance. Uniform Commercial Code, Section 2-320. If it is clear from the contract that the seller is supposed to ship the goods (i.e., the buyer is not going to the seller's place to get them) but not clear whether it is a shipment or a destination contract, the UCC presumes it is a shipment contract. Uniform Commercial Code, Section 2-503(5).

If it is a destination contract, the seller has two duties: to get the goods to the destination at the buyer's disposal and to provide appropriate documents of delivery. Uniform Commercial Code, Section 2-503. The contract language could be "F.O.B. [place of destination inserted here]," which obligates the seller to deliver to that specific location; "ex-ship," which obligates the seller to unload the goods from the vehicle of transportation at the agreed location (e.g., load the goods onto the dock); or it could be "no arrival, no sale," where the seller is not liable for failure of the goods to arrive, unless she caused it. Uniform Commercial Code, Sections 2-319, 2-322, and 2-324.

If the goods are in the possession of a bailee and are not to be moved—and the parties don't stipulate otherwise—the UCC, Section 2-503 says delivery is accomplished when the seller gives the buyer a negotiable document of title, or if none, when the bailee acknowledges the buyer's right to take the goods.

If nothing at all is said about delivery, the place for delivery is the seller's place of business or his residence if he has no place of business. Uniform Commercial Code, Section 2-308.

### **Conforming Goods**

As always, the parties may put into the contract whatever they want about the goods as delivered. If they don't, the UCC fills the gaps.

### **By Agreement**

The parties may agree on what "conforming goods" means. An order will specify "large grade A eggs," and that means something in the trade. Or an order might specify "20 gross 100-count boxes No. 8 × 3/8 × 32 Phillips flathead machine screws." That is a screw with a designated diameter, length, number of threads per inch, and with a unique, cruciform head insert to take a particular kind of driver. The buyer might, for example, agree to purchase "seconds," which are goods with some flaw, such as clothes with seams not sewed quite straight or foodstuffs

past their pull date. The parties may also agree in the contract what happens if nonconforming goods are delivered, as we'll see later in this chapter.

### **If There Is No Agreement**

If nothing is said in the contract about what quality of goods conform to the contract, then the UCC default rule kicks in. The seller is to make a perfect tender: what is delivered must in every respect conform to the contract. Uniform Commercial Code, Section 2-601. And if what is delivered doesn't conform to the contract, the buyer is not obligated to accept the goods.

## 18.2 Performance by Buyer

### Learning Objectives

1. Understand what the general duties of the buyer are.
2. Recognize what rights the buyer has if the seller tenders a nonconforming delivery.

### 2.1 General Duties of Buyer

#### Inspection

Under Sections 2-513(1) and (2) of the Uniform Commercial Code (UCC), the buyer has a qualified right to inspect goods. That means the buyer must be given the chance to look over the goods to determine whether they conform to the contract. If they do not, he may properly reject the goods and refuse to pay. The right to inspect is subject to three exceptions:

1. The buyer waives the right. If the parties agree that payment must be made before inspection, then the buyer must pay (unless the nonconformity is obvious without inspection). Payment under these circumstances does not constitute acceptance, and the buyer does not lose the right to inspect and reject later.
2. The delivery is to be made C.O.D. (cash on delivery).
3. Payment is to be made against documents of title.

If the buyer fails to inspect, or fails to discover a defect that an inspection would have revealed, he cannot later revoke his acceptance, subject to some exceptions.

#### Acceptance

Acceptance is clear enough: it means the buyer takes the goods. But the buyer's options on improper delivery need to be examined, because that's often a problem area.

The buyer may accept goods by words, silence, or action. Section 2-606(1) of the UCC defines acceptance as occurring in any one of three circumstances:

1. **Words.** The buyer, after a reasonable opportunity to inspect, tells the seller either that the goods conform or that he will keep them despite any nonconformity.
2. **Silence.** The buyer fails to reject, after a reasonable opportunity to inspect.
3. **Action.** The buyer does anything that is inconsistent with the seller's ownership, such as using the goods (with some exceptions) or selling the goods to someone else.

Once the buyer accepts, she is obligated to pay at the contract rate and loses the right to reject the goods. Uniform Commercial Code, Section 2-607. She is stuck, subject to some exceptions.

## **Payment**

The parties may specify in their contract what *payment* means and when it is to be made. If they don't, the UCC controls the transaction. Uniform Commercial Code, Sections 2-511 and 2-512.

### **2.2 A Buyer's Right on Nonconforming Delivery**

Obviously if the delivery is defective, the disappointed buyer does not have to accept the goods: the buyer may (a) reject the whole, (b) accept the whole, or (c) accept any commercial unit and reject the rest (2-601, 2A-509), or (d)—in two situations—revoke an acceptance already made.

### **Rejection and a Buyer's Duties after Rejection**

Under UCC, Section 2-601(a), rejection is allowed if the seller fails to make a perfect tender. The rejection must be made within a reasonable time after delivery or tender. Once it is made, the buyer may not act as the owner of the goods. If he has taken possession of the goods before he rejects them, he must hold them with reasonable care to permit the seller to remove them. If the buyer is a merchant, then the buyer has a special duty to follow reasonable instructions from the seller for disposing of the rejected goods; if no instructions are forthcoming and the goods are perishable, then he must try to sell the goods for the seller's account and is entitled to a commission for his efforts. Whether or not he is a merchant, a buyer may store the goods,

reship them to the seller, or resell them—and charge the seller for his services—if the seller fails to send instructions on the goods’ disposition. Such storage, reshipping, and reselling are not acceptance or conversion by the buyer.

### **Acceptance of a Nonconforming Delivery**

The buyer need not reject a nonconforming delivery. She may accept it with or without allowance for the nonconformity.

### **Acceptance of Part of a Nonconforming Delivery**

The buyer may accept any commercial unit and reject the rest if she wants to. A commercial unit means “such a unit of goods as by commercial usage is a single whole for purposes of sale and division of which materially impairs its character or value on the market or in use. A commercial unit may be a single article (as a machine), a set of articles (as a suite of furniture or an assortment of sizes), a quantity (as a bale, gross, or carload), or any other unit treated in use or in the relevant market as a single whole. Uniform Commercial Code, Sections 2-105 and 2A103(1).

## **18.3 Remedies**

### **Learning Objectives**

1. Understand what purpose remedies serve under the UCC.
2. Be able to see when the parties’ agreements as to limited remedies fail under the UCC.
3. Recognize what the seller’s remedies are.
4. Recognize what the buyer’s remedies are.

### **3.1 Remedies in General**

#### **General Policy**

The general policy of the Uniform Commercial Code (UCC) is to put the aggrieved party in a good position as if the other party had fully performed—as if there had been a timely delivery

of conforming goods. The UCC provisions are to be read liberally to achieve that result if possible. Thus the seller has a number of potential remedies when the buyer breaches, and likewise the buyer has a number of remedies when the seller breaches.

### **3.2 Seller's Remedies**

#### **Article 2 in General**

Article 2-703 of the UCC lists the four things the buyer can do by way of default, and it lists—here slightly paraphrased—the seller's remedies (2A-523(1) is similar for leases):

Where the buyer wrongfully rejects or revokes acceptance of goods or fails to make a payment due on or before delivery or repudiates with respect to a part or the whole, then with respect to any goods directly affected and, if the breach is of the whole contract, then also with respect to the whole undelivered balance, the aggrieved seller may:

- 1) withhold delivery of such goods;
- (2) stop delivery by any bailee;
- (3) identify to the contract conforming goods not already identified;
- (4) reclaim the goods on the buyer's insolvency;
- (5) resell and recover damages;
- (6) recover damages for non-acceptance or repudiation;
- (7) or in a proper case recover the price;
- (8) cancel.

### 3.3 Buyer's Remedies

In this section, let us assume that Howard, rather than Bunker, breaches, and all other circumstances are the same. That is, Howard had delivered twenty-five prints, twenty-five more were en route, the original painting hung in Howard's living room, another twenty-five prints were in Howard's factory, and the final twenty-five prints were in production.

#### **In General**

The buyer can do the following three things by way of defaulting: repudiate the contract, fail to deliver the goods, or deliver or tender nonconforming goods. Section 2-711 of the UCC provides the following remedies for the buyer:

Where the seller fails to make delivery or repudiates, or the buyer rightfully rejects or justifiably revokes, then with respect to any goods involved, and with respect to the whole if the breach goes to the whole contract, the buyer may;

- (1) cancel the contract, and
- (2) recover as much of the price as has been paid; and
- (3) "cover" and get damages; and
- (4) recover damages for nondelivery.

Where the seller fails to deliver or repudiates, the buyer may also:

- (5) if the goods have been identified recover them; or
- (6) in a proper case obtain specific performance or
- (7) replevy the goods.

On rightful rejection or justifiable revocation of acceptance, a buyer:

(8) has a security interest in goods in his possession or control for any payments made on their price and any expenses reasonably incurred in their inspection, receipt, transportation, care and custody and may hold such goods and resell them in like manner as an aggrieved seller.

If the buyer has accepted non-conforming goods and notified seller of the non-conformity, buyer can

(9) recover damages for the breach; Uniform Commercial Code, Section 2-714.

and in addition the buyer may

(10) recover incidental damages and

(11) recover consequential damages; Uniform Commercial Code, Section 2-715.

## 18.4 Excuses for Nonperformance

### Learning Objectives

1. Recognize how parties are discharged if the goods are destroyed.
2. Determine what defenses are valid when it becomes very difficult or impossible to perform.
3. Understand the UCC's position on the right to adequate assurances and anticipatory repudiation.

In contracts for the sale of goods, as in common law, things can go wrong. What then?

#### 4.1 Casualty to Identified Goods

As always, the parties may agree what happens if the goods are destroyed before delivery. The default is Sections 2-613 and 2A-221(a) of the Uniform Commercial Code (UCC). The UCC says that “where the contract requires for its performance goods identified when the contract is made, and the goods suffer casualty without fault of either party before the risk of loss passes to the buyer,...then (a) if the loss is total the contract is avoided; and (b) if the loss is partial the

buyer may nevertheless accept them with due allowance for the goods' defects." Thus if Howard ships the original Bruegel to Bunker but the painting is destroyed, through no fault of either party, before delivery occurs, the parties are discharged. If the frame is damaged, Bunker could, if he wants, take the painting anyway, but at a discount.

### **The UCC's Take on Issues Affecting "Impossibility"**

Although this matter was touched on in [Chapter 14 "Discharge of Obligations"](#), it is appropriate to mention briefly again the UCC's treatment of variations on the theme of "impossibility."

#### **Impracticability**

Sections 2-614(1) and 2A-404(1) of the UCC require reasonable substitution for berthing, loading, and unloading facilities that become unavailable. They also require reasonable substitution for transportation and delivery systems that become "commercially impracticable"; if a practical alternative exists, "performance must be tendered and accepted." If Howard agreed to send the prints by rail, but a critical railroad bridge is unusable and no trains can run, delivery by truck would be required.

Section 2-615 of the UCC says that the failure to deliver goods is not a breach of the seller's duty "if performance as agreed has become impracticable by the occurrence of a contingency the non-occurrence of which was a basic assumption on which the contract was made or by compliance in good faith with any applicable foreign or domestic government regulation or order whether or not it later proves to be invalid." Section 2A-405(b) of the UCC is similar for leases.

#### **Right to Adequate Assurances of Performance**

Section 2-609, Comment 1, of the UCC observes that "the essential purpose of a contract...is actual performance [but] a continuing sense of reliance and security that the promised performance will be forthcoming when due is an important feature of the bargain." Thus the UCC says that if one party has "reasonable grounds for insecurity arise...either party may in

writing demand adequate assurance and until he receives such assurance may if commercially reasonable suspend [his own] performance[.]”

### **Anticipatory Repudiation**

Obviously if a person repudiates the contract it’s clear she will not perform, but what if she repudiates before time for performance is due? Does the other side have to wait until nonperformance actually happens, or can he sue in anticipation of the other’s default? Sections 2-610 and 2A-402 of the UCC say the aggrieved party can do either: wait for performance or “resort to any remedy for breach.” Under the UCC, Sections 2-611 and 2A-403, the one who has anticipatorily repudiated can “retract his repudiation unless the aggrieved party has since the repudiation cancelled or materially changed his position[.]”

Suppose that Howard has cause to suspect that if he does deliver the goods, Bunker won’t pay. Howard may write to Bunker and demand—not request—assurances of adequate performance. If such assurances are not adequately forthcoming, Howard may assume that Bunker has repudiated the contract and have remedies.

## Chapter 19 Nature and Form of Commercial Paper (Hardbound Chapter 22)

### Learning Objectives

After reading this chapter, you should understand the following:

1. Why commercial paper is important in modern economic systems
2. How the law of commercial paper has developed over the past four hundred years, and what role it plays in economics and finance
3. What the types of commercial paper are, and who the parties to such paper are
4. What is required for paper to be negotiable

Here we begin our examination of commercial paper, documents representing an obligation by one party to pay another money. You are familiar with one kind of commercial paper: a check.

### 19.1 Introduction to Commercial Paper

#### Learning Objectives

1. Understand why commercial paper is an important concept in modern finance.
2. Be familiar with the historical development of commercial paper.
3. Recognize how commercial paper is viewed in economics and finance.

#### 1.1 The Importance of Commercial Paper

Because commercial paper is a vital invention for the working of our economic system, brief attention to its history and its function as a medium of exchange in economics and finance is appropriate.

#### The Central Role of Commercial Paper

Commercial paper is the collective term for various financial instruments, or tools, that include checks drawn on commercial banks, drafts (drawn on something other than a bank), certificates of deposit, and notes evidencing a promise to pay. Like money, commercial paper is a medium

of exchange, but because it is one step removed from money, difficulties arise that require a series of interlocking rules to protect both sellers and buyers.

To understand the importance of commercial paper, consider the following example. It illustrates a distinction that is critical to the discussion in our four chapters on commercial paper.

Lorna Love runs a tennis club. She orders a truckload of new tennis rackets from Rackets, Inc., a manufacturer. The contract price of the rackets is \$100,000. Rackets ships the rackets to Love. Rackets then sells for \$90,000 its contract rights (rights to receive the payment from Love of \$100,000) to First Bank. Unfortunately, the rackets that arrive at Love's are warped and thus commercially worthless. Rackets files for bankruptcy.

The key to the central role that commercial paper plays in modern finance is negotiability. *Negotiability* means that the paper is freely and unconditionally transferable from one person to another by delivery or by delivery and indorsement. ("Indorsement," not "endorsement," is the spelling used in the UCC, though the latter is more common in nonlegal usage.) Without the ability to pay and finance through commercial paper, the business world would be paralyzed. At bottom, negotiability is the means by which a person is empowered to transfer to another more than what the transferor himself possesses. In essence, this is the power to convey to a transferee the right in turn to convey clear title, when the original transferor does not have clear title.

### **Overview of Chapters on Commercial Paper**

In this chapter, we examine the history and nature of commercial paper and define the types of parties (persons who have an interest in the paper) and the types of instruments. We then proceed to four fundamental issues that must be addressed to determine whether parties such as First Bank, in the preceding example, can collect:

1. Is the paper negotiable? That is, is the paper in the proper form? We explore that issue in this chapter.
2. Was the paper negotiated properly?.
3. Is the purchaser of the paper a holder in due course?.
4. Does the maker of the paper have available any defenses against even the holder in due course?

## 1.2 History of Commercial Paper

### Development of the Law

Negotiable instruments are no modern invention; we know that merchants used them as long ago as the age of Hammurabi, around 1700 BC. They fell into disuse after the collapse of the Roman Empire and then reappeared in Italy around the fourteenth century. They became more common as long-distance commerce spread. In an era before paper currency, payment in coins or bullion was awkward, especially for merchants who traveled great distances across national boundaries to attend the fairs at which most economic exchanges took place. Merchants and traders found it far more efficient to pay with paper.

Bills of exchange, today commonly known as *drafts*, were recognized instruments in the law merchant. (The “law merchant” was the system of rules and customs recognized and adopted by early-modern traders and is the basis of the UCC Article 3.) A draft is an unconditional order by one person (the drawer) directing another person (drawee or payor) to pay money to a named third person or to bearer; a check is the most familiar type of draft. The international merchant courts regularly enforced drafts and permitted them to be transferred to others by indorsement (the legal spelling of *endorsement*). By the beginning of the sixteenth century, the British common-law courts began to hear cases involving bills of exchange, but it took a half century before the courts became comfortable with them and accepted them as crucial to the growing economy.

## 19.2 Scope of Article 3 and Types of Commercial Paper and Parties

## Learning Objectives

1. Understand the scope of Article 3 of the Uniform Commercial Code.
2. Recognize the types of commercial paper: drafts, checks, notes, and certificates of deposit.
3. Give the names of the various parties to commercial paper.

### 2.1 Scope of Article 3

Article 3 of the Uniform Commercial Code (UCC) covers commercial paper but explicitly excludes money, documents of title, and investment securities. Documents of title include bills of lading and warehouse receipts and are governed by Article 7 of the UCC. Investment securities are covered by Article 8. Instruments that fall within the scope of Article 3 may also be subject to Article 4 (bank deposits and collections), Article 8 (securities), and Article 9 (secured transactions). If so, the rules of these other articles supersede the provisions of Article 3 to the extent of conflict. Article 3 is a set of general provisions on negotiability; the other articles deal more narrowly with specific transactions or instruments.

### 2.2 Types of Commercial Paper

There are four types of commercial paper: drafts, checks, notes, and certificates of deposit.

#### **Drafts**

A draft is an unconditional written order by one person (the drawer) directing another person (the drawee) to pay a certain sum of money on demand or at a definite time to a named third person (the payee) or to bearer. The draft is one of the two basic types of commercial paper; the other is the note. As indicated by its definition, the draft is a three-party transaction.

#### **Parties to a Draft**

The drawer is one who directs a person or an entity, usually a bank, to pay a sum of money stated in an instrument—for example, a person who makes a draft or writes a check. The

drawer prepares a document (a form, usually)—the draft—ordering the drawee to remit a stated sum of money to the payee. The drawee is the person or entity that a draft is directed to and that is ordered to pay the amount stated on it. The most common drawee is a bank. The drawer, drawee, and payee need not be different people; the same person may have different capacities in a single transaction. For example, a drawer (the person asking that payment be made) may also be the payee (the person to whom the payment is to be made). A drawee who signs the draft becomes an acceptor: the drawee pledges to honor the draft as written. To accept, the drawee need only sign her name on the draft, usually vertically on the face, but anywhere will do. Words such as “accepted” or “good” are unnecessary. However, a drawee who indicates that she might refuse to pay will not be held to have accepted. Thus in the archetypal case, the court held that a drawee who signed his name and appended the words “Kiss my foot” did not accept the draft. *Norton v. Knapp*, 19 N.W. 867 (IA 1884).

The drawer directs the funds to be drawn from—pulled from—the drawee, and the drawee pays the person entitled to payment as directed.

## **Types of Drafts**

Drafts can be divided into two broad subcategories: sight drafts and time drafts.

A sight draft calls for payment “on sight,” that is, when presented. Recall from [Section 19.1 "Introduction to Commercial Paper"](#) that Lorna Love wished to buy tennis rackets from Rackets, Inc. Suppose Love had the money to pay but did not want to do so before delivery. Rackets, on the other hand, did not want to ship before Love paid. The solution: a sight draft, drawn on Love, to which would be attached an order bill of lading that Rackets received from the trucker when it shipped the rackets. The sight draft and bill of lading go to a bank in Love’s city. When the tennis rackets arrive, the carrier notifies the bank, which presents the draft to Love for payment. When she has done so, the bank gives Love the bill of lading, entitling her to receive

the shipment. The bank forwards the payment to Rackets' bank, which credits Rackets' account with the purchase amount.

A time draft, not surprisingly, calls for payment on a date specified in the draft. Suppose that Love will not have sufficient cash to pay until she has sold the rackets but that Rackets needs to be paid immediately. The solution: a common form of time draft known as a trade acceptance. Rackets, the seller, draws a draft on Love, who thus becomes a drawee. The draft orders Love to pay the purchase price to the order of Rackets, as payee, on a fixed date. Rackets presents the draft to Love, who accepts it by signing her name. Rackets then can indorse the draft (by signing it) and sell it, at a discount, to its bank or some other financial institution. Rackets thus gets its money right away; the bank may collect from Love on the date specified

### **Drafts in International Trade**

Drafts are an international convention. In England and the British Commonwealth, drafts are called bills of exchange. Like a draft, a bill of exchange is a kind of check or promissory note without interest. Used primarily in international trade, it is a written order by one person to pay another a specific sum on a specific date sometime in the future. If the bill of exchange is drawn on a bank, it is called a bank draft. If it is drawn on another party, it is called a trade draft. Sometimes a bill of exchange will simply be called a draft, but whereas a draft is always negotiable (transferable by endorsement), this is not necessarily true of a bill of exchange.

widely used draft in international trade is the banker's acceptance. It is a short-term credit investment created by a nonfinancial firm and guaranteed by a bank. This instrument is used when an exporter agrees to extend credit to an importer.

Assume Love, the importer, is in New York; Rackets, the exporter, is in Taiwan. Rackets is willing to permit Love to pay ninety days after shipment. Love makes a deal with her New York bank to issue Rackets' bank in Taiwan a letter of credit. This tells the seller's bank that the buyer's bank is willing to accept a draft drawn on the buyer in accordance with terms spelled out in the letter of credit. Love's bank may insist on a security interest in the tennis rackets, or it may conclude

that Love is creditworthy. On receipt of the letter of credit, Rackets presents its bank in Taiwan with a draft drawn on Love's bank. That bank antes up the purchase amount (less its fees and interest), paying Rackets directly. It then forwards the draft, bill of lading, and other papers to a correspondent bank in New York, which in turn presents it to Love's bank. If the papers are in order, Love's bank will "accept" the draft (sign it). The signed draft is the banker's acceptance. It is returned to the bank in Taiwan, which can then discount the banker's acceptance if it wishes payment immediately or else wait the ninety days to present it to the New York bank for payment. After remitting to the Taiwanese bank, the New York bank then demands payment from Love.

## **Checks**

A second type of commercial paper is the common bank check, a special form of draft. Section 3-104(2)(b) of the UCC defines a check as "a draft drawn on a bank and payable on demand." Postdating a check (putting in a future date) does not invalidate it or change its character as payable on demand. Postdating simply changes the first time at which the payee may demand payment. Checks are, of course, usually written on paper forms, but a check can be written on anything—a door, a shirt, a rock—though certainly the would-be holder is not obligated to accept it.

Like drafts, checks may be accepted by the drawee bank. Bank acceptance of a check is called certification; the check is said to be certified by stamping the word "certified" on the face of the check. When the check is certified, the bank guarantees that it will honor the check when presented. It can offer this guarantee because it removes from the drawer's account the face amount of the check and holds it for payment. The payee may demand payment from the bank but not from the drawer or any prior indorser of the check.

A certified check is distinct from a cashier's check. A cashier's check is drawn on the account of the bank itself and signed by an authorized bank representative in return for a cash payment to it from the customer. The bank guarantees payment of the cashier's check also.

## Notes

A note—often called a promissory note—is a written promise to pay a specified sum of money on demand or at a definite time. There are two parties to a note: the maker (promisor), and the payee (promisee). For an example of a promissory note. The maker might execute a promissory note in return for a money loan from a bank or other financial institution or in return for the opportunity to make a purchase on credit.

## Checks

A second type of commercial paper is the common bank check, a special form of draft. Section 3-104(2)(b) of the UCC defines a check as “a draft drawn on a bank and payable on demand.” Postdating a check (putting in a future date) does not invalidate it or change its character as payable on demand. Postdating simply changes the first time at which the payee may demand payment. Checks are, of course, usually written on paper forms, but a check can be written on anything—a door, a shirt, a rock—though certainly the would-be holder is not obligated to accept it.

Like drafts, checks may be accepted by the drawee bank. Bank acceptance of a check is called certification; the check is said to be certified by stamping the word “certified” on the face of the check. When the check is certified, the bank guarantees that it will honor the check when presented. It can offer this guarantee because it removes from the drawer’s account the face amount of the check and holds it for payment. The payee may demand payment from the bank but not from the drawer or any prior indorser of the check.

A certified check is distinct from a cashier’s check. A cashier’s check is drawn on the account of the bank itself and signed by an authorized bank representative in return for a cash payment to it from the customer. The bank guarantees payment of the cashier’s check also.

## **Certificates of Deposit**

A fourth type of commercial paper is the certificate of deposit, commonly called a CD. The CD is a written acknowledgment by a bank that it has received money and agrees to repay it at a time specified in the certificate. The first negotiable CD was issued in 1961 by First National City Bank of New York (now Citibank); it was designed to compete for corporate cash that companies were investing in Treasury notes and other funds. Because CDs are negotiable, they can be traded easily if the holder wants cash, though their price fluctuates with the market.

### **2.3 Other Parties to Commercial Paper**

In addition to makers, drawees, and payees, there are five other capacities in which one can deal with commercial paper.

#### **Indorser and Indorsee**

The indorser (also spelled *endorser*) is one who transfers ownership of a negotiable instrument by signing it. A depositor indorses a check when presenting it for deposit by signing it on the back. The bank deposits its own funds, in the amount of the check, to the depositor's account. By indorsing it, the depositor transfers ownership of the check to the bank. The depositor's bank then can present it to the drawer's bank for repayment from the drawer's funds. The indorsee is the one to whom a draft or note is indorsed. When a check is deposited in a bank, the bank is the indorsee.

#### **Holder**

A holder is "a person in possession of a negotiable that is payable either to bearer, or to an identified person that is the person in possession. Uniform Commercial Code, Section 1-201(21). *Holder* is thus a generic term that embraces several of the specific types of parties already mentioned. An indorsee and a drawee can be holders. But a holder can also be someone unnamed whom the original parties did not contemplate by name—for example, the holder of a bearer note.

## **Holder in Due Course**

A holder in due course is a special type of holder who, if certain requirements are met, acquires rights beyond those possessed by the transferor (we alluded to this in describing the significance of Lorna Love's making of a negotiable—as opposed to a nonnegotiable—instrument). We discuss the requirements for a holder in due course.

An accommodation party is one who signs a negotiable instrument in order to lend her name to another party to the instrument. It does not matter in what capacity she signs, whether as maker or comaker, drawer or codrawer, or indorser. As a signatory, an accommodation party is always a surety; a surety is one who guarantees payment if the primarily obligated party fails to pay).

## Chapter 20 Negotiation of Commercial Paper (Hardbound chapter 23)

### Learning Objectives

After reading this chapter, you should understand the following:

1. The distinction between *transfer* and *negotiation* of commercial paper
2. The liability of a person who transfers paper
3. The types of indorsements and their effects
4. Special problems that arise with forged indorsements

In the previous chapter, we took up the requirements for paper to be negotiable. Here we take up negotiation.

### 20.1 Transfer and Negotiation of Commercial Paper

#### Learning Objectives

1. Understand what a transfer of commercial paper is.
2. Recognize the rights and liabilities of transferees and the liabilities of transferors.
3. Know how a transfer becomes a negotiation payable to order or to bearer.

#### 1.1 Definitions, Rights, and Liabilities

Transfer means physical delivery of any instrument—negotiable or not—intending to pass title. Section 3-203(a) of the Uniform Commercial Code (UCC) provides that “an instrument is transferred when it is delivered by a person other than its issuer for the purpose of giving to the person receiving delivery the right to enforce the instrument.”

#### Negotiation and Holder

Section 3-201(a) of the UCC defines negotiation as “a transfer of possession, whether voluntary or involuntary, of an instrument to a person who thereby becomes its holder if possession is obtained from a person other than the issuer of the instrument.” A holder is defined in Section

1-201(2) as “a person who is in possession of an instrument drawn, issued, or indorsed to him or his order or to bearer or in blank” (“in blank” means that no indorsement is required for negotiation). The original issuing or making of an instrument is not negotiation, though a holder can be the beneficiary of either a transfer or a negotiation. The Official Comment to 3-201(a) is helpful:

A person can become holder of an instrument when the instrument is issued to that person, or the status of holder can arise as the result of an event that occurs after issuance. “Negotiation” is the term used in article 3 to describe this post-issuance event. Normally, negotiation occurs as the result of a voluntary transfer of possession of an instrument by a holder to another person who becomes the holder as a result of the transfer. Negotiation always requires a change in possession of the instrument because nobody can be a holder without possessing the instrument, either directly or through an agent. But in some cases the transfer of possession is involuntary and in some cases the person transferring possession is not a holder....[S]ubsection (a) states that negotiation can occur by an involuntary transfer of possession. For example, if an instrument is payable to bearer and it is stolen by Thief or is found by Finder, Thief or Finder becomes the holder of the instrument when possession is obtained. In this case there is an involuntary transfer of possession that results in negotiation to Thief or Finder. Uniform Commercial Code, Section 3-201, Official Comment.

In other words, to qualify as a holder, a person must possess an instrument that runs to her. An instrument “runs” to a person if (1) it has been issued to her or (2) it has been transferred to her by negotiation (negotiation is the “post-issuance event” cited in the comment).

Commercially speaking, the status of the immediate person to whom the instrument was issued (the payee) is not very interesting; the thing of interest is whether the instrument is passed *on* by the payee *after* possession, through negotiation. Yes, the payee of an instrument is a holder, and can be a holder in due course, but the crux of negotiable instruments involves taking an instrument free of defenses that might be claimed by anybody against paying on the instrument; the payee would know of defenses, usually, so—as the comment puts it—“use of the holder-in-due-course doctrine by the payee of an instrument is not the normal

situation....[r]ather, the holder in due course is an immediate or remote transferee of the payee.” Uniform Commercial Code, Section 3-302, Comment 4.

## **Liability of Transferors**

Introduction to liability will help in understanding the types of indorsements discussed in this chapter. There are two types of liability affecting transferors: contract liability and warranty liability.

### **Contract Liability**

Persons who sign the instrument—that is, makers, acceptors, drawers, indorsers—have signed a contract and are subject to contract liabilities. Drafts (checks) and notes are, after all, contracts. Makers and acceptors are *primary parties* and are unconditionally liable to pay the instrument. Drawers and indorsers are *secondary parties* and are conditionally liable. The conditions creating liability—that is, presentment, dishonor, and notice. .

### **Warranty Liability**

The transferor’s *contract* liability is limited. It applies only to those who sign and only if certain additional conditions are met and, as will be discussed, can even be disclaimed. Consequently, a holder who has not been paid often must resort to a suit based on one of five warranties. These warranties are implied by law; UCC, Section 3-416, details them:

(A) A person who transfers an instrument for consideration warrants all of the following to the transferee and, if the transfer is by indorsement, to any subsequent transferee:

- (1) The warrantor is a person entitled to enforce the instrument.
- (2) All signatures on the instrument are authentic and authorized.
- (3) The instrument has not been altered.

(4) The instrument is not subject to a defense or claim in recoupment of any party which can be asserted against the warrantor.

(5) The warrantor has no knowledge of any insolvency proceeding commenced with respect to the maker or acceptor or, in the case of an unaccepted draft, the drawer.

Breach of one of these warranties must be proven at trial if there is no general contract liability.

### **Liability of Transferees**

The transferee takes by assignment; as an assignee, the new owner of the instrument has only those rights held by the assignor. Claims that could be asserted by third parties against the assignor can be asserted against the assignee. A negotiable instrument can be transferred in this sense without being negotiated. A payee, for example, might fail to meet all the requirements of negotiation; in that event, the instrument might wind up being merely transferred (assigned). When all requirements of negotiability and negotiation have been met, the buyer is a holder and may (if a holder in due course—see [Chapter 21 "Holder in Due Course and Defenses"](#)) collect on the instrument without having to prove anything more. But if the instrument was not properly negotiated, the purchaser is at most a transferee and cannot collect if defenses are available, even if the paper itself is negotiable.

## **1.2 How Negotiation Is Accomplished**

Negotiation can occur with either bearer paper or order paper.

### **Negotiation of Instrument Payable to Bearer**

An instrument payable to bearer—bearer paper—can be negotiated simply by delivering it to the transferee; bearer paper runs to whoever is in possession of it, even a thief. Despite this simple rule, the purchaser of the instrument may require an indorsement on some bearer paper anyway. You may have noticed that sometimes you are requested to indorse your own

check when you make it out to cash. That is because the indorsement increases the liability of the indorser if the holder is unable to collect.

### **Negotiation of Instrument Payable to Order**

Negotiation is usually voluntary, and the issuer usually directs payment “to order” —that is, to someone’s order, originally the payee. Order paper is this negotiable instrument that by its term is payable to a specified person or his assignee. If it is to continue its course through the channels of commerce, it must be indorsed—signed, usually on the back—by the payee and passed on to the transferee. The transferee is a holder.

## **20.2 Indorsements**

### **Learning Objectives**

1. Understand the meaning of indorsement and its formal requirements.
2. Know the effects of various types of indorsements: no indorsement, partial, blank, special, restrictive, conditional, qualified.

### **2.1 Definition and Formal Requirements of Indorsement**

#### **Definition**

Most commonly, paper is transferred by indorsement. The indorsement is evidence that the indorser intended the instrument to move along in the channels of commerce. An indorsement is defined by UCC Section 3-204(a) as

a signature, other than that of a signer as maker, drawer, or acceptor, that alone or accompanied by other words is made on an instrument for the purpose of (i) negotiating the instrument, (ii) restricting payment of the instrument, or (iii) incurring indorser’s liability on the instrument, but regardless of the intent of the signer, a signature and its accompanying words is an indorsement unless the accompanying words, terms of the instrument, place of the signature, or other circumstances unambiguously indicated that the signature was made for a purpose other than indorsement.

## Placement of Indorsement

*Indorse* (or *endorse*) literally means “on the back of,” as fish, say, have dorsal fins—fins on their backs. Usually indorsements are on the back of the instrument, but an indorsement could be on a piece of paper affixed to the instrument. Such an attachment is called an allonge—it comes along with the instrument (UCC, Section 3-204(a)).

There are rules about where indorsements are placed. The Expedited Funds Availability Act was enacted in 1987 by Congress to standardize holding periods on deposits made to commercial banks and to regulate institutions’ use of deposit holds—that is, how soon customers can access the money after they have deposited a check in the bank. The Federal Reserve Board subsequently adopted “Regulation CC, Check Endorsement Standards” to improve funds availability and expedite the return of checks.

## 20.3 Problems and Issues in Negotiation

### Learning Objectives

1. Recognize under what circumstances a negotiation is subject to rescission.
2. Know the effect of reacquisition of an instrument.
3. Understand how instruments made payable to two or more persons are negotiated.
4. Understand how the UCC treats forged indorsements, imposters, and other signatures in the name of the payee.

### 3.1 Common Issues Arising in Negotiation of Commercial Paper

A number of problems commonly arise that affect the negotiation of commercial paper. Here we take up three.

#### Negotiation Subject to Rescission

A negotiation—again, transfer of possession to a person who becomes a holder—can be effective even when it is made by a person without the capacity to sign. Section 3-202(a) of the

UCC declares that negotiation is effective even when the indorsement is made by an infant or by a corporation exceeding its powers; is obtained by fraud, duress, or mistake; is part of an illegal transaction; or is made in breach of a duty.

However, unless the instrument was negotiated to a holder in due course, the indorsement can be rescinded or subjected to another appropriate legal remedy. The Official Comment to this UCC section is helpful:

Subsection (a) applies even though the lack of capacity or the illegality is of a character which goes to the essence of the transaction and makes it entirely void. It is inherent in the character of negotiable instruments that any person in possession of an instrument which by its terms is payable to that person or to bearer is a holder and may be dealt with by anyone as a holder. The principle finds its most extreme application in the well-settled rule that a holder in due course may take the instrument even from a thief and be protected against the claim of the rightful owner. The policy of subsection (a) is that any person to whom an instrument is negotiated is a holder until the instrument has been recovered from that person's possession. Uniform Commercial Code, Section 3-404, Official Comment 1.

So suppose a mentally incapacitated person under a guardianship evades her guardian, goes to town, and writes a check for a new car. Normally, contracts made by such persons are void. But the check is negotiable here. If the guardian finds out about the escapade before the check leaves the dealer's hands, the deal could be rescinded: the check could be retrieved and the car returned.

### **Effect of Reacquisition**

A prior party who reacquires an instrument may reissue it or negotiate it further. But doing so discharges intervening parties as to the reacquirer and to later purchasers who are not holders in due course. Section 3-207 of the UCC permits the reacquirer to cancel indorsements unnecessary to his title or ownership; in so doing, he eliminates the liability of such indorsers even as to holders in due course.

## **Instruments Payable to Two or More Persons**

A note or draft can be payable to two or more persons. In form, the payees can be listed in the alternative or jointly. When a commercial paper says “Pay to the order of Lorna Love or Rackets, Inc.,” it is stated in the alternative. Either person may negotiate (or discharge or enforce) the paper without the consent of the other. On the other hand, if the paper says “Pay to the order of Lorna Love and Rackets, Inc.” or does not clearly state that the payees are to be paid in the alternative, then the instrument is payable to both of them and may be negotiated (or discharged or enforced) only by both of them acting together. The **case**, *Wisner Elevator Company, Inc. v. Richland State Bank*, 862 So. 2d. 1112 (2003); deals, indirectly, with instruments payable to two or more persons.

### **3.2 Forged Indorsements, Imposters, and Fictitious Payees**

#### **The General Rule on Forged Indorsements**

When a check already made out to a payee is stolen, an unscrupulous person may attempt to negotiate it by forging the payee’s name as the indorser. Under UCC Section 1-201(43), a forgery is an “unauthorized signature.” Section 3-403(a) provides that any unauthorized signature on an instrument is “ineffective except as the signature of the unauthorized signer.” The consequence is that, generally, the loss falls on the first party to take the instrument with a forged or unauthorized signature because that person is in the best position to prevent the loss.

Lorna Love writes a check to Steve Supplier on her account at First State Bank, but the check goes astray and is found by Carl Crooks. Crooks indorses the check “Steve Supplier” and presents it for cash to a busy teller who fails to request identification. Two days later, Steve Supplier inquires about his check. Love calls First State Bank to stop payment. Too late—the check has been cashed. Who bears the loss—Love, Supplier, or the bank? The bank does, and it must recredit Love’s account. The forged indorsement on the check was ineffective; the bank was not a holder, and the check should not have been allowed into the channels of commerce. This is why banks may retain checks for a while before allowing access to the money. It is, in

part, what the Expedited Funds Availability Act, “Indorsements” addresses—giving banks time to assess the validity of checks.

### **Exceptions: Imposter, Fictitious Payee, and Dishonest Employee Rules**

The loss for a forged indorsement usually falls on the first party to take the instrument with a forged signature. However, there are three important exceptions to this general rule: the imposter rule, the fictitious payee rule, and the dishonest employee rule.

#### **The Imposter Rule**

If one person poses as the named payee or as an agent of the named payee, inducing the maker or drawer to issue an instrument in the name of the payee to the imposter (or his confederate), the imposter’s indorsement of the payee’s name is effective. The paper can be negotiated according to the imposter rule.

If the named payee is a real person or firm, the negotiation of the instrument by the imposter is good and has no effect on whatever obligation the drawer or maker has to the named payee. Lorna Love owes Steve Supplier \$2,000. Knowing of the debt, Richard Wright writes to Love, pretending to be Steve Supplier, requesting her to send a check to Wright’s address in Supplier’s name. When the check arrives, Wright indorses it by signing “Pay to the order of Richard Wright, (signed) Steve Supplier,” and then indorses it in his own name and cashes it. Love remains liable to Steve Supplier for the money that she owes him, and Love is out the \$2,000 unless she can find Wright.

The difference between this case and the one involving the forger Carl Crooks is that in the second case the imposter (Wright) “induced the maker or drawer [Lorna Love] to issue the instrument...by impersonating the payee of the instrument [Steve Supplier]” (UCC, Section 3-404(a)), whereas in the first case the thief did not induce Love to issue the check to him—he simply found it. And the rationale for making Lorna Love bear the loss is that she failed to detect the scam: she *intended* the imposter, Wright, to receive the instrument. Section 3-404(c)

provides that the indorsement of the imposter (Wright, posing as Steve Supplier) is effective. The same rule applies if the imposter poses as an agent: if the check is payable to Supplier, Inc., a company whose president is Steve Supplier, and an impostor impersonates Steve Supplier, the check could be negotiated if the imposter indorses it as Supplier, Inc.'s, agent "Steve Supplier." Uniform Commercial Code, Section 3-404, Official Comment 1.

Similarly, suppose Love is approached by a young man who says to her, "My company sells tennis balls, and we're offering a special deal this month: a can of three high-quality balls for \$2 each. We'll send your order to you by UPS." He hands her a sample ball: it is substantial, and the price is good. Love has heard of the company the man says he represents; she makes out a check for \$100 to "Sprocket Athletic Supply." The young man does not represent the company at all, but he cashes the check by forging the indorsement and the bank pays. Love takes the loss: surely she is more to blame than the bank.

### **The Fictitious Payee Rule**

Suppose Lorna Love has a bookkeeper, Abby Accountant. Abby presents several checks for Love to sign, one made out to Carlos Aquino. Perhaps there really is no such person, or perhaps he is somebody whom Love deals with regularly, but Accountant intends him to have no interest here. No matter: Love signs the check in the amount of \$2,000. Accountant takes the check and indorses it: "Carlos Aquino, pay to the order of Abby Accountant." Then she signs her name as the next indorser and cashes the check at Love's bank. The check is good, even though it was never intended by Accountant that "Carlos Aquino"—the fictitious payee—have any interest in the instrument. The theory here is to "place the loss on the drawer of the check rather than on the drawee or the Depository Bank that took the check for collection....The drawer is in the best position to avoid the fraud and thus should take the loss. Uniform Commercial Code, Section 3-404, Comment 3. This is also known as "the padded-payroll rule."

In the *imposter* cases, Love drew checks made out to real names but gave them to the wrong person (the imposter); in the *fictitious payee* cases she wrote checks to a nonexistent person (or a real person who was not intended to have any interest at all).

### **The Dishonest Employee Rule**

The UCC takes head-on the recurring problem of a dishonest employee. It says that if an employer “entrust[s] an employee with responsibility with respect to the instrument and the employee or a person acting in concert with the employee makes a fraudulent indorsement of the instrument, the indorsement is effective.” Uniform Commercial Code, Section 3-405(B). For example (adapted from UCC 3-405, Official Comment 3; the Comment does not use the names of these characters, of course), the duties of Abby Accountant, a bookkeeper, include posting the amounts of checks payable to Lorna Love to the accounts of the drawers of the checks. Accountant steals a check payable to Love, which was entrusted to Accountant, and forges Love’s indorsement. The check is deposited by Accountant to an account in the depository bank that Accountant opened in the same name as Lorna Love, and the check is honored by the drawee bank. The endorsement is effective as Love’s indorsement because Accountant’s duties include processing checks for bookkeeping purposes. Thus Accountant is entrusted with “responsibility” with respect to the check. Neither the depository bank nor the drawee bank is liable to Love for conversion of the check. The same result would follow if Accountant deposited the check in the account in the depository bank without indorsement (UCC, Section 4-205(a)). Under Section 4-205(c), deposit in a depository bank in an account in a name substantially similar to that of Lorna Love is the equivalent of an indorsement in the name of Lorna Love. If, say, the janitor had stolen the checks, the result would be different, as the janitor is not entrusted with responsibility regarding the instrument.

### **Negligence**

Not surprisingly, though, if a person fails to exercise ordinary care and thereby substantially contributes to the success of a forgery, that person cannot assert “the alteration or the forgery

against a person that, in good faith, pays the instrument or takes it for value.” Uniform Commercial Code, Section 4-406(a). If the issuer is also negligent, the loss is allocated between them based on comparative negligence theories. Perhaps the bank teller in the example about the tennis-ball scam should have inquired whether the young man had any authority to cash the check made out to Sprocket Athletic Supply. If so, the bank could be partly liable. Or suppose Lorna Love regularly uses a rubber signature stamp for her tennis club business but one day carelessly leaves it unprotected. As a result, the stamp and some checks are stolen; Love bears any loss for being negligent. Similarly liable is a person who has had previous notice that his signature has been forged and has taken no steps to prevent reoccurrences, as is a person who negligently mails a check to the wrong person, one who has the same name as the payee. The UCC provides that the negligence of two or more parties might be compared in order to determine whether each party bears a percentage of the loss.

## Chapter 21 [Holder in Due Course and Defenses](#) (Hardbound chapter 24)

### Learning Objectives

After reading this chapter, you should understand the following:

1. What a holder in due course is, and why that status is critical to commercial paper
2. What defenses are good against a holder in due course
3. How the holder-in-due-course doctrine is modified in consumer transactions

In this chapter, we consider the final two questions that are raised in determining whether a holder can collect:

1. Is the holder a holder in due course?
2. What defenses, if any, can be asserted against the holder in due course to prevent collection on the instrument?

## 1. Holder in Due Course

### Learning Objectives

1. Understand why the concept of holder in due course is important in commercial transactions.
2. Know what the requirements are for being a holder in due course.
3. Determine whether a payee may be a holder in due course.
4. Know what the shelter rule is and why the rule exists.

### 1.1 Overview of the Holder-in-Due-Course Concept

#### Importance of the Holder-in-Due-Course Concept

A holder is a person in possession of an instrument payable to bearer or to the identified person possessing it. But a holder's rights are ordinary, as we noted briefly in [Chapter 19 "Nature and Form of Commercial Paper"](#). If a person to whom an instrument is negotiated becomes nothing more than a holder, the law of commercial paper would not be very

significant, nor would a negotiable instrument be a particularly useful commercial device. A mere holder is simply an assignee, who acquires the assignor's rights but also his liabilities; an ordinary holder must defend against claims and overcome defenses just as his assignor would. The holder in due course is really the crux of the concept of commercial paper and the key to its success and importance. What the holder in due course gets is an instrument free of claims or defenses by previous possessors. A holder with such a preferred position can then treat the instrument almost as money, free from the worry that someone might show up and prove it defective.

### **Requirements for Being a Holder in Due Course**

Under Section 3-302 of the Uniform Commercial Code (UCC), to be a holder in due course (HDC), a transferee must fulfill the following:

1. Be a holder of a negotiable instrument;
2. Have taken it:
  - a) for value,
  - b) in good faith,
  - c) without notice
    - (1) that it is overdue or
    - (2) has been dishonored (not paid), or
    - (3) is subject to a valid claim or defense by any party, or
    - (4) that there is an uncured default with respect to payment of another instrument issued as part of the same series, or

(5) that it contains an unauthorized signature or has been altered, and

3. Have no reason to question its authenticity on account of apparent evidence of forgery, alteration, irregularity or incompleteness.

The point is that the HDC should honestly pay for the instrument and not know of anything wrong with it. If that's her status, she gets paid on it, almost no matter what.

## 1.2 Specific Analysis of Holder-in-Due-Course Requirements

### **Holder**

Again, a holder is a person who possesses a negotiable instrument “payable to bearer or, the case of an instrument payable to an identified person, if the identified person is in possession.” Uniform Commercial Code, Section 1-201(20). An instrument is payable to an identified person if she is the named payee, or if it is indorsed to her. So a holder is one who possesses an instrument and who has all the necessary indorsements.

### **Taken for Value**

Section 3-303 of the UCC describes what is meant by transferring an instrument “for value.” In a broad sense, it means the holder has given something for it, which sounds like consideration. But “value” here is not the same as consideration under contract law. Here is the UCC language:

An instrument is issued or transferred for value if any of the following apply:

(1) The instrument is issued or transferred for a promise of performance, to the extent the promise has been performed.

(2) The transferee acquires a security interest or other lien in the instrument other than a lien obtained by judicial proceeding.

(3) The instrument is issued or transferred as payment of, or as security for, an antecedent claim against any person, whether or not the claim is due.

(4) The instrument is issued or transferred in exchange for a negotiable instrument.

(5) The instrument is issued or transferred in exchange for the incurring of an irrevocable obligation to a third party by the person taking the instrument.

1. *For a promise, to the extent performed.* Suppose A contracts with B: “I’ll buy your car for \$5,000.” Under contract law, A has given consideration: the promise is enough. But this executory (not yet performed) promise given by A is not giving “value” to support the HDC status because the promise has not been performed.

Lorna Love sells her car to Paul Purchaser for \$5,000, and Purchaser gives her a note in that amount. Love negotiates the note to Rackets, Inc., for a new shipment of tennis rackets to be delivered in thirty days. Rackets never delivers the tennis rackets. Love has a claim for \$5,000 against Rackets, which is not an HDC because its promise to deliver is still executory. Assume Paul Purchaser has a defense against Love (a reason why he doesn’t want to pay on the note), perhaps because the car was defective. When Rackets presents the note to Purchaser for payment, he refuses to pay, raising his defense against Love. If Rackets had been an HDC, Purchaser would be obligated to pay on the note regardless of the defense he might have had against Love, the payee.

A taker for value can be a partial HDC if the consideration was only partly performed. Suppose the tennis rackets were to come in two lots, each worth \$2,500, and Rackets only delivered one lot. Rackets would be an HDC only to the extent of \$2,500, and the debtor—Paul Purchaser—could refuse to pay \$2,500 of the promised sum.

The UCC presents two exceptions to the rule that an executory promise is not value. Section 3-303(a)(4) provides that an instrument is issued or transferred for value if the issuer or transferor gives it in exchange for a negotiable instrument, and Section 3-303(5) says an instrument is transferred for value if the issuer gives it in exchange for an irrevocable obligation to a third party.

2. *Security interest*. Value is not limited to cash or the fulfillment of a contractual obligation. A holder who acquires a lien on, or a security interest in, an instrument other than by legal process has taken for value.

3. *Antecedent debt*. Likewise, taking an instrument in payment of, or as security for, a prior claim, whether or not the claim is due, is a taking for value. Blackstone owes Webster \$1,000, due in thirty days. Blackstone unexpectedly receives a refund check for \$1,000 from the Internal Revenue Service and indorses it to Webster. Webster is an HDC though he gave value in the past.

The rationale for the rule of value is that if the holder has not yet given anything of value in exchange for the instrument, he still has an effective remedy should the instrument prove defective: he can rescind the transaction, given the transferor's breach of warranty.

### **In Good Faith**

Section 3-103(4) of the UCC defines good faith as "honesty in fact and the observance of reasonable commercial standards of fair dealing."

### **Honesty in Fact**

"Honesty in fact" is subjectively tested. Suppose Lorna Love had given Rackets, Inc., a promissory note for the tennis rackets. Knowing that it intended to deliver defective tennis rackets and that Love is likely to protest as soon as the shipment arrives, Rackets offers a deep discount on the note to its fleet mechanic: instead of the \$1,000 face value of the note, Rackets will give it to him in payment of an outstanding bill of \$400. The mechanic, being naive in commercial dealings, has no suspicion from the large discount that Rackets might be committing fraud. He has acted in good faith under the UCC test. That is not to say that no set of circumstances will ever exist to warrant a finding that there was a lack of good faith.

### **Observance of Reasonable Commercial Standards of Fair Dealing**

Whether reasonable commercial standards were observed in the dealings is objectively tested, but buying an instrument at a discount—as was done in the tennis rackets example—is not commercially unreasonable, necessarily.

### **Without Notice**

It obviously would be unjust to permit a holder to enforce an instrument that he knew—when he acquired it—was defective, was subject to claims or defenses, or had been dishonored. A purchaser with knowledge cannot become an HDC. But proving knowledge is difficult, so the UCC at Section 3-302(2) lists several types of notice that presumptively defeat any entitlement to status as HDC. Notice is not limited to receipt of an explicit statement; it includes an inference that a person should have made from the circumstances. The explicit things that give a person notice include those that follow.

### **Without Notice That an Instrument Is Overdue**

The UCC provides generally that a person who has notice that an instrument is overdue cannot be an HDC. What constitutes notice? When an inspection of the instrument itself would show that it was due before the purchaser acquired it, notice is presumed. A transferee to whom a promissory note due April 23 is negotiated on April 24 has notice that it was overdue and consequently is not an HDC. Not all paper contains a due date for the entire amount, and demand paper has no due date at all. In Sections 3-302(a)(2) and 3-304, the UCC sets out specific rules dictating what is overdue paper.

### **Without Notice That an Instrument Has Been Dishonored**

Dishonor means that instrument is not paid when it is presented to the party who should pay it.

### **Without Notice of a Defense or Claim**

A purchaser of an instrument cannot be an HDC if he has notice that there are any defenses or claims against it. A defense is a reason why the would-be obligor will not pay; a claim is an assertion of ownership in the instrument. If a person is fraudulently induced to issue or make an instrument, he has a claim to its ownership and a defense against paying.

### **Without Notice of Unauthorized Signature or Alteration**

This is pretty clear: a person will fail to achieve the HDC status if he has notice of alteration or an unauthorized signature.

### **Without Reason to Question the Instrument's Authenticity Because of Apparent Forgery, Alteration, or Other Irregularity or Incompleteness as to Call into Question Its Authenticity**

This also is pretty straightforward, though it is worth observing that a holder will flunk the HDC test if she has notice of unauthorized signature or alteration, or if she *should* have notice on account of apparent irregularity. So a clever forgery would not by itself defeat the HDC status, unless the holder had notice of it.

### **1.3 Payee as Holder in Due Course**

The payee can be an HDC, but in the usual circumstances, a payee would have knowledge of claims or defenses because the payee would be one of the original parties to the instrument. Nevertheless, a payee may be an HDC if all the prerequisites are met. For instance, Blackstone fraudulently convinces Whitestone into signing a note as a comaker, with Greenstone as the payee. Without authority, Blackstone then delivers the note for value to Greenstone. Having taken the note in good faith, for value, without notice of any problems, and without cause to question its validity because of apparent irregularities, Greenstone is an HDC. In any event, typically the HDC is not the payee of the instrument, but rather, is an immediate or remote transferee of the payee.

## 1.4 The Shelter Rule

There is one last point to mention before we get to the real nub of the holder-in-due-course concept (that the sins of her predecessors are washed away for an HDC). The shelter rule provides that the transferee of an instrument acquires the same rights that the transferor had. Thus a person who does not himself qualify as an HDC can still acquire that status if some previous holder (someone “upstream”) was an HDC.

## 21.2 Defenses and Role in Consumer Transactions

### Learning Objective

1. Know to what defenses the holder in due course is not subject.
2. Know to what defenses the holder in due course is subject.
3. Understand how the holder-in-due-course doctrine has been modified for consumer transactions and why.

### 2.1 Defenses

We mentioned that the importance of the holder-in-due-course status is that it promotes ready transferability of commercial paper by giving transferees confidence that they can buy and in turn sell negotiable instruments without concern that somebody upstream—previous holders in the chain of distribution—will have some reason not to pay. The holder-in-due-course doctrine makes the paper almost as readily transferable as cash. Almost, but not quite. We examine first the defenses to which the holder in due course (HDC) is *not subject* and then—the “almost” part—the defenses to which even HDCs are subject.

#### Holder in Due Course Is Not Subject to Personal Defenses

An HDC is *not* subject to the obligor’s personal defenses. But a holder who is not an HDC is subject to them: he takes a negotiable instrument subject to the possible personal claims and defenses of numerous people.

In general, the personal defenses—to which the HDC is *not* subject—are similar to the whole range of defenses for breach of simple contract: lack of consideration; failure of consideration; duress, undue influence, and misrepresentation that does not render the transaction void; breach of warranty; unauthorized completion of an incomplete instrument; prior payment. Incapacity that does not render the transaction void (except infancy) is also a personal defense. As the Uniform Commercial Code (UCC) puts it, this includes “mental incompetence, guardianship, ultra vires acts or lack of corporate capacity to do business, or any other incapacity apart from infancy. If under the state law the effect is to render the obligation of the instrument entirely null and void, the defense may be asserted against a holder in due course. If the effect is merely to render the obligation voidable at the election of the obligor, the defense is cut off.” Uniform Commercial Code, Section 3-305, Comment 1. James White and Robert Summers, in their hornbook on the UCC, opine that unconscionability is almost always a personal defense, not assertable against an HDC. James White and Robert Summers, Uniform Commercial Code, 2/e, 575 (1980). But again, the HDC takes free only from personal defenses of parties with whom she has not dealt. So while the payee of a note can be an HDC, if he dealt with the maker, he is subject to the maker’s defenses.

### **Holder in Due Course Is Subject to Real Defenses**

An HDC in a nonconsumer transaction is not subject to personal defenses, but he *is* subject to the so-called real defenses (or “universal defenses”)—they are good against an HDC.

The real defenses good against any holder, including HDCs, are as follows:

1. Unauthorized signature (forgery) (UCC, Section 3-401(a))
2. Bankruptcy (UCC, Section 3-305(a))
3. Infancy (UCC, Section 3-305(a))
4. Fraudulent alteration (UCC, Section 3-407(b) and (c))
5. Duress, mental incapacity, or illegality that renders the obligation void (UCC, Section 3-305(a))

6. Fraud in the execution (UCC, Section 3-305(a))
7. Discharge of which the holder has notice when he takes the instrument (UCC, Section 3-601)

## Chapter 22: Secured Transactions and Suretyship (Hardbound chapter 28)

### Learning Objectives

After reading this chapter, you should understand the following:

1. The basic concepts of secured transactions
2. The property subject to the security interest
3. Creation and perfection of the security interest
4. Priorities for claims on the security interest
5. Rights of creditors on default

## 22.1 Introduction to Secured Transactions

### Learning Objectives

1. Recognize, most generally, the two methods by which debtors' obligations may be secured.
2. Know the source of law for personal property security.
3. Understand the meaning of *security interest* and other terminology necessary to discuss the issues.
4. Know what property is subject to the security interest.
5. Understand how the security interest is created—"attached"—and perfected.

### 1.1 The Problem of Security

Creditors want assurances that they will be repaid by the debtor. An oral promise to pay is no security at all, and—as it is oral—it is difficult to prove. A signature loan is merely a written promise by the debtor to repay, but the creditor stuck holding a promissory note with a signature loan only—while he may sue a defaulting debtor—will get nothing if the debtor is

insolvent. Again, that's no security at all. Real security for the creditor comes in two forms: by agreement with the debtor or by operation of law without an agreement.

### **By Agreement with the Debtor**

Security obtained through agreement comes in three major types: (1) personal property security (the most common form of security); (2) suretyship—the willingness of a third party to pay if the primarily obligated party does not; and (3) mortgage of real estate.

### **By Operation of Law**

Security obtained through operation of law is known as a lien. Derived from the French for “string” or “tie,” a *lien* is the legal hold that a creditor has over the property of another in order to secure payment or discharge an obligation.

In this chapter, we take up security interests in personal property and suretyship. In the next chapter, we look at mortgages and nonconsensual liens.

## **1.2 Basics of Secured Transactions**

The law of secured transactions consists of five principal components: (1) the nature of property that can be the subject of a security interest; (2) the methods of creating the security interest; (3) the perfection of the security interest against claims of others; (4) priorities among secured and unsecured creditors—that is, who will be entitled to the secured property if more than one person asserts a legal right to it; and (5) the rights of creditors when the debtor defaults. After considering the source of the law and some key terminology, we examine each of these components in turn.

Here is the simplest (and most common) scenario: Debtor borrows money or obtains credit from Creditor, signs a note and security agreement putting up collateral, and promises to pay the debt or, upon Debtor's default, let Creditor (secured party) take possession of (repossess) the collateral and sell it.

## 1.3 Source of Law and Definitions

### Source of Law

Article 9 of the Uniform Commercial Code (UCC) governs security interests in personal property. The UCC defines the scope of the article (here slightly truncated): Uniform Commercial Code, Section 9-109.

This chapter applies to the following:

1. A transaction, regardless of its form, that creates a security interest in personal property or fixtures by contract;
2. An agricultural lien;
3. A sale of accounts, chattel paper, payment intangibles, or promissory notes;
4. A consignment...

### Definitions

As always, it is necessary to review some definitions so that communication on the topic at hand is possible. The secured transaction always involves a debtor, a secured party, a security agreement, a security interest, and collateral.

Article 9 applies to any transaction “that creates a security interest. The UCC in Section 1-201(35) defines security interest as “an interest in personal property or fixtures which secures payment or performance of an obligation.”

Security agreement is “an agreement that creates or provides for a security interest.” It is the contract that sets up the debtor’s duties and the creditor’s rights in event the debtor defaults. Uniform Commercial Code, Section 9-102(a)(73).

Collateral “means the property subject to a security interest or agricultural lien. Uniform Commercial Code, Section 9-102(12).

Purchase-money security interest (PMSI) is the simplest form of security interest. Section 9-103(a) of the UCC defines “purchase-money collateral” as “goods or software that secures a purchase-money obligation with respect to that collateral.” A PMSI arises where the debtor gets credit to buy goods and the creditor takes a secured interest in those goods. Suppose you want to buy a big hardbound textbook on credit at your college bookstore. The manager refuses to extend you credit outright but says she will take back a PMSI. In other words, she will retain a security interest in the book itself, and if you don’t pay, you’ll have to return the book; it will be repossessed. Contrast this situation with a counteroffer you might make: because she tells you not to mark up the book (in the event that she has to repossess it if you default), you would rather give her some other collateral to hold—for example, your gold college signet ring. Her security interest in the ring is not a PMSI but a pledge; a PMSI must be an interest in the particular goods purchased. A PMSI would also be created if you borrowed money to buy the book and gave the lender a security interest in the book.

Whether a transaction is a lease or a PMSI is an issue that frequently arises. The answer depends on the facts of each case. However, a security interest is created if (1) the lessee is obligated to continue payments for the term of the lease; (2) the lessee cannot terminate the obligation; and (3) one of several economic tests, which are listed in UCC Section 1-201 (37), is met. For example, one of the economic tests is that “the lessee has an option to become owner of the goods for no additional consideration or nominal additional consideration upon compliance with the lease agreement.”

The issue of lease versus security interest gets litigated because of the requirements of Article 9 that a security interest be perfected in certain ways (as we will see). If the transaction turns out to be a security interest, a lessor who fails to meet these requirements runs the risk of losing his property to a third party. And consider this example. Ferrous Brothers Iron Works “leases” a \$25,000 punch press to Millie’s Machine Shop. Under the terms of the lease, Millie’s must pay a yearly rental of \$5,000 for five years, after which time Millie’s may take title to the machine outright for the payment of \$1. During the period of the rental, title remains in Ferrous Brothers. Is this “lease” really a security interest? Since ownership comes at nominal charge

when the entire lease is satisfied, the transaction would be construed as one creating a security interest. What difference does this make? Suppose Millie's goes bankrupt in the third year of the lease, and the trustee in bankruptcy wishes to sell the punch press to satisfy debts of the machine shop. If it were a true lease, Ferrous Brothers would be entitled to reclaim the machine (unless the trustee assumed the lease). But if the lease is really intended as a device to create a security interest, then Ferrous Brothers can recover its collateral only if it has otherwise complied with the obligations of Article 9—for example, by recording its security interest, as we will see.

Now we return to definitions.

Debtor is “a person (1) having an interest in the collateral other than a security interest or a lien; (2) a seller of accounts, chattel paper, payment intangibles, or promissory notes; or (3) a consignee. Uniform Commercial Code, Section 9-102(a)(28).

Obligor is “a person that, with respect to an obligation secured by a security interest in or an agricultural lien on the collateral, (i) owes payment or other performance of the obligation, (ii) has provided property other than the collateral to secure payment or other performance of the obligation, or (iii) is otherwise accountable in whole or in part for payment or other performance of the obligation. Uniform Commercial Code, Section 9-102 (59). Here is example 1 from the Official Comment to UCC Section 9-102: “Behnfeltdt borrows money and grants a security interest in her Miata to secure the debt. Behnfeltdt is a debtor and an obligor.”

Behnfeltdt is a debtor because she has an interest in the car—she owns it. She is an obligor because she owes payment to the creditor. Usually the debtor is the obligor.

A *secondary obligor* is “an obligor to the extent that: (A) [the] obligation is secondary; or (b) [the person] has a right of recourse with respect to an obligation secured by collateral against the debtor, another obligor, or property of either. Uniform Commercial Code, Section 9-102(a)(71). The secondary obligor is a guarantor (surety) of the debt, obligated to perform if the primary obligor defaults. Consider example 2 from the Official Comment to Section 9-102:

“Behnfeltdt borrows money and grants a security interest in her Miata to secure the debt. Bruno cosigns a negotiable note as maker. As before, Behnfeltdt is the debtor and an obligor. As an accommodation party, Bruno is a secondary obligor. Bruno has this status even if the note states that her obligation is a primary obligation and that she waives all suretyship defenses.”

Again, usually the debtor is the obligor, but consider example 3 from the same Official Comment: “Behnfeltdt borrows money on an unsecured basis. Bruno cosigns the note and grants a security interest in her Honda to secure her [Behnfeltdt’s] obligation. Inasmuch as Behnfeltdt does not have a property interest in the Honda, Behnfeltdt is not a debtor. Having granted the security interest, Bruno is the debtor. Because Behnfeltdt is a principal obligor, she is not a secondary obligor. Whatever the outcome of enforcement of the security interest against the Honda or Bruno’s secondary obligation, Bruno will look to Behnfeltdt for her losses. The enforcement will not affect Behnfeltdt’s aggregate obligations.”

Secured party is “a person in whose favor a security interest is created or provided for under a security agreement,” and it includes people to whom accounts, chattel paper, payment intangibles, or promissory notes have been sold; consignors; and others under Section 9-102(a)(72).

#### 1.4 Property Subject to the Security Interest

Now we examine what property may be put up as security—collateral. Collateral is—again—property that is subject to the security interest. It can be divided into four broad categories: goods, intangible property, indispensable paper, and other types of collateral.

##### **Goods**

Tangible property as collateral is goods. *Goods* means “all things that are movable when a security interest attaches. The term includes (i) fixtures, (ii) standing timber that is to be cut and removed under a conveyance or contract for sale, (iii) the unborn young of animals, (iv) crops

grown, growing, or to be grown, even if the crops are produced on trees, vines, or bushes, and (v) manufactured homes. The term also includes a computer program embedded in goods. Uniform Commercial Code, Section 9-102(44). Goods are divided into several subcategories; six are taken up here.

### **Consumer Goods**

These are “goods used or bought primarily for personal, family, or household purposes. Uniform Commercial Code, Section 9-102(a)(48).

### **Inventory**

“Goods, other than farm products, held by a person for sale or lease or consisting of raw materials, works in progress, or material consumed in a business. Uniform Commercial Code, Section 9-102(a)(48).

### **Farm Products**

“Crops, livestock, or other supplies produced or used in farming operations,” including aquatic goods produced in aquaculture. Uniform Commercial Code, Section 9-102(a)(34).

### **Equipment**

This is the residual category, defined as “goods other than inventory, farm products, or consumer goods. Uniform Commercial Code, Section 9-102(a)(33).

### **Fixtures**

These are “goods that have become so related to particular real property that an interest in them arises under real property law. Uniform Commercial Code, Section 9-102(a)(41). Examples

would be windows, furnaces, central air conditioning, and plumbing fixtures—items that, if removed, would be a cause for significant reconstruction.

### **Accession**

These are “goods that are physically united with other goods in such a manner that the identity of the original goods is lost. Uniform Commercial Code, Section 9-102(a)(1). A new engine installed in an old automobile is an accession.

### **Intangible Property**

Two types of collateral are neither goods nor indispensable paper: accounts and general intangibles.

#### **Accounts**

This type of intangible property includes accounts receivable (the right to payment of money), insurance policy proceeds, energy provided or to be provided, winnings in a lottery, health-care-insurance receivables, promissory notes, securities, letters of credit, and interests in business entities. Uniform Commercial Code, Section 9-102(a)(2). Often there is something in writing to show the existence of the right—such as a right to receive the proceeds of somebody else’s insurance payout—but the writing is merely evidence of the right. The paper itself doesn’t have to be delivered for the transfer of the right to be effective; that’s done by assignment.

#### **General Intangibles**

General intangibles refers to “any personal property, including things in action, other than accounts, commercial tort claims, deposit accounts, documents, goods, instruments,

investment property, letter-of-credit rights, letters of credit, money, and oil, gas, or other minerals before extraction.” General intangibles include payment intangibles and software. Uniform Commercial Code, Section 9-102(42).

### **Indispensable Paper**

This oddly named category is the middle ground between goods—stuff you can touch—and intangible property. It’s called “indispensable” because although the right to the value—such as a warehouse receipt—is embodied in a written paper, the paper itself is indispensable for the transferee to access the value. For example, suppose Deborah Debtor borrows \$3,000 from Carl Creditor, and Carl takes a security interest in four designer chairs Deborah owns that are being stored in a warehouse. If Deborah defaults, Carl has the right to possession of the warehouse receipt: he takes it to the warehouse and is entitled to take the chairs and sell them to satisfy the obligation. The warehouse will not let Carl have the chairs without the warehouse receipt—it’s indispensable paper. There are four kinds of indispensable paper.

### **Chattel Paper**

*Chattel* is another word for goods. Chattel paper is a record (paper or electronic) that demonstrates both “a monetary obligation and a security interest either in certain goods or in a lease on certain goods. Uniform Commercial Code, Section 9-102(11). The paper represents a valuable asset and can itself be used as collateral. For example, Creditor Car Company sells David Debtor an automobile and takes back a note and security agreement (this is a purchase-money security agreement; the note and security agreement is chattel paper). The chattel paper is not yet collateral; the automobile is. Now, though, Creditor Car Company buys a new hydraulic lift from Lift Co., and grants Lift Co. a security interest in Debtor’s chattel paper to secure Creditor Car’s debt to Lift Co. The chattel paper is now collateral. Chattel paper can be tangible (actual paper) or electronic.

### **Documents**

This category includes documents of title—bills of lading and warehouse receipts are examples.

### **Instruments**

An “instrument” here is “a negotiable instrument (checks, drafts, notes, certificates of deposit) or any other writing that evidences a right to the payment of a monetary obligation, is not itself a security agreement or lease, and is of a type that in the ordinary course of business is transferred by delivery with any necessary indorsement or assignment.” “Instrument” does not include (i) investment property, (ii) letters of credit, or (iii) writings that evidence a right to payment arising out of the use of a credit or charge card or information contained on or for use with the card. Uniform Commercial Code, Section 9-102(a)(47).

### **Investment Property**

This includes securities (stock, bonds), security accounts, commodity accounts, and commodity contracts. Uniform Commercial Code, Section 9-102(a)(49). Securities may be certified (represented by a certificate) or uncertified (not represented by a certificate). Uniform Commercial Code, Section 8-102(a)(4) and (a)(18).

### **Other Types of Collateral**

Among possible other types of collateral that may be used as security is the floating lien. This is a security interest in property that was not in the possession of the debtor when the security agreement was executed. The floating lien creates an interest that floats on the river of present and future collateral and proceeds held by—most often—the business debtor. It is especially useful in loans to businesses that sell their collateralized inventory. Without the floating lien, the lender would find its collateral steadily depleted as the borrowing business sells its products to its customers. Pretty soon, there’d be no security at all. The floating lien includes the following:

- *After-acquired property*. This is property that the debtor acquires after the original deal was set up. It allows the secured party to enhance his security as the debtor (obligor) acquires more property subject to collateralization.
- *Sale proceeds*. These are proceeds from the disposition of the collateral. Carl Creditor takes a secured interest in Deborah Debtor's sailboat. She sells the boat and buys a garden tractor. The secured interest attaches to the garden tractor.
- *Future advances*. Here the security agreement calls for the collateral to stand for both present and future advances of credit without any additional paperwork.

Here are examples of future advances:

- Example 1: A debtor enters into a security agreement with a creditor that contains a future advances clause. The agreement gives the creditor a security interest in a \$700,000 inventory-picking robot to secure repayment of a loan made to the debtor. The parties contemplate that the debtor will, from time to time, borrow more money, and when the debtor does, the machine will stand as collateral to secure the further indebtedness, without new paperwork.
- Example 2: A debtor signs a security agreement with a bank to buy a car. The security agreement contains a future advances clause. A few years later, the bank sends the debtor a credit card. Two years go by: the car is paid for, but the credit card is in default. The bank seizes the car. "Whoa!" says the debtor. "I paid for the car." "Yes," says the bank, "but it was collateral for all future indebtedness you ran up with us. Check out your loan agreement with us and UCC Section 9-204(c), especially Comment 5."

## 1.5 Attachment of the Security Interest

### In General

Attachment is the term used to describe when a security interest becomes enforceable against the debtor with respect to the collateral. "Attachment" is the outreached hand that is prepared, if the debtor defaults, to grasp the collateral. Uniform Commercial Code, Section 9-203(a).

## **Requirements for Attachment**

There are three requirements for attachment: (1) the secured party gives value; (2) the debtor has rights in the collateral or the power to transfer rights in it to the secured party; (3) the parties have a security agreement “authenticated” (signed) by the debtor, or the creditor has possession of the collateral.

### **Creditor Gives Value**

The creditor, or secured party, must give “value” for the security interest to attach. The UCC, in Section 1-204, provides that

a person gives ‘value’ for rights if he acquires them

(1) in return for a binding commitment to extend credit or for the extension of immediately available credit whether or not drawn upon and whether or not a charge-back is provided for in the event of difficulties in collection; or

(2) as security for or in total or partial satisfaction of a pre-existing claim; or

(3) by accepting delivery pursuant to a pre-existing contract for purchase; or

(4) generally, in return for any consideration sufficient to support a simple contract.

Suppose Deborah owes Carl \$3,000. She cannot repay the sum when due, so she agrees to give Carl a security interest in her automobile to the extent of \$3,000 in return for an extension of the time to pay. That is sufficient value.

### **Debtor’s Rights in Collateral**

The debtor must have rights in the collateral. Most commonly, the debtor owns the collateral (or has some ownership interest in it). The rights need not necessarily be the immediate right to

possession, but they must be rights that can be conveyed. Uniform Commercial Code, Section 9-203(b)(2). A person can't put up as collateral property she doesn't own.

### **Security Agreement (Contract) or Possession of Collateral by Creditor**

The debtor most often signs the written security agreement, or contract. The UCC says that “the debtor [must have] authenticated a security agreement that provides a description of the collateral....” “Authenticating” (or “signing,” “adopting,” or “accepting”) means to sign or, in recognition of electronic commercial transactions, “to execute or otherwise adopt a symbol, or encrypt or similarly process a record...with the present intent of the authenticating person to identify the person and adopt or accept a record.” The “record” is the modern UCC’s substitution for the term “writing.” It includes information electronically stored or on paper. Uniform Commercial Code, Section 9-102, Official Comment 9.

The “authenticating record” (the signed security agreement) is *not* required in some cases. It is not required if the debtor makes a pledge of the collateral—that is, delivers it to the creditor for the creditor to possess. For example, upon a creditor’s request of a debtor for collateral to secure a loan of \$3,000, the debtor offers up his stamp collection. The creditor says, “Fine, have it appraised (at your expense) and show me the appraisal. If it comes in at \$3,000 or more, I’ll take your stamp collection and lock it in my safe until you’ve repaid me. If you don’t repay me, I’ll sell it.” A creditor could take possession of any goods and various kinds of paper, tangible or intangible. In commercial transactions, it would be common for the creditor to have possession of—actually or virtually—certified securities, deposit accounts, electronic chattel paper, investment property, or other such paper or electronic evidence of value. Uniform Commercial Code, Section 9-203(b)(3)(B-D).

### **1.6 Perfection of the Security Interest**

As between the debtor and the creditor, attachment is fine: if the debtor defaults, the creditor will repossess the goods and—usually—sell them to satisfy the outstanding obligation. But unless an additional set of steps is taken, the rights of the secured party might be subordinated

to the rights of other secured parties, certain lien creditors, bankruptcy trustees, and buyers who give value and who do not know of the security interest. Perfection is the secured party's way of announcing the security interest to the rest of the world. It is the secured party's claim on the collateral.

There are five ways a creditor may perfect a security interest: (1) by filing a financing statement, (2) by taking or retaining possession of the collateral, (3) by taking control of the collateral, (4) by taking control temporarily as specified by the UCC, or (5) by taking control automatically.

### **Perfection by Filing**

"Except as otherwise provided...a financing statement must be filed to perfect all security agreements." Uniform Commercial Code, Section 9-310(a).

### **The Financing Statement**

A financing statement is a simple notice showing the creditor's general interest in the collateral. It is what's filed to establish the creditor's "dibs."

### **Contents of the Financing Statement**

It may consist of the security agreement itself, as long as it contains the information required by the UCC, but most commonly it is much less detailed than the security agreement: it "indicates merely that a person may have a security interest in the collateral[.]...Further inquiry from the parties concerned will be necessary to disclose the full state of affairs. Uniform Commercial Code, Section 9-502, Official Comment 2. The financing statement must provide the following information:

- The debtor’s name. Financing statements are indexed under the debtor’s name, so getting that correct is important. Section 9-503 of the UCC describes what is meant by “name of debtor.”
- The secured party’s name.
- An “indication” of what collateral is covered by the financing statement. Uniform Commercial Code, Section 9-502(a). It may describe the collateral or it may “indicate that the financing statement covers all assets or all personal property” (such generic references are not acceptable in the security agreement but are OK in the financing statement). Uniform Commercial Code, Section 9-504. If the collateral is real-property-related, covering timber to be cut or fixtures, it must include a description of the real property to which the collateral is related. Uniform Commercial Code, Section 9-502(b).

The form of the financing statement may vary from state to state. Minor errors or omissions on the form will not make it ineffective, but the debtor’s signature is required unless the creditor is authorized by the debtor to make the filing without a signature, which facilitates paperless filing. Uniform Commercial Code, Section 9-506; Uniform Commercial Code, Section, 9-502, Comment 3.

### **Duration of the Financing Statement**

Generally, the financing statement is effective for five years; a continuation statement may be filed within six months before the five-year expiration date, and it is good for another five years. Uniform Commercial Code, Section 9-515. Manufactured-home filings are good for thirty years. When the debtor’s obligation is satisfied, the secured party files a termination statement if the collateral was consumer goods; otherwise—upon demand—the secured party sends the debtor a termination statement. Uniform Commercial Code, Section 9-513.

### **Debtor Moves out of State**

The UCC also has rules for continued perfection of security interests when the debtor—whether an individual or an association (corporation)—moves from one state to another. Generally, an

interest remains perfected until the earlier of when the perfection would have expired or for four months after the debtor moves to a new jurisdiction. Uniform Commercial Code, Section 9-316.

### **Where to File the Financing Statement**

For most real-estate-related filings—ore to be extracted from mines, agricultural collateral, and fixtures—the place to file is with the local office that files mortgages, typically the county auditor’s office. Uniform Commercial Code, Section 9-501. For other collateral, the filing place is as duly authorized by the state. In some states, that is the office of the Secretary of State; in others, it is the Department of Licensing; or it might be a private party that maintains the state’s filing system. Uniform Commercial Code, Section 9-501(a)(2). The filing should be made in the state where the debtor has his or her primary residence for individuals, and in the state where the debtor is organized if it is a registered organization. Uniform Commercial Code, Section 9-307(b). The point is, creditors need to know where to look to see if the collateral offered up is already encumbered. In any event, filing the statement in more than one place can’t hurt. The filing office will provide instructions on how to file; these are available online, and electronic filing is usually available for at least some types of collateral.

### **Exemptions**

Some transactions are exempt from the filing provision. The most important category of exempt collateral is that covered by state certificate of title laws. For example, many states require automobile owners to obtain a certificate of title from the state motor vehicle office. Most of these states provide that it is not necessary to file a financing statement in order to perfect a security interest in an automobile. The reason is that the motor vehicle regulations require any security interests to be stated on the title, so that anyone attempting to buy a car in

which a security interest had been created would be on notice when he took the actual title certificate. Uniform Commercial Code, Section 9-303.

### **Temporary Perfection**

The UCC provides that certain types of collateral are automatically perfected but only for a while: “A security interest in certificated securities, or negotiable documents, or instruments is perfected without filing or the taking of possession for a period of twenty days from the time it attaches to the extent that it arises for new value given under an authenticated security agreement.” Uniform Commercial Code, Section 9-312(e). Similar temporary perfection covers negotiable documents or goods in possession of a bailee, and when a security certificate or instrument is delivered to the debtor for sale, exchange, presentation, collection, enforcement, renewal, or registration. Uniform Commercial Code, Section 9-312(f) and (g). After the twenty-day period, perfection would have to be by one of the other methods mentioned here.

### **Perfection by Possession**

A secured party may perfect the security interest by possession where the collateral is negotiable documents, goods, instruments, money, tangible chattel paper, or certified securities. Uniform Commercial Code, Section 9-313. This is a pledge of assets (mentioned in the example of the stamp collection). No security agreement is required for perfection by possession.

A variation on the theme of pledge is field warehousing. When the pawnbroker lends money, he takes possession of the goods—the watch, the ring, the camera. But when large manufacturing concerns wish to borrow against their inventory, taking physical possession is not necessarily so easy. The bank does not wish to have shipped to its Wall Street office several tons of copper mined in Colorado. Bank employees perhaps could go west to the mine and take physical control of the copper, but banks are unlikely to employ people and equipment necessary to build a warehouse on the spot. Thus this so-called field pledge is rare.

More common is the field warehouse. The field warehouse can take one of two forms. An independent company can go to the site and put up a temporary structure—for example, a fence around the copper—thus establishing physical control of the collateral. Or the independent company can lease the warehouse facilities of the debtor and post signs indicating that the goods inside are within its sale custody. Either way, the goods are within the physical possession of the field warehouse service. The field warehouse then segregates the goods secured to the particular bank or finance company and issues a warehouse receipt to the lender for those goods. The lender is thus assured of a security interest in the collateral.

### **Perfection by Control**

“A security interest in investment property, deposit accounts, letter-of-credit rights, or electronic chattel paper may be perfected by control of the collateral.” Uniform Commercial Code, Section 9-314. “Control” depends on what the collateral is. If it’s a checking account, for example, the bank with which the deposit account is maintained has “control”: the bank gets a security interest automatically because, as Official Comment 3 to UCC Section 9-104 puts it, “all actual and potential creditors of the debtor are always on notice that the bank with which the debtor’s deposit account is maintained may assert a claim against the deposit account.”

“Control” of electronic chattel paper of investment property, and of letter-of-credit rights is detailed in Sections 9-105, 9-106, and 9-107. Obtaining “control” means that the creditor has taken whatever steps are necessary, given the manner in which the items are held, to place itself in a position where it can have the items sold, without further action by the owner.

Uniform Commercial Code, Section 8-106, Official Comment 1.

### **Automatic Perfection**

The fifth mechanism of perfection is addressed in Section 9-309 of the UCC: there are several circumstances where a security interest is perfected upon mere attachment. The most important here is automatic perfection of a purchase-money security interest given in consumer goods. If a seller of consumer goods takes a PMSI in the goods sold, then perfection

of the security interest is automatic. But the seller may file a financial statement and faces a risk if he fails to file and the consumer debtor sells the goods. Under Section 9-320(b), a buyer of consumer goods takes free of a security interest, even though perfected, if he buys without knowledge of the interest, pays value, and uses the goods for his personal, family, or household purposes—unless the secured party had first filed a financing statement covering the goods.

## 22.2 Priorities

### Learning Objectives

1. Understand the general rule regarding who gets priority among competing secured parties.
2. Know the immediate exceptions to the general rule—all involving PMSIs.
3. Understand the basic ideas behind the other exceptions to the general rule.

Priorities: this is the money question. Who gets what when a debtor defaults? Depending on how the priorities in the collateral were established, even a secured creditor may walk away with the collateral or with nothing. Here we take up the general rule and the exceptions.

### 2.1 General Rule

The general rule regarding priorities is, to use a quotation attributed to a Southern Civil War general, the one who wins “gets there firstest with the mostest.” The first to do the best job of perfecting wins. The Uniform Commercial Code (UCC) creates a race of diligence among competitors.

### Application of the Rule

If both parties have perfected, the first to perfect wins. If one has perfected and one attached, the perfected party wins. If both have attached without perfection, the first to attach wins. If neither has attached, they are unsecured creditors. Let’s test this general rule against the following situations:

1. Rosemary, without having yet lent money, files a financing statement on February 1 covering certain collateral owned by Susan—Susan’s fur coat. Under UCC Article 9, a filing may be made before the security interest attaches. On March 1, Erika files a similar statement, also without having lent any money. On April 1, Erika loans Susan \$1,000, the loan being secured by the fur coat described in the statement she filed on March 1. On May 1, Rosemary also loans Susan \$1,000, with the same fur coat as security. Who has priority? Rosemary does, since she filed first, even though Erika actually first extended the loan, which was perfected when made (because she had already filed). This result is dictated by the rule even though Rosemary may have known of Erika’s interest when she subsequently made her loan.
2. Susan cajoles both Rosemary and Erika, each unknown to the other, to loan her \$1,000 secured by the fur coat, which she already owns and which hangs in her coat closet. Erika gives Susan the money a week after Rosemary, but Rosemary has not perfected and Erika does not either. A week later, they find out they have each made a loan against the same coat. Who has priority? Whoever perfects first: the rule creates a race to the filing office or to Susan’s closet. Whoever can submit the financing statement or actually take possession of the coat first will have priority, and the outcome does not depend on knowledge or lack of knowledge that someone else is claiming a security interest in the same collateral. But what of the rule that in the absence of perfection, whichever security interest first attached has priority? This is “thought to be of merely theoretical interest,” says the UCC commentary, “since it is hard to imagine a situation where the case would come into litigation without [either party] having perfected his interest.” And if the debtor filed a petition in bankruptcy, neither unperfected security interest could prevail against the bankruptcy trustee.

To rephrase: An attached security interest prevails over other unsecured creditors (unsecured creditors lose to secured creditors, perfected or unperfected). If both parties are secured (have attached the interest), the first to perfect wins. Uniform Commercial Code, Section 9-322(a)(2).

If both parties have perfected, the first to have perfected wins. Uniform Commercial Code, Section 9-322(a)(1).

## 23.3 Rights of Creditor on Default and Disposition after Repossession

### Learning Objectives

1. Understand that the creditor may sue to collect the debt.
2. Recognize that more commonly the creditor will realize on the collateral—repossess it.
3. Know how collateral may be disposed of upon repossession: by sale or by strict foreclosure.

### 3.1 Rights of Creditor on Default

Upon default, the creditor must make an election: to sue, or to repossess.

#### Resort to Judicial Process

After a debtor's default (e.g., by missing payments on the debt), the creditor could ignore the security interest and bring suit on the underlying debt. But creditors rarely resort to this remedy because it is time-consuming and costly. Most creditors prefer to repossess the collateral and sell it or retain possession in satisfaction of the debt.

#### Repossession

Section 9-609 of the Uniform Commercial Code (UCC) permits the secured party to take possession of the collateral on default (unless the agreement specifies otherwise):

(a) After default, a secured party may (1) take possession of the collateral; and (2) without removal, may render equipment unusable and dispose of collateral on a debtor's premises.

(b) A secured party may proceed under subsection (a): (1) pursuant to judicial process; or (2) without judicial process, if it proceeds without breach of the peace.

This language has given rise to the flourishing business of professional “repo men” (and women). “Repo” companies are firms that specialize in repossession collateral. They have trained car-lock pickers, in-house locksmiths, experienced repossession teams, damage-free towing equipment, and the capacity to deliver repossessed collateral to the client’s desired destination. Some firms advertise that they have 360-degree video cameras that record every aspect of the repossession. They have “skip chasers”—people whose business it is to track down those who skip out on their obligations, and they are trained not to breach the peace. Here is an example of sophisticated online advertising for a repossession firm: SSR, “Southern & Central Coast California Repossession Services,” <http://www.simonsrecovery.com/index.htm>.

The reference in Section 9-609(a)(2) to “render equipment unusable and dispose of collateral on a debtor’s premises” gets to situations involving “heavy equipment [when] the physical removal from the debtor’s plant and the storage of collateral pending disposition may be impractical or unduly expensive....Of course...all aspects of the disposition must be commercially reasonable.” Uniform Commercial Code, Section 9-609(a)(2), Official Comment 6. Rendering the equipment unusable would mean disassembling some critical part of the machine—letting it sit there until an auction is set up on the premises.

The creditor’s agents—the repo people—charge for their service, of course, and if possible the cost of repossession comes out of the collateral when it’s sold. A debtor would be better off voluntarily delivering the collateral according to the creditor’s instructions, but if that doesn’t happen, “self-help”—repossession—is allowed because, of course, the debtor said it would be allowed in the security agreement, so long as the repossession can be accomplished without breach of peace. “Breach of peace” is language that can cover a wide variety of situations over which courts do not always agree. For example, some courts interpret a creditor’s taking of the collateral despite the debtor’s clear oral protest as a breach of the peace; other courts do not.

### **3.2 Disposition after Repossession**

After repossession, the creditor has two options: sell the collateral or accept it in satisfaction of the debt.

## **Sale**

Sale is the usual method of recovering the debt. Section 9-610 of the UCC permits the secured creditor to “sell, lease, license, or otherwise dispose of any or all of the collateral in its present condition or following any commercially reasonable preparation or processing.” The collateral may be sold as a whole or in parcels, at one time or at different times. Two requirements limit the creditor’s power to resell: (1) it must send notice to the debtor and secondary obligor, and (unless consumer goods are sold) to other secured parties; and (2) all aspects of the sale must be “commercially reasonable.” Uniform Commercial Code, Section 9-611; Uniform Commercial Code, Section 9-610. Most frequently the collateral is auctioned off.

Section 9-615 of the UCC describes how the proceeds are applied: first, to the costs of the repossession, including reasonable attorney’s fees and legal expenses as provided for in the security agreement (and it will provide for that!); second, to the satisfaction of the obligation owed; and third, to junior creditors. This again emphasizes the importance of promptly perfecting the security interest: failure to do so frequently subordinates the tardy creditor’s interest to junior status. If there is money left over from disposing of the collateral—a surplus—the debtor gets that back. If there is still money owing—a deficiency—the debtor is liable for that. In Section 9-616, the UCC carefully explains how the surplus or deficiency is calculated; the explanation is required in a consumer goods transaction, and it has to be sent to the debtor after the disposition.

## **Strict Foreclosure**

Because resale can be a bother (or the collateral is appreciating in value), the secured creditor may wish simply to accept the collateral in full satisfaction or partial satisfaction of the debt, as permitted in UCC Section 9-620(a). This is known as strict foreclosure. The debtor must consent to letting the creditor take the collateral without a sale in a “record authenticated after default,” or after default the creditor can send the debtor a proposal for the creditor to accept the collateral, and the proposal is effective if not objected to within twenty days after it’s sent.

The strict foreclosure provisions contain a safety feature for consumer goods debtors. If the debtor has paid at least 60 percent of the debt, then the creditor may not use strict foreclosure—unless the debtor signs a statement after default renouncing his right to bar strict foreclosure and to force a sale. Uniform Commercial Code, 9-620(e); Uniform Commercial Code, Section 9-624. A consumer who refuses to sign such a statement thus forces the secured creditor to sell the collateral under Section 9-610. Should the creditor fail to sell the goods within ninety days after taking possession of the goods, he is liable to the debtor for the value of the goods in a conversion suit or may incur the liabilities set forth in Section 9-625, which provides for minimum damages for the consumer debtor. Recall that the UCC imposes a duty to act in good faith and in a commercially reasonable manner, and in most cases with reasonable notification. Uniform Commercial Code, Section 1-203.

### **Foreclosure on Intangible Collateral**

A secured party's repossession of inventory or equipment can disrupt or even close a debtor's business. However, when the collateral is intangible—such as accounts receivable, general intangibles, chattel paper, or instruments—collection by a secured party after the debtor's default may proceed without interrupting the business. Section 9-607 of the UCC provides that on default, the secured party is entitled to notify the third party—for example, a person who owes money on an account—that payment should be made to him. The secured party is accountable to the debtor for any surplus, and the debtor is liable for any deficiency unless the parties have agreed otherwise.

As always in parsing the UCC here, some of the details and nuances are necessarily omitted because of lack of space or because a more detailed analysis is beyond this book's scope.

## PART THREE – PROPERTY

### Chapter 23 Introduction to Property: Personal Property and Fixtures (Hardbound Chapter 31)

#### Learning Objectives

After reading this chapter, you should understand the following:

1. The difference between personal property and other types of property
2. How rights in personal property are acquired and maintained
3. How some kinds of personal property can become real property, and how to determine who has rights in fixtures that are part of real property

In this chapter, we examine the general nature of property rights and the law relating to personal property—with special emphasis on acquisition and fixtures. In [Chapter 24 "Intellectual Property"](#), we discuss intellectual property, a kind of personal property that is increasingly profitable. In [Chapter 27 "The Nature and Regulation of Real Estate and the Environment"](#) through [Chapter 28 "Landlord and Tenant Law"](#), we focus on real property, including its nature and regulation, its acquisition by purchase (and some other methods), and its acquisition by lease (landlord and tenant law).

### 23.1 The General Nature of Property Rights

#### Learning Objectives

1. Understand the elastic and evolving boundaries of what the law recognizes as property that can be bought or sold on the market.
2. Distinguish real property from personal property.

## 1.1 Definition of Property

Property, which seems like a commonsense concept, is difficult to define in an intelligible way; philosophers have been striving to define it for the past 2,500 years. To say that “property is what we own” is to beg the question—that is, to substitute a synonym for the word we are trying to define. Blackstone’s famous definition is somewhat wordy: “The right of property is that sole and despotic dominion which one man claims and exercises over the external things of the world, in total exclusion of the right of any other individual in the universe. It consists in the free use, enjoyment, and disposal of all a person’s acquisitions, without any control or diminution save only by the laws of the land.” A more concise definition, but perhaps too broad, comes from the Restatement of the Law of Property, which defines property as the “legal relationship between persons with respect to a thing.”

The Restatement’s definition makes an important point: property is a *legal relationship*, the power of one person to use objects in ways that affect others, to exclude others from the property, and to acquire and transfer property. Still, this definition does not contain a specific list of those nonhuman “objects” that could be in such a relationship. We all know that we can own personal objects like iPods and DVDs, and even more complex objects like homes and minerals under the ground. Property also embraces objects whose worth is representative or symbolic: ownership of stock in a corporation is valued not for the piece of paper called a stock certificate but for dividends, the power to vote for directors, and the right to sell the stock on the open market. Wholly intangible things or objects like copyrights and patents and bank accounts are capable of being owned as property. But the list of things that can be property is not fixed, for our concept of property continues to evolve. Collateralized debt obligations (CDOs) and structured investment vehicles (SIVs), prime players in the subprime mortgage crisis, were not on anyone’s list of possible property even fifteen years ago.

## 1.2 The Economist’s View

Property is not just a legal concept, of course, and different disciplines express different philosophies about the purpose of property and the nature of property rights. To the jurist,

property rights should be protected because it is just to do so. To an economist, the legal protection of property rights functions to create incentives to use resources efficiently. For a truly efficient system of property rights, some economists would require universality (everything is owned), exclusivity (the owners of each thing may exclude all others from using it), and transferability (owners may exchange their property). Together, these aspects of property would lead, under an appropriate economic model, to efficient production and distribution of goods. But the law of property does not entirely conform to the economic conception of the ownership of productive property by private parties; there remain many kinds of property that are not privately owned and some parts of the earth that are considered part of “the commons.” For example, large areas of the earth’s oceans are not “owned” by any one person or nation-state, and certain land areas (e.g., Yellowstone National Park) are not in private hands.

### 1.3 Classification of Property

Property can be classified in various ways, including tangible versus intangible, private versus public, and personal versus real. Tangible property is that which physically exists, like a building, a popsicle stand, a hair dryer, or a steamroller. Intangible property is something without physical reality that entitles the owner to certain benefits; stocks, bonds, and intellectual property would be common examples. Public property is that which is owned by any branch of government; private property is that which is owned by anyone else, including a corporation.

Perhaps the most important distinction is between real and personal property. Essentially, real property is immovable; personal property is movable. At common law, personal property has been referred to as “chattels.” When chattels become affixed to real property in a certain manner, they are called fixtures and are treated as real property. (For example, a bathroom cabinet purchased at Home Depot and screwed into the bathroom wall may be converted to part of the real property when it is affixed.) Fixtures are discussed in [Section 23.3 "Fixtures"](#) of this chapter.

## 1.4 Importance of the Distinction between Real and Personal Property

In our legal system, the distinction between real and personal property is significant in several ways. For example, the sale of personal property, but not real property, is governed by Article 2 of the Uniform Commercial Code (UCC). Real estate transactions, by contrast, are governed by the general law of contracts. Suppose goods are exchanged for realty. Section 2-304 of the UCC says that the transfer of the goods and the seller's obligations with reference to them are subject to Article 2, but not the transfer of the interests in realty nor the transferor's obligations in connection with them.

The form of transfer depends on whether the property is real or personal. Real property is normally transferred by a deed, which must meet formal requirements dictated by state law. By contrast, transfer of personal property often can take place without any documents at all.

Another difference can be found in the law that governs the transfer of property on death. A person's heirs depend on the law of the state for distribution of his property if he dies intestate—that is, without a will. Who the heirs are and what their share of the property will be may depend on whether the property is real or personal. For example, widows may be entitled to a different percentage of real property than personal property when their husbands die intestate.

Tax laws also differ in their approach to real and personal property. In particular, the rules of valuation, depreciation, and enforcement depend on the character of the property. Thus real property depreciates more slowly than personal property, and real property owners generally have a longer time than personal property owners to make good unpaid taxes before the state seizes the property.

## 22.2 Personal Property

### Learning Objective

1. Explain the various ways that personal property can be acquired by means other than purchase.

Most legal issues about personal property center on its acquisition. Acquisition by purchase is the most common way we acquire personal property, but there are at least five other ways to legally acquire personal property: (1) possession, (2) finding lost or misplaced property, (3) gift, (4) accession, and (5) confusion.

## 2.1 Possession

It is often said that “possession is nine-tenths of the law.” There is an element of truth to this, but it’s not the whole truth. For our purposes, the more important question is, what is meant by “possession”? Its meaning is not intuitively obvious, as a moment’s reflection will reveal. For example, you might suppose that you possess something when it is physically within your control, but what do you say when a hurricane deposits a boat onto your land? What if you are not even home when this happens? Do you possess the boat? Ordinarily, we would say that you don’t, because you don’t have physical control when you are absent. You may not even have the intention to control the boat; perhaps instead of a fancy speedboat in relatively good shape, the boat is a rust bucket badly in need of repair, and you want it removed from your front yard.

Even the element of physical domination of the object may not be necessary. Suppose you give your new class ring to a friend to examine. Is it in the friend’s possession? No: the friend has custody, not possession, and you retain the right to permit a second friend to take it from her hands. This is different from the case of a bailment, in which the bailor gives possession of an object to the bailee. For example, a garage (a bailee) entrusted with a car for the evening, and not the owner, has the right to exclude others from the car; the owner could not demand that the garage attendants refrain from moving the car around as necessary.

From these examples, we can see that possession or physical control must usually be understood as the power to exclude others from using the object. Otherwise, anomalies arise

from the difficulty of physically controlling certain objects. It is more difficult to exercise control over a one-hundred-foot television antenna than a diamond ring. Moreover, in what sense do you possess your household furniture when you are out of the house? Only, we suggest, in the power to exclude others. But this power is not purely a physical one: being absent from the house, you could not physically restrain anyone. Thus the concept of possession must inevitably be mixed with legal rules that do or could control others.

Possession confers ownership in a restricted class of cases only: when no person was the owner at the time the current owner took the object into his possession. The most obvious categories of objects to which this rule of possession applies are wild animals and abandoned goods. The rule requires that the would-be owner actually take possession of the animal or goods; the hunter who is pursuing a particular wild animal has no legal claim until he has actually captured it. Two hunters are perfectly free to pursue the same animal, and whoever actually grabs it will be the owner.

But even this simple rule is fraught with difficulties in the case of both wild animals and abandoned goods. In the case of wild game, fish in a stream, and the like, the general rule is subject to the rights of the owner of the land on which the animals are caught. Thus even if the animals caught by a hunter are wild, as long as they are on another's land, the landowner's rights are superior to the hunter's. Suppose a hunter captures a wild animal, which subsequently escapes, and a second hunter thereafter captures it. Does the first hunter have a claim to the animal? The usual rule is that he does not, for once an animal returns to the wild, ownership ceases.

## 23.3 Fixtures

### Learning Objective

1. Know the three tests for when personal property becomes a fixture and thus becomes real property.

### 3.1 Definition

A fixture is an object that was once personal property but that has become so affixed to land or structures that it is considered legally a part of the real property. For example, a stove bolted to the floor of a kitchen and connected to the gas lines is usually considered a fixture, either in a contract for sale, or for testamentary transfer (by will). For tax purposes, fixtures are treated as real property.

### 3.2 Tests

Obviously, no clear line can be drawn between what is and what is not a fixture. In general, the courts look to three tests to determine whether a particular object has become a fixture: annexation, adaptation, and intention.

#### **Annexation**

The object must be annexed or affixed to the real property. A door on a house is affixed. Suppose the door is broken and the owner has purchased a new door made to fit, but the house is sold before the new door is installed. Most courts would consider that new door a fixture under a rule of constructive annexation. Sometimes courts have said that an item is a fixture if its removal would damage the real property, but this test is not always followed. Must the object be attached with nails, screws, glue, bolts, or some other physical device? In one case, the court held that a four-ton statue was sufficiently affixed merely by its weight.

#### **Adaptation**

Another test is whether the object is adapted to the use or enjoyment of the real property. Examples are home furnaces, power equipment in a mill, and computer systems in bank buildings.

## **Intention**

Recent decisions suggest that the controlling test is whether the person who actually annexes the object intends by so doing to make it a permanent part of the real estate. The intention is usually deduced from the circumstances, not from what a person might later say her intention was. If an owner installs a heating system in her house, the law will presume she intended it as a fixture because the installation was intended to benefit the house; she would not be allowed to remove the heating system when she sold the house by claiming that she had not intended to make it a fixture.

## Chapter 24 Intellectual Property (Hardbound Chapter 32)

### Learning Objectives

After reading this chapter, you should understand the following:

1. The principal kinds of intellectual property
2. The difference between patents and trade secrets, and why a company might choose to rely on trade secrets rather than obtain a patent
3. What copyrights are, how to obtain them, and how they differ from trademarks
4. Why some “marks” may not be eligible for trademark protection, and how to obtain trademark protection for those that are.

Few businesses of any size could operate without being able to protect their rights to a particular type of intangible personal property: **intellectual property**. The major forms of intellectual property are patents, copyrights, and trademarks. Unlike tangible personal property (machines, inventory) or real property (land, office buildings), intellectual property is formless. It is the product of the human intellect that is embodied in the goods and services a company offers and by which the company is known.

A patent is a grant from government that gives an inventor the exclusive right to make, use, and sell an invention for a period of twenty years from the date of filing the application for a patent. A **copyright** is the right to exclude others from using or marketing forms of expression. A **trademark** is the right to prevent others from using a company’s product name, slogan, or identifying design. Other forms of intellectual property are trade secrets (particular kinds of information of commercial use to a company that created it) and right of publicity (the right to exploit a person’s name or image). Note that the property interest protected in each case is not the tangible copy of the invention or writing—not the machine with a particular serial number or the book lying on someone’s shelf—but the invention or words themselves. That is why intellectual property is said to be intangible: it is a right to exclude any others from gaining economic benefit from your own intellectual creation. In this chapter, we examine how

Congress, the courts, and the Patent and Trademark Office have worked to protect the major types of intellectual property.

## 24.1 Patents

### Learning Objectives

1. Explain why Congress would grant exclusive monopolies (patents) for certain periods of time.
2. Describe what kinds of things may be patentable and what kinds of things may not be patentable.
3. Explain the procedures for obtaining a patent, and how patent rights may be an issue where the invention is created by an employee.
4. Understand who can sue for patent infringement, on what basis, and with what potential remedies.

### 1.1 Source of Authority and Duration

Patent and copyright law are federal, enacted by Congress under the power given by Article I of the Constitution “to promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries.” Under current law, a patent gives an inventor exclusive rights to make, use, or sell an invention for twenty years. (If the patent is a design patent—protecting the appearance rather than the function of an item—the period is fourteen years.) In return for this limited monopoly, the inventor must fully disclose, in papers filed in the US Patent and Trademark Office (PTO), a complete description of the invention.

### 1.2 Patentability

#### What May Be Patented

The patent law says that “any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof” may be patented.<sup>35</sup> United States Code, Section 101. A process is a “process, art or method, and includes a new use of a known

process, machine, manufacture, composition of matter, or material.”<sup>35</sup> United States Code, Section 101. A process for making rolled steel, for example, qualifies as a patentable process under the statute. A machine is a particular apparatus for achieving a certain result or carrying out a distinct process—lathes, printing presses, motors, and the cotton gin are all examples of the hundreds of thousands of machines that have received US patents since the first Patent Act in 1790. A manufacture is an article or a product, such as a television, an automobile, a telephone, or a lightbulb. A composition of matter is a new arrangement of elements so that the resulting compound, such as a metal alloy, is not found in nature. In *Diamond v. Chakrabarty*, 440 U.S. 303 (1980); the Supreme Court said that even living organisms—in particular, a new “genetically engineered” bacterium that could “eat” oil spills—could be patented. The *Chakrabarty* decision has spawned innovation: a variety of small biotechnology firms have attracted venture capitalists and other investors.

### **What May Not Be Patented**

Many things can be patented, but not (1) the laws of nature, (2) natural phenomena, and (3) abstract ideas, including algorithms (step-by-step formulas for accomplishing a specific task).

One frequently asked question is whether patents can be issued for computer software. The PTO was reluctant to do so at first, based on the notion that computer programs were not “novel”—the software program either incorporated automation of manual processes or used mathematical equations (which were not patentable). But in 1998, the Supreme Court held in *Diamond v. Diehr*, 450 U.S. 175 (1981). that patents could be obtained for a process that incorporated a computer program if the process itself was patentable.

## **24.2 Trade Secrets**

### **Learning Objectives**

1. Describe the difference between trade secrets and patents, and explain why a firm might prefer keeping a trade secret rather than obtaining a patent.
2. Understand the dimensions of corporate espionage and the impact of the federal Economic Espionage Act.

## 2.1 Definition of Trade Secrets

A patent is an invention publicly disclosed in return for a monopoly. A trade secret is a means to a monopoly that a company hopes to maintain by preventing public disclosure. Why not always take out a patent? There are several reasons. The trade secret might be one that is not patentable, such as a customer list or an improvement that does not meet the tests of novelty or no obviousness. A patent can be designed around; but if the trade secret is kept, its owner will be the exclusive user of it. Patents are expensive to obtain, and the process is extremely time consuming. Patent protection expires in twenty years, after which anyone is free to use the invention, but a trade secret can be maintained for as long as the secret is kept.

However, a trade secret is valuable only so long as it is kept secret. Once it is publicly revealed, by whatever means, anyone is free to use it. The critical distinction between a patent and a trade secret is this: a patent gives its owner the right to enjoin anyone who infringes it from making use of it, whereas a trade secret gives its “owner” the right to sue only the person who improperly took it or revealed it.

According to the Restatement of Torts, Section 757, Comment b, a trade secret may consist of any formula, pattern, device or compilation of information which is used in one’s business, and which gives him an opportunity to obtain an advantage over competitors who do not know or use it. It may be a formula for a chemical compound, a process of manufacturing, treating or preserving materials, a pattern for a machine or other device, or a list of customers....A trade secret is a process or device for continuous use in the operation of a business. rally, it relates to the production of goods, as, for example, a machine or formula for the production of an article.

Other types of trade secrets are customer information, pricing data, marketing methods, sources of supply, and secret technical know-how.

## 2.2 Elements of Trade Secrets

To be entitled to protection, a trade secret must be (1) original and (2) secret.

### **Originality**

The trade secret must have a certain degree of originality, although not as much as would be necessary to secure a patent. For example, a principle or technique that is common knowledge does not become a protectable trade secret merely because a particular company taught it to one of its employees who now wants to leave to work for a competitor.

### **Secrecy**

Some types of information are obviously secret, like the chemical formula that is jealously guarded through an elaborate security system within the company. But other kinds of information might not be secret, even though essential to a company's business. For instance, a list of suppliers that can be devised easily by reading through the telephone directory is not secret. Nor is a method secret simply because someone develops and uses it, if no steps are taken to guard it. A company that circulates a product description in its catalog may not claim a trade secret in the design of the product if the description permits someone to do "reverse engineering." A company that hopes to keep its processes and designs secret should affirmatively attempt to do so—for example, by requiring employees to sign a nondisclosure agreement covering the corporate trade secrets with which they work. However, a company need not go to every extreme to guard a trade secret.

Trade-secrets espionage has become a big business. To protect industrial secrets, US corporations spend billions on security arrangements. The line between competitive intelligence gathering and espionage can sometimes be difficult to draw. The problem is by no means confined to the United States; companies and nations all over the world have become

concerned about theft of trade secrets to gain competitive advantage, and foreign governments are widely believed to be involved in espionage and cyberattacks.

### **2.3 Economic Espionage Act**

The Economic Espionage Act (EEA) of 1996 makes the theft or misappropriation of a trade secret a federal crime. The act is aimed at protecting commercial information rather than classified national defense information. Two sorts of activities are criminalized. The first section of the act Economic Espionage Act, 18 United States Code, Section 1831(a) (1996) criminalizes the misappropriation of trade secrets (including conspiracy to misappropriate trade secrets and the subsequent acquisition of such misappropriated trade secrets) with the knowledge or intent that the theft will benefit a foreign power. Penalties for violation are fines of up to US\$500,000 per offense and imprisonment of up to fifteen years for individuals, and fines of up to US\$10 million for organizations.

The second section Economic Espionage Act, 18 United States Code, Section 1832 (1996). criminalizes the misappropriation of trade secrets related to or included in a product that is produced for or placed in interstate (including international) commerce, with the knowledge or intent that the misappropriation will injure the owner of the trade secret. Penalties for violation are imprisonment for up to ten years for individuals (no fines) and fines of up to US\$5 million for organizations.

In addition to these specific penalties, the fourth section of the EEA Economic Espionage Act, 18 United States Code, Section 1834 (1996). Also requires criminal forfeiture of (1) any proceeds of the crime and property derived from proceeds of the crime and (2) any property used, or intended to be used, in commission of the crime.

The EEA authorizes civil proceedings by the Department of Justice to enjoin violations of the act but does not create a private cause of action. This means that anyone believing they have been victimized must go through the US attorney general in order to obtain an injunction.

The EEA is limited to the United States and has no extraterritorial application unless (1) the offender is a US company or a citizen operating from abroad against a US company or (2) an act in furtherance of the espionage takes place in the United States. Other nations lack such legislation, and some may actively support industrial espionage using both their national intelligence services. The US Office of the National Counterintelligence Executive publishes an annual report, mandated by the US

Congress, on foreign economic collection and industrial espionage, which outlines these espionage activities of many foreign nations.

## 2.4 Right of Employees to Use Trade Secrets

A perennial source of lawsuits in the trade secrets arena is the employee who is hired away by a competitor, allegedly taking trade secrets along with him. Companies frequently seek to prevent piracy by requiring employees to sign confidentiality agreements. An agreement not to disclose particular trade secrets learned or developed on the job is generally enforceable. Even without an agreement, an employer can often prevent disclosure under principles of agency law. Sections 395 and 396 of the Restatement (Second) of Agency suggest that it is an actionable breach of duty to disclose to third persons information given confidentially during the course of the agency. However, every person is held to have a right to earn a living. If the rule were strictly applied, a highly skilled person who went to another company might be barred from using his knowledge and skills. The courts do not prohibit people from using elsewhere the general knowledge and skills they developed on the job. Only specific trade secrets are protected.

## 24.3 Copyright

### Learning Objectives

1. Describe and explain copyrights, how to obtain one, and how they differ from trademarks.
2. Explain the concept of fair use and describe its limits.

### 3.1 Definition and Duration

Copyright is the legal protection given to “authors” for their “writings.” Copyright law is federal; like patent law, its source lies in the Constitution. Copyright protects the expression of ideas in some tangible form, but it does not protect the ideas themselves. Under the 1976 Copyright Act as amended, a copyright in any work created after January 1, 1978, begins when the work is fixed in tangible form—for example, when a book is written down or a picture is painted—and generally lasts for the life of the author plus 70 years after his or her death. This is similar to copyright protection in many countries, but in some countries, the length of copyright protection is the life of the author plus 50 years. For copyrights owned by publishing houses, done as works for hire, common copyright expires 95 years from the date of publication or 120 years from the date of creation, whichever is first. For works created before 1978, such as many of Walt Disney’s movies and cartoons, the US Sonny Bono Copyright Term Extension Act of 1998 provided additional protection of up to 95 years from publication date. Thus works created in 1923 by Disney would not enter the public domain until 2019 or after, unless the copyright had expired prior to 1998 or unless the Disney company released the work into the public domain. In general, after expiration of the copyright, the work enters the public domain.

In 1989, the United States signed the Berne Convention, an international copyright treaty. This law eliminated the need to place the symbol © or the word *Copyright* or the abbreviation *Copr.* on the work itself. Copyrights can be registered with the US Copyright Office in Washington, DC.

### 3.2 Protected Expression

The Copyright Act protects a variety of “writings,” some of which may not seem written at all. These include literary works (books, newspapers, and magazines), music, drama, choreography, films, art, sculpture, and sound recordings. Since copyright covers the expression and not the material or physical object, a book may be copyrighted whether it is on paper, microfilm, tape, or computer disk.

### 3.3 Rights Protected by the Copyright Act

#### Preventing Copying

A copyright gives its holder the right to prevent others from copying his or her work. The copyright holder has the exclusive right to reproduce the work in any medium (paper, film, sound recording), to perform it (e.g., in the case of a play), or to display it (a painting or film). A copyright also gives its holder the exclusive right to prepare derivative works based on the copyrighted work. Thus a playwright could not adapt to the stage a novelist's book without the latter's permission.

### **Fair Use**

One major exception to the exclusivity of copyrights is the fair use doctrine. Section 107 of the Copyright Act provides as follows:

Fair use of a copyrighted work, including such use by reproduction in copies or phono records or by any other means specified by section 106 of the copyright, for purposes such as criticism, comment, news reporting, teaching (including multiple copies for classroom use), scholarship, or research, is not an infringement of copyright. In determining whether the use made of a work in any particular case is a fair use, the factors to be considered shall include—

(1) the purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes;

(2) the nature of the copyrighted work;

(3) the amount and substantiality of the portion used in relation to the copyrighted work as a whole; and

(4) the effect of the use upon the potential market for or value of the copyrighted work.<sup>17</sup>

United States Code, Section 107.

### **3.4 Computer Downloads and the Digital Millennium Copyright Act**

The ubiquity of the Internet and the availability of personal computers with large capacities have greatly impacted the music business. Sharing of music files took off in the late 1990s with

Napster, which lost a legal battle on copyright and had to cease doing business. By providing the means by which individuals could copy music that had been purchased, major record labels were losing substantial profits. Grokster, a privately owned software company based in the West Indies, provided peer-to-peer file sharing from 2001 to 2005 until the US Supreme Court's decision in *MGM Studios, Inc. v. Grokster, Ltd.*, 545 U.S. 913 (2005).

## 24.4 Trademarks

### Learning Objectives

1. Understand what a trademark is and why it deserves protection.
2. Know why some “marks” may not be eligible for trademark protection, and how to obtain trademark protection for those that are.
3. Explain what “blurring” and “tarnishment” are and what remedies are available to the holder of the mark.

### 4.1 Definitions of Trademarks

A trademark is defined in the federal Lanham Act of 1946 as “any word, name, symbol, or device or any combination thereof adopted and used by a manufacturer or merchant to identify his goods and distinguish them from goods manufactured or sold by others.”<sup>15</sup> United States Code, Section 1127.

Examples of well-known trademarks are Coca-Cola, Xerox, and Apple. A service mark is used in the sale or advertising of services to identify the services of one person and distinguish them from the services of others. Examples of service marks are McDonald's, BP, and Hilton. A certification mark is used in connection with many products “to certify regional or other origin, material, mode of manufacture, quality, accuracy or other characteristics of such goods or services or that the work or labor on the goods or services was performed by members of a union or other organization.” Examples are the Good Housekeeping Seal of Approval and UL (Underwriters Laboratories, Inc., approval mark). Unlike other forms of trademark, the owner

of the certification mark (e.g., Good Housekeeping, or the Forest Stewardship Council's FSC mark) is not the owner of the underlying product.

## 4.2 Extent of Trademark Protection

### **Kinds of Marks**

Trademarks and other kinds of marks may consist of words and phrases, pictures, symbols, shapes, numerals, letters, slogans, and sounds. Trademarks are a part of our everyday world: the sounds of a radio or television network announcing itself (NBC, BBC), the shape of a whiskey bottle (Haig & Haig's Pinch Bottle), a series of initials (GE, KPMG, IBM), or an animal's warning growl (MGM's lion).

## Chapter 25 Mortgages and Nonconsensual Liens (Hardbound chapter 29)

### Learning Objectives

After reading this chapter, you should understand the following:

1. The basic concepts of mortgages
2. How the mortgage is created
3. Priorities with mortgages as security devices
4. Termination of the mortgage
5. Other methods of using real estate as security
6. Nonconsensual liens

## 25.1 Uses, History, and Creation of Mortgages

### Learning Objectives

1. Understand the terminology used in mortgage transactions, and how mortgages are used as security devices.
2. Know a bit about the history of mortgages.
3. Understand how the mortgage is created.

Having discussed in [Chapter 22 "Secured Transactions and Suretyship"](#) security interests in personal property and suretyship—two of the three common types of consensual security arrangements—we turn now to the third type of consensual security arrangement, the mortgage. We also discuss briefly various forms of nonconsensual liens.

### 1.1 Definitions

A mortgage is a means of securing a debt with real estate. A long time ago, the mortgage was considered an actual transfer of title, to become void if the debt was paid off. The modern view, held in most states, is that the mortgage is but a lien, giving the holder, in the event of

default, the right to sell the property and repay the debt from the proceeds. The person giving the mortgage is the mortgagor, or borrower. In the typical home purchase, that's the buyer. The buyer needs to borrow to finance the purchase; in exchange for the money with which to pay the seller, the buyer "takes out a mortgage" with, say, a bank. The lender is the mortgagee, the person or institution holding the mortgage, with the right to foreclose on the property if the debt is not timely paid. Although the law of real estate mortgages is different from the set of rules in Article 9 of the Uniform Commercial Code (UCC) that we examined in [Chapter 22 "Secured Transactions and Suretyship"](#), the circumstances are the same, except that the security is real estate rather than personal property (secured transactions) or the promise of another (suretyship).

## 1.2 The Uses of Mortgages

Most frequently, we think of a mortgage as a device to fund a real estate purchase: for a homeowner to buy her house, or for a commercial entity to buy real estate (e.g., an office building), or for a person to purchase farmland. But the value in real estate can be mortgaged for almost any purpose (a home equity loan): a person can take out a mortgage on land to fund a vacation. Indeed, during the period leading up to the recession in 2007–08, a lot of people borrowed money on their houses to buy things: boats, new cars, furniture, and so on. Unfortunately, it turned out that some of the real estate used as collateral was overvalued: when the economy weakened and people lost income or their jobs, they couldn't make the mortgage payments. And, to make things worse, the value of the real estate sometimes sank too, so that the debtors owed more on the property than it was worth (that's called being underwater). They couldn't sell without taking a loss, and they couldn't make the payments. Some debtors just walked away, leaving the banks with a large number of houses, commercial buildings, and even shopping centers on their hands.

## 1.3 Short History of Mortgage Law

The mortgage has ancient roots, but the form we know evolved from the English land law in the Middle Ages. Understanding that law helps to understand modern mortgage law. In the

fourteenth century, the mortgage was a deed that actually transferred title to the mortgagee. If desired, the mortgagee could move into the house, occupy the property, or rent it out. But because the mortgage obligated him to apply to the mortgage debt whatever rents he collected, he seldom ousted the mortgagor. Moreover, the mortgage set a specific date (the “law day”) on which the debt was to be repaid. If the mortgagor did so, the mortgage became void and the mortgagor was entitled to recover the property. If the mortgagor failed to pay the debt, the property automatically vested in the mortgagee. No further proceedings were necessary.

This law was severe. A day’s delay in paying the debt, for any reason, forfeited the land, and the courts strictly enforced the mortgage. The only possible relief was a petition to the king, who over time referred these and other kinds of petitions to the courts of equity. At first fitfully, and then as a matter of course (by the seventeenth century), the equity courts would order the mortgagee to return the land when the mortgagor stood ready to pay the debt plus interest. Thus a new right developed: the *equitable right of redemption*, known for short as the equity of redemption. In time, the courts held that this equity of redemption was a form of property right; it could be sold and inherited. This was a powerful right: no matter how many years later, the mortgagor could always recover his land by proffering a sum of money.

Understandably, mortgagees did not warm to this interpretation of the law, because their property rights were rendered insecure. They tried to defeat the equity of redemption by having mortgagors waive and surrender it to the mortgagees, but the courts voided waiver clauses as a violation of public policy. Hence a mortgage, once a transfer of title, became a security for debt. A mortgage as such can never be converted into a deed of title.

The law did not rest there. Mortgagees won a measure of relief in the development of the foreclosure. On default, the mortgagee would seek a court order giving the mortgagor a fixed time—perhaps six months or a year—within which to pay off the debt; under the court decree, failure meant that the mortgagor was forever foreclosed from asserting his right of

redemption. This strict foreclosure gave the mortgagee outright title at the end of the time period.

In the United States today, most jurisdictions follow a somewhat different approach: the mortgagee forecloses by forcing a public sale at auction. Proceeds up to the amount of the debt are the mortgagee's to keep; surplus is paid over to the mortgagor. Foreclosure by sale is the usual procedure in the United States. At bottom, its theory is that a mortgage is a lien on land. (Foreclosure issues are further discussed in Section 29.2 "Priority, Termination of the Mortgage, and Other Methods of Using Real Estate as Security".)

Under statutes enacted in many states, the mortgagor has one last chance to recover his property, even after foreclosure. This statutory right of redemption extends the period to repay, often by one year.

## **1.4 Creation of the Mortgage**

### **Statutory Regulation**

The decision whether to lend money and take a mortgage is affected by several federal and state regulations.

### **Consumer Credit Statutes Apply**

Statutes dealing with consumer credit transactions have a bearing on the mortgage, including state usury statutes, and the federal Truth in Lending Act and Equal Credit Opportunity Act.

### **Real Estate Settlement Procedures Act**

Other federal statutes are directed more specifically at mortgage lending. One, enacted in 1974, is the Real Estate Settlement Procedures Act (RESPA), aimed at abuses in the settlement process—the process of obtaining the mortgage and purchasing a residence. The act covers all federally related first mortgage loans secured by residential properties for one to four families. It requires the lender to disclose information about settlement costs in advance of the closing

day: it prohibits the lender from “springing” unexpected or hidden costs onto the borrower. The RESPA is a US Department of Housing and Urban Development (HUD) consumer protection statute designed to help home buyers be better shoppers in the home-buying process, and it is enforced by HUD. It also outlaws what had been a common practice of giving and accepting kickbacks and referral fees. The act prohibits lenders from requiring mortgagors to use a particular company to obtain insurance, and it limits add-on fees the lender can demand to cover future insurance and tax charges.

### **The Note and the Mortgage Documents**

The note and the mortgage documents are the contracts that set up the deal: the mortgagor gets credit, and the mortgagee gets the right to repossess the property in case of default.

#### **The Note**

If the lender decides to grant a mortgage, the mortgagor signs two critical documents at the closing: the note and the mortgage. We cover notes in [Chapter 19 "Nature and Form of Commercial Paper"](#). It is enough here to recall that in a note (really a type of IOU), the mortgagor promises to pay a specified principal sum, plus interest, by a certain date or dates. The note is the underlying obligation for which the mortgage serves as security. Without the note, the mortgagee would have an empty document, since the mortgage would secure nothing. Without a mortgage, a note is still quite valid, evidencing the debtor’s personal obligation.

One particular provision that usually appears in both mortgages and the underlying notes is the acceleration clause. This provides that if a debtor should default on any particular payment, the entire principal and interest will become due immediately at the lender’s option. Why an acceleration clause? Without it, the lender would be powerless to foreclose the entire mortgage when the mortgagor defaulted but would have to wait until the expiration of the note’s term. Although the acceleration clause is routine, it will not be enforced unless the mortgagee acts in an equitable and fair manner. The problem arises where the mortgagor’s

default was the result of some unconscionable conduct of the mortgagee, such as representing to the mortgagee that she might take a sixty-day “holiday” from having to make payments. In *Paul H. Cherry v. Chase Manhattan Mortgage Group*, 190 F. Supp. 1330 (Dist. Ct. Fl. 2002); the equitable powers of the court were invoked to prevent acceleration.

## The Mortgage

Under the statute of frauds, the mortgage itself must be evidenced by some writing to be enforceable. The mortgagor will usually make certain promises and warranties to the mortgagee and state the amount and terms of the debt and the mortgagor’s duties concerning taxes, insurance, and repairs.

## 25.2 Priority, Termination of the Mortgage, and Other Methods of Using Real Estate as Security

### Learning Objectives

1. Understand why it is important that the mortgagee (creditor) record her interest in the debtor’s real estate.
2. Know the basic rule of priority—who gets an interest in the property first in case of default—and the exceptions to the rule.
3. Recognize the three ways mortgages can be terminated: payment, assumption, and foreclosure.
4. Be familiar with other methods (besides mortgages) by which real property can be used as security for a creditor.

### 2.1 Priorities in Real Property Security

You may recall from [Chapter 22 "Secured Transactions and Suretyship"](#) how important it is for a creditor to perfect its secured interest in the goods put up as collateral. Absent perfection, the creditor stands a chance of losing out to another creditor who took its interest in the goods subsequent to the first creditor. The same problem is presented in real property security: the

mortgagee wants to make sure it has first claim on the property in case the mortgagor (debtor) defaults.

## **2.2 General Rule of Priorities**

The general rule of priority is the same for real property security as for personal property security: the first in time to give notice of the secured interest is first in right. For real property, the notice is by recording the mortgage. Recording is the act of giving public notice of changes in interests in real estate. Recording was created by statute; it did not exist at common law. The typical recording statute calls for a transfer of title or mortgage to be placed in a particular county office, usually the auditor, recorder, or register of deeds.

A mortgage is valid between the parties whether or not it is recorded, but a mortgagee might lose to a third party—another mortgagee or a good-faith purchaser of the property—unless the mortgage is recorded.

### **Foreclosure**

The third method of terminating the mortgage is by foreclosure when a mortgagor defaults. Even after default, the mortgagor has the right to exercise his equity of redemption—that is, to redeem the property by paying the principal and interest in full. If he does not, the mortgagee may foreclose the equity of redemption. Although strict foreclosure is used occasionally, in most cases the mortgagee forecloses by one of two types of sale.

The first type is judicial sale. The mortgagee seeks a court order authorizing the sale to be conducted by a public official, usually the sheriff. The mortgagor is entitled to be notified of the proceeding and to a hearing. The second type of sale is that conducted under a clause called a power of sale, which many lenders insist be contained in the mortgage. This clause permits the mortgagee to sell the property at public auction without first going to court—although by custom or law, the sale must be advertised, and typically a sheriff or other public official conducts the public sale or auction.

Once the property has been sold, it is deeded to the new purchaser. In about half the states, the mortgagor still has the right to redeem the property by paying up within six months or a year—the statutory redemption period. Thereafter, the mortgagor has no further right to redeem. If the sale proceeds exceed the debt, the mortgagor is entitled to the excess unless he has given second and third mortgages, in which case the junior mortgagees are entitled to recover their claims before the mortgagor. If the proceeds are less than the debt, the mortgagee is entitled to recover the deficiency from the mortgagor. However, some states have statutorily abolished deficiency judgments.

### **Deed of Trust**

*The deed of trust is a device for securing a debt with real property; unlike the mortgage, it requires three parties: the borrower, the trustee, and the lender. Otherwise, it is at base identical to a mortgage. The borrower conveys the land to a third party, the trustee, to hold in trust for the lender until the borrower pays the debt. (The trustee's interest is really a kind of legal fiction: that person is expected to have no interest in the property.) The primary benefit to the deed of trust is that it simplifies the foreclosure process by containing a provision empowering the trustee to sell the property on default, thus doing away with the need for any court filings. The disinterested third party making sure things are done properly becomes the trustee, not a judge. In thirty states and the District of Columbia—more than half of US jurisdictions—the deed of trust is usually used in lieu of mortgages. The states using the deed of trust system are as follows: Alabama, Alaska, Arkansas, Arizona, California, Colorado, District of Columbia, Georgia, Hawaii, Idaho, Iowa, Michigan, Minnesota, Mississippi, Missouri, Montana, Nevada, New Hampshire, North Carolina, Oklahoma, Oregon, Rhode Island, South Dakota, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.*

### **Installment or Land Contract**

Under the installment contract or land contract, the purchaser takes possession and agrees to pay the seller over a period of years. Until the final payment, title belongs to the seller. The contract will specify the type of deed to be conveyed at closing, the terms of payment, the buyer's duty to pay taxes and insure the premises, and the seller's right to accelerate on default. The buyer's particular concern in this type of sale is whether the seller in fact has title. The buyers can protect themselves by requiring proof of title and title insurance when the contract is signed. Moreover, the buyer should record the installment contract to protect against the seller's attempt to convey title to an innocent third-party purchaser while the contract is in effect.

## **25.3 Nonconsensual Lien**

### **3.1 Court-Decreed Liens**

Some nonconsensual liens are issued by courts.

#### **Attachment Lien**

An attachment lien is ordered against a person's property—real or personal—to prevent him from disposing of it during a lawsuit. To obtain an attachment lien, the plaintiff must show that the defendant likely will dispose of or hide his property; if the court agrees with the plaintiff, she must post a bond and the court will issue a writ of attachment to the sheriff, directing the sheriff to seize the property. Attachments of real property should be recorded. Should the plaintiff win her suit, the court issues a writ of execution, directing the sheriff to sell the property to satisfy the judgment.

#### **Judgment Lien**

A judgment lien may be issued when a plaintiff wins a judgment in court if an attachment lien has not already been issued. Like the attachment lien, it provides a method by which the defendant's property may be seized and sold.

### 3.2 Mechanic's Lien

#### Overview

The most common nonconsensual lien on real estate is the mechanic's lien. A mechanic's lien can be obtained by one who furnishes labor, services, or materials to improve real estate: this is statutory, and the statute must be carefully followed. The "mechanic" here is one who works with his or her hands, not specifically one who works on machines. An automobile mechanic could not obtain a mechanic's lien on a customer's house to secure payment of work he did on her car. (The lien to which the automobile mechanic is entitled is a "possessory lien" or "artisan's lien,") To qualify for a mechanic's lien, the claimant must file a sworn statement describing the work done, the contract made, or the materials furnished that permanently improved the real estate.

A particularly difficult problem crops up when the owner has paid the contractor, who in turn fails to pay his subcontractors. In many states, the subcontractors can file a lien on the owner's property, thus forcing the owner to pay them—and maybe twice. To protect themselves, owners can demand a sworn statement from general contractors listing the subcontractors used on the job, and from them, owners can obtain a waiver of lien rights before paying the general contractor.

## Chapter 26 The Transfer of Real Estate by Sale (Hardbound chapter 34)

### Learning Objectives

After reading this chapter, you should understand the following:

1. The various forms of real estate ownership, including fee simple, tenancy in common, and joint tenancy
2. The mechanics of finding, financing, and closing a real estate transaction
3. How adverse possession may sometimes vest title in real property despite the nonconsent of the owner

This chapter follows the steps taken when real estate is transferred by sale.

1. The buyer selects a form of ownership.
2. The buyer searches for the real estate to be purchased. In doing so, the buyer will usually deal with real estate brokers.
3. After a parcel is selected, the seller and buyer will negotiate and sign a sales agreement.
4. The seller will normally be required to provide proof of title.
5. The buyer will acquire property insurance.
6. The buyer will arrange financing.
7. The sale and purchase will be completed at a closing.

During this process, the buyer and seller enter into a series of contracts with each other and with third parties such as brokers, lenders, and insurance companies. In this chapter, we focus on the unique features of these contracts, with the exception of mortgages.

### 26.1 Forms of Ownership

## 1.1 Joint Tenancy

Joint tenancy is an estate in land owned by two or more persons. It is distinguished chiefly by the right of survivorship. If two people own land as joint tenants, then either becomes the sole owner when the other dies. For land to be owned jointly, four unities must coexist:

1. Unity of time. The interests of the joint owners must begin at the same time.
2. Unity of title. The joint tenants must acquire their title in the same conveyance—that is, the same will or deed.
3. Unity of interest. Each owner must have the same interest in the property; for example, one may not hold a life estate and the other the remainder interest.
4. Unity of possession. All parties must have an equal right to possession of the property.

Suppose a woman owns some property and upon marriage wishes to own it jointly with her husband. She deeds it to herself and her husband “as joint tenants and not tenants in common.” Strictly speaking, the common law would deny that the resulting form of ownership was joint because the unities of title and time were missing. The wife owned the property first and originally acquired title under a different conveyance. But the modern view in most states is that an owner may convey directly to herself and another in order to create a joint estate.

When one or more of the unities is destroyed, however, the joint tenancy lapses. Fritz and Gary own a farm as joint tenants. Fritz decides to sell his interest to Jesse (or, because Fritz has gone bankrupt, the sheriff auctions off his interest at a foreclosure sale). Jesse and Gary would hold as tenants in common and not as joint tenants. Suppose Fritz had made out his will, leaving his interest in the farm to Reuben. On Fritz’s death, would the unities be destroyed, leaving Gary and Reuben as tenants in common? No, because Gary, as joint tenant, would own the entire farm on Fritz’s death, leaving nothing behind for Reuben to inherit.

## 1.2 Tenancy by the Entirety

About half the states permit husbands and wives to hold property as tenants by the entirety. This form of ownership is similar to joint tenancy, except that it is restricted to husbands and

wives. This is sometimes described as the unity of person. In most of the states permitting tenancy by the entirety, acquisition by husband and wife of property as joint tenants automatically becomes a tenancy by the entirety. The fundamental importance of tenancy by the entirety is that neither spouse individually can terminate it; only a joint decision to do so will be effective. One spouse alone cannot sell or lease an interest in such property without consent of the other, and in many states a creditor of one spouse cannot seize the individual's separate interest in the property, because the interest is indivisible.

### 1.3 Tenancy in Common

Two or more people can hold property as tenants in common when the unity of possession is present, that is, when each is entitled to occupy the property. None of the other unities—of time, title, or interest—is necessary, though their existence does not impair the common ownership. Note that the tenants in common do not own a specific portion of the real estate; each has an undivided share in the whole, and each is entitled to occupy the whole estate. One tenant in common may sell, lease, or mortgage his undivided interest. When a tenant in common dies, his interest in the property passes to his heirs, not to the surviving tenants in common.

Chapter 27 [The Nature and Regulation of Real Estate and the Environment \(Hardbound chapter 33\)](#)

### Learning Objectives

After reading this chapter, you should understand the following:

1. The various kinds of interests (or “estates”) in real property
2. The various rights that come with ownership of real property
3. What easements are, how they are created, and how they function
4. How ownership of real property is regulated by tort law, by agreement, and by the public interest (through eminent domain)
5. The various ways in which environmental laws affect the ownership and use of real property

Real property is an important part of corporate as well as individual wealth. As a consequence, the role of the corporate real estate manager has become critically important within the corporation. The real estate manager must be aware not only of the value of land for purchase and sale but also of proper lease negotiation, tax policies and assessments, zoning and land development, and environmental laws.

## **27.1 Estates**

### **1.1 Fee Simple Absolute**

The strongest form of ownership is known as the fee simple absolute (or fee simple, or merely fee). This is what we think of when we say that someone “owns” the land. As one court put it, “The grant of a fee in land conveys to the grantee complete ownership, immediately and forever, with the right of possession from boundary to boundary and from the center of the earth to the sky, together with all the lawful uses thereof.” *Magnolia Petroleum Co. v. Thompson*, 106 F.2d 217 (8th Cir. 1939). Although the fee simple may be encumbered by a mortgage (you may borrow money against the equity in your home) or an easement (you may grant someone the right to walk across your backyard), the underlying control is in the hands of the owner. Though it was once a complex matter in determining whether a person had been given a fee simple interest, today the law presumes that the estate being transferred is a fee simple, unless the conveyance expressly states to the contrary. (In her will, Lady Gaga grants

her five-thousand-acre ranch “to my screen idol, Tilda Swinton.” On the death of Lady Gaga, Swinton takes ownership of the ranch outright in fee simple absolute.)

## 1.2 Life Estates

An estate measured by the life of a particular person is called a life estate. A conventional life estate is created privately by the parties themselves. The simplest form is that conveyed by the following words: “to Scarlett for life.” Scarlett becomes a life tenant; as such, she is the owner of the property and may occupy it for life or lease it or even sell it, but the new tenant or buyer can acquire only as much as Scarlett has to give, which is ownership for her life (i.e., all she can sell is a life estate in the land, not a fee simple absolute). If Scarlett sells the house and dies a month later, the buyer’s interest would terminate. A life estate may be based on the life of someone other than the life tenant: “to Scarlett for the life of Rhett.”

The life tenant may use the property as though he were the owner in fee simple absolute with this exception: he may not act so as to diminish the value of the property that will ultimately go to the remainderman—the person who will become owner when the life estate terminates. The life tenant must pay the life estate for ordinary upkeep of the property, but the remainderman is responsible for extraordinary repairs.

Some life estates are created by operation of law and are known as legal life estates. The most common form is a widow’s interest in the real property of her husband. In about one-third of the states, a woman is entitled to dower, a right to a percentage (often one-third) of the property of her husband when he dies. Most of these states give a widower a similar interest in the property of his deceased wife. Dower is an alternative to whatever is bequeathed in the will; the widow has the right to elect the share stated in the will or the share available under dower. To prevent the dower right from upsetting the interests of remote purchasers, the right may be waived on sale by having the spouse sign the deed.

## 1.4 Future Estates

To this point, we have been considering present estates. But people also can have future interests in real property. Despite the implications of its name, the future interest is owned now but is not available to be used or enjoyed now. For the most part, future interests may be bought and sold, just as land held in fee simple absolute may be bought and sold. There are several classes of future interests, but in general there are two major types: reversion and remainder.

### **Reversion**

A reversion arises whenever the estate transferred has a duration less than that originally owned by the transferor. A typical example of a simple reversion is that which arises when a life estate is conveyed. The ownership conveyed is only for the life; when the life tenant dies, the ownership interest reverts to the grantor. Suppose the grantor has died in the meantime. Who gets the reversion interest? Since the reversion is a class of property that is owned now, it can be inherited, and the grantor's heirs would take the reversion at the subsequent death of the life tenant.

### **Remainder**

The transferor need not keep the reversion interest for himself. He can give that interest to someone else, in which case it is known as a remainder interest, because the remainder of the property is being transferred. Suppose the transferor conveys land with these words: "to Scarlett for life and then to Rhett." Scarlett has a life estate; the remainder goes to Rhett in fee simple absolute. Rhett is said to have a vested remainder interest, because on Scarlett's death, he or his heirs will automatically become owners of the property. Some remainder interests are contingent—and are therefore known as contingent remainder interests—on the happening of a certain event: "to my mother for her life, then to my sister if she marries Harold before my mother dies." The transferor's sister will become the owner of the property in fee simple only if she marries Harold while her mother is alive; otherwise, the property will revert to the

transferor or his heirs. The number of permutations of reversions and remainders can become quite complex, far more than we have space to discuss in this text.

## 27.2 Rights Incident to Possession and Ownership of Real Estate

### Learning Objective

Understand that property owners have certain rights in the airspace above their land, in the minerals beneath their land, and even in water that adjoins their land.

#### 2.1 Rights to Airspace

The traditional rule was stated by Lord Coke: “Whoever owns the soil owns up to the sky.” This traditional rule remains valid today, but its application can cause problems. A simple example would be a person who builds an extension to the upper story of his house so that it hangs out over the edge of his property line and thrusts into the airspace of his neighbor. That would clearly be an encroachment on the neighbor’s property. But is it trespass when an airplane—or an earth satellite—flies over your backyard? Obviously, the courts must balance the right to travel against landowners’ rights. In *U.S. v. Causby*, 328 U.S. 256 (1946), the Court determined that flights over private land may constitute a diminution in the property value if they are so low and so frequent as to be a direct and immediate interference with the enjoyment and use of land.

#### 2.2 Rights to Water

The right to determine how bodies of water will be used depends on basic property rules. Two different approaches to water use in the United States—eastern and western—have developed over time. Eastern states, where water has historically been more plentiful, have adopted the so-called riparian rights theory, which itself can take two forms. *Riparian* refers to land that includes a part of the bed of a waterway or that borders on a public watercourse. A riparian owner is one who owns such land. What are the rights of upstream and downstream owners of riparian land regarding use of the waters? One approach is the “natural flow” doctrine: Each

riparian owner is entitled to have the river or other waterway maintained in its natural state. The upstream owner may use the river for drinking water or for washing but may not divert it to irrigate his crops or to operate his mill if doing so would materially change the amount of the flow or the quality of the water. Virtually all eastern states today are not so restrictive and rely instead on a “reasonable use” doctrine, which permits the benefit to be derived from use of the waterway to be weighed against the gravity of the harm. This approach is illustrated in *Hoover v. Crane*, 362 Mich. 36, 106 N.W.2d 563 (1960).

In contrast to riparian rights doctrines, western states have adopted the prior appropriation doctrine. This rule looks not to equality of interests but to priority in time: first in time is first in right. The first person to use the water for a beneficial purpose has a right superior to latecomers. This rule applies even if the first user takes all the water for his own needs and even if other users are riparian owners. This rule developed in water-scarce states in which development depended on incentives to use rather than hoard water. Today, the prior appropriation doctrine has come under criticism because it gives incentives to those who already have the right to the water to continue to use it profligately, rather than to those who might develop more efficient means of using it.

## **27.3 Easements: Rights in the Lands of Others**

### **Learning Objectives**

1. Explain the difference between an easement and a license.
2. Describe the ways in which easements can be created.

#### **3.1 Definition**

An easement is an interest in land created by agreement that permits one person to make use of another’s estate. This interest can extend to a profit, the taking of something from the other’s land. Though the common law once distinguished between an easement and profit, today the distinction has faded, and profits are treated as a type of easement. An easement must be distinguished from a mere license, which is permission, revocable at the will of the

owner, to make use of the owner's land. An easement is an estate; a license is personal to the grantee and is not assignable.

The two main types of easements are affirmative and negative. An affirmative easement gives a landowner the right to use the land of another (e.g., crossing it or using water from it), while a negative easement, by contrast, prohibits the landowner from using his land in ways that would affect the holder of the easement. For example, the builder of a solar home would want to obtain negative easements from neighbors barring them from building structures on their land that would block sunlight from falling on the solar home. With the growth of solar energy, some states have begun to provide stronger protection by enacting laws that regulate one's ability to interfere with the enjoyment of sunlight. These laws range from a relatively weak statute in Colorado, which sets forth rules for obtaining easements, to the much stronger statute in California, which says in effect that the owner of a solar device has a vested right to continue to receive the sunlight.

Another important distinction is made between easements appurtenant and easements in gross. An easement appurtenant benefits the owner of adjacent land. The easement is thus appurtenant to the holder's land. The benefited land is called the dominant tenement, and the burdened land—that is, the land subject to the easement—is called the servient tenement. An easement in gross is granted independent of the easement holder's ownership or possession of land. It is simply an independent right—for example, the right granted to a local delivery service to drive its trucks across a private roadway to gain access to homes at the other end.

## 27.4 Regulation of Land Use

### Learning Objectives

1. Compare the various ways in which law limits or restricts the right to use your land in any way that you decide is best for you.

2. Distinguish between regulation by common law and regulation by public acts such as zoning or eminent domain.
3. Understand that property owners may restrict the uses of land by voluntary agreement, subject to important public policy considerations.

Land use regulation falls into three broad categories: (1) restriction on the use of land through tort law, (2) private regulation by agreement, and (3) public ownership or regulation through the powers of eminent domain and zoning.

#### **4.1 Regulation of Land Use by Tort Law**

Tort law is used to regulate land use in two ways: (1) The owner may become liable for certain activities carried out on the real estate that affect others beyond the real estate. (2) The owner may be liable to persons who, upon entering the real estate, are injured.

##### **Landowner's Activities**

The two most common torts in this area are nuisance and trespass. A common-law nuisance is an interference with the use and enjoyment of one's land. Examples of nuisances are excessive noise (especially late at night), polluting activities, and emissions of noxious odors. But the activity must produce substantial harm, not fleeting, minor injury, and it must produce those effects on the reasonable person, not on someone who is peculiarly allergic to the complained-of activity. A person who suffered migraine headaches at the sight of croquet being played on a neighbor's lawn would not likely win a nuisance lawsuit. While the meaning of nuisance is difficult to define with any precision, this common-law cause of action is a primary means for landowners to obtain damages for invasive environmental harms.

A trespass is the wrongful physical invasion of or entry upon land possessed by another. Loud noise blaring out of speakers in the house next door might be a nuisance but could not be a trespass, because noise is not a physical invasion. But spraying pesticides on your gladiolas

could constitute a trespass on your neighbor's property if the pesticide drifts across the boundary.

Nuisance and trespass are complex theories, a full explanation of which would consume far more space than we have. What is important to remember is that these torts are two-edged swords. In some situations, the landowner himself will want to use these theories to sue trespassers or persons creating a nuisance, but in other situations, the landowner will be liable under these theories for his own activities.

### **Injury to Persons Entering the Real Estate**

Traditionally, liability for injury has depended on the status of the person who enters the real estate.

#### **Trespassers**

If the person is an intruder without permission—a trespasser—the landowner owes him no duty of care unless he knows of the intruder's presence, in which case the owner must exercise reasonable care in his activities and warn of hidden dangers on his land of which he is aware. A known trespasser is someone whom the landowner actually sees on the property or whom he knows frequently intrudes on the property, as in the case of someone who habitually walks across the land. If a landowner knows that people frequently walk across his property and one day he puts a poisonous chemical on the ground to eliminate certain insects, he is obligated to warn those who continue to walk on the grounds. Intentional injury to known trespassers is not allowed, even if the trespasser is a criminal intent on robbery, for the law values human life above property rights.

#### **Children**

If the trespasser is a child, a different rule applies in most states. This is the doctrine of attractive nuisance. Originally this rule was enunciated to deal with cases in which something on the land attracted the child to it, like a swimming pool. In recent years, most courts have

dropped the requirement that the child must have been attracted to the danger. Instead, the following elements of proof are necessary to make out a case of attractive nuisance (Restatement of Torts, Section 339):

1. The child must have been injured by a structure or other artificial condition.
2. The possessor of the land (not necessarily the owner) must have known or should have known that young children would be likely to trespass.
3. The possessor must have known or should have known that the artificial condition exists and that it posed an unreasonable risk of serious injury.
4. The child must have been too young to appreciate the danger that the artificial condition posed.
5. The risk to the child must have far outweighed the utility of the artificial condition to the possessor.
6. The possessor did not exercise reasonable care in protecting the child or eliminating the danger.

Old refrigerators, open gravel pits, or mechanisms that a curious child would find inviting are all examples of attractive nuisance. Suppose Farmer Brown keeps an old buggy on his front lawn, accessible from the street. A five-year-old boy clambers up the buggy one day, falls through a rotted floorboard, and breaks his leg. Is Farmer Brown liable? Probably so. The child was too young to appreciate the danger posed by the buggy, a structure. The farmer should have appreciated that young children would be likely to come onto the land when they saw the buggy and that they would be likely to climb up onto the buggy. Moreover, he should have known, if he did not know in fact, that the buggy, left outside for years without being tended, would pose an unreasonable risk. The buggy's utility as a decoration was far overbalanced by the risk that it posed to children, and the farmer failed to exercise reasonable care.

## **Licensees**

A nontrespasser who comes onto the land without being invited, or if invited, comes for purposes unconnected with any business conducted on the premises, is known as a licensee. This class of visitors to the land consists of (1) social guests (people you invite to your home for a party); (2) a salesman, not invited by the owner, who wishes to sell something to the owner or occupier of the property; and (3) persons visiting a building for a purpose not connected with the business on the land (e.g., students who visit a factory to see how it works). The landowner owes the same duty of care to licensees that he owes to known trespassers. That is, he must warn them against hidden dangers of which he is aware, and he must exercise reasonable care in his activities to ensure that they are not injured.

### **Invitees**

A final category of persons entering land is that of invitee. This is one who has been invited onto the land, usually, though not necessarily, for a business purpose of potential economic benefit to the owner or occupier of the premises. This category is confusing because it sounds as though it should include social guests (who clearly are invited onto the premises), but traditionally social guests are said to be licensees.

Invitees include customers of stores, users of athletic and other clubs, customers of repair shops, strollers through public parks, restaurant and theater patrons, hotel guests, and the like. From the owner's perspective, the major difference between licensees and invitees is that he is liable for injuries resulting to the latter from hidden dangers that he should have been aware of, even if he is not actually aware of the dangers. How hidden the dangers are and how broad the owner's liability is depends on the circumstances, but liability sometimes can be quite broad. Difficult questions arise in lawsuits brought by invitees (or business invitees, as they are sometimes called) when the actions of persons other than the landowner contribute to the injury.

The foregoing rules dealing with liability for persons entering the land are the traditional rules at common law. In recent years, some courts have moved away from the rigidities and

sometimes perplexing differences between trespassers, licensees, and invitees. By court decision, several states have now abolished such distinctions and hold the proprietor, owner, or occupier liable for failing to maintain the premises in a reasonably safe condition. According to the California Supreme Court,

A man's life or limb does not become less worthy of protection by the law nor a loss less worthy of compensation under the law because he has come upon the land of another without permission or with permission but without a business purpose. Reasonable people do not ordinarily vary their conduct depending upon such matters, and to focus upon the status of the injured party as a trespasser, licensee, or invitee in order to determine the question whether the landowner has a duty of care, is contrary to our modern social mores and humanitarian values. Where the occupier of land is aware of a concealed condition involving in the absence of precautions an unreasonable risk of harm to those coming in contact with it and is aware that a person on the premises is about to come in contact with it, the trier of fact can reasonably conclude that a failure to warn or to repair the condition constitutes negligence. Whether or not a guest has a right to expect that his host will remedy dangerous conditions on his account, he should reasonably be entitled to rely upon a warning of the dangerous condition so that he, like the host, will be in a position to take special precautions when he comes in contact with it. *Rowland v. Christian*, 443 P.2d 561 (Cal. 1968).

#### **4.2 Private Regulation of Land Use by Agreement**

A restrictive covenant is an agreement regarding the use of land that "runs with the land." In effect, it is a contractual promise that becomes part of the property and that binds future owners. Violations of covenants can be redressed in court in suits for damages or injunctions but will not result in reversion of the land to the seller.

Usually, courts construe restrictive covenants narrowly—that is, in a manner most conducive to free use of the land by the ultimate owner (the person against whom enforcement of the covenant is being sought). Sometimes, even when the meaning of the covenant is clear, the courts will not enforce it. For example, when the character of a neighborhood changes, the

courts may declare the covenant a nullity. Thus a restriction on a one-acre parcel to residential purposes was voided when in the intervening thirty years a host of businesses grew up around it, including a bowling alley, restaurant, poolroom, and sewage disposal plant. *Norris v. Williams*, 54 A.2d 331 (Md. 1947).

An important nullification of restrictive covenants came in 1947 when the US Supreme Court struck down as unconstitutional racially restrictive covenants, which barred blacks and other minorities from living on land so burdened. The Supreme Court reasoned that when a court enforces such a covenant, it acts in a discriminatory manner (barring blacks but not whites from living in a home burdened with the covenant) and thus violates the Fourteenth Amendment's guarantee of equal protection of the laws. *Shelley v. Kraemer*, 334 U.S. 1 (1947).

#### **4.3 Public Control of Land Use through Eminent Domain**

The government may take private property for public purposes. Its power to do so is known as eminent domain. The power of eminent domain is subject to constitutional limitations. Under the Fifth Amendment, the property must be put to public use, and the owner is entitled to "just compensation" for his loss. These requirements are sometimes difficult to apply.

##### **Public Use**

The requirement of public use normally means that the property will be useful to the public once the state has taken possession—for example, private property might be condemned to construct a highway. Although not allowed in most circumstances, the government could even condemn someone's property in order to turn around and sell it to another individual, if a legitimate public purpose could be shown. For example, a state survey in the mid-1960s showed that the government owned 49 percent of Hawaii's land. Another 47 percent was controlled by seventy-two private landowners. Because this concentration of land ownership (which dated back to feudal times) resulted in a critical shortage of residential land, the

Hawaiian legislature enacted a law allowing the government to take land from large private estates and resell it in smaller parcels to homeowners. In 1984, the US Supreme Court upheld the law, deciding that the land was being taken for a public use because the purpose was “to attack certain perceived evils of concentrated property ownership. *Hawaii Housing Authority v. Midkiff*, 467 U.S. 229 (1984). Although the use must be public, the courts will not inquire into the necessity of the use or whether other property might have been better suited. It is up to government authorities to determine whether and where to build a road, not the courts.

The limits of public use were amply illustrated in the Supreme Court’s 2002 decision of *Kelo v. New London*, 545 U.S. 469 (2005). in which Mrs. Kelo’s house was condemned so that the city of New London, in Connecticut, could create a marina and industrial park to lease to Pfizer Corporation. The city’s motives were to create a higher tax base for property taxes. The Court, following precedent in *Midkiff* and other cases, refused to invalidate the city’s taking on constitutional grounds. Reaction from states was swift; many states passed new laws restricting the bases for state and municipal governments to use powers of eminent domain, and many of these laws also provided additional compensation to property owners whose land was taken.

#### **4.4 Public Control of Land Use through Zoning**

Zoning is a technique by which a city or other municipality regulates the type of activity to be permitted in geographical areas within its boundaries. Though originally limited to residential, commercial, and industrial uses, today’s zoning ordinances are complex sets of regulations. A typical municipality might have the following zones: residential with a host of subcategories (such as for single-family and multiple-family dwellings), office, commercial, industrial, agricultural, and public lands. Zones may be exclusive, in which case office buildings would not be permitted in commercial zones, or they may be cumulative, so that a more restricted use would be allowed in a less restrictive zone. Zoning regulations do more than specify the type of

use: they often also dictate minimum requirements for parking, open usable space, setbacks, lot sizes, and the like, and maximum requirements for height, length of side lots, and so on.

*Nolan v. California Coastal Commission*, 483 U.S. 825, 107 S. Ct. 3141, 97 L. Ed. 2d 677 (1987);  
*Dolan v. City of Tigard*, 512 U. S. 825 (1994).

## 27.5 Environmental Law

### Learning Objectives

1. Describe the major federal laws that govern business activities that may adversely affect air quality and water quality.
2. Describe the major federal laws that govern waste disposal and chemical hazards including pesticides.

In one sense, environmental law is very old. Medieval England had smoke control laws that established the seasons when soft coal could be burned. Nuisance laws give private individuals a limited control over polluting activities of adjacent landowners. But a comprehensive set of US laws directed toward general protection of the environment is largely a product of the past quarter-century, with most of the legislative activity stemming from the late 1960s and later, when people began to perceive that the environment was systematically deteriorating from assaults by rapid population growth and greatly increased automobile driving, vast proliferation of factories that generate waste products, and a sharp rise in the production of toxic materials. Two of the most significant developments in environmental law came in 1970, when the National Environmental Policy Act took effect and the Environmental Protection Agency became the first of a number of new federal administrative agencies to be established during the decade. *Rapanos v. United States*, 547 U. S. \_\_\_ (2006); *Decker v. Northwest Environmental Defense Center*, 133 S. Ct. 1326, 185 L. Ed. 2d 447 (2013).

### 5.1 National Environmental Policy Act

Signed into law by President Nixon on January 1, 1970, the National Environmental Policy Act (NEPA) declared that it shall be the policy of the federal government, in cooperation with state

and local governments, “to create and maintain conditions under which man and nature can exist in productive harmony, and fulfill the social, economic, and other requirements of present and future generations of Americans....The Congress recognizes that each person should enjoy a healthful environment and that each person has a responsibility to contribute to the preservation and enhancement of the environment.”<sup>42</sup> United States Code, Section 4321 et seq.

The most significant aspect of NEPA is its requirement that federal agencies prepare an environmental impact statement in every recommendation or report on proposals for legislation and whenever undertaking a major federal action that significantly affects environmental quality.

The Environmental Protection Agency (EPA) has been in the forefront of the news since its creation in 1970. Charged with monitoring environmental practices of industry, assisting the government and private business to halt environmental deterioration, promulgating regulations consistent with federal environmental policy, and policing industry for violations of the various federal environmental statutes and regulations.

### **Clean Water Act**

Legislation governing the nation’s waterways goes back a long time. The first federal water pollution statute was the Rivers and Harbors Act of 1899. Congress enacted new laws in 1948, 1956, 1965, 1966, and 1970. But the centerpiece of water pollution enforcement is the Clean Water Act of 1972 (technically, the Federal Water Pollution Control Act Amendments of 1972), as amended in 1977 and by the Water Quality Act of 1987. The Clean Water Act is designed to restore and maintain the “chemical, physical, and biological integrity of the Nation’s waters.”<sup>33</sup> United States Code, Section 1251. It operates on the states, requiring them to designate the

uses of every significant body of water within their borders (e.g., for drinking water, recreation, commercial fishing) and to set water quality standards to reduce pollution to levels appropriate for each use.

## 5.2 Air Pollution

The centerpiece of the legislative effort to clean the atmosphere is the Clean Air Act of 1970 (amended in 1975, 1977, and 1990). Under this act, the EPA has set two levels of National Ambient Air Quality Standards (NAAQS). The primary standards limit the ambient (i.e., circulating) pollution that affects human health; secondary standards limit pollution that affects animals, plants, and property. The heart of the Clean Air Act is the requirement that subject to EPA approval, the states implement the standards that the EPA establishes. The setting of these pollutant standards was coupled with directing the states to develop state implementation plans (SIPs), applicable to appropriate industrial sources in the state, in order to achieve these standards. The act was amended in 1977 and 1990 primarily to set new goals (dates) for achieving attainment of NAAQS since many areas of the country had failed to meet the deadlines.

## 5.3 Waste Disposal

Though pollution of the air by highly toxic substances like benzene or vinyl chloride may seem a problem removed from that of the ordinary person, we are all in fact polluters. Every year, the United States generates approximately 230 million tons of “trash”—about 4.6 pounds per person per day. Less than one-quarter of it is recycled; the rest is incinerated or buried in landfills. But many of the country’s landfills have been closed, either because they were full or because they were contaminating groundwater. Once groundwater is contaminated, it is extremely expensive and difficult to clean it up. In the 1965 Solid Waste Disposal Act and the 1970 Resource Recovery Act, Congress sought to regulate the discharge of garbage by

encouraging waste management and recycling. Federal grants were available for research and training, but the major regulatory effort was expected to come from the states and municipalities. The rarely discussed industrial dumping of hazardous wastes now became an open controversy, and Congress responded in 1976 with the Resource Conservation and Recovery Act (RCRA) and the Toxic Substances Control Act (TSCA) and in 1980 with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

### **Resource Conservation and Recovery Act**

The RCRA expresses a “cradle-to-grave” philosophy: hazardous wastes must be regulated at every stage. The act gives the EPA power to govern their creation, storage, transport, treatment, and disposal. Any person or company that generates hazardous waste must obtain a permit (known as a “manifest”) either to store it on its own site or ship it to an EPA-approved treatment, storage, or disposal facility. No longer can hazardous substances simply be dumped at a convenient landfill. Owners and operators of such sites must show that they can pay for damage growing out of their operations, and even after the sites are closed to further dumping, they must set aside funds to monitor and maintain the sites safely.

### **Comprehensive Environmental Response, Compensation, and Liability Act**

The CERCLA, also known as the Superfund, gives the EPA emergency powers to respond to public health or environmental dangers from faulty hazardous waste disposal, currently estimated to occur at more than seventeen thousand sites around the country. The EPA can direct immediate removal of wastes presenting imminent danger (e.g., from train wrecks, oil spills, leaking barrels, and fires). Injuries can be sudden and devastating; in 1979, for example, when a freight train derailed in Florida, ninety thousand pounds of chlorine gas escaped from a punctured tank car, leaving 8 motorists dead and 183 others injured and forcing 3,500 residents within a 7-mile radius to be evacuated. The EPA may also carry out “planned removals” when the danger is substantial, even if immediate removal is not necessary.

## 5.4 Chemical Hazards

### **Toxic Substances Control Act**

Chemical substances that decades ago promised to improve the quality of life have lately shown their negative side—they have serious adverse side effects. For example, asbestos, in use for half a century, causes cancer and asbestosis, a debilitating lung disease, in workers who breathed in fibers decades ago. The result has been crippling disease and death and more than thirty thousand asbestos-related lawsuits filed nationwide. Other substances, such as polychlorinated biphenyls (PCBs) and dioxin, have caused similar tragedy. Together, the devastating effects of chemicals led to enactment of the TSCA, designed to control the manufacture, processing, commercial distribution, use, and disposal of chemicals that pose unreasonable health or environmental risks. (The TSCA does not apply to pesticides, tobacco, nuclear materials, firearms and ammunition, food, food additives, drugs, and cosmetics—all are regulated by other federal laws.)

## Learning Objectives

After reading this chapter, you should understand the following:

1. The various types of leasehold estates
2. How leasehold states are created and extended
3. The rights and duties of landlords
4. The rights and duties of tenants
5. The potential tort liability of landlords

## 28.1 Types and Creation of Leasehold Estates

### 1.1 Types of Leasehold Estates

#### Estate for Years

The estate for years is characterized by a definite beginning and a definite end. When you rent an apartment for two years, beginning September 1 and ending on the second August 31, you are the owner of an estate for years. Virtually any period will do; although it is called an estate “for years,” it can last but one day or extend one thousand years or more. Some statutes declare that any estate for years longer than a specified period—one hundred years in Massachusetts, for instance—is a fee simple estate.

#### Periodic Tenancy

As its name implies, a periodic tenancy lasts for a period that is renewed automatically until either landlord or tenant notifies the other that it will end. The periodic tenancy is sometimes called an estate from year to year (or month to month, or week to week). The lease may provide explicitly for the periodic tenancy by specifying that at the expiration of, say, a one-year lease, it will be deemed renewed for another year unless one party notifies the other to the contrary within six months prior to the expiration of the term. Or the periodic tenancy may be

created by implication, if the lease fails to state a term or is defective in some other way, but the tenant takes possession and pays rent. The usual method of creating a periodic tenancy occurs when the tenant remains on the premises (“holds over”) when an estate for years under a lease has ended. The landlord may either reject or accept the implied offer by the tenant to rent under a periodic tenancy. If he rejects the implied offer, the tenant may be ejected, and the landlord is entitled to rent for the holdover period. If he accepts the offer, the original lease determines the rent and length of the renewable period, except that no periodic tenancy may last longer than from year to year—that is, the renewable period may never be any longer than twelve months.

### **Tenancy at Will**

If the landlord and tenant agree that the lease will last only as long as both want it to, then they have created a tenancy at will. Statutes in most states require some notice of intention to terminate. Simone comes to the university to study, and Anita gives her a room to stay in for free. The arrangement is a tenancy at will, and it will continue as long as both want it to. One Friday night, after dinner with classmates, Simone decides she would rather move in with Bob. She goes back to her apartment, packs her suitcase, and tells Anita she’s leaving. The tenancy at will terminates that day.

## **28.2 Rights and Duties of Landlords and Tenants**

### **Learning Objectives**

1. Itemize and explain the rights and duties of landlords.
2. List and describe the rights and duties of tenants.
3. Understand the available remedies for tenants when a landlord is in breach of his or her duties.

## 2.1 Rights and Duties of Landlords

The law imposes a number of duties on the landlord and gives the tenant a number of corresponding rights. These include (1) possession, (2) habitable condition, and (3) noninterference with use.

### **Possession**

The landlord must give the tenant the right of possession of the property. This duty is breached if, at the time the tenant is entitled to take possession, a third party has paramount title to the property and the assertion of this title would deprive the tenant of the use contemplated by the parties. Paramount title means any legal interest in the premises that is not terminable at the will of the landlord or at the time the tenant is entitled to take possession.

If the tenant has already taken possession and then discovers the paramount title, or if the paramount title only then comes into existence, the landlord is not automatically in breach. However, if the tenant thereafter is evicted from the premises and thus deprived of the property, then the landlord is in breach. Suppose the landlord rents a house to a doctor for ten years, knowing that the doctor intends to open a medical office in part of the home and knowing also that the lot is restricted to residential uses only. The doctor moves in. The landlord is not yet in default. The landlord will be in default if a neighbor obtains an injunction against maintaining the office. But if the landlord did not know (and could not reasonably have known) that the doctor intended to use his home for an office, then the landlord would not be in default under the lease, since the property could have been put to normal—that is, residential—use without jeopardizing the tenant’s right to possession.

### **Warranty of Habitability**

As applied to leases, the old common-law doctrine of caveat emptor said that once the tenant has signed the lease, she must take the premises as she finds them. Since she could inspect them before signing the lease, she should not complain later. Moreover, if hidden defects come

to light, they ought to be easy enough for the tenant herself to fix. Today this rule no longer applies, at least to residential rentals. Unless the parties specifically agree otherwise, the landlord is in breach of his lease if the conditions are unsuitable for residential use when the tenant is due to move in. The landlord is held to an implied warranty of habitability.

The change in the rule is due in part to the conditions of the modern urban setting: tenants have little or no power to walk away from an available apartment in areas where housing is scarce. It is also due to modern construction and technology: few tenants are capable of fixing most types of defects. A US court of appeals has said the following:

*Today's urban tenants, the vast majority of whom live in multiple dwelling houses, are interested not in the land, but solely in "a house suitable for occupation." Furthermore, today's city dweller usually has a single, specialized skill unrelated to maintenance work; he is unable to make repairs like the "jack-of-all-trades" farmer who was the common law's model of the lessee. Further, unlike his agrarian predecessor who often remained on one piece of land for his entire life, urban tenants today are more mobile than ever before. A tenant's tenure in a specific apartment will often not be sufficient to justify efforts at repairs. In addition, the increasing complexity of today's dwellings renders them much more difficult to repair than the structures of earlier times. In a multiple dwelling, repairs may require access to equipment and areas in control of the landlord. Low and middle income tenants, even if they were interested in making repairs, would be unable to obtain financing for major repairs since they have no long-term interest in the property. Javins v. First National Realty Corp., 428 F.2d 1071, 1078-79 (D.C. Cir.), cert. denied, 400 U.S. 925 (1970).*

At common law, the landlord was not responsible if the premises became unsuitable once the tenant moved in. This rule was often harshly applied, even for unsuitable conditions caused by a sudden act of God, such as a tornado. Even if the premises collapsed, the tenant would be liable to pay the rent for the duration of the lease. Today, however, many states have statutorily abolished the tenant's obligation to pay the rent if a non-man-made force renders the premises unsuitable. Moreover, most states today impose on the landlord, after the tenant

has moved in, the responsibility for maintaining the premises in a safe, livable condition, consistent with the safety, health, and housing codes of the jurisdiction.

These rules apply only in the absence of an express agreement between the parties. The landlord and tenant may allocate in the lease the responsibility for repairs and maintenance. But it is unlikely that any court would enforce a lease provision waiving the landlord's implied warranty of habitability for residential apartments, especially in areas where housing is relatively scarce.

### **Noninterference with Use**

In addition to maintaining the premises in a physically suitable manner, the landlord has an obligation to the tenant not to interfere with a permissible use of the premises. Suppose Simone moves into a building with several apartments. One of the other tenants consistently plays music late in the evening, causing Simone to lose sleep. She complains to the landlord, who has a provision in the lease permitting him to terminate the lease of any tenant who persists in disturbing other tenants. If the landlord does nothing after Simone has notified him of the disturbance, he will be in breach. This right to be free of interference with permissible uses is sometimes said to arise from the landlord's implied covenant of quiet enjoyment.

### **Tenant's Remedies**

When the landlord breaches one of the foregoing duties, the tenant has a choice of three basic remedies: termination, damages, or rent adjustment.

In virtually all cases where the landlord breaches, the tenant may terminate the lease, thus ending her obligation to continue to pay rent. To terminate, the tenant must (1) actually vacate the premises during the time that she is entitled to terminate and (2) either comply with lease provisions governing the method of terminating or else take reasonable steps to ensure that the landlord knows she has terminated and why.

When the landlord physically deprives the tenant of possession, he has evicted the tenant; wrongful eviction permits the tenant to terminate the lease. Even if the landlord's conduct falls short of actual eviction, it may interfere substantially enough with the tenant's permissible use so that they are tantamount to eviction. This is known as constructive eviction, and it covers a wide variety of actions by both the landlord and those whose conduct is attributable to him, as illustrated by *Fidelity Mutual Life Insurance Co. v Kaminsky*, 768 S.W. 2d 818 (1989)

### **Damages**

Another traditional remedy is money damages, available whenever termination is an appropriate remedy. Damages may be sought after termination or as an alternative to termination. Suppose that after the landlord had refused Simone's request to repair the electrical system, Simone hired a contractor to do the job. The cost of the repair work would be recoverable from the landlord. Other recoverable costs can include the expense of relocating if the lease is terminated, moving costs, expenses connected with finding new premises, and any increase in rent over the period of the terminated lease for comparable new space. A business may recover the loss of anticipated business profits, but only if the extent of the loss is established with reasonable certainty. In the case of newest businesses, it would be almost impossible to prove loss of profits.

In all cases, the tenant's recovery will be limited to damages that would have been incurred by a tenant who took all reasonable steps to mitigate losses. That is, the tenant must take reasonable steps to prevent losses attributable to the landlord's breach, to find new space if terminating, to move efficiently, and so on.

### **Rent Remedies**

Under an old common-law rule, the landlord's obligation to provide the tenant with habitable space and the tenant's obligation to pay rent were independent covenants. If the landlord breached, the tenant was still legally bound to pay the rent; her only remedies were termination and suit for damages. But these are often difficult remedies for the tenant.

Termination means the aggravation of moving, assuming that new quarters can be found, and a suit for damages is time consuming, uncertain, and expensive. The obvious solution is to permit the tenant to withhold rent, or what we here call rent adjustment. The modern rule, adopted in several states (but not yet in most), holds that the mutual obligations of landlord and tenant are dependent. States following this approach have developed three types of remedies: rent withholding, rent application, and rent abatement.

The simplest approach is for the tenant to withhold the rent until the landlord remedies the defect. In some states, the tenant may keep the money. In other states, the rent must be paid each month into an escrow account or to the court, and the money in the escrow account becomes payable to the landlord when the default is cured.

Several state statutes permit the tenant to apply the rent money directly to remedy the defect or otherwise satisfy the landlord's performance. Thus Simone might have deducted from her rent the reasonable cost of hiring an electrician to repair the electrical system.

In some states, the rent may be reduced or even eliminated if the landlord fails to cure specific types of defects, such as violations of the housing code. The abatement will continue until the default is eliminated or the lease is terminated.

## **2.2 Rights and Duties of Tenants**

In addition to the duties of the tenant set forth in the lease itself, the common law imposes three other obligations: (1) to pay the rent reserved (stated) in the lease, (2) to refrain from committing waste (damage), and (3) not to use the premises for an illegal purpose.

### **Duty to Pay Rent**

What constitutes rent is not necessarily limited to the stated periodic payment usually denominated "rent." The tenant may also be responsible for such assessments as taxes and utilities, payable to the landlord as rent. Simone's lease calls for her to pay taxes of \$500 per year, payable in quarterly installments. She pays the rent on the first of each month and the

first tax bill on January 1. On April 1, she pays the rent but defaults on the next tax bill. She has failed to pay the rent reserved in the lease.

The landlord in the majority of states is not obligated to mitigate his losses should the tenant abandon the property and fail thereafter to pay the rent. As a practical matter, this means that the landlord need not try to rent out the property but instead can let it sit vacant and sue the defaulting tenant for the balance of the rent as it becomes due. However, the tenant might notify the landlord that she has abandoned the property or is about to abandon it and offer to surrender it. If the landlord accepts the surrender, the lease then terminates. Unless the lease specifically provides for it, a landlord who accepts the surrender will not be able to recover from the tenant the difference between the amount of her rent obligation and the new tenant's rent obligation.

Many leases require the tenant to make a security deposit—a payment of a specific sum of money to secure the tenant's performance of duties under the lease. If the tenant fails to pay the rent or otherwise defaults, the landlord may use the money to make good the tenant's performance. Whatever portion of the money is not used to satisfy the tenant's obligations must be repaid to the tenant at the end of the lease. In the absence of an agreement to the contrary, the landlord must pay interest on the security deposit when he returns the sum to the tenant at the end of the lease.

### **Alteration and Restoration of the Premises**

In the absence of a specific agreement in the lease, the tenant is entitled to physically change the premises in order to make the best possible permissible use of the property, but she may not make structural alterations or damage (waste) the property. A residential tenant may add telephone lines, put up pictures, and affix bookshelves to the walls, but she may not remove a wall in order to enlarge a room.

The tenant must restore the property to its original condition when the lease ends, but this requirement does not include normal wear and tear. Simone rents an apartment with newly

polished wooden floors. Because she likes the look of oak, she decides against covering the floors with rugs. In a few months' time, the floors lose their polish and become scuffed. Simone is not obligated to refinish the floors, because the scuffing came from normal walking, which is ordinary wear and tear.

### **Use of the Property for an Illegal Purpose**

It is a breach of the tenant's obligation to use the property for an illegal purpose. A landlord who found a tenant running a numbers racket, for example, or making and selling moonshine whisky could rightfully evict her.

### **Landlord's Remedies**

In general, when the tenant breaches any of the three duties imposed by the common law, the landlord may terminate the lease and seek damages. One common situation deserves special mention: the holdover tenant. When a tenant improperly overstays her lease, she is said to be a tenant at sufferance, meaning that she is liable to eviction. Some cultures, like the Japanese, exhibit a considerable bias toward the tenant, making it exceedingly difficult to move out holdover tenants who decide to stay. But in the United States, landlords may remove tenants through summary (speedy) proceedings available in every state or, in some cases, through self-help. Self-help is a statutory remedy for landlords or incoming tenants in some states and involves the peaceful removal of a holdover tenant's belongings. If a state has a statute providing a summary procedure for removing a holdover tenant, neither the landlord nor the incoming tenant may resort to self-help, unless the statute specifically allows it. A provision in the lease permitting self-help in the absence of statutory authority is unenforceable. Self-help must be peaceful, must not cause physical harm or even the expectation of harm to the tenant or anyone on the premises with his permission, and must not result in unreasonable damage to the tenant's property. Any clause in the lease attempting to waive these conditions is void.

Self-help can be risky, because some summary proceeding statutes declare it to be a criminal act and because it can subject the landlord to tort liability. Suppose that Simone improperly

holds over in her apartment. With a new tenant scheduled to arrive in two days, the landlord knocks on her door the evening after her lease expires. When Simone opens the door, she sees the landlord standing between two 450-pound Sumo wrestlers with menacing expressions. He demands that she leave immediately. Fearing for her safety, she departs instantly. Since she had a reasonable expectation of harm had she not complied with the landlord's demand, Simone would be entitled to recover damages in a tort suit against her landlord, although she would not be entitled to regain possession of the apartment.

Besides summary judicial proceedings and self-help, the landlord has another possible remedy against the holdover tenant: to impose another rental term. In order to extend the lease in this manner, the landlord need simply notify the holdover tenant that she is being held to another term, usually measured by the periodic nature of the rent payment. For example, if rent was paid each month, then imposition of a new term results in a month-to-month tenancy. One year is the maximum tenancy that the landlord can create by electing to hold the tenant to another term.

## **28.4 Landlord's Tort Liability**

As a general rule, when injury occurs on premises rented to a tenant, it is the tenant—an occupier—who is liable. The reason for this rule seems clear: The landlord has given up all but a reversionary interest in the property; he has no further control over the premises. Indeed, he is not even permitted on the property without the tenant's permission. But over the years, certain exceptions have developed to the rule that the landlord is not liable.

### **4.1 Exceptions to the General Rule**

#### **Hidden Dangers Known to Landlord**

The landlord is liable to the tenant, her family, or guests who are injured by hidden and dangerous conditions that the landlord knew about or should have known about but failed to disclose to the tenant.

### **Dangers to People off the Premises**

The landlord is liable to people injured outside the property by defects that existed when the lease was signed. Simone rents a dilapidated house and agrees with the landlord to keep the building repaired. She neglects to hire contractors to repair the cracked and sagging wall on the street. The building soon collapses, crushing several automobiles parked alongside. Simone can be held responsible and so can the landlord; the tenant's contractual agreement to maintain the property is not sufficient to shift the liability away from the landlord. In a few cases, the landlord has even been held liable for activities carried on by the tenant, but only because he knew about them when the lease was signed and should have known that the injuries were probable results.

### **Faulty Repair of Premises**

Landlords often have a duty to repair the premises. The duty may be statutory or may rest on an agreement in the lease. In either case, the landlord will be liable to a tenant or others for injury resulting from defects that should have been repaired. No less important, a landlord will be liable even if he has no duty to repair but negligently makes repairs that themselves turn out to be dangerous.

## Chapter 29 Corporation: General Characteristics and Formation (Hardbound chapter 43)

### Learning Objectives

After reading this chapter, you should understand the following:

1. The historical background of the corporation
2. How partnerships compare with corporations
3. What the corporation is as a legal entity, and how corporate owners can lose limited liability by certain actions
4. How corporations are classified

The corporation is the dominant form of the business enterprise in the modern world. As a legal entity, it is bound by much of the law discussed in the preceding chapters. However, as a significant institutional actor in the business world, the corporation has a host of relationships that have called forth a separate body of law.

Forming a corporation like forming a partnership is part of a bigger decision process. How do you start a business? What will the business do, what will it produce, what services will it provide, what will its market be? Before forming a business you must:

1. Brainstorm ideas MISSION STATEMENT
2. Build a business plan (Executive summary)
3. Assess your finances
4. Determine legal business structure- State Statues (Articles of Incorporation by-laws)
5. Register with the government and IRS
6. Select your technology
7. Purchase an insurance policy
8. Choose your partners, members
9. Build your professional team attorney, Insurance agent and, CPA.

10. Brand yourself and advertise (trade mark, service mark, trade name, copyright etc)
11. Develop a strategy to grow your business- Marketing

## 29.1 Historical Background

### Learning Objectives

1. Comprehend the historical significance of corporate formation.
2. Learn about key court decisions and their effect on interstate commerce and corporate formation.
3. Become acquainted with how states formed their corporate laws.

#### 1.1 A Fixture of Every Major Legal System

Like partnership, the corporation is an ancient concept, recognized in the Code of Hammurabi, and to some degree a fixture in every other major legal system since then. The first corporations were not business enterprises; instead, they were associations for religious and governmental ends in which perpetual existence was a practical requirement. Thus until relatively late in legal history, kings, popes, and jurists assumed that corporations could be created only by political or ecclesiastical authority and that corporations were creatures of the state or church. By the seventeenth century, with feudalism on the wane and business enterprise becoming a growing force, kings extracted higher taxes and intervened more directly in the affairs of businesses by refusing to permit them to operate in corporate form except by royal grant. This came to be known as the concession theory, because incorporation was a concession from the sovereign.

#### 1.2 US Corporation Formation

The United States remained largely unaffected by the Bubble Act. Incorporation was granted only by special acts of state legislatures, even well into the nineteenth century, but many such acts were passed. Before the Revolution, perhaps fewer than a dozen business corporations

existed throughout the thirteen colonies. During the 1790s, two hundred businesses were incorporated, and their numbers swelled thereafter. The theory that incorporation should not be accomplished except through special legislation began to give way. As industrial development accelerated in the mid-1800s, it was possible in many states to incorporate by adhering to the requirements of a general statute. Indeed, by the late nineteenth century, all but three states constitutionally *forbade* their legislatures from chartering companies through special enactments.

The US Supreme Court contributed importantly to the development of corporate law. In *Gibbons v. Ogden*, 22 U.S. 1 (1824), a groundbreaking case, the Court held that the Commerce Clause of the US Constitution (Article I, Section 8, Clause 3) granted Congress the power to regulate interstate commerce. However, in *Paul v. Virginia*, 75 U.S. 168 (1868), the Court said that a state could prevent corporations not chartered there—that is, **out-of-state or** foreign corporations—from engaging in what it considered the local, and not interstate, business of issuing insurance policies. The inference made by many was that states could not bar foreign corporations engaged in *interstate* business from their borders.

During the 1920s, the National Conference of Commissioners on Uniform State Laws drafted a Uniform Business Corporation Act, the final version of which was released in 1928. It was not widely adopted, but it did provide the basis during the 1930s for revisions of some state laws, including those in California, Illinois, Michigan, Minnesota, and Pennsylvania. By that time, in the midst of the Great Depression, the federal government for the first time intruded into corporate law in a major way by creating federal agencies, most notably the Securities and Exchange Commission in 1934, with power to regulate the interstate issuance of corporate stock.

### 1.3 Corporate Law Today

Following World War II, most states revised their general corporation laws. A significant development for states was the preparation of the Model Business Corporation Act by the American Bar Association's Committee on Corporate Laws. About half of the states have

adopted all or major portions of the act. The 2005 version of this act, the Revised Model Business Corporation Act (RMBCA), will be referred to throughout our discussion of corporation law.

## 29.2 Partnerships versus Corporations

### Learning Objectives

1. Distinguish basic aspects of partnership formation from those of corporate formation.
2. Explain ownership and control in partnerships and in publicly held and closely held corporations.
3. Know how partnerships and corporations are taxed.

Let us assume that three people have already formed a partnership to run a bookstore business. Bob has contributed \$80,000. Carol has contributed a house in which the business can lawfully operate. Ted has contributed his services; he has been managing the bookstore, and the business is showing a slight profit. A friend has been telling them that they ought to incorporate. What are the major factors they should consider in reaching a decision?

### 2.1 Ease of Formation

Partnerships are easy to form. If the business is simple enough and the partners are few, the agreement need not even be written down. Creating a corporation is more complicated because formal documents must be placed on file with public authorities.

### 2.2 Ownership and Control

All general partners have equal rights in the management and conduct of the business. By contrast, ownership and control of corporations are, in theory, separated. In the publicly held corporation, which has many shareholders, the separation is real. Ownership is widely

dispersed because millions of shares are outstanding and it is rare that any single shareholder will own more than a tiny percentage of stock. It is difficult under the best of circumstances for shareholders to exert any form of control over corporate operations. However, in the closely held corporation, which has few shareholders, the officers or senior managers are usually also the shareholders, so the separation of ownership and control may be less pronounced or even nonexistent.

### 2.3 Transferability of Interests

Transferability of an interest in a partnership is a problem because a transferee cannot become a member unless all partners consent. The problem can be addressed and overcome in the partnership agreement. Transfer of interest in a corporation, through a sale of stock, is much easier; but for the stock of a small corporation, there might not be a market or there might be contractual restrictions on transfer.

## 29.3 The Corporate Veil: The Corporation as a Legal Entity

### Learning Objectives

1. Know what rights a corporate “person” and a natural person have in common.
2. Recognize when a corporate “veil” is pierced and shareholder liability is imposed.
3. Identify other instances when a shareholder will be held personally liable.

In comparing partnerships and corporations, there is one additional factor that ordinarily tips the balance in favor of incorporating: the corporation is a legal entity in its own right, one that can provide a “veil” that protects its shareholders from personal liability.

### 3.1 The Basic Rights of the Corporate “Person”

To say that a corporation is a “person” does not automatically describe what its rights are, for the courts have not accorded the corporation every right guaranteed a natural person. Yet the

Supreme Court recently affirmed in *Citizens United v. Federal Election Commission* (2010) that the government may not suppress the First Amendment right of political speech because the speaker is a corporation rather than a natural person. According to the Court, “No sufficient governmental interest justifies limits on the political speech of nonprofit or for-profit corporations.” *Citizens United v. Federal Election Commission*, 558 U.S. \_\_\_\_ (2010).

### 3.2 Absence of Rights

Corporations lack certain rights that natural persons possess. For example, corporations do not have the privilege against self-incrimination guaranteed for natural persons by the Fifth and Fourteenth Amendments. In any legal proceeding, the courts may force a corporation to turn over incriminating documents, even if they also incriminate officers or employees of the corporation. Corporations are not citizens under the Privileges and Immunities Clause of the Constitution, so that the states can discriminate between domestic and foreign corporations. The corporation is not entitled to federal review of state criminal convictions, as are many individuals.

Until relatively recently, few cases had tested the power of the state to limit the right of corporations to spend their own funds to speak the “corporate mind.” Most cases involving corporate free speech address advertising, and few states have enacted laws that directly impinge on the freedom of companies to advertise. Those states that have done so have usually sought to limit the ability of corporations to sway voters in public referenda. In 1978, the Supreme Court finally confronted the issue head on in *First National Bank of Boston v. Bellotti*.). The ruling in *Bellotti* was reaffirmed by the Supreme Court in *Citizens United v. Federal Election Commission*. In *Citizens United*, the Court struck down the part of the McCain-Feingold Act, The Bipartisan Campaign Reform Act of 2002 (BCRA, McCain–Feingold Act, Pub.L. 107-155, 116 Stat. 81, enacted March 27, 2002, H.R. 2356). Prohibited all corporations, both for-profit and not-for-profit, and unions from broadcasting “electioneering communications.”

### 3.3 Piercing the Corporate Veil

Given the importance of the corporate entity as a veil that limits shareholder liability, it is important to note that in certain circumstances, the courts may reach beyond the wall of protection that divides a corporation from the people or entities that exist behind it. This is known as piercing the corporate veil, and it will occur in two instances: (1) when the corporation is used to commit a fraud or an injustice and (2) when the corporation does not act as if it were one. See *United States v. Bestfoods*, 113 F.3d 572 (1998).

#### **Failure to Act as a Corporation**

In other limited circumstances, individual stockholders may also be found personally liable. Failure to follow corporate formalities, for example, may subject stockholders to personal liability. This is a special risk that small, especially one-person, corporations run. Particular factors that bring this rule into play include inadequate capitalization, omission of regular meetings, failure to record minutes of meetings, failure to file annual reports, and commingling of corporate and personal assets. Where these factors exist, the courts may look through the corporate veil and pluck out the individual stockholder or stockholders to answer for a tort, contract breach, or the like. The classic case is the taxicab operator who incorporates several of his cabs separately and services them through still another corporation. If one of the cabs causes an accident, the corporation is usually “judgment proof” because the corporation will have few assets (practically worthless cab, minimum insurance). The courts frequently permit plaintiffs to proceed against the common owner on the grounds that the particular corporation was inadequately financed.

#### **Other Types of Personal Liability**

Even when a corporation is formed for a proper purpose and is operated as a corporation, there are instances in which individual shareholders will be personally liable. For example, if a shareholder involved in company management commits a tort or enters into a contract in a personal capacity, he will remain personally liable for the consequences of his actions. In some states, statutes give employees special rights against shareholders. For example, a New York statute permits employees to recover wages, salaries, and debts owed them by the company from the ten largest shareholders of the corporation. (Shareholders of public companies whose stock is traded on a national exchange or over the counter are exempt.) Likewise, federal law permits the IRS to recover from the “responsible persons” any withholding taxes collected by a corporation but not actually paid over to the US Treasury.

### **3.4 Business Corporations**

#### **The Two Types**

It is the business corporation proper that we focus on in this unit. There are two broad types of business corporations: publicly held (or public) and closely held (or close or private) corporations. Again, both types are private in the sense that they are not governmental.

The publicly held corporation is one in which stock is widely held or available for wide public distribution through such means as trading on a national or regional stock exchange. Its managers, if they are also owners of stock, usually constitute a small percentage of the total number of shareholders and hold a small amount of stock relative to the total shares outstanding. Few, if any, shareholders of public corporations know their fellow shareholders.

By contrast, the shareholders of the closely held corporation are fewer in number. Shares in a closely held corporation could be held by one person, and usually by no more than thirty. Shareholders of the closely held corporation often share family ties or have some other association that permits each to know the others.

Though most closely held corporations are small, no economic or legal reason prevents them from being large. Some are huge, having annual sales of several billion dollars each. Roughly 90 percent of US corporations are closely held.

The giant publicly held companies with more than \$1 billion in assets and sales, with initials such as IBM and GE, constitute an exclusive group. Publicly held corporations outside this elite class fall into two broad (nonlegal) categories: those that are quoted on stock exchanges and those whose stock *is* too widely dispersed to be called closely held but is not traded on exchanges.

## **29.5 Corporate Organization**

### **5.1 The Corporate Charter**

#### **Function of the Charter**

The ultimate goal of the incorporation process is issuance of a corporate charter. The term used for the document varies from state to state. Most states call the basic document filed in the appropriate public office the “articles of incorporation” or “certificate of incorporation,” but there are other variations. There is no legal significance to these differences in terminology.

Chartering is basically a state prerogative. Congress has chartered several enterprises, including national banks (under the National Banking Act), federal savings and loan associations, national farm loan associations, and the like, but virtually all business corporations are chartered at the state level.

Originally a legislative function, chartering is now an administrative function in every state. The secretary of state issues the final indorsement to the articles of incorporation, thus giving them legal effect.

## 5.2 Selection of a State

### Where to Charter

Choosing the particular venue in which to incorporate is the first critical decision to be made after deciding to incorporate. Some corporations, though headquartered in the United States, choose to incorporate offshore to take advantage of lenient taxation laws. Advantages of an offshore corporation include not only lenient tax laws but also a great deal of privacy as well as certain legal protections. For example, the names of the officers and directors can be excluded from documents filed. In the United States, over half of the *Fortune* 500 companies hold Delaware charters for reasons related to Delaware's having a lower tax structure, a favorable business climate, and a legal system—both its statutes and its courts—seen as being up to date, flexible, and often probusiness. Delaware's success has led other states to compete, and the political realities have caused the Revised Model Business Corporation Act (RMBCA), which was intentionally drafted to balance the interests of all significant groups (management, shareholders, and the public), to be revised from time to time so that it is more permissive from the perspective of management

## 5.3 The Promoter

### Functions

Once the state of incorporation has been selected, it is time for promoters, the midwives of the enterprise, to go to work. Promoters are the individuals who take the steps necessary to form the corporation, and they often will receive stock in exchange for their efforts. They have four principal functions: (1) to seek out or discover business opportunities, (2) to raise capital by persuading investors to sign stock subscriptions, (3) to enter into contracts on behalf of the corporation to be formed, (4) and to prepare the articles of incorporation.

Promoters have acquired an unsavory reputation as fast talkers who cajole investors out of their money. Though some promoters fit this image, it is vastly overstated. Promotion is difficult work often carried out by the same individuals who will manage the business.

## **Contract Liability**

Promoters face two major legal problems. First, they face possible liability on contracts made on behalf of the business before it is incorporated. For example, suppose Bob is acting as promoter of the proposed BCT Bookstore, Inc. On September 15, he enters into a contract with Computogram Products to purchase computer equipment for the corporation to be formed. If the incorporation never takes place, or if the corporation is formed but the corporation refuses to accept the contract, Bob remains liable.

Now assume that the corporation is formed on October 15, and on October 18 it formally accepts all the contracts that Bob signed prior to October 15. Does Bob remain liable? In most states, he does. The ratification theory of agency law will not help in many states that adhere strictly to agency rules, because there was no principal (the corporation) in existence when the contract was made and hence the promoter must remain liable. To avoid this result, Bob should seek an express novation, although in some states, a novation will be implied. The intention of the parties should be stated as precisely as possible in the contract, as the promoters learned in *RKO-Stanley Warner Theatres, Inc. v. Graziano*, 355 A.2d 830 (1976).

The promoters' other major legal concern is the duty owed to the corporation. The law is clear that promoters owe a fiduciary duty. For example, a promoter who transfers real estate worth \$250,000 to the corporation in exchange for \$750,000 worth of stock would be liable for \$500,000 for breach of fiduciary duty.

### **5.5 Execution and Filing of the Articles of Incorporation**

Once the business details are settled, the promoters, now known as incorporators, must sign and deliver the articles of incorporation to the secretary of state. The articles of incorporation typically include the following: the corporate name; the address of the corporation's initial registered office; the period of the corporation's duration (usually perpetual); the company's purposes; the total number of shares, the classes into which they are divided, and the par value of each; the limitations and rights of each class of shareholders; the authority of the directors to

establish preferred or special classes of stock; provisions for preemptive rights; provisions for the regulation of the internal affairs of the corporation, including any provision restricting the transfer of shares; the number of directors constituting the initial board of directors and the names and addresses of initial members; and the name and address of each incorporator. Although compliance with these requirements is largely a matter of filling in the blanks, two points deserve mention.

First, the choice of a name is often critical to the business. Under RMBCA, Section 4.01, the name must include one of the following words (or abbreviations): corporation, company, incorporated, or limited (Corp., Co., Inc., or Ltd.). The name is not allowed to deceive the public about the corporation's purposes, nor may it be the same as that of any other company incorporated or authorized to do business in the state.

## **29.6 Effect of Organization**

### **6.1 De Jure and De Facto Corporations**

If promoters meet the requirements of corporate formation, a de jure corporation, considered a legal entity, is formed. Because the various steps are complex, the formal prerequisites are not always met. Suppose that a company, thinking its incorporation has taken place when in fact it hasn't met all requirements, starts up its business. What then? Is everything it does null and void? If three conditions exist, a court might decide that a de facto corporation has been formed; that is, the business will be recognized as a corporation. The state then has the power to force the de facto corporation to correct the defect(s) so that a de jure corporation will be created.

### **6.2 Corporation by Estoppel**

Even if the incorporators omit important steps, it is still possible for a court, under estoppel principles, to treat the business as a corporation. Assume that Bob, Carol, and Ted have sought to incorporate the BCT Bookstore, Inc., but have failed to file the articles of incorporation. At the initial directors' meeting, Carol turns over to the corporation a deed to her property. A

month later, Bob discovers the omission and hurriedly submits the articles of incorporation to the appropriate public office. Carol decides she wants her land back. It is clear that the corporation was not de jure at the time she surrendered her deed, and it was probably not de facto either. Can she recover the land? Under equitable principles, the answer is no. She is estopped from denying the existence of the corporation, because it would be inequitable to permit one who has conducted herself as though there were a corporation to deny its existence in order to defeat a contract into which she willingly entered. As *Cranson v. International Business Machines Corp.*, 200 A. 2d 33(1964); indicates, the doctrine of corporation by estoppel can also be used by the corporation against one of its creditors.

## **29.7 Legal Aspects of Corporate Finance (Hardbound chapter 44)**

A corporation requires money for many reasons. In this chapter, we look at the methods available to a corporation for raising funds, focusing on how firms generate large amounts of funds and finance large projects, such as building a new factory.

One major method of finance is the sale of stock. A corporation sells shares of stock, often in an initial public offering. In exchange for consideration—usually cash—the purchaser acquires stock in the corporation. This stock may give the owner a share in earnings, the right to transfer the stock, and, depending on the size of the corporation and the number of shares, power to exercise control. Other methods of corporate finance include bank financing and bonds. We also discuss some more modern financing methods, such as private equity and venture capital. Additional methods of corporate finance, such as commercial paper.

## **29.8 General Sources of Corporate Funds**

### **Sources**

To finance growth, any ongoing business must have a source of funds. Apart from bank and trade debt, the principal sources are plowback, debt securities, equity securities, and private equity.

## **Plowback**

A significant source of new funds that corporations spend on capital projects is earnings. Rather than paying out earnings to shareholders, the corporation plows those earnings back into the business. Plowback is simply reinvesting earnings in the corporation. It is an attractive source of capital because it is subject to managerial control. No approval by governmental agencies is necessary for its expenditure, as it is when a company seeks to sell securities, or stocks and bonds. Furthermore, stocks and bonds have costs associated with them, such as the interest payments on bonds, while retaining profits avoids these costs.

## **Debt Securities**

A second source of funds is borrowing through debt securities. A corporation may take out a debt security such as a loan, commonly evidenced by a note and providing security to the lender. This is covered in [Chapter 22 "Secured Transactions and Suretyship"](#) and [Chapter 25 "Mortgages and Nonconsensual Liens"](#). A common type of corporate debt security is a bond, which is a promise to repay the face value of the bond at maturity and make periodic interest payments called the coupon rate. For example, a bond may have a face value of \$1,000 (the amount to be repaid at maturity) and a coupon rate of 7 percent paid annually; the corporation pays \$70 interest on such a bond each year. Bondholders have priority over stockholders because a bond is a debt, and in the event of bankruptcy, creditors have priority over equity holders.

## **Equity Securities**

The third source of new capital funds is equity securities—namely, stock. Equity is an ownership interest in property or a business. Stock is the smallest source of new capital but is of critical importance to the corporation in launching the business and its initial operations. Stock gives the investor a bundle of legal rights—ownership, a share in earnings, transferability and, to some extent, the power to exercise control through voting. The usual way to acquire stock is by paying cash or its equivalent as consideration.

## Other Forms of Finance

While stock, debt securities, and reinvested profits are the most common types of finance for major corporations (particularly publicly traded corporations), smaller corporations or start-ups cannot or do not want to avail themselves of these financing options. Instead, they seek to raise funds through private equity, which involves private investors providing funds to a company in exchange for an interest in the company. A private equity firm is a group of investors who pool their money together for investment purposes, usually to invest in other companies. Looking to private equity firms is an option for start-ups—companies newly formed or in the process of being formed—that cannot raise funds through the bond market or that wish to avoid debt or a public stock sale. Start-ups need money to begin operations, expand, or conduct further research and development. A private equity firm might provide venture capital financing for these start-ups. Generally, private equity firms that provide a lot of venture capital must be extremely savvy about the start-up plans of new businesses and must ask the start-up entrepreneurs numerous challenging and pertinent questions. Such private equity firms expect a higher rate of return on their investment than would be available from established companies. Today, venture capital is often used to finance entrepreneurial start-ups in biotechnology and clean technology.

Sometimes, a private equity firm will buy all the publicly traded shares of a company—a process commonly termed “going private.” Private equity may also be involved in providing financing to established firms.

Another source of private equity is angel investors, affluent individuals who operate like venture capitalists, providing capital for a business to get started in exchange for repayment with interest or an ownership interest. The main difference between an angel investor and a venture capitalist is the source of funds: an angel investor invests his or her own money, while venture capitalists use pooled funds.

Private equity firms may also use a leveraged buyout (LBO) to finance the acquisition of another firm. With regard to Corporate Expansion, in the realm of private equity, an LBO is a financing option using debt to acquire another firm. In an LBO, private equity investors use the assets of the target corporation as collateral for a loan to purchase that target corporation. Such investors may pursue an LBO as a debt acquisition option since they do not need to use much—or even any—of their own money in order to finance the acquisition.

A major drawback to private equity, whether through a firm or through venture capital, is the risk versus return trade-off. Private equity investors may demand a significant interest in the firm, or a high return, to compensate them for the riskiness of their investment. They may demand a say in how the firm is operated or a seat on the board of directors.

### **Basics of Corporate Bonds**

Corporations often raise money through debt. This can be done through loans or bank financing but is often accomplished through the sale of bonds. Large corporations, in particular, use the bond market. Private equity is not ideal for established firms because of the high cost to them, both monetarily and in terms of the potential loss of control.

For financing, many corporations sell corporate bonds to investors. A bond is like an IOU. When a corporation sells a bond, it owes the bond purchaser periodic interest payments as well as a lump sum at the end of the life of the bond (the maturity date). A typical bond is issued with a face value, also called the par value, of \$1,000 or some multiple of \$1,000. The face value is the amount that the corporation must pay the purchaser at the end of the life of the bond. Interest payments, also called coupon payments, are usually made on a biannual basis but could be of nearly any duration. There are even zero coupon bonds, which pay only the face value at maturity.

Stocks, or shares, represent an ownership interest in a corporation. Traditionally, stock was the original capital paid into a business by its founders. This stock was then divided into shares, or fractional ownership of the stock. In modern usage, the two terms are used interchangeably, as

we will do here. Shares in closely held corporations are often identical: each share of stock in BCT Bookstore, Inc. carries with it the same right to vote, to receive dividends, and to receive a distribution of the net assets of the company upon liquidation. Many large corporations do not present so simple a picture. Large corporations may have many different types of stock: different classes of common stock, preferred stock, stock with par value and no-par stock, voting and nonvoting stock, outstanding stock, and treasury stock. To find out which types of stock a company has issued, look at the shareholders' (or stockholders') equity section of the company's balance sheet.

### **Preferred Stock**

The term *preferred* has no set legal meaning, but shareholders of preferred stock often have different rights than shareholders of common stock. Holders of preferred stock must look to the articles of incorporation to find out what their rights are. Preferred stock has elements of both stock (equity) and bonds (debt). Thus corporations issue preferred stock to attract more conservative investors: common stock is riskier than preferred stock, so corporations can attract more investors if they have both preferred and common stock.

### **Voting Rights**

Ordinarily, the articles of incorporation provide that holders of preferred shares do not have a voting right. Or they may provide for contingent voting rights, entitling preferred shareholders to vote on the happening of a particular event—for example, the nonpayment of a certain number of dividends. The articles may allow class voting for directors, to ensure that the class of preferred stockholders has some representation on the board.

### **Common Stock**

Common stock is different from preferred stock. Common stock represents an ownership interest in a corporation. Unless otherwise provided in the articles of incorporation, common stockholders have the following rights:

1. Voting rights. This is a key difference: preferred shareholders usually do not have the right to vote. Common shareholders express their ownership interest in the corporation by voting. Votes are cast at meetings, typically the annual meetings, and the shareholders can vote for directors and on other important corporate decisions (e.g., there has been a recent push to allow shareholders to vote on executive compensation).
2. The right to ratable participation in earnings (i.e., in proportion to the total shares) and/or the right to ratable participation in the distribution of net assets on liquidation. Bondholders and other creditors have seniority upon liquidation, but if they have been satisfied, or the corporation has no debt, the common shareholders may ratably recover from what is left over in liquidation.
3. Some shares may give holders preemptive rights to purchase additional shares. This right is often invoked in two instances. First, if a corporation is going to issue more shares, a shareholder may invoke this right so that his or her total percentage ownership is not diluted. Second, the right to purchase additional shares can be invoked to prevent a hostile takeover.

### **Treasury Shares**

Treasury shares are those that were originally issued and then reacquired by the company (such as in a buyback, discussed next) or, alternatively, never sold to the public in the first place and simply retained by the corporation. Thus treasury shares are shares held or owned by the corporation. They are considered to be issued shares but not outstanding shares.

## **29.8 Corporate Powers and Management (Hardbound chapter 45)**

Power within a corporation is present in many areas. The corporation itself has powers, although with limitations. There is a division of power between shareholders, directors, and officers. Given this division of power, certain duties are owed amongst the parties. We focus this chapter upon these powers and upon the duties owed by shareholders, directors, and officers.

## 29.9 Powers of a Corporation

### Two Types of Corporate Powers

#### Express Powers

The corporation may exercise all powers expressly given it by statute and by its articles of incorporation. Under the Revised Model Business Corporation Act (RMBCA) sets out a number of express powers, including the following: to sue and be sued in the corporate name; to purchase, use, and sell land and dispose of assets to the same extent a natural person can; to make contracts, borrow money, issue notes and bonds, lend money, invest funds, make donations to the public welfare, and establish pension plans; and to join in partnerships, joint ventures, trusts, or other enterprises. The powers set out in this section need not be included in the articles of incorporation.

#### Implied Powers

Corporate powers beyond those explicitly established are implied powers. For example, suppose BCT Bookstore, Inc.'s statement of purpose reads simply, "to operate a bookstore." The company may lawfully conduct all acts that are necessary or appropriate to running a bookstore—hiring employees, advertising special sales, leasing trucks, and so forth. Could Ted, its vice president and general manager, authorize the expenditure of funds to pay for a Sunday afternoon lecture on the perils of nuclear war or the adventures of a professional football player? Yes—if the lectures are relevant to current books on sale or serve to bring people into the store, they comply with the corporation's purpose.

#### The Ultra Vires Doctrine

The law places limitations upon what acts a corporation may undertake. Corporations cannot do anything they wish, but rather, must act within the prescribed rules as laid out in statute, case law, their articles of incorporation, and their bylaws. Sometimes, though, a corporation will step outside its permitted power (literally “beyond the powers). The ultra vires doctrine holds that certain legal consequences attach to an attempt by a corporation to carry out acts that are outside its lawful powers. Ultra vires (literally “beyond the powers”) is not limited to illegal acts, although it encompasses actions barred by statute as well as by the corporate charter. Under the traditional approach, either the corporation or the other party could assert ultra vires as a defense when refusing to abide by a wholly executory contract. The ultra vires doctrine loses much of its significance when corporate powers are broadly stated in a corporation’s articles. Furthermore, RMBCA Section 3.04 states that “the validity of corporate action may not be challenged on the ground that the corporation lacks or lacked power to act.”

Nonetheless, ultra vires acts are still challenged in courts today. For example, particularly in the area of environmental law, plaintiffs are challenging corporate environmental actions as ultra vires. Delaware corporation law states that the attorney general shall revoke the charter of a corporation for illegal acts. Additionally, the Court of Chancery of Delaware has jurisdiction to forfeit or revoke a corporate charter for abuse of corporate powers. Del. Code Ann., Title 8, Section 284 (2011). See Adam Sulkowski’s “Ultra Vires Statutes: Alive, Kicking, and a Means of Circumventing the Scalia Standing Gauntlet.” Adam Sulkowski, “Ultra Vires Statutes: Alive, Kicking, and a Means of Circumventing the Scalia Standing Gauntlet,” *Journal of Environmental Law and Litigation* 14, no. 1 (2009): 75.

### **General Management Functions**

In the modern publicly held corporation, ownership and control are separated. The shareholders “own” the company through their ownership of its stock, but power to manage is vested in the directors. In a large publicly traded corporation, most of the ownership of the corporation is diluted across its numerous shareholders, many of whom have no involvement with the corporation other than through their stock ownership. On the other hand, the issue of

separation and control is generally irrelevant to the closely held corporation, since in many instances the shareholders are the same people who manage and work for the corporation.

Shareholders do retain some degree of control. For example, they elect the directors, although only a small fraction of shareholders control the outcome of most elections because of the diffusion of ownership and modern proxy rules; proxy fights are extremely difficult for insurgents to win. Shareholders also may adopt, amend, and repeal the corporation's bylaws; they may adopt resolutions ratifying or refusing to ratify certain actions of the directors. They must vote on certain extraordinary matters, such as whether to amend the articles of incorporation, merge, or liquidate.

### **General Management Responsibility of the Directors**

Directors derive their power to manage the corporation from statutory law. Section 8.01 of the Revised Model Business Corporation Act (RMBCA) states that "all corporate powers shall be exercised by or under the authority of, and the business and affairs of the corporation managed under the direction of, its board of directors." A director is a fiduciary, a person to whom power is entrusted for another's benefit, and as such, as the RMBCA puts it, must perform his duties "in good faith, with the care an ordinarily prudent person in a like position would exercise under similar circumstances" (Section 8.30). A director's main responsibilities include the following: (1) to protect shareholder investments, (2) to select and remove officers, (3) to delegate operating authority to the managers or other groups, and (4) to supervise the company as a whole.

### **Liability of Directors and Officers**

Not so long ago, boards of directors of large companies were quiescent bodies, virtual rubber stamps for their friends among management who put them there. By the late 1970s, with the general increase in the climate of litigiousness, one out of every nine companies on the *Fortune* 500 list saw its directors or officers hit with claims for violation of their legal responsibilities. "D & O Claims Incidence Rises," *Business Insurance*, November 12, 1979, 18. In a seminal case, the

Delaware Supreme Court found that the directors of TransUnion were grossly negligent in accepting a buyout price of \$55 per share without sufficient inquiry or advice on the adequacy of the price, a breach of their duty of care owed to the shareholders. The directors were held liable for \$23.5 million for this breach. *Smith v. Van Gorkom*, 488 A.2d 858 (Del. 1985). Thus serving as a director or an officer was never free of business risks. Today, the task is fraught with legal risk as well.

### **Duty of Loyalty**

As a fiduciary of the corporation, the director owes his primary loyalty to the corporation and its stockholders, as do the officers and majority shareholders. This responsibility is called the duty of loyalty. When there is a conflict between a director's personal interest and the interest of the corporation, he is legally bound to put the corporation's interest above his own.

When a director serves on more than one board, the problem of corporate opportunity becomes even more complex, because he may be caught in a situation of conflicting loyalties. Moreover, multiple board memberships pose another serious problem. A direct interlock occurs when one person sits on the boards of two different companies; an indirect interlock happens when directors of two different companies serve jointly on the board of a third company. The Clayton Act prohibits interlocking directorates between direct competitors. Despite this prohibition, as well as public displeasure, corporate board member overlap is commonplace. According to an analysis by *USA Today* and The Corporate Library, eleven of the fifteen largest companies have at least two board members who also sit together on the board of another corporation. Furthermore, CEOs of one corporation often sit on the boards of other corporations. Bank board members may sit on the boards of other corporations, including the bank's own clients. This web of connections has both pros and cons.

For a further discussion of board member connectedness, see Matt Krant, "Web of Board Members Ties Together Corporation America," at

[http://www.usatoday.com/money/companies/management/2002-11-24-interlock\\_x.htm](http://www.usatoday.com/money/companies/management/2002-11-24-interlock_x.htm).

## Duty of Care

The second major aspect of the director's responsibility is that of duty of care. An "ordinarily prudent person" means one who directs his intelligence in a thoughtful way to the task at hand. Put another way, a director must make a reasonable effort to inform himself before making a decision, as discussed in the next paragraph. The director is not held to a higher standard required of a specialist (finance, marketing) unless he is one. A director of a small, closely held corporation will not necessarily be held to the same standard as a director who is given a staff by a large, complex, diversified company. The standard of care is that which an ordinarily prudent person would use who is in "a like position" to the director in question. Moreover, the standard is not a timeless one for all people in the same position. The standard can depend on the circumstances: a fast-moving situation calling for a snap decision will be treated differently later, if there are recriminations because it was the wrong decision, than a situation in which time was not of the essence.

Despite the fiduciary requirements, in reality a director does not spend all his time on corporate affairs, is not omnipotent, and must be permitted to rely on the word of others. Nor can directors be infallible in making decisions. Managers work in a business environment, in which risk is a substantial factor. No decision, no matter how rigorously debated, is guaranteed. Accordingly, courts will not second-guess decisions made on the basis of good-faith judgment and due care. This is the business judgment rule, mentioned in previous chapters.

Under the business judgment rule, the actions of directors who fulfill their fiduciary duties will not be second-guessed by a court. The general test is whether a director's decision or transaction was so one sided that no businessperson of ordinary judgment would reach the same decision. The business judgment rule has been refined over time. While the business judgment rule may seem to provide blanket protection for directors (the rule was quite broad as outlined by the court in *Dodge v. Ford*), this is not the case. The rule does not protect every decision made by directors, and they may face lawsuits, a topic to which we now turn.

## Constituency Statutes and Corporate Social Responsibility

Until the 1980s, the law in all the states imposed on corporate directors the obligation to advance shareholders' economic interests to ensure the long-term profitability of the corporation. Other groups—employees, local communities and neighbors, customers, suppliers, and creditors—took a back seat to this primary responsibility of directors. Of course, directors could consider the welfare of these other groups if in so doing they promoted the interests of shareholders. But directors were not legally permitted to favor the interests of others over shareholders. The prevailing rule was, and often still is, that maximizing shareholder value is the primary duty of the board. Thus in *Revlon, Inc. v. MacAndrews & Forbes Holdings, Inc.*, 506 A.2d 173 (Del. 1986). The Delaware Supreme Court held that Revlon's directors had breached their fiduciary duty to the company's shareholders in response to a hostile tender offer from Pantry Pride. While the facts of the case are intricate, the general gist is that the Revlon directors thwarted the hostile tender by adopting a variation of a poison pill involving a tender offer for their own shares in exchange for debt, effectively eliminating Pantry Pride's ability to take over the firm. Pantry Pride upped its offer price, and in response, Revlon began negotiating with a leveraged buyout by a third party, Forstmann Little. Pantry Pride publicly announced it would top any bid made by Forstmann Little. Despite this, the Revlon board negotiated a deal with Forstmann Little. The court noted an exception to the general rule that permitted directors to consider the interests of other groups as long as "there are rationally related benefits accruing to the stockholders." But when a company is about to be taken over, the object must be to sell it to the highest bidder, Pantry Pride in this case. It is then, said the court, in situations where the corporation is to be sold, that "concern for nonstockholder interests is inappropriate," thus giving rise to what are commonly called the Revlon duties.

Post-*Revlon*, in response to a wave of takeovers in the late 1980s, some states have enacted laws to give directors legal authority to take account of interests other than those of shareholders in deciding how to defend against hostile mergers and acquisitions. These laws are known as constituency statutes, because they permit directors to take account of the interests of other constituencies of corporations. These do not permit a corporation to avoid its

Revlon duties (that when a corporation is up for sale, it must be sold to the highest bidder) but will allow a corporation to consider factors other than shareholder value in determining whether to make charitable donations or reinvest profits. This ability has been further expanding as the concept of corporate social responsibility has grown.

### **Sarbanes-Oxley and Other Modern Trends**

The Sarbanes-Oxley Act of 2002, enacted following several accounting scandals, strengthens the duties owed by the board and other corporate officers. In particular, Title III contains corporate responsibility provisions, such as requiring senior executives to vouch for the accuracy and completeness of their corporation's financial disclosures. While the main goal of Sarbanes-Oxley is to decrease the incidents of financial fraud and accounting tricks, its operative goal is to strengthen the fiduciary duties of loyalty and care as well as good faith.

The modern trend has been to impose more duties. Delaware has been adding to the list of fiduciary responsibilities other than loyalty and care. As mentioned previously, the Delaware judicial system consistently recognizes a duty of good faith. The courts have further added a duty of candor with shareholders when the corporation is disseminating information to its investors. Particular duties arise in the context of mergers, acquisitions, and tender offers. As mentioned previously in the *Revlon* case, the duty owed to shareholders in situations of competing tender offers is that of maximum value. Other duties may arise, such as when directors attempt to retain their positions on the board in the face of a hostile tender offer. Trends in fiduciary responsibilities, as well as other changes in the business legal field, are covered extensively by the American Bar Association at [http://www.americanbar.org/groups/business\\_law.html](http://www.americanbar.org/groups/business_law.html).

## Chapter 30 Partnerships: General Characteristics and Formation (Hardbound chapter 40)

### 30.1 Introduction to Partnerships and Entity Theory

When two or more people form their own business or professional practice, they usually consider becoming partners. Partnership law defines a partnership as “the association of two or more persons to carry on as co-owners a business for profit...whether or not the persons intend to form a partnership.” Revised Uniform Partnership Act, Section 202(a). In 2011, there were more than three million business firms in the United States as partnerships. Partnerships are a common form of organization among accountants, lawyers, doctors, and other professionals. When we use the word *partnership*, we are referring to the *general business partnership*. There are also limited partnerships and limited liability partnerships.

#### 1.2 The Current State of Partnership Law

Despite its name, UPA was not enacted uniformly among the states; moreover, it had some shortcomings. So the states tinkered with it, and by the 1980s, the National Conference of Commissioners on Uniform Laws (NCCUL) determined that a revised version was in order. An amended UPA appeared in 1992, and further amendments were promulgated in 1993, 1994, 1996, and 1997. The NCCUL reports that thirty-nine states have adopted some version of the revised act. This chapter will discuss the [Revised Uniform Partnership Act \(RUPA\)](#) as promulgated in 1997, but because not all jurisdictions have not adopted it, where RUPA makes significant changes, the original 1914 UPA will also be considered. NCCUSL, Uniform Law Commission, “Acts: Partnership Act,”. The following states *have* adopted the RUPA: Alabama, Alaska, Arizona, Arkansas, California, Colorado, Delaware, District of Columbia, Florida, Hawaii, Idaho, Illinois, Iowa, Kansas, Kentucky, Maine, Maryland, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Jersey, New Mexico, North Dakota, Oklahoma, Oregon, Puerto Rico, South Dakota (substantially similar), Tennessee, Texas (substantially similar), US Virgin Islands, Vermont, Virginia, and Washington. Connecticut, West Virginia, and Wyoming adopted the 1992 or 1994 version. Here are the states that have *not* adopted RUPA (Louisiana never

adopted UPA at all): Georgia, Indiana, Massachusetts, Michigan, Mississippi, New Hampshire, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, and Wisconsin. The NCCUL observes in its “prefatory note” to the 1997 act: “The Revised Act is largely a series of ‘default rules’ that govern the relations among partners in situations they have not addressed in a partnership agreement. The primary focus of RUPA is the small, often informal, partnership. Larger partnerships generally have a partnership agreement addressing, and often modifying, many of the provisions of the partnership act.” University of Pennsylvania Law School, Biddle Law Library, [“Uniform Partnership Act \(1997\),”](#) NCCUSL Archives.

## 1.2 Entity Theory

### Meaning of “Legal Entity”

A significant difference between a partnership and most other kinds of business organization relates to whether, and the extent to which, the business is a legal entity. A legal entity is a person or group that the law recognizes as having legal rights, such as the right to own and dispose of property, to sue and be sued, and to enter into contracts; the entity theory is the concept of a business firm as a legal person, with existence and accountability separate from its owners. When individuals carry out a common enterprise as partners, a threshold legal question is whether the partnership is a legal entity. The common law said no. In other words, under the common-law theory, a partnership was but a convenient name for an aggregate of individuals, and the rights and duties recognized and imposed by law are those of the individual partners. By contrast, the mercantile theory of the law merchant held that a partnership is a legal entity that can have rights and duties independent of those of its members.

### Entity Characteristics of a Partnership

A partnership has entity characteristics, but the partners remain guarantors of partnership obligations, as always—that is the partners’ joint and several liability. This is a very important point and a primary weakness of the partnership form: all partners are, and each one of them is, ultimately personally liable for the obligations of the partnership, without limit, which includes personal and unlimited liability. This personal liability is very distasteful, and it has

been abolished, subject to some exceptions, with limited partnerships and limited liability companies, as discussed in Hybrid Business Forms. And, of course, the owners of corporations are also not generally liable for the corporation's obligations, which is a major reason for the corporate form's popularity.

### **For Accounting Purposes**

Under both versions of the law, the partnership may keep business records as if it were a separate entity, and its accountants may treat it as such for purposes of preparing income statements and balance sheets.

### **For Purposes of Taxation**

Under both versions of the law, partnerships are *not* taxable entities, so they do not pay income taxes. Instead, each partner's distributive share, which includes income or other gain, loss, deductions, and credits, must be included in the partner's personal income tax return, whether or not the share is actually distributed.

### **For Purposes of Litigation**

In litigation, the aggregate theory causes some inconvenience in naming and serving partnership defendants: under UPA, lawsuits to enforce a partnership contract or some other right must be filed in the name of all the partners. Similarly, to sue a partnership, the plaintiff must name and sue each of the partners. This cumbersome procedure was modified in many states, which enacted special statutes expressly permitting suits by and against partnerships in the firm name. In suits on a claim in federal court, a partnership may sue and be sued in its common name. The move by RUPA to make partnerships entities changed very little. Certainly it provides that "a partnership may sue and be sued in the name of the partnership"—that's handy where the plaintiff hopes for a judgment against the partnership, without recourse to the individual partners' personal assets. RUPA, Section 307(a). But a plaintiff must still name the partnership and the partners individually to have access to both estates, the partnership and

the individuals': "A judgment against a partnership is not by itself a judgment against a partner. A judgment against a partnership may not be satisfied from a partner's assets unless there is also a judgment against the partner." RUPA, Section 307(c).

### **For Purposes of Owning Real Estate**

Aggregate theory concepts bedeviled property co-ownership issues, so UPA finessed the issue by stating that partnership property, real or personal, could be held in the name of the partners as "tenants in partnership"—a type of co-ownership—or it could be held in the name of the partnership. Uniform Partnership Act, Section 25(1); UPA, Section 8(3). Under RUPA, "property acquired by the partnership is property of the partnership and not of the partners." RUPA, Section 203. But RUPA is no different from UPA in practical effect. The latter provides that "property originally brought into the partnership stock or subsequently acquired by purchase...on account of the partnership, is partnership property." UPA, Section 8(1). Under either law, a partner may bring onto the partnership premises her own property, not acquired in the name of the partnership or with its credit, and it remains her separate property. Under neither law can a partner unilaterally dispose of partnership property, however labeled, for the obvious reason that one cannot dispose of another's property or property rights without permission. UPA, Sections 9(3)(a) and 25; RUPA, Section 302. Keep in mind that partnership law is the default: partners are free to make up partnership agreements as they like, subject to some limitations. They are free to set up property ownership rules as they like.

## **2.1 Creation of an Express Partnership**

### **Creation in General**

The most common way of forming a partnership is expressly—that is, in words, orally or in writing. Such a partnership is called an express partnership. If parties have an express partnership with no partnership agreement, the relevant law—the Uniform Partnership Act (UPA) or the Revised Uniform Partnership Act (RUPA)—applies the governing rules.

Assume that three persons have decided to form a partnership to run a car dealership. Able contributes \$250,000. Baker contributes the building and space in which the business will operate. Carr contributes his services; he will manage the dealership.

The first question is whether Able, Baker, and Carr must have a partnership agreement. As should be clear from the foregoing discussion, no agreement is necessary as long as the tests of partnership are met. However, they *ought* to have an agreement in order to spell out their rights and duties among themselves.

The agreement itself is a contract and should follow the principles and rules spelled out in [Chapter 8 "Introduction to Contract Law"](#) through [Chapter 15 "Remedies"](#) of this book. Because it is intended to govern the relations of the partners toward themselves and their business, every partnership contract should set forth clearly the following terms: (1) the name under which the partners will do business; (2) the names of the partners; (3) the nature, scope, and location of the business; (4) the capital contributions of each partner; (5) how profits and losses are to be divided; (6) how salaries, if any, are to be determined; (7) the responsibilities of each partner for managing the business; (8) limitations on the power of each partner to bind the firm; (9) the method by which a given partner may withdraw from the partnership; (10) continuation of the firm in the event of a partner's death and the formula for paying a partnership interest to his heirs; and (11) method of dissolution.

### **Who Can Be a Partner?**

As discussed earlier in this chapter, a partnership is not limited to a direct association between human beings but may also include an association between other entities, such as corporations or even partnerships themselves. A **joint venture**—sometimes known as a joint adventure, coadventure, joint enterprise, joint undertaking, syndicate, group, or pool—is an association of persons to carry on a particular task until completed. In essence, a joint venture is a “temporary partnership.” In the United States, the use of joint ventures began with the railroads in the late 1800s. Throughout the middle part of the twentieth century joint ventures were common in the

manufacturing sector. By the late 1980s, they increasingly appeared in both manufacturing and service industries as businesses looked for new, competitive strategies. They are aggressively promoted on the Internet: “Joint Ventures are in, and if you’re not utilizing this strategic weapon, chances are your competition is, or will soon be, using this to their advantage....possibly against you!” (Scott Allen, “Joint Venturing 101,” About.com Entrepreneurs, <http://entrepreneurs.about.com/od/beyondstartup/a/jointventures.htm>). As a risk-avoiding device, the joint venture allows two or more firms to pool their differing expertise so that neither needs to “learn the ropes” from the beginning; neither needs the entire capital to start the enterprise. Partnership rules generally apply, although the relationship of the joint venturers is closer to that of special than general agency. Joint venturers are fiduciaries toward one another. Although no formality is necessary, the associates will usually sign an agreement. The joint venture need have no group name, though it may have one. Property may be owned jointly. Profits and losses will be shared, as in a partnership, and each associate has the right to participate in management. Liability is unlimited. Sometimes two or more businesses will form a joint venture to carry out a specific task—prospecting for oil, building a nuclear reactor, doing basic scientific research—and will incorporate the joint venture. In that case, the resulting business—known as a “joint venture corporation”—is governed by corporation law, not the law of partnership, and is not a joint venture in the sense described here. Increasingly, companies are forming joint ventures to do business abroad; foreign investors or governments own significant interests in these joint ventures. For example, in 1984 General Motors entered into a joint venture with Toyota to revive GM’s shuttered Fremont, California, assembly plant to create New United Motor Manufacturing, Inc. (NUMMI). For GM the joint venture was an opportunity to learn about lean manufacturing from the Japanese company, while Toyota gained its first manufacturing base in North America and a chance to test its production system in an American labor environment. Until May 2010, when the copartnership ended and the plant closed, NUMMI built an average of six thousand vehicles a week, or nearly eight million cars and trucks. These vehicles were the Chevrolet Nova (1984–88), the Geo Prizm (1989–97), the Chevrolet Prizm (1998–2002), and the Hilux (1991–95, predecessor of the Tacoma), as well as the Toyota Voltz, the Japanese right-hand-drive version

of the Pontiac Vibe. The latter two were based on the Toyota Matrix. Paul Stenquist, "GM and Toyota's Joint Venture Ends in California," *New York Times*, April 2, 2010,

<http://wheels.blogs.nytimes.com/2010/04/02/g-m-and-toyotas-joint-venture-ends-in-california>. Family members can be partners, and partnerships between parents and minor children are lawful, although a partner who is a minor may disaffirm the agreement.

## 2.2 Creation of Implied Partnership

An implied partnership exists when in fact there are two or more persons carrying on a business as co-owners for profit. For example, Carlos decides to paint houses during his summer break. He gathers some materials and gets several jobs. He hires Wally as a helper. Wally is very good, and pretty soon both of them are deciding what jobs to do and how much to charge, and they are splitting the profits. They have an implied partnership, without intending to create a partnership at all.

How do we know whether an implied partnership *has* been created? Obviously, we know if there is an express agreement. Partnerships can come into existence quite informally, indeed, without any formality—they can be created accidentally. In contrast to the corporation, which is the creature of statute, partnership is a catchall term for a large variety of working relationships, and frequently, uncertainties arise about whether or not a particular relationship is that of partnership. The law can reduce the uncertainty in advance only at the price of severely restricting the flexibility of people to associate. As the chief drafter of the Uniform Partnership Act (UPA, 1914) explained.

## 2.3 Creation of Partnership by Estoppel

Ordinarily, if two people are not legally partners, then third parties cannot so regard them. For example, Mr. Tot and Mr. Tut own equal shares of a house that they rent but do not regard it as a business and are not in fact partners. They do have a loose "understanding" that since Mr. Tot is mechanically adept, he will make necessary repairs whenever the tenants call. On his way to the house one day to fix its boiler, Mr. Tot injures a pedestrian, who sues both Mr. Tot and Mr.

Tut. Since they are not partners, the pedestrian cannot sue them as if they were; hence Mr. Tut has no partnership liability.

Suppose that Mr. Tot and Mr. Tut happened to go to a lumberyard together to purchase materials that Mr. Tot intended to use to add a room to the house. Short of cash, Mr. Tot looks around and espies Mr. Tat, who greets his two friends heartily by saying within earshot of the salesman who is debating whether to extend credit, "Well, how are my two partners this morning?" Messrs. Tot and Tut say nothing but smile faintly at the salesman, who mistakenly but reasonably believes that the two are acknowledging the partnership. The salesman knows Mr. Tat well and assumes that since Mr. Tat is rich, extending credit to the "partnership" is a "sure thing." Messrs. Tot and Tut fail to pay. The lumberyard is entitled to collect from Mr. Tat, even though he may have forgotten completely about the incident by the time suit is filed. Under Uniform Partnership Act Section 16(1), Mr. Tat would be liable for the debt as being part of a partnership by estoppel.

### **30.3 Operation: Relations among Partners (Hardbound chapter 41)**

#### **3.1 Duties Partners Owe Each Other**

Among the duties partners owe each other, six may be called out here: (1) the duty to serve, (2) the duty of loyalty, (3) the duty of care, (4) the duty of obedience, (5) the duty to inform copartners, and (6) the duty to account to the partnership. These are all very similar to the duty owed by an agent to the principal, as partnership law is based on agency concepts. Revised Uniform Partnership Act, Section 404, Comment 3: "Indeed, the law of partnership reflects the broader law of principal and agent, under which every agent is a fiduciary."

#### **Duty to Serve**

Unless otherwise agreed, expressly or impliedly, a partner is expected to work for the firm. The partnership, after all, is a profit-making co-venture, and it would not do for one to loaf about and still expect to get paid. For example, suppose Joan takes her two-week vacation from the horse-stable partnership she operates with Sarah and Sandra. Then she does not return for four

months because she has gone horseback riding in the Southwest. She might end up having to pay if the partnership hired a substitute to do her work.

### **Duty of Loyalty**

In general, this requires partners to put the firm's interests ahead of their own. Partners are *fiduciaries* as to each other and as to the partnership, and as such, they owe a fiduciary duty to each other and the partnership. Judge Benjamin Cardozo, in an often-quoted phrase, called the fiduciary duty "something stricter than the morals of the market place. Not honesty alone, but the punctilio of an honor the most sensitive, is then the standard of behavior." *Meinhard v. Salmon*, 164 N.E. 545 (N.Y. 1928). Breach of the fiduciary duty gives rise to a claim for compensatory, consequential, and incidental damages; recoupment of compensation; and—rarely—punitive damages.

### **Duty of Care**

Stemming from its roots in agency law, partnership law also imposes a duty of care on partners. Partners are to faithfully serve to the best of their ability. Section 404 of RUPA imposes the fiduciary standard on the duty of care, but rather confusingly: how does the "punctilio of an honor the most sensitive"—as Judge Cardozo described that standard—apply when under RUPA Section 404(c) the "the duty of care...is limited to refraining from engaging in grossly negligent or reckless conduct, intentional misconduct, or a knowing violation of law"? Recognize that a person can attend to business both loyally and negligently.

### **Duty of Obedience**

The partnership is a contractual relationship among the partners; they are all agents and principals of each other. Expressly or impliedly that means no partner can disobey the partnership agreement or fail to follow any properly made partnership decision. This includes the duty to act within the authority expressly or impliedly given in the partnership agreement,

and a partner is responsible to the other partners for damages or losses arising from unauthorized activities.

### **Duty to Inform Copartners**

As in the agency relationship, a partner is expected to inform copartners of notices and matters coming to her attention that would be of interest to the partnership.

### **Duty to Account**

The partnership—and necessarily the partners—have a duty to allow copartners and their agents access to the partnership’s books and records and to provide “any information concerning the partnership’s business and affairs reasonably required for the proper exercise of the partner’s rights and duties under the partnership agreement [or this Act].” UPA, Sections 19 and 20; RUPA, Section 403. The fiduciary standard is imposed upon the duty to account for “it any property, profit, or benefit derived by [a] partner,” as noted in RUPA Section 404. RUPA, Section 404(1).

## **3.2 Contract Liability**

### **Liability of the Partnership**

Recall that an agent can make contracts on behalf of a principal under three types of authority: express, implied, and apparent. *Express authority* is that explicitly delegated to the agent, *implied authority* is that necessary to the carrying out of the express authority, and *apparent authority* is that which a third party is led to believe has been conferred by the principal on the agent, even though in fact it was not or it was revoked.

### **Personal Liability of Partners, in General**

It is clear that the *partnership* is liable for contracts by authorized partners, as discussed in the preceding paragraphs. The bad thing about the partnership as a form of business organization is that it imposes liability on the partners *personally and without limit*. Section 306 of RUPA

provides that “all partners are liable jointly and severally for all obligations of the partnership unless otherwise agreed by the claimant or provided by law.” RUPA, Section 306. Section 13 of UPA is in accord.

### **Liability of Existing Partners**

Contract liability is joint and several: that is, all partners are liable (“joint”) and each is “several.” (We usually do not use *several* in modern English to mean “each”; it’s an archaic usage.) But—and here’s the intrusion of entity theory—generally RUPA requires the judgment creditor to exhaust the partnership’s assets before going after the separate assets of a partner. Thus under RUPA the partners are *guarantors* of the partnership’s liabilities. RUPA Section 306.

Under UPA, contract liability is joint only, not also several. This means the partners must be sued in a joint action brought against them all. A partner who is not named cannot later be sued by a creditor in a separate proceeding, though the ones who were named could see a proportionate contribution from the ones who were not.

For tortious acts, the partners are said to be jointly and severally liable under both UPA and RUPA, and the plaintiff may separately sue one or more partners. Even after winning a judgment, the plaintiff may sue other partners unnamed in the original action. Each and every partner is separately liable for the entire amount of the debt, although the plaintiff is not entitled to recover more than the total of his damages. The practical effect of the rules making partners personally liable for partnership contracts and torts can be huge. In his classic textbook *Economics*, Professor Paul Samuelson observed that unlimited liability “reveals why partnerships tend to be confined to small, personal enterprises....When it becomes a question of placing their personal fortunes in jeopardy, people are reluctant to put their capital into complex ventures over which they can exercise little control....In the field of investment banking, concerns like JPMorgan Chase used to advertise proudly ‘not incorporated’ so that their creditors could have extra assurance. But even these concerns have converted themselves into corporate entities.” *Paul A. Samuelson, Economics* (New York: McGraw-Hill, 1973), 106.

### 3.3 Dissolution of Partnerships under UPA

*Dissolution*, in the most general sense, means a separation into component parts.

#### Meaning of Dissolution under UPA

People in business are sometimes confused about the meaning of dissolution. It does not mean the termination of a business. It has a precise legal definition, given in UPA Section 29: “The dissolution of a partnership is the change in the relation of the partners caused by any partner ceasing to be associated in the carrying on as distinguished from the winding up of the business.” The partnership is not necessarily terminated on dissolution; rather, it continues until the winding up of partnership affairs is completed, and the remaining partners may choose to continue on as a new partnership if they want, UPA, Section 30. Under UPA the partnership dissolves upon the withdrawal of any partner.

### 30.4 Hybrid Business Forms ([Hardbound chapter 42](#))

Several types of associations that are hybrid forms—that is, they share some aspects of partnerships and some of corporations. Corporations afford the inestimable benefit of limited liability, partnerships the inestimable benefit of limited taxation. Businesspeople always seek to limit their risk and their taxation.

base, whether to allow businesspeople and investors to grasp the holy grail of limited liability is a political issue. When we say a person is “irresponsible,” it means he (or she, or it) does not take responsibility for his harmful actions; the loss is borne by others. Politically speaking, there is an incentive to allow businesspeople insulation from liability: it encourages them to take risks and invest, thus stimulating economic activity and forestalling unemployment. So the political trade-off with allowing various inventive forms of business organization is between providing business actors with the security that they will lose only their calculable investment, thus stimulating the economy, versus the “moral hazard” of allowing them to emerge mostly unscathed from their own harmful or foolish activities, thus externalizing resulting losses upon others. Some people feel that during the run-up to the “Great Recession” of 2007–09, the

economic system allowed too much risk taking. When the risky investments collapsed, though, instead of forcing the risk takers to suffer loss, the government intervened—it “bailed them out,” as they say, putting the consequences of the failed risks on the taxpayer.

The limited partnership is attractive because of its treatment of taxation and its imposition of limited liability on its limited partners.

### **Governing Law**

The original source of limited partnership law is the Uniform Limited Partnership Act (ULPA), which was drafted in 1916. A revised version, the Revised Uniform Limited Partnership Act (RULPA), was adopted by the National Conference of Commissioners on Uniform Laws in 1976 and further amended in 1985 and in 2001.

### **Definition**

A limited partnership (LP) is defined as “a partnership formed by two or more persons under the laws of a State and having one or more general partners and one or more limited partners.” ULPA, Section 102(11). The form tends to be attractive in business situations that focus on a single or limited-term project, such as making a movie or developing real estate; it is also widely used by private equity firms.

Unlike a general partnership, a limited partnership is created in accordance with the state statute authorizing it. There are two categories of partners: limited and general. The limited partners capitalize the business and the general partners run it.

### **Creation**

The act requires that the firm’s promoters file a certificate of limited partnership with the secretary of state; if they do not, or if the certificate is substantially defective, a general partnership is created. The certificate must be signed by all general partners. It must include the name of the limited partnership (which must include the words *limited partnership* so the

world knows there are owners of the firm who are not liable beyond their contribution) and the names and business addresses of the general partners. If there are any changes in the general partners, the certificate must be amended. The general partner may be, and often is, a corporation. Having a general partner be a corporation achieves the goal of limited liability for everyone, but it is somewhat of a “clunky” arrangement. That problem is obviated in the limited liability company, discussed under Limited Liability Companies. Here is an example of a limited partnership operating agreement:

<http://www.wyopa.com/Articles%20of%20limited%20partnership.htm>.

#### 4.1 Control and Compensation

##### **Control**

Control is *not* generally shared by both classes of partners.

##### **General Partners**

The control of the limited partnership is in the hands of the general partners, which may—as noted—be partnerships or corporations.

##### **Limited Partners**

Under ULPA-1985 and its predecessors, a limited partner who exercised any significant control would incur liability like a general partner as to third parties who believed she was one (the “control rule”). However, among the things a limited partner could do that would *not* risk the loss of insulation from personal liability were these “safe harbors”:

- Acting as an agent, employee, or contractor for the firm; or being an officer, director, or shareholder of a corporate general partner
- Consulting with the general partner of the firm
- Requesting or attending a meeting of partners
- Being a surety for the firm

- Voting on amendments to the agreement, on dissolution or winding up the partnership, on loans to the partnership, on a change in its nature of business, on removing or admitting a general or limited partner.

### **General Partners**

The general partners are liable as in a general partnership, and they have the same fiduciary duty and duty of care as partners in a general partnership. However, see the discussion under Limited Liability Partnerships. In the newest type of LP, the limited liability limited partnership (triple LP), where the general partner is also afforded limited liability under ULPA-2001.

### **Limited Partners**

The limited partners are only liable up to the amount of their capital contribution, provided the surname of the limited partner does not appear in the partnership name (unless his name is coincidentally the same as that of one of the general partners whose name does appear) and provided the limited partner does not participate in control of the firm.

## 4.2 History of the Limited Liability Company

The limited liability company (LLC) gained sweeping popularity in the late twentieth century because it combines the best aspects of partnership and the best aspects of corporations: it allows all its owners (members) insulation from personal liability and pass-through (conduit) taxation. The first efforts to form LLCs were thwarted by IRS rulings that the business form was too much like a corporation to escape corporate tax complications. Tinkering by promoters of the LLC concept and flexibility by the IRS solved those problems in interesting and creative ways.

Corporations have six characteristics: (1) associates, (2) an objective to carry on a business and divide the gains, (3) continuity of life, (4) centralized management, (5) limited liability, and (6) free transferability of interests. Partnerships also, necessarily, have the first two corporate characteristics; under IRS rulings, if the LLC is *not* to be considered a corporation for tax

purposes, it must lack at least one-half of the remaining four characteristics of a corporation: the LLC, then, must lack two of these corporate characteristics (otherwise it will be considered a corporation): (1) limited liability, (2) centralized management, (3) continuity of life, or (4) free transferability of interests. But limited liability is essential and centralized management is necessary for passive investors who don't want to be involved in decision making, so pass-through taxation usually hinges on whether an LLC has continuity of life and free transferability of accounts. Thus it is extremely important that the LLC promoters avoid the corporate characteristics of continuity of life and free transferability of interests.

#### **4.3 Creation of the LLC**

An LLC is created according to the statute of the state in which it is formed. It is required that the LLC members file a "certificate of organization" with the secretary of state, and the name must indicate that it is a limited liability company. Partnerships and limited partnerships may convert to LLCs; the partners' previous liability under the other organizational forms is not affected, but going forward, limited liability is provided. The members' operating agreement spells out how the business will be run; it is subordinate to state and federal law. Unless otherwise agreed, the operating agreement can be amended only by unanimous vote. The LLC is an entity. Foreign LLCs must register with the secretary of state before doing business in a "foreign" state, or they cannot sue in state courts.

As compared with corporations, the LLC is not a good form if the owners expect to have multiple investors or to raise money from the public. The typical LLC has relatively few members (six or seven at most), all of whom usually are engaged in running the firm.

Most early LLC statutes, at least, prohibited their use by professionals. That is, practitioners who need professional licenses, such as certified public accountants, lawyers, doctors, architects, chiropractors, and the like, could not use this form because of concern about what would happen to the standards of practice if such people could avoid legitimate malpractice claims. For that reason, the limited liability partnership was invented.

## **Control**

The LLC operating agreement may provide for either a member-managed LLC or a manager-managed (centralized) LLC. If the former, all members have actual and apparent authority to bind the LLC to contracts on its behalf, as in a partnership, and all members' votes have equal weight unless otherwise agreed. Member-managers have duty of care and a fiduciary duty, though the parameters of those duties vary from state to state. If the firm is manager managed, only managers have authority to bind the firm; the managers have the duty of care and fiduciary duty, but the nonmanager members usually do not. Some states' statutes provide that voting is based on the financial interests of the members. Most statutes provide that any extraordinary firm decisions be voted on by all members (e.g., amend the agreement, admit new members, sell all the assets prior to dissolution, merge with another entity). Members can make their own rules without the structural requirements (e.g., voting rights, notice, quorum, approval of major decisions) imposed under state corporate law.

If the firm has a centralized manager system, it gets a check in its "corporate-like" box, so it will need to make sure there are enough noncorporate-like attributes to make up for this one. If it looks too much like a corporation, it will be taxed like one.

## **Liability**

The great accomplishment of the LLC is, again, to achieve limited liability for all its members: no general partner hangs out with liability exposure.

## **Taxation**

Assuming the LLC is properly formed so that it is not too much like a corporation, it will—upon its members' election—be treated like a partnership for tax purposes.

## **Termination**

Termination, loosely speaking, refers either to how the entity's life as a business ends (continuity of life) or to how a member's interest in the firm ends—that is, how freely the interest is transferable.

### **Other Forms**

The sub-S corporation or the S corporation gets its name from the IRS Code, Chapter 1, Subchapter S. It was authorized by Congress in 1958 to help small corporations and to stem the economic and cultural influence of the relatively few, but increasingly powerful, huge multinational corporations. According to the website of an S corporation champion, “a half century later, S corporations are the most popular corporate structure in America.

### **Creation and Capitalization**

The S corporation is a regular corporation created upon application to the appropriate secretary of state's office and operated according to its bylaws and shareholders' agreements. There are, however, some limits on how the business is set up, among them the following:

- It must be incorporated in the United States.
- It cannot have more than one hundred shareholders (a married couple counts as one shareholder).
- The only shareholders are individuals, estates, certain exempt organizations, or certain trusts.
- Only US citizens and resident aliens may be shareholders.
- The corporation has only one class of stock.
- With some exceptions, it cannot be a bank, thrift institution, or insurance company.
- All shareholders must consent to the S corporation election.
- It is capitalized as is a regular corporation.

### **Liability**

The owners of the S corporation have limited liability.

## **Taxation**

Taxation is the crux of the matter. The S corporation pays no corporate income tax (unless it has a lot of passive income). The S corporation's shareholders include on their personal income statements, and pay tax on, their share of the corporation's separately stated items of income, deduction, and loss. That is, the S corporation avoids the dreaded double taxation of corporate income.

## **Transferability of Ownership**

S corporations' shares can be bought or sold via share purchase agreements, and all changes in the ownership are reflected in the share ledger in the corporate minute book.

## **Limited Liability Limited Partnerships**

The progress toward achieving limited liability continues. A limited liability limited partnership (LLLP, or triple LP) is the latest invention. It is a limited partnership that has invoked the LLLP provisions of its state partnership law by filing with a specified public official the appropriate documentation to become an LLLP. This form completely eliminates the automatic personal liability of the general partner for partnership obligations and, under most statutes, also eliminates the "control rule" liability exposure for all limited partners. It is noteworthy that California law does not allow for an LLLP to be formed in California; however, it does recognize LLLPs formed in other states. A "foreign" LLLP doing business in California must register with the secretary of state. As of February 2011, twenty-one states allow the formation of LLLPs.

The 2001 revision of the Uniform Limited Partnership Act (ULPA) provides this definition of an LLLP: "Limited liability limited partnership'...means a limited partnership whose certificate of limited partnership states that the limited partnership is a limited liability limited partnership." "Uniform Limited Partnership Act (2001)," NCCUSL Archives, ULPA Section, 102(9). Section 404(c) gets to the point: "An obligation of a limited partnership incurred while the limited partnership is a limited liability limited partnership, whether arising in contract, tort, or

otherwise, is solely the obligation of the limited partnership. A general partner is not personally liable, directly or indirectly, by way of contribution or otherwise, for such an obligation solely by reason of being or acting as a general partner. This subsection applies despite anything inconsistent in the partnership agreement that existed immediately before the consent required to become a limited liability limited partnership. "ULPA Section, 404(c).

## Chapter 31 Securities Regulation (Hardbound chapter 46)

Both the registration and the trading of securities are highly regulated by the Securities and Exchange Commission (SEC). A violation of a securities law can lead to severe criminal and civil penalties. First we will examine the question, Why is there a need for securities regulation?

### 31.1 The Nature of Securities Regulation

What we commonly refer to as “**securities**” are essentially worthless pieces of paper. Their inherent value lies in the interest in property or an ongoing enterprise that they represent. This disparity between the tangible property—the stock certificate, for example—and the intangible interest it represents gives rise to several reasons for regulation. First, there is need for a mechanism to inform the buyer accurately what it is he is buying. Second, laws are necessary to prevent and provide remedies for deceptive and manipulative acts designed to defraud buyers and sellers. Third, the evolution of stock trading on a massive scale has led to the development of numerous types of specialists and professionals, in dealings with whom the public can be at a severe disadvantage, and so the law undertakes to ensure that they do not take unfair advantage of their customers.

The **Securities Act of 1933** and the **Securities Exchange Act of 1934** are two federal statutes that are vitally important, having virtually refashioned the law governing corporations during the past half century. In fact, it is not too much to say that although they deal with securities, they have become the general federal law of corporations.

The definition of *security*, which is set forth in the Securities Act of 1933, is comprehensive, but it does not on its face answer all questions that financiers in a dynamic market can raise. Under Section 2(1) of the act, “security” includes “any note, stock, treasury stock, bond, debenture, evidence of indebtedness, certificate of interest or participation in any profit-sharing agreement, collateral-trust certificate, preorganization certificate or subscription, transferable share, investment contract, voting-trust certificate, certificate of deposit for a security, fractional undivided interest in oil, gas, or other mineral rights, or, in general, any interest or

instrument commonly known as a 'security,' or any certificate of interest or participation in, temporary or interim certificate for, receipt for, guarantee of, or warrant or right to subscribe to or purchase, any of the foregoing.”

Under this definition, an investment may not be a security even though it is so labeled, and it may actually be a security even though it is called something else. For example, does a service contract that obligates someone who has sold individual rows in an orange orchard to cultivate, harvest, and market an orange crop involve a security subject to regulation under federal law? Yes, said the Supreme Court in *Securities & Exchange Commission v. W. J. Howey Co.*, 328 U.S. 293 (1946). The Court said the test is whether “the person invests his money in a common enterprise and is led to expect profits solely from the efforts of the promoter or a third party.” Under this test, courts have liberally interpreted “investment contract” and “certificate of interest or participation in any profit-sharing agreement” to be securities interests in such property as real estate condominiums and cooperatives, commodity option contracts, and farm animals.

## 1.2 The Securities and Exchange Commission

### Functions

The Securities and Exchange Commission (SEC) is over half a century old, having been created by Congress in the Securities Exchange Act of 1934. It is an independent regulatory agency, subject to the rules of the Administrative Procedure Act. The commission is composed of five members, who have staggered five-year terms. Every June 5, the term of one of the commissioners expires. Although the president cannot remove commissioners during their terms of office, he does have the power to designate the chairman from among the sitting members. The SEC is bipartisan: not more than three commissioners may be from the same political party.

The SEC’s primary task is to investigate complaints or other possible violations of the law in securities transactions and to bring enforcement proceedings when it believes that violations have occurred. It is empowered to conduct information inquiries, interview witnesses, examine

brokerage records, and review trading data. If its requests are refused, it can issue subpoenas and seek compliance in federal court. Its usual leads come from complaints of investors and the general public, but it has authority to conduct surprise inspections of the books and records of brokers and dealers. Another source of leads is price fluctuations that seem to have been caused by manipulation rather than regular market forces.

Among the violations the commission searches out are these: (1) unregistered sale of securities subject to the registration requirement of the Securities Act of 1933, (2) fraudulent acts and practices, (3) manipulation of market prices, (4) carrying out of a securities business while insolvent, (5) misappropriation of customers' funds by brokers and dealers, and (4) other unfair dealings by brokers and dealers.

When the commission believes that a violation has occurred, it can take one of three courses. First, it can refer the case to the Justice Department with a recommendation for criminal prosecution in cases of fraud or other willful violation of law.

Second, the SEC can seek a civil injunction in federal court against further violations. As a result of amendments to the securities laws in 1990 (the Securities Enforcement Remedies and Penny Stock Reform Act), the commission can also ask the court to impose civil penalties. The maximum penalty is \$100,000 for each violation by a natural person and \$500,000 for each violation by an entity other than a natural person. Alternatively, the defendant is liable for the gain that resulted from violating securities law if the gain exceeds the statutory penalty. The court is also authorized to bar an individual who has committed securities fraud from serving as an officer or a director of a company registered under the securities law.

Third, the SEC can proceed administratively—that is, hold its own hearing, with the usual due process rights, before an administrative law judge. If the commissioners by majority vote accept the findings of the administrative law judge after reading briefs and hearing oral argument, they can impose a variety of sanctions: suspend or expel members of exchanges; deny, suspend, or revoke the registrations of broker-dealers; censure individuals for misconduct; and

bar censured individuals (temporarily or permanently) from employment with a registered firm. The 1990 securities law amendments allow the SEC to impose civil fines similar to the court-imposed fines described. The amendments also authorize the SEC to order individuals to cease and desist from violating securities law.

### **1.3 Securities Act of 1933**

#### **Goals**

The Securities Act of 1933 is the fundamental “truth in securities” law. Its two basic objectives, which are written in its preamble, are “to provide full and fair disclosure of the character of securities sold in interstate and foreign commerce and through the mails, and to prevent frauds in the sale thereof.”

#### **Registration**

The primary means for realizing these goals is the requirement of registration. Before securities subject to the act can be offered to the public, the issuer must file a registration statement and prospectus with the SEC, laying out in detail relevant and material information about the offering as set forth in various schedules to the act. If the SEC approves the registration statement, the issuer must then provide any prospective purchaser with the prospectus. Since the SEC does not pass on the fairness of price or other terms of the offering, it is unlawful to state or imply in the prospectus that the commission has the power to disapprove securities for lack of merit, thereby suggesting that the offering is meritorious.

The SEC staff examines the registration statement and prospectus, and if they appear to be materially incomplete or inaccurate, the commission may suspend or refuse the effectiveness of the registration statement until the deficiencies are corrected. Even after the securities have gone on sale, the agency has the power to issue a stop order that halts trading in the stock.

Section 5(c) of the act bars any person from making any sale of any security unless it is first registered. Nevertheless, there are certain classes of exemptions from the registration

requirement. Perhaps the most important of these is Section 4(3), which exempts “transactions by any person other than an issuer, underwriter or dealer.” Section 4(3) also exempts most transactions of dealers. So the net is that trading in outstanding securities (the secondary market) is exempt from registration under the Securities Act of 1933: you need not file a registration statement with the SEC every time you buy or sell securities through a broker or dealer, for example. Other exemptions include the following: (1) private offerings to a limited number of persons or institutions who have access to the kind of information registration would disclose and who do not propose to redistribute the securities; (2) offerings restricted to the residents of the state in which the issuing company is organized and doing business; (3) securities of municipal, state, federal and other government instrumentalities, of charitable institutions, of banks, and of carriers subject to the Interstate Commerce Act; (4) offerings not in excess of certain specified amounts made in compliance with regulations of the Commission...: and (5) offerings of “small business investment companies” made in accordance with rules and regulations of the Commission.

#### **1.4 Securities Exchange Act of 1934**

##### **Companies Covered**

The Securities Act of 1933 is limited, as we have just seen, to new securities issues—that is the primary market. The trading that takes place in the secondary market is far more significant, however. In a normal year, trading in outstanding stock totals some twenty times the value of new stock issues.

To regulate the secondary market, Congress enacted the Securities Exchange Act of 1934. This law, which created the SEC, extended the disclosure rationale to securities listed and registered for public trading on the national securities exchanges. Amendments to the act have brought within its ambit every corporation whose equity securities are traded over the counter if the company has at least \$10 million in assets and five hundred or more shareholders.

## Reporting Proxy Solicitation

Any company seeking listing and registration of its stock for public trading on a national exchange—or over the counter, if the company meets the size test—must first submit a registration application to both the exchange and the SEC. The registration statement is akin to that filed by companies under the Securities Act of 1933, although the Securities Exchange Act of 1934 calls for somewhat fewer disclosures. Thereafter, companies must file annual and certain other periodic reports to update information in the original filing.

The Securities Exchange Act of 1934 also covers proxy solicitation. Whenever management, or a dissident minority, seeks votes of holders of registered securities for any corporate purpose, disclosures must be made to the stockholders to permit them to vote yes or no intelligently.

### 1.5 Blue Sky Laws

Long before congressional enactment of the securities laws in the 1930s, the states had legislated securities regulations. Today, every state has enacted a blue sky law, so called because its purpose is to prevent “speculative schemes which have no more basis than so many feet of ‘blue sky.’ *Hall v. Geiger-Jones Co.*, 242 U.S. 539 (1917). The federal Securities Act of 1933, specifically preserves the jurisdiction of states over securities.

Blue sky laws are divided into three basic types of regulation. The simplest is that which prohibits fraud in the sale of securities. Thus at a minimum, issuers cannot mislead investors about the purpose of the investment. All blue sky laws have antifraud provisions; some have no other provisions. The second type calls for registration of broker-dealers, and the third type for registration of securities. Some state laws parallel the federal laws in intent and form of proceeding, so that they overlap; other blue sky laws empower state officials (unlike the SEC) to judge the merits of the offerings, often referred to as merit review laws. As part of a movement toward deregulation, several states have recently modified or eliminated merit provisions.

## 1.6 Dodd-Frank Wall Street Reform and Consumer Protection Act

In 2010, Congress passed the Dodd-Frank Wall Street Reform and Consumer Protection Act, which is the largest amendment to financial regulation in the United States since the Great Depression. This amendment was enacted in response to the economic recession of the late 2000s for the following purposes: (1) to promote the financial stability of the United States by improving accountability and transparency in the financial system, (2) to end “too big to fail” institutions, (3) to protect the American taxpayer by ending bailouts, and (4) to protect consumers from abusive financial services practices. The institutions most affected by the regulatory changes include those involved in monitoring the financial system, such as the Federal Deposit Insurance Corporation (FDIC) and the SEC. Importantly, the amendment ended the exemption for investment advisors who previously were not required to register with the SEC because they had fewer than fifteen clients during the previous twelve months and did not hold out to the public as investment advisors. This means that in practice, numerous investment advisors, as well as hedge funds and private equity firms, are now subject to registration requirements. For more information on the Dodd-Frank Wall Street Reform and Consumer Protection Act (Pub.L. 111-203, H.R. 4173), see Thomas, “Major Actions,” Bill Summary & Status 111th Congress (2009–2010) H.R.4173, <http://thomas.loc.gov/cgi-bin/bdquery/z?d111:HR04173:@@L&summ2=m&#major%20actions>.

## 1.7 The Foreign Corrupt Practices Act

Investigations by the Securities and Exchange Commission (SEC) and the Watergate Special Prosecutor in the early 1970s turned up evidence that hundreds of companies had misused corporate funds, mainly by bribing foreign officials to induce them to enter into contracts with or grant licenses to US companies. Because revealing the bribes would normally be self-defeating and, in any event, could be expected to stir up immense criticism, companies paying bribes routinely hid the payments in various accounts. As a result, one of many statutes enacted in the aftermath of Watergate, the Foreign Corrupt Practices Act (FCPA) of 1977, was incorporated into the 1934 Securities Exchange Act. The SEC’s legal interest in the matter is not

premised on the morality of bribery but rather on the falsity of the financial statements that are being filed.

Congress's response to abuses of financial reporting, the FCPA, was much broader than necessary to treat the violations that were uncovered. The FCPA prohibits an issuer (i.e., any US business enterprise), a stockholder acting on behalf of an issuer, and "any officer, director, employee, or agent" of an issuer from using either the mails or interstate commerce corruptly to offer, pay, or promise to pay anything of value to foreign officials, foreign political parties, or candidates if the purpose is to gain business by inducing the foreign official to influence an act of the government to render a decision favorable to the US corporation.

### **1.8 Insider Trading**

Corporate insiders—directors, officers, or important shareholders—can have a substantial trading advantage if they are privy to important confidential information. Learning bad news (such as financial loss or cancellation of key contracts) in advance of all other stockholders will permit the privileged few to sell shares before the price falls. Conversely, discovering good news (a major oil find or unexpected profits) in advance gives the insider a decided incentive to purchase shares before the price rises.

Because of the unfairness to those who are ignorant of inside information, federal law prohibits insider trading. Two provisions of the 1934 Securities Exchange Act are paramount: Section 16(b) and 10(b).

#### **Recapture of Short-Swing Profits: Section 16(b)**

The Securities Exchange Act assumes that any director, officer, or shareholder owning 10 percent or more of the stock in a corporation is using inside information if he or any family member makes a profit from trading activities, either buying and selling or selling and buying, during a six-month period. Section 16(b) penalizes any such person by permitting the corporation or a shareholder suing on its behalf to recover the short-swing profits. The law

applies to any company with more than \$10 million in assets and at least five hundred or more shareholders of any class of stock.

The SEC charged several TGS officers and directors with having purchased or told their friends, so-called tippees, to purchase TGS stock from November 12, 1963, through April 16, 1964, on the basis of material inside information. The SEC also alleged that the April 12, 1964, press release was deceptive. The US Court of Appeals, in *SEC v. Texas Gulf Sulphur Co.*, 401 F.2d 833 (2d Cir. 1968); decided that the defendants who purchased the stock before the public announcement had violated Rule 10b-5. According to the court, “anyone in possession of material inside information must either disclose it to the investing public, or, if he is disabled from disclosing to protect a corporate confidence, or he chooses not to do so, must abstain from trading in or recommending the securities concerned while such inside information remains undisclosed.” On remand, the district court ordered certain defendants to pay \$148,000 into an escrow account to be used to compensate parties injured by the insider trading.

### **1.9 Sarbanes-Oxley Act**

Congress enacted the Sarbanes-Oxley Act in 2002 in response to major corporate and accounting scandals, most notably those involving Enron, Tyco International, Adelphia, and WorldCom. The act created the Public Company Accounting Oversight Board, which oversees, inspects, and regulates accounting firms in their capacity as auditors of public companies. As a result of the act, the SEC may include civil penalties to a disgorgement fund for the benefit of victims of the violations of the Securities Act of 1933 and the Securities Exchange Act of 1934.

## Chapter 32 Antitrust Law (Hardbound chapter 48)

This chapter will describe the history and current status of federal laws to safeguard the US market from anticompetitive practices, especially those of very large companies that may have a monopoly. Companies that have a monopoly in any market segment have the potential to exercise monopoly power in ways that are harmful to consumers and competitors. Economic theory assures us that for the most part, competition is good: that sound markets will offer buyers lots of choices and good information about products and services being sold and will present few barriers to entry for buyers and sellers. By encouraging more, rather than fewer, competitors in a given segment of the market, US antitrust law attempts to preserve consumer choice and to limit barriers to entry, yet it does allow some businesses to achieve considerable size and market share on the belief that size can create efficiencies and pass along the benefits to consumers.

### **32.1 History and Basic Framework of Antitrust Laws in the United States**

In this chapter, we take up the origins of the federal antitrust laws and the basic rules governing restraints of trade. Sherman Act, Section 1; Clayton Act, Section 3. We also look at concentrations of market power: monopoly and acquisitions and mergers. Sherman Act, Section 2; Clayton Act, Section 7.

The antitrust laws are aimed at maintaining competition as the driving force of the US economy. The very word *antitrust* implies opposition to the giant trusts that began to develop after the Civil War. Until then, the economy was largely local; manufacturers, distributors, and retailers were generally small. The Civil War demonstrated the utility of large-scale enterprise in meeting the military's ferocious production demands, and business owners were quick to understand the advantage of size in attracting capital. For the first time, immense fortunes could be made in industry, and adventurous entrepreneurs were quick to do so in an age that lauded the acquisitive spirit.

The first great business combinations were the railroads. To avoid ruinous price wars, railroad owners made private agreements, known as “pools,” through which they divided markets and offered discounts to favored shippers who agreed to ship goods on certain lines. The pools discriminated against particular shippers and certain geographic regions, and public resentment grew.

Farmers felt the effects first and hardest, and they organized politically to express their opposition. In time, they persuaded many state legislatures to pass laws regulating railroads. In *Munn v. Illinois*, the Supreme Court rejected a constitutional attack on a state law regulating the transportation and warehousing of grain; the court declared that the “police powers” of the states permit the regulation of property put to public uses. *Munn v. Illinois*, 94 U.S. 113 (1877). But over time, many state railroad laws were struck down because they interfered with interstate commerce, which only Congress may regulate constitutionally. The consequence was federal legislation: the Interstate Commerce Act of 1887, establishing the first federal administrative agency, the Interstate Commerce Commission.

Consumers howled in protest. The political parties got the message: In 1888, both Republicans and Democrats put an antitrust plank in their platforms. In 1889, the new president, Republican Benjamin Harrison, condemned monopolies as “dangerous conspiracies” and called for legislation to remedy the tendency of monopolies that would “crush out” competition.

The result was the Sherman Antitrust Act of 1890, sponsored by Senator John Sherman of Ohio. Its two key sections forbade combinations in restraint of trade and monopolizing. Senator Sherman and other sponsors declared that the act had roots in a common-law policy that frowned on monopolies. To an extent, it did, but it added something quite important for the future of business and the US economy: the power of the federal government to enforce a national policy against monopoly and restraints of trade. Nevertheless, passage of the Sherman Act did not end the public clamor, because fifteen years passed before a national administration began to enforce the act, when President Theodore Roosevelt—the

Trustbuster”—sent his attorney general after the Northern Securities Corporation, a transportation holding company.

The Sherman, Clayton, and FTC Acts remain the basic texts of antitrust law. Over the years, many states have enacted antitrust laws as well; these laws govern intrastate competition and are largely modeled on the federal laws. The various state antitrust laws are beyond the scope of this textbook.

Two additional federal statutes were adopted during the next third of a century as amendments to the Clayton Act. Enacted in the midst of the Depression in 1936, the Robinson-Patman Act prohibits various forms of price discrimination. The Celler-Kefauver Act, strengthening the Clayton Act’s prohibition against the acquisition of competing companies, was enacted in 1950 in the hopes of stemming what seemed to be a tide of corporate mergers and acquisitions. We will examine these laws in turn.

### 1.1 The Sherman Act

Section 1 of the Sherman Act declares, “Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is declared to be illegal.” This is sweeping language. What it embraces seems to depend entirely on the meaning of the words “restraint of trade or commerce.” Whatever they might mean, *every* such restraint is declared unlawful. But in fact, as we will see, the proposition cannot be stated quite so categorically, for in 1911 the Supreme Court limited the reach of this section to *unreasonable* restraints of trade.

What does “restraint of trade” mean? The Sherman Act’s drafters based the act on a common-law policy against monopolies and other infringements on competition. But common law regarding restraints of trade had been developed in only rudimentary form, and the words have come to mean whatever the courts say they mean. In short, the antitrust laws, and the Sherman Act in particular, authorize the courts to create a federal “common law” of competition.

## 1.2 The Clayton Act

The Clayton Act was enacted in 1914 to plug what many in Congress saw as loopholes in the Sherman Act. Passage of the Clayton Act was closely linked to that of the FTC Act. Unlike the Sherman Act, the Clayton Act is not a criminal statute; it merely declares certain defined practices as unlawful and leaves it to the government or to private litigants to seek to enjoin those practices. But unlike the FTC Act, the Clayton Act does spell out four undesirable practices. Violations of the Sherman Act require an *actual* adverse impact on competition, whereas violations of the Clayton Act require merely a *probable* adverse impact. Thus the enforcement of the Clayton Act involves a prediction that the defendant must rebut in order to avoid an adverse judgment.

The four types of proscribed behavior are these:

1. Discrimination in prices charged different purchasers of the same commodities.
2. Conditioning the sale of one commodity on the purchaser's refraining from using or dealing in commodities of the seller's competitors. Clayton Act, Section 3.
3. Acquiring the stock of a competing corporation. Clayton Act, Section 7. Because the original language did not prohibit various types of acquisitions and mergers that had grown up with modern corporate law and finance, Congress amended this section in 1950 (the Celler-Kefauver Act) to extend its prohibition to a wide variety of acquisitions and mergers.
4. Membership by a single person on more than one corporate board of directors if the companies are or were competitors. Clayton Act, Section 8.

## 1.3 The Federal Trade Commission Act

Like the Clayton Act, the FTC Act is a civil statute, involving no criminal penalties. Unlike the Clayton Act, its prohibitions are broadly worded. Its centerpiece is Section 5, which forbids "unfair methods of competition in commerce, and unfair or deceptive acts or practices in commerce."

The Justice Department may enforce violations of the Sherman and Clayton Acts by seeking injunctions in federal district court. The injunction can be a complex set of instructions, listing in some detail the practices that a defendant is to avoid and even the way in which it will be required to conduct its business thereafter. Once an injunction is issued and affirmed on appeal, or the time for appeal has passed, it confers continuing jurisdiction on the court to hear complaints by those who say the defendant is violating it. In a few instances, the injunction or a consent decree is in effect the basic “statute” by which an industry operates. A 1956 decree against American Telephone & Telegraph Company (AT&T) kept the company out of the computer business for a quarter-century, until the government’s monopoly suit against AT&T was settled and a new decree issued in 1983. The federal courts also have the power to break up a company convicted of monopolizing or to order divestiture when the violation consists of unlawful mergers and acquisitions.

Rather than litigate a case fully, defendants may agree to consent decrees, in which, without admitting guilt, they agree not to carry on the activity complained of. Violations of injunctions, cease and desist orders, and consent decrees subject companies to a fine of \$10,000 a day for every day the violation continues. Companies frequently enter into consent decrees—and not just because they wish to avoid the expense and trouble of trial. Section 5 of the Clayton Act says that whenever an antitrust case brought by the federal government under either the Clayton Act or the Sherman Act goes to final judgment, the judgment can be used, in a private suit in which the same facts are at issue, as prima facie evidence that the violation was committed. This is a powerful provision, because it means that a private plaintiff need prove only that the violation in fact injured him. He need not prove that the defendant committed the acts that amount to antitrust violations. Since this provision makes it relatively easy for private plaintiffs to prevail in subsequent suits, defendants in government suits have a strong inducement to enter into consent decrees, because these are not considered judgments. Likewise, a guilty plea in a criminal case gives the plaintiff in a later private civil suit prima facie evidence of the defendant’s liability. However, a plea of nolo contendere will avoid this result. Section 5 has been the spur for a considerable proportion of all private antitrust suits. For

example, the government's price-fixing case against the electric equipment industry that sent certain executives of General Electric to jail in the 1950s led to more than 2,200 private suits.

## 1.4 Price-Fixing

### Direct Price-Fixing Agreements

Price-fixing agreements are per se violations of Section 1 of the Sherman Act. The per se rule was announced explicitly in *United States v. Trenton Potteries*, 273 U.S. 392 (1927). In that case, twenty individuals and twenty-three corporations, makers and distributors of 82 percent of the vitreous pottery bathroom fixtures used in the United States, were found guilty of having agreed to establish and adhere to a price schedule. On appeal, they did not dispute that they had combined to fix prices. They did argue that the jury should have been permitted to decide whether what they had done was reasonable. The Supreme Court disagreed, holding that any fixing of prices is a clear violation of the Sherman Act.

Twenty-four years later, the Court underscored this categorical per se rule in *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons*, 340 U.S. 211 (1951). The defendants were distillers who had agreed to sell liquor only to those wholesalers who agreed to resell it for no more than a *maximum* price set by the distillers. The defendants argued that setting maximum prices did not violate the Sherman Act because such prices promoted rather than restrained competition. Again, the Supreme Court disagreed: “[S]uch agreements, no less than those to fix minimum prices, cripple the freedom of traders and thereby restrain their ability to sell in accordance with their own judgment.”

### Exchanging Price Information

Knowledge of competitors' prices can be an effective means of controlling prices throughout an industry. Members of a trade association of hardwood manufacturers adopted a voluntary “open competition” plan. About 90 percent of the members adhered to the plan. They accounted for one-third of the production of hardwood in the United States. Under the plan, members reported daily on sales and deliveries and monthly on production, inventory, and

prices. The association, in turn, sent out price, sales, and production reports to the participating members. Additionally, members met from time to time to discuss these matters, and they were exhorted to refrain from excessive production in order to keep prices at profitable levels. In *American Column and Lumber Company v. United States*, the Supreme Court condemned this plan as a per se violation of Section 1 of the Sherman Act. *American Column and Lumber Company v. United States*, 257 U.S. 377 (1921).

### **Controlling Output**

Competitors also fix prices by controlling an industry's output. For example, competitors could agree to limit the amount of goods each company makes or by otherwise limiting the amount that comes to market. This latter technique was condemned in *United States v. Socony-Vacuum Oil Co.*, 310 U.S. 150 (1940). To prevent oil prices from dropping, dominant oil companies agreed to and did purchase from independent refiners surplus gasoline that the market was forcing them to sell at distress prices. By buying up this gasoline, the large companies created a price floor for their own product. This conduct, said the Court, is a per se violation.

## **1.5 Nonprice Restraints of Trade**

### **Allocating Territories**

Suppose four ice-cream manufacturers decided one day that their efforts to compete in all four corners of the city were costly and destructive. Why not simply strike a bargain: each will sell ice cream to retail shops in only one quadrant of the city. This is not a pricing arrangement; each is free to sell at whatever price it desires. But it is a restraint of trade, for in carving up the territory in which each may sell, they make it impossible for grocery stores to obtain a choice among all four manufacturers. The point becomes obvious when the same kind of agreement is put on a national scale: suppose Ford and Toyota agreed that Ford would not sell its cars in New York and Toyota would not sell Toyotas in California.

### **Boycotts**

Agreements by competitors to boycott (refuse to deal with) those who engage in undesirable practices are unlawful. In an early case, a retailers' trade association circulated a list of wholesale distributors who sold directly to the public. The intent was to warn member retailers not to buy from those wholesalers. Although each member was free to act however it wanted, the Court saw in this blacklist a plan to promote a boycott. *Eastern State Lumber Dealers' Association v. United States*, 234 U.S. 600 (1914).

### **Resale Price Maintenance**

Is it permissible for manufacturers to require distributors or retailers to sell products at a set price? Generally, the answer is no, but the strict per se rule against any kind of resale price maintenance has been somewhat relaxed.

But why would a manufacturer want to fix the price at which the retailer sells its goods? There are several possibilities. For instance, sustained, long-term sales of many branded appliances and other goods depend on reliable servicing by the retailer. Unless the retailer can get a fair price, it will not provide good service. Anything less than good service will ultimately hurt the brand name and lead to fewer sales. Another possible argument for resale price maintenance is that unless all retailers must abide by a certain price, some goods will not be stocked at all. For instance, the argument runs, bookstores will not stock slow-selling books if they cannot be guaranteed a good price on best sellers. Stores free to discount best sellers will not have the profit margin to stock other types of books. To guarantee sales of best sellers to bookstores carrying many lines of books, it is necessary to put a floor under the price of books. Still another argument is that brand-name goods are inviting targets for loss-leader sales; if one merchant drastically discounts Extremis Widgets, other merchants may not want to carry the line, and the manufacturer may experience unwanted fluctuations in sales.

None of these reasons has completely appeased the critics of price-fixing, including the most important critics—the US federal judges. As long ago as 1910, in *Dr. Miles Medical Co. v. John D. Park & Sons Co.*, the Supreme Court declared vertical price-fixing (what has come to be called resale price maintenance) unlawful under the Sherman Act. Dr. Miles Medical Company

required wholesalers that bought its proprietary medicines to sign an agreement in which they agreed not to sell below a certain price and not to sell to retailers who did not have a “retail agency contract” with Dr. Miles. The retail agency contract similarly contained a price floor. Dr. Miles argued that since it was free to make or not make the medicines, it should be free to dictate the prices at which purchasers could sell them. The Court said that Dr. Miles’s arrangement with more than four hundred jobbers (wholesale distributors) and twenty-five thousand retailers was no different than if the wholesalers or retailers agreed among themselves to fix the price. Dr. Miles “having sold its product at prices satisfactory to itself, the public is entitled to whatever advantage may be derived from a competition in the subsequent traffic.” *Dr. Miles Medical Co. v. John D. Park & Sons Co.*, 220 U.S. 373 (1910).

### 1.6 Exclusive Dealing and Tying

We move now to a nonprice vertical form of restraint. Suppose you went to the grocery store intent on purchasing a bag of potato chips to satisfy a late-night craving. Imagine your surprise—and indignation—if the store manager waved a paper in your face and said, “I’ll sell you this bag only on the condition that you sign this agreement to buy all of your potato chips in the next five years from me.” Or if he said, “I’ll sell only if you promise never to buy potato chips from my rival across the street.” This is an exclusive dealing agreement, and if the effect may be to lessen competition substantially, it is unlawful under Section 3 of the Clayton Act. It also may be unlawful under Section 1 of the Sherman Act and Section 5 of the Federal Trade Commission (FTC) Act. Another form of exclusive dealing, known as a tying contract, is also prohibited under Section 3 of the Clayton Act and under the other statutes. A tying contract results when you are forced to take a certain product in order to get the product you are really after: “I’ll sell you the potato chips you crave, but only if you purchase five pounds of my Grade B liver.”

## 32.4 Price Discrimination: The Robinson-Patman Act

If the relatively simple and straightforward language of the Sherman Act can provide litigants and courts with interpretive headaches, the law against price discrimination—the Robinson-Patman Act—can strike the student with a crippling migraine. Technically, Section 2 of the Clayton Act, the Robinson-Patman Act, has been verbally abused almost since its enactment in 1936. It has been called the “Typhoid Mary of Antitrust,” a “grotesque manifestation of the scissors and paste-pot method” of draftsmanship. Critics carp at more than its language; many have asserted over the years that the act is anticompetitive because it prevents many firms from lowering their prices to attract more customers.

Despite this rhetoric, the Robinson-Patman Act has withstood numerous attempts to modify or repeal it, and it can come into play in many everyday situations. Although in recent years the Justice Department has declined to enforce it, leaving government enforcement efforts to the Federal Trade Commission (FTC), *private* plaintiffs are actively seeking treble damages in numerous cases. So whether it makes economic sense or not, the act is a living reality for marketers. This section introduces certain problems that lurk in deciding how to price goods and how to respond to competitors’ prices.

The Clayton Act’s original Section 2, enacted in 1914, was aimed at the price-cutting practice of the large trusts, which would reduce the price of products below cost where necessary in a particular location to wipe out smaller competitors who could not long sustain such losses. But the original Clayton Act exempted from its terms any “discrimination in price...on account of differences in the quantity of the commodity sold.” This was a gaping loophole that made it exceedingly difficult to prove a case of price discrimination.

Not until the Depression in the 1930s did sufficient cries of alarm over price discrimination force Congress to act. The alarm was centered on the practices of large grocery chains. Their immense buying power was used as a lever to pry out price discounts from food processors and wholesalers. Unable to extract similar price concessions, the small mom-and-pop grocery stores found that they could not offer the retail customer the lower food prices set by the chains. The small shops began to fail. In 1936, Congress strengthened Section 2 by enacting the Robinson-

Patman Act. Although prompted by concern about how large buyers could use their purchasing power, the act in fact places most of its restrictions on the pricing decisions of sellers.

#### **4.1 Discrimination by the Seller**

##### **Preliminary Matters:**

##### **Simultaneous Sales**

To be discriminatory, the different prices must have been charged in sales made at the same time or reasonably close in time. What constitutes a reasonably close time depends on the industry and the circumstances of the marketplace. The time span for dairy sales would be considerably shorter than that for sales of mainframe computers, given the nature of the product, the frequency of sales, the unit cost, and the volatility of the markets.

##### **Identity of Purchaser**

Another preliminary issue is the identity of the actual purchaser. A supplier who deals through a dummy wholesaler might be charged with price discrimination even though on paper only one sale appears to have been made. Under the “indirect purchaser” doctrine, a seller who deals with two or more retail customers but passes their orders on to a single wholesaler and sells the total quantity to the wholesaler in one transaction, can be held to have violated the act. The retailers are treated as indirect purchasers of the supplier.

## **32.5 Exemptions**

### **5.1 Regulated Industries**

Congress has subjected several industries to oversight by specific regulatory agencies. These include banking, securities and commodities exchanges, communications, transportation, and fuel and energy. The question often arises whether companies within those industries are immune to antitrust attack. No simple answer can be given. As a general rule, activities that fall directly within the authority of the regulatory agency are immune. The agency is said to have exclusive jurisdiction over the conduct—for example, the rate structure of the national stock

exchanges, which are supervised by the Securities and Exchange Commission. But determining whether a particular case falls within a specific power of an agency is still up to the courts, and judges tend to read the antitrust laws broadly and the regulatory laws narrowly when they seem to clash. A doctrine known as primary jurisdiction often dictates that the question of regulatory propriety must first be submitted to the agency before the courts will rule on an antitrust question. If the agency decides the activity complained of is otherwise impermissible, the antitrust question becomes moot.

## **5.2 Organized Labor**

In the Clayton Act, Congress explicitly exempted labor unions from the antitrust laws in order to permit workers to band together. Section 6 says that “the labor of a human being is not a commodity or article of commerce. Nothing contained in the antitrust laws shall be construed to forbid the existence and operation of labor...organizations,...nor shall such organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the antitrust laws.” This provision was included to reverse earlier decisions of the courts that had applied the Sherman Act more against labor than business. Nevertheless, the immunity is not total, and unions have run afoul of the laws when they have combined with nonlabor groups to achieve a purpose unlawful under the antitrust laws. Thus a union could not bargain with an employer to sell its products above a certain price floor.

## **5.3 Insurance Companies**

Under the McCarran-Ferguson Act of 1945, insurance companies are not covered by the antitrust laws to the extent that the states regulate the business of insurance. Whether or not the states adequately regulate insurance and the degree to which the exemption applies are complex questions, and there has been some political pressure to repeal the insurance exemption.

## 5.4 State Action

In 1943, the Supreme Court ruled in *Parker v. Brown* that when a valid state law regulates a particular industry practice and the industry members are bound to follow that law, then they are exempt from the federal antitrust laws. *Parker v. Brown*, 317 U.S. 341 (1943). Such laws include regulation of public power and licensing and regulation of the professions. This exemption for “state action” has proved troublesome and, like the other exemptions, a complex matter to apply. But it is clear that the state law must require or compel the action and not merely permit it. No state law would be valid if it simply said, “Bakers in the state may jointly establish tariffs for the sale of cookies.”

The recent trend of Supreme Court decisions is to construe the exemption as narrowly as possible. A city, county, or other subordinate unit of a state is not immune under the *Parker* doctrine. A municipality can escape the consequences of antitrust violations—for example, in its operation of utilities—only if it is carrying out express policy of the state. Even then, a state-mandated price-fixing scheme may not survive a federal antitrust attack. New York law required liquor retailers to charge a certain minimum price, but because the state itself did not actively supervise the policy it had established, it fell to the Supreme Court’s antitrust axe.

## 5.5 Baseball

Baseball, the Supreme Court said back in 1923, is not “in commerce.” Congress has never seen fit to overturn this doctrine. Although some inroads have been made in the way that the leagues and clubs may exercise their power, the basic decision stands. Some things are sacred.

## Chapter 33 Unfair Trade Practices and the Federal Trade Commission (Hardbound chapter 49)

### **33.1 The Federal Trade Commission: Powers and Law Governing Deceptive Acts**

#### 1.1 General Powers of the Federal Trade Commission

Common law prohibited a variety of trade practices unfair either to competitors or to consumers. These included passing off one's products as though they were made by someone else, using a trade name confusingly similar to that of another, stealing trade secrets, and various forms of misrepresentation. In the Federal Trade Commission Act of 1912, Congress for the first time empowered a federal agency to investigate and deter acts of unfair competition.

Deceptive practices that the FTC has prosecuted are also amenable to suit at common law. A tire manufacturer who advertises that his "special tire" is "new" when it is actually a retread has committed a common-law misrepresentation, and the buyer could sue for rescission of the contract or for damages. But having a few buyers sue for misrepresentation does not stop the determined fraudster. Moreover, such lawsuits are expensive to bring, and the amount of damages awarded is usually small; thus law actions alone cannot adequately address deliberately fraudulent practices.

#### 1.2 General Principles of Law Governing Deceptive Acts and Practices

With a staff of some sixteen hundred and ten regional offices, the FTC is, at least from time to time, an active regulatory agency. The FTC's enforcement vigor waxes and wanes with the economic climate. Critics have often charged that what the FTC chooses to investigate defies common sense because so many of the cases seem to involve trivial, or at least relatively unimportant, offenses: Does the nation really need a federal agency to guard us against pronouncements by singer Pat Boone on the efficacy of acne medication or to ensure the authenticity of certain crafts sold to tourists in Alaska as "native"? One answer is that through such cases, important principles of law are declared and ratified.

## 33.2 Deceptive Acts and Practices

### 2.1 Failure to Disclose Pertinent Facts

Businesses are under no general obligation to disclose everything. Advertisers may put a bright face on their products as long as they do not make a direct material misrepresentation or misstatement. But under certain circumstances, a business may be required to disclose more than it did in order not to be involved in unfair or deceptive acts and practices. For example, failure to state the cost of a service might constitute deception. Thus a federal court has ruled that it is deceptive for a telephone service to fail to disclose that it cost fifteen dollars per call for customers dialing a special 900 number listed in newspaper advertisements offering jobs. *FTC v. Transworld Courier Services, Inc.*, 59 A&TR Rpt. 174 (N.D. Ga. 1990). Likewise, if a fact not disclosed might have a material bearing on a consumer's decision whether to purchase the product, its omission might be tantamount to deception.

### 2.2 Descriptions of Products

Although certain words are considered mere puffery (*greatest, best*), other words, which have more precise connotations, can cause trouble if they are misused. One example is the word *new*. In most cases, the Federal Trade Commission (FTC) has held that if a product is more than six months old, it is not new and may not lawfully be advertised as such.

The efficacy of products is perhaps their most often advertised aspect. An ad stating that a product will do more than it can is almost always deceptive if the claim is specific. Common examples that the FTC continues to do battle over are claims that a cream, pill, or other substance will "rejuvenate" the body, "cure" baldness, "permanently remove" wrinkles, or "restore" the vitality of hair.

The composition of goods is another common category of deceptive claims. For example, a product advertised as "wool" had better be 100 percent wool; a mixture of wool and synthetic fabrics cannot be advertised as wool. The FTC has lists of dozens of descriptive words with appropriate definitions.

Labeling of certain products is strictly regulated by specific statutes. Under the Food, Drug, and Cosmetic Act, artificial colors and flavors must be disclosed. Other specific federal statutes include the Wool Products Labeling Act, the Textile Fiber Products Identification Act, the Fur Products Labeling Act, and the Flammable Fabrics Act; these acts are enforced by the FTC. In 1966, Congress enacted the Fair Packaging and Labeling Act. It governs most consumer products and gives the FTC authority to issue regulations for proper labeling of most of them. In particular, the statute is designed to help standardize quantity descriptions (“small,” “medium,” and “large”) and enable shoppers to compare the value of competing goods in the stores.

### **2.3 Misleading Price and Savings Claims**

“Buy one, get another for half price.” “Suggested retail price: \$25. Our price: \$5.95.” “Yours for only \$95. You save \$50.” Claims such as these assault the eye and ear daily. Unless these ads are strictly true, they are violations of Section 5 of the FTC Act. To regulate deceptive price and savings claims, the FTC has issued a series of *Guides against Deceptive Pricing* that set forth certain principles by which the commission will judge the merits of price claims. These guides are not themselves law, but they are important clues to how the FTC will act when faced with a price claim case and they may even provide guidance to state courts hearing claims of deceptive pricing ads.

In general, the guides deal with five claims, as follows:

- **Comparisons of the sale price to a former price.** The former price must have been offered for a substantial period of time in the near past for a seller to be justified in referring to it. A product that once had a price tag of \$50, but that never actually sold for more than \$40, cannot be hawked at “the former price of \$50.” Under the FTC guides, a reduction of at least 10 percent is necessary to make the claim true.
- **Comparable products.** “This same mattress and box spring would cost you \$450 at retail.” The advertisement is true only if the seller is in fact offering the same merchandise and if the price quoted is genuine.

- **“Suggested” retail price.** The same rules apply as those just mentioned. But in the case of a “manufacturer’s suggested” price, an additional wrinkle can occur: the manufacturer might help the retailer deceive by listing a “suggested” price that is in fact considerably greater than the going price in the retailer’s trading area. Whether it is the manufacturer who is doing his own selling or the retailer who takes advantage of the “list price” ticket on the goods, the resulting claim of a bargain is deceptive if the product does not sell for the list price in any market or in the market of the retailer.
- **Bargain based on the purchase of something else.** The usual statement in these cases is “Buy one, get one free” (or at some percentage of the usual selling price). Again, the watchwords are *literal accuracy*. If the package of batteries normally sells in the advertiser’s store for ninety-nine cents, and two packages are now selling for that price, then the advertisement is unexceptionable. But advertisers are often tempted to raise the original selling price or reduce the size or quantity of the bargain product; doing so is deceptive.
- **False claims to explain a “sale” price.** “Giant clearance sale” or “going out of business” or “limited offer” are common advertising gimmicks. If true, they are legitimate, but it takes very little to make them deceptive. A “limited offer” that goes on forever (or a sale price charged beyond the date on which a sale is said to end) is deceptive. Likewise, false claims that imply the manufacturer is charging the customer a small price are illegitimate. These include claims like “wholesale price,” “manufacturer’s close-outs,” “irregulars,” or “seconds.”

## 2.4 Bait-and-Switch Advertisements

A common sales pitch in retail is the bait and switch. The retailer “baits” the prospective customer by dangling an alluring offer, but the offer either disappears or is disparaged once the customer arrives. Suppose someone sees this advertisement: “Steinway Grand Piano—only \$1,000.” But when the customer arrives at the store, he finds that the advertised product has “sold out.” The retailer then tries to sell the disappointed customer a higher priced product. Or the salesperson may have the product, but she will disparage it—pointing out that it does not

really live up to the advertised expectations—and will exhort the customer to buy the “better,” more expensive model. These and related tactics are all violations of Section 5 of the FTC Act. In its *Guides Against Bait Advertising*, the FTC lists several such unfair practices, including the following: (1) refusing to demonstrate the advertised product, (2) disparaging the product (e.g., by exhibiting a visibly inferior grade of product next to higher-priced merchandise), (3) failing to stock enough of the advertised product to meet anticipated demand (although the advertiser may say “supplies limited,” if that is the case), (4) stating that delivery of the advertised product will take an inordinate amount of time, (5) demonstrating a defective product, and (6) deliberately discouraging the would-be buyer from purchasing the advertised product.

## **2.5 Free Offers**

Careless advertisers will discover that *free*, perhaps the most powerful word in advertising, comes at a cost. As just noted, a product is not free if it is conditional on buying another product and the price of the “free” product is included in the purchased product (“Buy one tube and get another tube free”). Just how far the commission is prepared to take this rule is clear from *F.T.C. v. Mary Carter Paint Co.*, 382 U.S. 46 (1965). In that case, the company offered, from the time it began business, to sell on a two-for-one basis: “every second can FREE, gallon or quart.” The problem was that it had never priced and sold single cans of paint, so the FTC assumed that the price of the second can was included in the first, even though Mary Carter claimed it had established single-can prices that were comparable to those for paint of comparable quality sold by competing manufacturers. The Supreme Court sustained the commission’s finding of deception.

## **2.6 Product Comparisons and Disparagements**

Product disparagement—saying defamatory things about a competitor’s product—is a common-law tort, actionable under state law. It is also actionable under Section 5 of the FTC Act. The FTC brands as disparagement the making of specific untrue statements about a competitor’s product. The agency labels an indirect form of disparagement “comparative misrepresentation”—making false claims of superiority of one’s own product. Again, the

common-law puffing rule would permit the manufacturer of an over-the-counter pain reliever to make the general statement “Our pill is the best.” But the claim that a pill “works three times as fast as the leading competitor’s” violates Section 5 if untrue.

### **33.3 Unfair Trade Practices**

#### **3.1 Contests and Sweepstakes**

In 1971, the FTC obtained a consent order from *Reader’s Digest* barring it from promoting a mail-order sweepstakes—a sweepstakes in which those responding had a chance to win large monetary or other prizes by returning numbered tickets—unless the magazine expressly disclosed how many prizes would be awarded and unless all such prizes were in fact awarded. *Reader’s Digest* had heavily promoted the size and number of prizes, but few of the winning tickets were ever returned, and consequently few of the prizes were ever actually awarded. *Reader’s Digest Assoc.*, 79 F.T.C. 599 (1971).

#### **3.2 Door-to-Door, Direct Mail, and Unsolicited Merchandise**

In 1974, the FTC promulgated a TRR requiring a three-day cooling-off period within which any door-to-door sales contract can be cancelled. The contract must state the buyer’s right to the cooling-off period.

For many years, certain unscrupulous distributors would mail unsolicited merchandise to consumers and demand payment through a series of dunning letters and bills. In 1970, Congress enacted legislation that declares any unsolicited mailing and subsequent dunning to be an unfair trade practice under Section 5 of the FTC Act. Under this law, if you receive an

unsolicited product in the mail, you may treat it as a gift and use it; you are under no obligation to return it or pay for it.

Another regulation of mail-order sales is the FTC's TRR concerning mail-order merchandise. Any direct-mail merchandiser must deliver the promised goods within thirty days or give the consumer an option to accept delayed delivery or a prompt refund of his money or cancellation of the order if it has not been prepaid.

### 33.4 Remedies

The Federal Trade Commission (FTC) has a host of weapons in its remedial arsenal. It may issue cease and desist orders against unfair and deceptive acts and practices and let the punishment fit the crime. For instance, the FTC can order a company to remove or modify a deceptive trade name. It may order companies to substantiate their advertising. Or if a company fails to disclose facts about a product, the commission may order the company to affirmatively disclose the facts in future advertising.

The FTC has often exercised its power to order affirmative disclosures during the past decade, but its power to correct advertising deceptions is even broader. In *Warner Lambert Co. v. Federal Trade Commission*, the US court of appeals in Washington, using corrective advertising, approved the commission's power to order a company to *correct* in future advertisements its former misleading and deceptive statements regarding Listerine mouthwash should it choose to continue to advertise the product. *Warner Lambert Co. v. Federal Trade Commission*, 562 F.2d 749 (D.C. Cir. 1977), *cert. denied*, 435 U.S. 950 (1978). The court also approved the FTC's formula for determining how much the company must spend: an amount equal to the average annual expenditure on advertising the mouthwash during the ten years preceding the case.

## Chapter 34 [Employment Law \(Hardbound chapter 50\)](#)

In the next chapter, we will examine the laws that govern the relationship between the employer and the employee who belongs, or wants to belong, to a union. Although federal labor law is confined to that relationship, laws dealing with the employment relationship—both state and federal—are far broader than that. Because most employees do not belong to unions, a host of laws dealing with the many faces of discrimination shapes employers' power over and duties to their employees. Beyond the issue of discrimination, the law also governs a number of other issues, such as the extent to which an employer may terminate the relationship itself. We examine these issues later in this chapter.

Even before statutes governing collective bargaining and various state and federal discrimination laws, the common law set the boundaries for employer-employee relationships. The basic rule that evolved prior to the twentieth century was "employment at will." We will look at employment at will toward the end of this chapter. But as we go through the key statutes on employment law and employment discrimination, bear in mind that these statutes stand as an important set of exceptions to the basic common-law rule of employment at will. That rule holds that in the absence of a contractual agreement otherwise, an employee is free to leave employment at any time and for any reason; similarly, an employer is free to fire employees at any time and for any reason.

### **34.1 Employment at Will**

At common law, an employee without a contract guaranteeing a job for a specific period was an employee at will and could be fired at any time and for any reason, or even for no reason at all. The various federal statutes we have just examined have made inroads on the at-will doctrine.

Another federal statute, the Occupational Safety and Health Act, prohibits employers from discharging employees who exercise their rights under that law.

The courts and legislatures in more than forty states have made revolutionary changes in the at-will doctrine. They have done so under three theories: tort, contract, and duty of good faith and fair dealing. We will first consider the tort of wrongful discharge.

Courts have created a major exception to the employment-at-will rule by allowing the tort of wrongful discharge. *Wrongful discharge* means firing a worker for a bad reason. What is a bad reason? A bad reason can be (1) discharging an employee for refusing to violate a law, (2) discharging an employee for exercising a legal right, (3) discharging an employee for performing a legal duty, and (4) discharging an employee in a way that violates public policy.

### **1.1 Discharging an Employee for Refusing to Violate a Law**

Some employers will not want employees to testify truthfully at trial. In one case, a nurse refused a doctor's order to administer a certain anesthetic when she believed it was wrong for that particular patient; the doctor, angry at the nurse for refusing to obey him, then administered the anesthetic himself. The patient soon stopped breathing. The doctor and others could not resuscitate him soon enough, and he suffered permanent brain damage. When the patient's family sued the hospital, the hospital told the nurse she would be in trouble if she testified. She did testify according to her oath in the court of law (i.e., truthfully), and after several months of harassment, was finally fired on a pretext. The hospital was held liable for the tort of wrongful discharge. As a general rule, you should not fire an employee for refusing to break the law.

### **1.2 Discharging an Employee for Exercising a Legal Right**

Suppose Bob Berkowitz files a claim for workers' compensation for an accident at Pacific Gas & Electric, where he works and where the accident that injured him took place. He is fired for doing so, because the employer does not want to have its workers' comp premiums increased. In this case, the right exercised by Berkowitz is supported by public policy: he has a legal right to

file the claim, and if he can establish that his discharge was caused by his filing the claim, he will prove the tort of wrongful discharge.

### 1.3 Discharging an Employee for Performing a Legal Duty

Courts have long held that an employee may not be fired for serving on a jury. This is so even though courts do recognize that many employers have difficulty replacing employees called for jury duty. Jury duty is an important civic obligation, and employers are not permitted to undermine it.

### 1.4 Discharging an Employee in a Way That Violates Public Policy

This is probably the most controversial basis for a tort of wrongful discharge. There is an inherent vagueness in the phrase “basic social rights, duties, or responsibilities.” This is similar to the exception in contract law: the courts will not enforce contract provisions that violate public policy. (For the most part, public policy is found in statutes and in cases.) But what constitutes public policy is an important decision for state courts. In *Wagenseller v. Scottsdale Memorial Hospital*, 147 Ariz. 370; 710 P.2d 1025 (1985). for example, a nurse who refused to “play along” with her coworkers on a rafting trip was discharged. The group of coworkers had socialized at night, drinking alcohol; when the partying was near its peak, the plaintiff refused to be part of a group that bared their buttocks to the tune of “Moon River” (a composition by Henry Mancini that was popular in the 1970s). The court, at great length, considered that “mooning” was a misdemeanor under Arizona law and that therefore her employer could not discharge her for refusing to violate a state law.

Other courts have gone so far as to include professional oaths and codes as part of public policy. In *Rocky Mountain Hospital and Medical Services v. Diane Mariani*, the Colorado Supreme Court reviewed a trial court decision to refuse relief to a certified public accountant who was discharged when she refused to violate her professional code. *Rocky Mountain Hospital and Medical Services v. Diane Mariani*, 916 P.2d 519 (Colo. 1996). (Her employer had repeatedly required her to come up with numbers and results that did not reflect the true

situation, using processes that were not in accord with her training and the code.) The court of appeals had reversed the trial court, and the Supreme Court had to decide if the professional code of Colorado accountants could be considered to be part of public policy. Given that accountants were licensed by the state on behalf of the public, and that the Board of Accountancy had published a code for accounting professionals and required an oath before licensing, the court noted the following:

The Colorado State Board of Accountancy is established pursuant to section 12-2-103, 5A C.R.S. (1991). The Board has responsibility for making appropriate rules of professional conduct, in order to establish and maintain a high standard of integrity in the profession of public accounting. § 12-2-104, 5A C.R.S. (1991). These rules of professional conduct govern every person practicing as a certified public accountant. *Id.* Failure to abide by these rules may result in professional discipline. § 12-2-123, 5A C.R.S. (1991). The rules of professional conduct for accountants have an important public purpose. They ensure the accurate reporting of financial information to the public. They allow the public and the business community to rely with confidence on financial reporting. Rule 7.1, 3 C.C.R. 705-1 (1991). In addition, they ensure that financial information will be reported consistently across many businesses. The legislature has endorsed these goals in section 12-2-101, 5A C.R.S.

The court went on to note that the stated purpose of the licensing and registration of certified public accountants was to “provide for the maintenance of high standards of professional conduct by those so licensed and registered as certified public accountants.” Further, the specific purpose of Rule 7.1 provided a clear mandate to support an action for wrongful discharge. Rule 7.1 is entitled “Integrity and Objectivity” and states, “A certificate holder shall not in the performance of professional services knowingly misrepresent facts, nor subordinate his judgment to others.” The fact that Mariani’s employer asked her to knowingly misrepresent facts was a sufficient basis in public policy to make her discharge wrongful.

## 1.5 Contract Modification of Employment at Will

Contract law can modify employment at will. Oral promises made in the hiring process may be enforceable even though the promises are not approved by top management. Employee handbooks may create implied contracts that specify personnel processes and statements that the employees can be fired only for a “just cause” or only after various warnings, notice, hearing, or other procedures.

## 1.6 Good Faith and Fair Dealing Standard

A few states, among them Massachusetts and California, have modified the at-will doctrine in a far-reaching way by holding that every employer has entered into an implied covenant of good faith and fair dealing with its employees. That means, the courts in these states say, that it is “bad faith” and therefore unlawful to discharge employees to avoid paying commissions or pensions due them. Under this implied covenant of fair dealing, any discharge without good cause—such as incompetence, corruption, or habitual tardiness—is actionable. Shifting burdens is a problem in all these cases. (See *Gross v. FBI Financial Services Inc.*, 557 U.S. 167 (2009)). A minority view, is in the case *Orr v. Wal-Mart Stores Inc.*, 297 F.3d 720 (8<sup>th</sup> Cir. 2001) makes clear.

## 34.2 Federal Employment Discrimination Laws

As we look at federal employment discrimination laws, bear in mind that most states also have laws that prohibit various kinds of discriminatory practices in employment. Until the 1960s, Congress had intruded but little in the affairs of employers except in union relationships. A company could refuse to hire members of racial minorities, exclude women from promotions, or pay men more than women for the same work. But with the rise of the civil rights movement in the early 1960s, Congress (and many states) began to legislate away the employer’s frequently exercised power to discriminate. The most important statutes are Title VII of the Civil Rights Act of 1964, the Equal Pay Act of 1963, the Age Discrimination in Employment Act of 1967, and the Americans with Disabilities Act of 1990.

## 2.1 Title VII of the Civil Rights Act of 1964

The most basic antidiscrimination law in employment is in Title VII of the federal Civil Rights Act of 1964. The key prohibited discrimination is that based on race, but Congress also included sex, religion, national origin, and color as prohibited bases for hiring, promotion, layoff, and discharge decisions. To put the Civil Rights Act in its proper context, a short history of racial discrimination in the United States follows.

The passage of the Civil Rights Act of 1964 was the culmination of a long history that dated back to slavery, the founding of the US legal system, the Civil War, and many historical and political developments over the ninety-nine years from the end of the Civil War to the passage of the act. The years prior to 1964 had seen a remarkable rise of civil disobedience, led by many in the civil rights movement but most prominently by Dr. Martin Luther King Jr. Peaceful civil disobedience was sometimes met with violence, and television cameras were there to record most of it.

While the Civil War had addressed slavery and the secession of Southern states, the Thirteenth, Fourteenth, and Fifteenth Amendments, ratified just after the war, provided for equal protection under the law, guaranteed citizenship, and protected the right to vote for African Americans. The amendments also allowed Congress to enforce these provisions by enacting appropriate, specific legislation.

But during the Reconstruction Era, many of the Southern states resisted the laws that were passed in Washington, DC, to bolster civil rights. To a significant extent, decisions rendered by the US Supreme Court in this era—such as *Plessy v. Ferguson*, condoning “separate but equal” facilities for different races—restricted the utility of these new federal laws. The states effectively controlled the public treatment of African Americans, and a period of neglect set in that lasted until after World War II. The state laws essentially mandated segregated facilities (restaurants, hotels, schools, water fountains, public bathrooms) that were usually inferior for blacks.

Along with these Jim Crow laws in the South, the Ku Klux Klan was very strong, and lynchings (hangings without any sort of public due process) by the Klan and others were designed to limit the civil and economic rights of the former slaves. The hatred of blacks from that era by many whites in America has only gradually softened since 1964. Even as the civil rights bill was being debated in Congress in 1964, some Young Americans for Freedom in the right wing of the GOP would clandestinely chant “Be a man, join the Klan” and sing “We will hang Earl Warren from a sour apple tree,” to the tune of “Battle Hymn of the Republic,” in anger over the Chief Justice’s presiding over *Brown v. Board of Education*, which reversed *Plessy v. Ferguson*.

But just a few years earlier, the public service and heroism of many black military units and individuals in World War II had created a perceptual shift in US society; men of many races who had served together in the war against the Axis powers (fascism in Europe and the Japanese emperor’s rule in the Pacific) began to understand their common humanity. Major migrations of blacks from the South to industrial cities of the North also gave impetus to the civil rights movement.

Bills introduced in Congress regarding employment policy brought the issue of civil rights to the attention of representatives and senators. In 1945, 1947, and 1949, the House of Representatives voted to abolish the poll tax. The poll tax was a method used in many states to confine voting rights to those who could pay a tax, and often, blacks could not. The Senate did not go along, but these bills signaled a growing interest in protecting civil rights through federal action. The executive branch of government, by presidential order, likewise became active by ending discrimination in the nation’s military forces and in federal employment and work done under government contract.

The Supreme Court gave impetus to the civil rights movement in its reversal of the “separate but equal” doctrine in the *Brown v. Board of Education* decision. In its 1954 decision, the Court said, “To separate black children from others of similar age and qualifications solely because of their race generates a feeling of inferiority as to their status in the community that may affect their hearts and minds in a way never to be undone....We conclude that in the field of public

education the doctrine of separate but equal has no place. Separate educational facilities are inherently unequal.”

This decision meant that white and black children could not be forced to attend separate public schools. By itself, however, this decision did not create immediate gains, either in public school desegregation or in the desegregation of other public facilities. There were memorable standoffs between federal agents and state officials in Little Rock, Arkansas, for example; the Democratic governor of Arkansas personally blocked young black students from entering Little Rock’s Central High School, and it was only President Eisenhower’s order to have federal marshals accompany the students that forced integration. The year was 1957.

Resistance to public school integration was widespread, and other public facilities were not governed by the *Brown* ruling. Restaurants, hotels, and other public facilities were still largely segregated. Segregation kept blacks from using public city buses, park facilities, and restrooms on an equal basis with whites. Along with inferior schools, workplace practices throughout the South and also in many Northern cities sharply limited African Americans’ ability to advance economically. Civil disobedience began to grow.

The bus protests in Montgomery, Alabama, were particularly effective. Planned by civil rights leaders, Rosa Parks’s refusal to give up her seat to a white person and sit at the back of the public bus led to a boycott of the Montgomery bus system by blacks and, later, a boycott of white businesses in Montgomery. There were months of confrontation and some violence; finally, the city agreed to end its long-standing rules on segregated seating on buses.

There were also protests at lunch counters and other protests on public buses, where groups of Northern protesters—Freedom Riders—sometimes met with violence. In 1962, James Meredith’s attempt to enroll as the first African American at the University of Mississippi generated extreme hostility; two people were killed and 375 were injured as the state resisted Meredith’s admission. The murders of civil rights workers Medgar Evers and William L. Moore

added to the inflamed sentiments, and whites in Birmingham, Alabama, killed four young black girls who were attending Sunday school when their church was bombed.

These events were all covered by the nation's news media, whose photos showed beatings of protesters and the use of fire hoses on peaceful protesters. Social tensions were reaching a postwar high by 1964. According to the government, there were nearly one thousand civil rights demonstrations in 209 cities in a three-month period beginning May 1963.

Representatives and senators could not ignore the impact of social protest. But the complicated political history of the Civil Rights Act of 1964 also tells us that the legislative result was anything but a foregone conclusion. See Congress Link, "Major Features of the Civil Rights Act of 1964," at <http://people.bu.edu/smmarks/LegislationWeb/Civil-Rights-Act/1964%20Act.htm>.

In Title VII of the Civil Rights Act of 1964, Congress for the first time outlawed discrimination in employment based on race, religion, sex, or national origin. Title VII declares: "It shall be an unlawful employment practice for an employer to fail or refuse to hire or to discharge any individual, or otherwise to discriminate against any individual with respect to his compensation, terms, conditions, or privileges of employment, because of such individual's race, color, religion, sex, or national origin." Title VII applies to (1) employers with fifteen or more employees whose business affects interstate commerce, (2) all employment agencies, (3) labor unions with fifteen or more members, (4) state and local governments and their agencies, and (5) most federal government employment.

In 1984, the Supreme Court said that Title VII applies to partnerships as well as corporations when ruling that it is illegal to discriminatorily refuse to promote a female lawyer to partnership status in a law firm. This applies, by implication, to other fields, such as accounting. *Hishon v. King & Spalding*, 467 U.S. 69 (1984). The remedy for unlawful discrimination is back pay and hiring, reinstatement, or promotion.

Title VII established the Equal Employment Opportunity Commission (EEOC) to investigate violations of the act. A victim of discrimination who wishes to file suit must first file a complaint

with the EEOC to permit that agency to attempt conciliation of the dispute. The EEOC has filed a number of lawsuits to prove statistically that a company has systematically discriminated on one of the forbidden bases. The EEOC has received perennial criticism for its extreme slowness in filing suits and for failure to handle the huge backlog of complaints with which it has had to wrestle.

The courts have come to recognize two major types of Title VII cases:

1. Cases of disparate treatment

- In this type of lawsuit, the plaintiff asserts that because of race, sex, religion, or national origin, he or she has been treated less favorably than others within the organization. To prevail in a disparate treatment suit, the plaintiff must show that the company *intended* to discriminate because of one of the factors the law forbids to be considered. Thus in *McDonnell Douglas Corp. v. Green*, the Supreme Court held that the plaintiff had shown that the company intended to discriminate by refusing to rehire him because of his race. *McDonnell Douglas Corp. v. Green*, 411 U.S. 792 (1973). In general, there are two types of disparate treatment cases: (1) pattern-and-practice cases, in which the employee asserts that the employer systematically discriminates on the grounds of race, religion, sex, or national origin; and (2) reprisal or retaliation cases, in which the employee must show that the employer discriminated against him or her because that employee asserted his or her Title VII rights.

2. Cases of disparate impact

- In this second type of Title VII case, the employee need not show that the employer intended to discriminate but only that the effect, or impact, of the employer's action was discriminatory. Usually, this impact will be upon an entire class of employees. The plaintiff must demonstrate that the reason for the employer's conduct (such as refusal to promote) was not job related. Disparate impact cases often arise out of practices that appear to be neutral or nondiscriminatory on the surface, such as educational requirements and tests administered to help the employer choose the most qualified candidate. In the seminal case of *Griggs v. Duke Power Co.*, the Supreme Court held that

under Title VII, an employer is not free to use any test it pleases; the test must bear a genuine relationship to job performance. *Griggs v. Duke Power Co.*, 401 U.S. 424 (1971). *Griggs* stands for the proposition that Title VII “prohibits employment practices that have discriminatory effects as well as those that are intended to discriminate.”

## 2.2 Discrimination Based on Religion

An employer who systematically refuses to hire Catholics, Jews, Buddhists, or members of any other religious group engages in unlawful disparate treatment under Title VII. But refusal to deal with someone because of his or her religion is not the only type of violation under the law. Title VII defines religion as including religious observances and practices as well as belief and requires the employer to “reasonably accommodate to an employee’s or prospective employee’s religious observance or practice” unless the employer can demonstrate that a reasonable accommodation would work an “undue hardship on the conduct of the employer’s business.” Thus a company that refused even to consider permitting a devout Sikh to wear his religiously prescribed turban on the job would violate Title VII.

But the company need not make an accommodation that would impose more than a minimal cost. For example, an employee in an airline maintenance department, open twenty-four hours a day, wished to avoid working on his Sabbath. The employee belonged to a union, and under the collective bargaining agreement, a rotation system determined by seniority would have put the worker into a work shift that fell on his Sabbath. The Supreme Court held that the employer was not required to pay premium wages to someone whom the seniority system would not require to work on that day and could discharge the employee if he refused the assignment. *Trans World Airlines v. Hardison*, 432 U.S. 63 (1977).

Title VII permits religious organizations to give preference in employment to individuals of the same religion. Obviously, a synagogue looking for a spiritual leader would hire a rabbi and not a priest.

## 2.3 Sex Discrimination

A refusal to hire or promote a woman simply because she is female is a clear violation of Title VII. Under the Pregnancy Act of 1978, Congress declared that discrimination because of pregnancy is a form of sex discrimination. Equal pay for equal or comparable work has also been an issue in sex (or gender) discrimination. *Barbano v. Madison County*, presents a straightforward case of sex discrimination. In that case, notice how the plaintiff has the initial burden of proving discriminatory intent and how the burden then shifts to the defendant to show a plausible, nondiscriminatory reason for its hiring decision.

The late 1970s brought another problem of sex discrimination to the fore: sexual harassment. There is much fear and ignorance about sexual harassment among both employers and employees. Many men think they cannot compliment a woman on her appearance without risking at least a warning by the human resources department. Many employers have spent significant time and money trying to train employees about sexual harassment, so as to avoid lawsuits. Put simply, sexual harassment involves unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature.

There are two major categories of sexual harassment: (1) quid pro quo and (2) hostile work environment.

*Quid pro quo* comes from the Latin phrase “one thing in return for another.” If any part of a job is made conditional on sexual activity, there is quid pro quo sexual harassment. Here, one person’s power over another is essential; a coworker, for example, is not usually in a position to make sexual demands on someone at his same level, unless he has special influence with a supervisor who has power to hire, fire, promote, or change work assignments. A supervisor, on the other hand, typically has those powers or the power to influence those kinds of changes.

For example, when the male foreman says to the female line worker, “I can get you off of the night shift if you’ll sleep with me,” there is quid pro quo sexual harassment.

In *Harris v. Forklift Systems, Inc.*, 510 U.S. 17 (1993). and in *Meritor v. Vinson*, 477 U.S. 57 (1986). We see examples of hostile work environment. Hostile work environment claims are more frequent than quid pro quo claims and so are more worrisome to management. An employee has a valid claim of sexual harassment if sexual talk, imagery, or behavior becomes so pervasive that it interferes with the employee’s ability to work to her best capacity. On occasion, courts have found that offensive jokes, if sufficiently frequent and pervasive in the workplace, can create a hostile work environment. Likewise, comments about body parts or public displays of pornographic pictures can also create a hostile work environment. In short, the plaintiff can be detrimentally offended and hindered in the workplace even if there are no measurable psychological injuries.

In the landmark hostile work environment case of *Meritor v. Vinson*, the Supreme Court held that Title VII’s ban on sexual harassment encompasses more than the trading of sexual favors for employment benefits. Unlawful sexual harassment also includes the creation of a hostile or offensive working environment, subjecting both the offending employee and the company to damage suits even if the victim was in no danger of being fired or of losing a promotion or raise.

In recalling *Harris v. Forklift Systems* we see that the “reasonable person” standard is declared by the court as follows: “So long as the environment would reasonably be perceived, and is perceived, as hostile or abusive there is no need for it also to be psychologically injurious.” In *Duncan v. General Motors Corporation*, *Harris* is used as a precedent to deny relief to a woman who was sexually harassed, because the court believed the conditions were not severe or pervasive enough to unreasonably interfere with her work.

Sex discrimination in terms of wages and benefits is common enough that a number of sizeable class action lawsuits have been brought. A class action lawsuit is generally initiated by one or more people who believe that they, along with a group of other people, have been wronged in

similar ways. Class actions for sexual harassment have been successful in the past. On June 11, 1998, the EEOC reached a \$34 million settlement with Mitsubishi over allegations of widespread sexual harassment at the Normal, Illinois, auto plant. The settlement involved about five hundred women who split the \$34 million, although only seven received the maximum \$300,000 allowed by law. The others received amounts ranging from \$8,000 to \$225,000.

Class action lawsuits involve specific plaintiffs (called class plaintiffs or class representatives) who are named in the class action lawsuit to assert the claims of the unnamed or absent members of the class; thus all those with a common complaint need not file their own separate lawsuit. From the point of view of plaintiffs who may have lost only a few thousand dollars annually as a result of the discrimination, a class action is advantageous: almost no lawyer would take a complicated civil case that had a potential gain of only a few thousand dollars. But if there are thousands of plaintiffs with very similar claims, the judgment could be well into the millions. Defendants can win the procedural battle by convincing a court that the proposed class of plaintiffs does not present common questions of law or of fact.

In the Wal-Mart class action case decided by the Supreme Court in 2011, three named plaintiffs (Dukes, Arana, and Kwapnoski) represented a proposed class of 1.5 million current or former Wal-Mart employees. The plaintiffs' attorneys asked the trial court in 2001 to certify as a class all women employed at any Wal-Mart domestic retail store at any time since December of 1998. As the case progressed through the judicial system, the class grew in size. If the class was certified, and discrimination proven, Wal-Mart could have been liable for over \$1 billion in back pay. So Wal-Mart argued that as plaintiffs, the cases of the 1.5 million women did not present common questions of law or of fact—that is, that the claims were different enough that the Court should not allow a single class action lawsuit to present such differing kinds of claims. Initially, a federal judge disagreed, finding the class sufficiently coherent for purposes of federal civil procedure. The US Court of Appeals for the Ninth Circuit upheld the trial judge on two occasions.

In the US Supreme Court agreed with *Wal-Mart*. In the majority opinion, Justice Scalia discussed the commonality condition for class actions.

*Quite obviously, the mere claim by employees of the same company that they have suffered a Title VII injury, or even a disparate impact Title VII injury, gives no cause to believe that all their claims can productively be litigated at once. Their claims must depend upon a common contention—for example, the assertion of discriminatory bias on the part of the same supervisor. That common contention, moreover, must be of such a nature that it is capable of class wide resolution—which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke . Supra, 564 U.S. \_\_\_\_ (2011).*

Finding that there was no common contention, the Supreme Court reversed the lower courts. Many commentators, and four dissenting Justices, believed that the majority opinion has created an unnecessarily high hurdle for class action plaintiffs in Title VII cases.

## **2.4 Discrimination Based on Race, Color, and National Origin**

Title VII was primarily enacted to prohibit employment discrimination based on race, color, and national origin. Race refers to broad categories such as black, Caucasian, Asian, and Native American. Color simply refers to the color of a person's skin, and national origin refers to the country of the person's ancestry.

## **2.5 Exceptions to Title VII**

### **Merit**

Employers are allowed to select on merit and promote on merit without offending title VII's requirements. Merit decisions are usually based on work, educational, experience, and ability

tests. All requirements, however, must be job related. For example, the ability to lift heavy cartons of sixty pounds or more is appropriate for certain warehouse jobs but is not appropriate for all office workers. The ability to do routine maintenance (electrical, plumbing, construction) is an appropriate requirement for maintenance work but not for a teaching position. Requiring someone to have a high school degree, as in *Griggs vs. Duke Power Co.*, is not appropriate as a qualification for common labor.

### **Seniority**

Employers may also maintain seniority systems that reward workers who have been with the company for a long time. Higher wages, benefits, and choice of working hours or vacation schedules are examples of rewards that provide employees with an incentive to stay with the company. If they are not the result of intentional discrimination, they are lawful. Where an employer is dealing with a union, it is typical to see seniority systems in place.

### **Bona Fide Occupational Qualification (BFOQ)**

For certain kinds of jobs, employers may impose bona fide occupational qualifications (BFOQs). Under the express terms of Title VII, however, a bona fide (good faith) occupational qualification of race or color is never allowed. In the area of religion, as noted earlier, a group of a certain religious faith that is searching for a new spiritual leader can certainly limit its search to those of the same religion. With regard to sex (gender), allowing women to be locker-room attendants only in a women's gym is a valid BFOQ. One important test that the courts employ in evaluating an employer's BFOQ claims is the "essence of the business" test.

In *Diaz v. Pan American World Airways, Inc.*, the airline maintained a policy of exclusively hiring females for its flight attendant positions. *Diaz v. Pan American World Airways, Inc.*, 442 F.2d 385 (5th Cir. 1971). The essence of the business test was established with the court's finding that "discrimination based on sex is valid only when the essence of the business operation would be undermined by not hiring members of one sex exclusively." Although the court

acknowledged that females might be better suited to fulfill the required duties of the position, this was not enough to fulfill the essence of the business test:

The primary function of an airline is to transport passengers safely from one point to another. While a pleasant environment, enhanced by the obvious cosmetic effect that female stewardesses provide as well as...their apparent ability to perform the non-mechanical functions of the job in a more effective manner than most men, may all be important, they are tangential to the essence of the business involved. No one has suggested that having male stewards will so seriously affect the operation of an airline as to jeopardize or even minimize its ability to provide safe transportation from one place to another. *Diaz v. Pan American World Airways, Inc.*, 442 F.2d 385 (5th Cir. 1971).

The reason that airlines now use the gender-neutral term *flight attendant* is a direct result of Title VII. In the 1990s, Hooters had some difficulty convincing the EEOC and certain male plaintiffs that only women could be hired as wait staff in its restaurants. With regard to national origin, directors of movies and theatrical productions would be within their Title VII BFOQ rights to restrict the roles of fictional Asians to those actors whose national origin was Asian, but could also permissibly hire Caucasian actors made up in “yellow face.”

### **Defenses in Sexual Harassment Cases**

In the 1977 term, the US Supreme Court issued two decisions that provide an affirmative defense in some sexual harassment cases. In *Faragher v. City of Boca Raton*, 524 U.S. 775 (1998). and in *Burlington Industries, Inc. v. Ellerth*, 524 U.S. 742 (1998). Female employees sued for sexual harassment. In each case, they proved that their supervisors had engaged in unconsented-to touching as well as verbal sexual harassment. In both cases, the plaintiff quit her job and, after going through the EEOC process, got a right-to-sue letter and in fact sued for sexual harassment. In *Faragher*, the employer had never disseminated the policy against sexual harassment to its employees. But in the second case, *Burlington Industries*, the employer had a

policy that was made known to employees. Moreover, a complaints system had been established that was not used by the female employee.

Both opinions rejected the notion of strict or automatic liability for employers when agents (employees) engage in sexual harassment. But the employer can have a valid defense to liability if it can prove (1) that it exercised reasonable care to prevent and correct any sexual harassment behaviors and (2) that the plaintiff employee unreasonably failed to take advantage of any preventive or corrective opportunities provided by the employer or to otherwise avoid harm. As with all affirmative defenses, the employer has the burden of proving this defense.

### **Affirmative Action**

Affirmative action is mentioned in the statutory language of Title VII, as courts have the power to order affirmative action as a remedy for the effects of past discriminatory actions. In addition to court-ordered affirmative action, employers may voluntarily use an affirmative action plan to remedy the effects of past practices or to achieve diversity within the workforce to reflect the diversity in their community. In *Johnson v. Santa Clara County Transportation Agency*, 480 U.S. 616 (1987). The agency had an affirmative action plan. A woman was promoted from within to the position of dispatcher, even though a male candidate had a slightly higher score on a test that was designed to measure aptitude for the job. The man brought a lawsuit alleging sex discrimination. The Court found that voluntary affirmative action was not reverse discrimination in this case, but employers should be careful in hiring and firing and layoff decisions versus promotion decisions. It is in the area of promotions that affirmative action is more likely to be upheld.

In government contracts, President Lyndon Johnson's Executive Order 11246 prohibits private discrimination by federal contractors. This is important, because one-third of all US workers are employed by companies that do business with the federal government. Because of this executive order, many companies that do business with the government have adopted voluntary affirmative action programs. In 1995, the Supreme Court limited the extent to which

the government could require contractors to establish affirmative action programs. The Court said that such programs are permissible only if they serve a “compelling national interest” and are “narrowly tailored” so that they minimize the harm to white males. To make a requirement for contractors, the government must show that the programs are needed to remedy past discrimination, that the programs have time limits, and that nondiscriminatory alternatives are not available. *Adarand Constructors, Inc. v. Peña*, 515 U.S. 200 (1995).

## 2.6 The Age Discrimination in Employment Act

The Age Discrimination in Employment Act (ADEA) of 1967 (amended in 1978 and again in 1986) prohibits discrimination based on age, and recourse to this law has been growing at a faster rate than any other federal antibias employment law. In particular, the act protects workers over forty years of age and prohibits forced retirement in most jobs because of age. Until 1987, federal law had permitted mandatory retirement at age seventy, but the 1986 amendments that took effect January 1, 1987, abolished the age ceiling except for a few jobs, such as firefighters, police officers, tenured university professors, and executives with annual pensions exceeding \$44,000. Like Title VII, the law has a BFOQ exception—for example, employers may set reasonable age limitations on certain high-stress jobs requiring peak physical condition.

There are important differences between the ADEA and Title VII, as *Gross v. FBL Financial Services, Inc.*, makes it clear there is now more difficult to prove an age discrimination claim than a claim under Title VII.

## 2.7 Disabilities: Discrimination against the Handicapped

The 1990 Americans with Disabilities Act (ADA) prohibits employers from discriminating on the basis of disability. A disabled person is someone with a physical or mental impairment that substantially limits a major life activity or someone who is regarded as having such an impairment. This definition includes people with mental illness, epilepsy, visual impairment, dyslexia, and AIDS. It also covers anyone who has recovered from alcoholism or drug addiction.

It specifically does not cover people with sexual disorders, pyromania, kleptomania, exhibitionism, or compulsive gambling.

Employers cannot disqualify an employee or job applicant because of disability as long as he or she can perform the essential functions of the job, with reasonable accommodation.

Reasonable accommodation might include installing ramps for a wheelchair, establishing more flexible working hours, creating or modifying job assignments, and the like.

Reasonable accommodation means that there is no undue hardship for the employer. The law does not offer uniform standards for identifying what may be an undue hardship other than the imposition on the employer of a "significant difficulty or expense." Cases will differ: the resources and situation of each particular employer relative to the cost or difficulty of providing the accommodation will be considered; relative cost, rather than some definite dollar amount, will be the issue.

As with other areas of employment discrimination, job interviewers cannot ask questions about an applicant's disabilities before making a job offer; the interviewer may only ask whether the applicant can perform the work. Requirements for a medical exam are a violation of the ADA unless the exam is job related and required of all applicants for similar jobs. Employers may, however, use drug testing, although public employers are to some extent limited by the Fourth Amendment requirements of reasonableness.

The ADA's definition of disability is very broad. However, the Supreme Court has issued several important decisions that narrow the definition of what constitutes a disability under the act.

Two kinds of narrowing decisions stand out: one deals with "correctable conditions," and the other deals with repetitive stress injuries. In 1999, the Supreme Court reviewed a case that raised an issue of whether severe nearsightedness (which can be corrected with lenses) qualifies as a disability under the ADA. *Sutton v. United Airlines, Inc.*, 527 U.S. 471 (1999). The Supreme Court ruled that disability under the ADA will be measured according to how a person functions with corrective drugs or devices and not how the person functions without them. In

*Orr v. Wal-Mart Stores, Inc.*, a federal appellate court held that a pharmacist who suffered from diabetes did not have a cause of action against Wal-Mart under the ADA as long as the condition could be corrected by insulin. *Orr v. Wal-Mart Stores, Inc.*, 297 F.3d 720 (8th Cir. 2002).

The other narrowing decision deals with repetitive stress injuries. For example, carpal tunnel syndrome—or any other repetitive stress injury—could constitute a disability under the ADA. By compressing a nerve in the wrist through repetitive use, carpal tunnel syndrome causes pain and weakness in the hand. In 2002, the Supreme Court determined that while an employee with carpal tunnel syndrome could not perform all the manual tasks assigned to her, her condition did not constitute a disability under the ADA because it did not “extensively limit” her major life activities.

## **2.8 Equal Pay Act**

The Equal Pay Act of 1963 protects both men and women from pay discrimination based on sex. The act covers all levels of private sector employees and state and local government employees but not federal workers. The act prohibits disparity in pay for jobs that require equal skill and equal effort. Equal skill means equal experience, and equal effort means comparable mental and/or physical exertion. The act prohibits disparity in pay for jobs that require equal responsibility, such as equal supervision and accountability, or similar working conditions.

In making their determinations, courts will look at the stated requirements of a job as well as the actual requirements of the job. If two jobs are judged to be equal and similar, the employer cannot pay disparate wages to members of different sexes. Along with the EEOC enforcement, employees can also bring private causes of action against an employer for violating this act. There are four criteria that can be used as defenses in justifying differentials in wages: seniority, merit, quantity or quality of product, and any factor other than sex. The employer will bear the burden of proving any of these defenses.

A defense based on merit will require that there is some clearly measurable standard that justifies the differential. In terms of quantity or quality of product, there may be a commission structure, piecework structure, or quality-control-based payment system that will be permitted. Factors “other than sex” do not include so-called market forces. In *Glenn v. General Motors Corp.*, the US Court of Appeals for the Eleventh Circuit rejected General Motor’s argument that it was justified in paying three women less than their male counterparts on the basis of “the market force theory” that women will work for less than a man. *Glenn v. General Motors Corp.*, 841 F.2d 1567 (1988).

## **34.3 Other Employment-Related Laws**

### **3.1 The Federal Plant-Closing Act**

A prime source of new jobs across the United States is the opening of new industrial plants—which accounted for millions of jobs a year during the 1970s and 1980s. But for every 110 jobs thus created, nearly 100 were lost annually in plant closings during that period. In the mid-1980s alone, 2.2 million plant jobs were lost each year. As serious as those losses were for the national economy, they were no less serious for the individuals who were let go. Surveys in the 1980s showed that large numbers of companies provided little or no notice to employees that their factories were to be shut down and their jobs eliminated. Nearly a quarter of businesses with more than 100 employees provided no specific notice to their employees that their particular work site would be closed or that they would suffer mass layoffs. More than half provided two weeks’ notice or less.

Because programs to support dislocated workers depend heavily on the giving of advance notice, a national debate on the issue in the late 1980s culminated in 1988 in Congress’s enactment of the Worker Adjustment and Retraining Notification (WARN) Act, the formal name of the federal plant-closing act. Under this law, businesses with 100 or more employees must give employees or their local bargaining unit, along with the local city or county government, at least sixty days’ notice whenever (1) at least 50 employees in a single plant or office facility would lose their jobs or face long-term layoffs or a reduction of more than half their working

hours as the result of a shutdown and (2) a shutdown would require long-term layoffs of 500 employees or at least a third of the workforce. An employer who violates the act is liable to employees for back pay that they would have received during the notice period and may be liable to other fines and penalties.

An employer is exempted from having to give notice if the closing is caused by business circumstances that were not reasonably foreseeable as of the time the notice would have been required. An employer is also exempted if the business is actively seeking capital or business that if obtained, would avoid or postpone the shutdown and the employer, in good faith, believes that giving notice would preclude the business from obtaining the needed capital or business.

### **3.2 The Employee Polygraph Protection Act**

Studies calling into question the reliability of various forms of lie detectors have led at least half the states and, in 1988, Congress to legislate against their use by private businesses. The Employee Polygraph Protection Act forbids private employers from using lie detectors (including such devices as voice stress analyzers) for any reason. Neither employees nor applicants for jobs may be required or even asked to submit to them. (The act has some exceptions for public employers, defense and intelligence businesses, private companies in the security business, and manufacturers of controlled substances.)

Use of polygraphs, machines that record changes in the subject's blood pressure, pulse, and other physiological phenomena, is strictly limited. They may be used in conjunction with an investigation into such crimes as theft, embezzlement, and industrial espionage, but in order to require the employee to submit to polygraph testing, the employer must have "reasonable suspicion" that the employee is involved in the crime, and there must be supporting evidence for the employer to discipline or discharge the employee either on the basis of the polygraph results or on the employee's refusal to submit to testing. The federal polygraph law does not preempt state laws, so if a state law absolutely bars an employer from using one, the federal law's limited authorization will be unavailable.

### 3.3 Occupational Safety and Health Act

In a heavily industrialized society, workplace safety is a major concern. Hundreds of studies for more than a century have documented the gruesome toll taken by hazardous working conditions in mines, on railroads, and in factories from tools, machines, treacherous surroundings, and toxic chemicals and other substances. Studies in the late 1960s showed that more than 14,000 workers were killed and 2.2 million were disabled annually—at a cost of more than \$8 billion and a loss of more than 250 million worker days. Congress responded in 1970 with the Occupational Safety and Health Act, the primary aim of which is “to assure so far as possible every working man and woman in the Nation safe and healthful working conditions.”

The act imposes on each employer a general duty to furnish a place of employment free from recognized hazards likely to cause death or serious physical harm to employees. It also gives the secretary of labor the power to establish national health and safety standards. The standard-making power has been delegated to the Occupational Safety and Health Administration (OSHA), an agency within the US Department of Labor. The agency has the authority to inspect workplaces covered by the act whenever it receives complaints from employees or reports about fatal or multiple injuries. The agency may assess penalties and proceed administratively to enforce its standards. Criminal provisions of the act are enforced by the Justice Department.

During its first two decades, OSHA was criticized for not issuing standards very quickly: fewer than thirty national workplace safety standards were issued by 1990. But not all safety enforcement is in the hands of the federal government: although OSHA standards preempt similar state standards, under the act the secretary may permit the states to come up with standards equal to or better than federal standards and may make grants to the states to cover half the costs of enforcement of the state safety standards.

### 3.5 Employee Retirement Income Security Act

More than half the US workforce is covered by private pension plans for retirement. One 1988 estimate put the total held in pension funds at more than \$1 *trillion*, costing the federal Treasury nearly \$60 billion annually in tax write-offs. As the size of the private pension funds increased dramatically in the 1960s, Congress began to hear shocking stories of employees defrauded out of pension benefits, deprived of a lifetime's savings through various ruses (e.g., by long vesting provisions and by discharges just before retirement). To put an end to such abuses, Congress, in 1974, enacted the Employee Retirement Income Security Act (ERISA).

In general, ERISA governs the vesting of employees' pension rights and the funding of pension plans. Within five years of beginning employment, employees are entitled to vested interests in retirement benefits contributed on their behalf by individual employers. Multiemployer pension plans must vest their employees' interests within ten years. A variety of pension plans must be insured through a federal agency, the Pension Benefit Guaranty Corporation, to which employers must pay annual premiums. The corporation may assume financial control of underfunded plans and may sue to require employers to make up deficiencies. The act also requires pension funds to disclose financial information to beneficiaries, permits employees to sue for benefits, governs the standards of conduct of fund administrators, and forbids employers from denying employees their rights to pensions. The act largely preempts state law governing employee benefits.

### 3.6 Fair Labor Standards Act

In the midst of the Depression, Congress enacted at President Roosevelt's urging a national minimum wage law, the Fair Labor Standards Act of 1938 (FLSA). The act prohibits most forms of child labor and established a scale of minimum wages for the regular workweek and a higher scale for overtime. (The original hourly minimum was twenty-five cents, although the administrator of the Wage and Hour Division of the US Department of Labor, a position created

by the act, could raise the minimum rate industry by industry.) The act originally was limited to certain types of work: that which was performed in transporting goods in interstate commerce or in producing goods for shipment in interstate commerce.

Employers quickly learned that they could limit the minimum wage by, for example, separating the interstate and intrastate components of their production. Within the next quarter century, the scope of the FLSA was considerably broadened, so that it now covers all workers in businesses that do a particular dollar-volume of goods that move in interstate commerce, regardless of whether a particular employee actually works in the interstate component of the business. It now covers between 80 and 90 percent of all persons privately employed outside of agriculture, and a lesser but substantial percentage of agricultural workers and state and local government employees. Violations of the act are investigated by the administrator of the Wage and Hour Division, who has authority to negotiate back pay on the employee's behalf. If no settlement is reached, the Labor Department may sue on the employee's behalf, or the employee, armed with a notice of the administrator's calculations of back wages due, may sue in federal or state court for back pay. Under the FLSA, a successful employee will receive double the amount of back wages due.

### **3.7 Workers' Compensation Laws**

Since the beginning of the twentieth century, work-related injuries or illnesses have been covered under state workers' compensation laws that provide a set amount of weekly compensation for disabilities caused by accidents and illnesses suffered on the job. The compensation plans also pay hospital and medical expenses necessary to treat workers who are injured by, or become ill from, their work. In assuring workers of compensation, the plans eliminate the hazards and uncertainties of lawsuits by eliminating the need to prove fault. Employers fund the compensation plans by paying into statewide plans or purchasing insurance.

### 3.8 Other State Laws

Although it may appear that most employment law is federal, employment discrimination is largely governed by state law because Congress has so declared it. The Civil Rights Act of 1964 tells federal courts to defer to state agencies to enforce antidiscrimination provisions of parallel state statutes with remedies similar to those of the federal law. Moreover, many states have gone beyond federal law in banning certain forms of discrimination. Thus well before enactment of the Americans with Disabilities Act, more than forty states prohibited such discrimination in private employment. More than a dozen states ban employment discrimination based on marital status, a category not covered by federal law. Two states have laws that protect those that may be considered “overweight.” Two states and more than seventy counties or municipalities ban employment discrimination on the basis of sexual orientation; most large companies have offices or plants in at least one of these jurisdictions. By contrast, federal law has no statutory law dealing with sexual orientation.

## Chapter 35 Labor-Management Relations (Hardbound chapter 50)

Over half a century, the federal law of labor relations has developed out of four basic statutes into an immense body of cases and precedent regulating the formation and governance of labor unions and the relationships among employers, unions, and union members. Like antitrust law, labor law is a complex subject that has spawned a large class of specialized practitioners. Though specialized, it is a subject that no employer of any size can ignore, for labor law has a pervasive influence on how business is conducted throughout the United States. In this chapter, we examine the basic statutory framework and the activities that it regulates.

In 1806, the union of Philadelphia Journeymen Cordwainers was convicted of and bankrupted by charges of criminal conspiracy after a strike for higher wages, setting a precedent by which the US government would combat unions for years to come. Andrew Jackson became a strikebreaker in 1834 when he sent troops to the construction sites of the Chesapeake and Ohio Canal. In 1877, a general strike halted the movement of US railroads. In the following days, strike riots spread across the United States. The next week, federal troops were called out to force an end to the nationwide strike. At the Battle of the Viaduct in Chicago, federal troops (recently returned from an Indian massacre) killed thirty workers and wounded over one hundred. Numerous other violent confrontations marked the post-Civil War period in America, including the violent rail strikes of 1877, when President Rutherford B. Hayes sent troops to prevent obstruction of the mails. President Grover Cleveland used soldiers to break the Pullman strike of 1894. Not until the anthracite coal strikes in Pennsylvania in 1902 did the US government become a mediator between labor and management rather than an enforcer for industry.

## 35. 1 A Brief History of Labor Legislation

### 1.1 Labor and the Common Law in the Nineteenth Century

Labor unions appeared in modern form in the United States in the 1790s in Boston, New York, and Philadelphia. Early in the nineteenth century, employers began to seek injunctions against union organizing and other activities. Two doctrines were employed: (1) *common-law conspiracy* and (2) *common-law restraint of trade*. The first doctrine held that workers who joined together were acting criminally as conspirators, regardless of the means chosen or the objectives sought.

The second doctrine—common-law restraint of trade—was also a favorite theory used by the courts to enjoin unionizing and other joint employee activities. Workers who banded together to seek better wages or working conditions were, according to this theory, engaged in concerted activity that restrained trade in their labor. This theory made sense in a day in which conventional wisdom held that an employer was entitled to buy labor as cheaply as possible—the price would obviously rise if workers were allowed to bargain jointly rather than if they were required to offer their services individually on the open market.

### 1.2 Labor under the Antitrust Laws

The Sherman Act did nothing to change this basic judicial attitude. A number of cases decided early in the act's history condemned labor activities as violations of the antitrust law. In particular, in the *Danbury Hatters' case (Loewe v. Lawlor)* the Supreme Court held that a "secondary boycott" against a nonunionized company violated the Sherman Act. The hatters instigated a boycott of retail stores that sold hats manufactured by a company whose workers had struck. The union was held liable for treble damages. *Loewe v. Lawlor*, 208 U.S. 274 (1908).

By 1912, labor had organized widely, and it played a pivotal role in electing Woodrow Wilson and giving him a Democratic Congress, which responded in 1914 with the Clayton Act's "labor exemption." Section 6 of the Clayton Act says that labor unions are not "illegal combinations or conspiracies in restraint of trade, under the antitrust laws." Section 20 forbids courts from

issuing injunctions in cases involving strikes, boycotts, and other concerted union activities (which were declared to be lawful) as long as they arose out of disputes between employer and employees over the terms of employment.

But even the Clayton Act proved of little lasting value to the unions. In 1921, the Supreme Court again struck out against a secondary boycott that crippled the significance of the Clayton Act provisions. In the case, a machinists' union staged a boycott against an employer (by whom the members were not employed) in order to pressure the employer into permitting one of its factories to be unionized. The Court ruled that the Clayton Act exemptions applied only in cases involving an employer and its own employees. *Duplex Printing Press Co. v. Deering*, 254 U.S. 443 (1921). Without the ability to boycott under those circumstances, and with the threat of antitrust prosecutions or treble-damage actions, labor would be hard-pressed to unionize many companies. More antiunion decisions followed.

### **1.3 Modern Labor Legislation**

In 1926, Congress enacted the Railway Labor Act. This statute imposed a duty on railroads to bargain in good faith with their employees' elected representatives. The act also established the National Mediation Board to mediate disputes that were not resolved in contract negotiations. The stage was set for more comprehensive national labor laws. These would come with the Great Depression.

#### **The Norris–La Guardia Act**

The first labor law of the Great Depression was the Norris–La Guardia Act of 1932. It dealt with the propensity of federal courts to issue preliminary injunctions, often *ex parte* (i.e., after hearing only the plaintiff's argument), against union activities. Even though the permanent injunction might later have been denied, the effect of the vaguely worded preliminary injunction would have been sufficient to destroy the attempt to unionize. The Norris–La Guardia Act forbids federal courts from temporarily or permanently enjoining certain union activities, such as peaceful picketing and strikes. The act is applicable to any "labor dispute,"

defined as embracing “any controversy concerning terms or conditions of employment, or concerning the association or representation of persons in negotiating, fixing, maintaining, changing, or seeking to arrange terms or conditions of employment, regardless of whether or not the disputants stand in the proximate relation of employer and employee.” This language thus permitted the secondary boycott that had been held a violation of the antitrust laws in *Duplex Printing Press v. Deering*. The act also bars the courts from enforcing so-called yellow-dog contracts—agreements that employees made with their employer not to join unions.

### **The National Labor Relations Act (the Wagner Act)**

In 1935, Congress finally enacted a comprehensive labor statute. The National Labor Relations Act (NLRA), often called the Wagner Act after its sponsor, Senator Robert F. Wagner, declared in Section 7 that workers in interstate commerce “have the right to self-organization, to form, join or assist labor organizations, to bargain collectively through representatives of their own choosing, and to engage in concerted activities for the purpose of collective bargaining or other mutual aid or protection.” Section 8 sets out five key unfair labor practices:

1. Interference with the rights guaranteed by Section 7
2. Interference with the organization of unions, or dominance by the employer of union administration (this section thus outlaws “company unions”)
3. Discrimination against employees who belong to unions
4. Discharging or otherwise discriminating against employees who seek relief under the act
5. Refusing to bargain collectively with union representatives

The procedures for forming a union to represent employees in an appropriate “bargaining unit” are set out in Section 9. Finally, the Wagner Act established the National Labor Relations Board (NLRB) as an independent federal administrative agency, with power to investigate and remedy unfair labor practices.

The Supreme Court upheld the constitutionality of the act in 1937 in a series of five cases. In the first, *NLRB v. Jones & Laughlin Steel Corp.*, the Court ruled that congressional power under

the Commerce Clause extends to activities that might affect the flow of interstate commerce, as labor relations certainly did. *NLRB v. Jones & Laughlin Steel Corp.*, 301 U.S. 1 (1937). Through its elaborate mechanisms for establishing collective bargaining as a basic national policy, the Wagner Act has had a profound effect on interstate commerce during the last half-century.

### **The Taft-Hartley Act (Labor-Management Relations Act)**

The Wagner Act did not attempt to restrict union activities in any way. For a dozen years, opponents of unions sought some means of curtailing the breadth of opportunity opened up to unions by the Wagner Act. After failing to obtain relief in the Supreme Court, they took their case to Congress and finally succeeded after World War II when, in 1947, Congress, for the first time since 1930, had Republican majorities in both houses. Congress responded to critics of “big labor” with the Taft-Hartley Act, passed over President Truman’s veto. Taft-Hartley—known formally as the Labor-Management Relations Act—did not repeal the protections given employees and unions under the NLRA. Instead, it balanced union power with a declaration of rights of employers. In particular, Taft-Hartley lists six unfair labor practices of unions, including secondary boycotts, strikes aimed at coercing an employer to fire an employee who refuses to join a union, and so-called jurisdictional strikes over which union should be entitled to do specified jobs at the work site.

### **The Landrum-Griffin Act**

Congressional hearings in the 1950s brought to light union corruption and abuses and led in 1959 to the last of the major federal labor statutes, the Landrum-Griffin Act (Labor-Management Reporting and Disclosure Act). It established a series of controls on internal union procedures, including the method of electing union officers and the financial controls necessary to avoid the problems of corruption that had been encountered. Landrum-Griffin also restricted union picketing under various circumstances, narrowed the loopholes in Taft-Hartley’s prohibitions against secondary boycotts, and banned “hot cargo” agreements.

## **35.2 The National Labor Relations Board: Organization and Functions**

The National Labor Relations Board (NLRB) consists of five board members, appointed by the president and confirmed by the Senate, who serve for five-year, staggered terms. The president designates one of the members as chairman. The president also appoints the general counsel, who is in charge of the board's investigatory and prosecutorial functions and who represents the NLRB when it goes (or is taken) to court. The general counsel also oversees the thirty-three regional offices scattered throughout the country, each of which is headed by a regional director.

The NLRB serves two primary functions: (1) it investigates allegations of unfair labor practices and provides remedies in appropriate cases, and (2) it decides in contested cases which union should serve as the exclusive bargaining agent for a particular group of employees.

## **35.3 Labor and Management Rights under the Federal Labor Laws**

### **Choosing the Union as the Exclusive Bargaining Representative**

#### **Determining the Appropriate Union**

As long as a union has a valid contract with the employer, no rival union may seek an election to oust it except within sixty to ninety days before the contract expires. Nor may an election be held if an election has already been held in the bargaining unit during the preceding twelve months.

Whom does the union represent? In companies of even moderate size, employees work at different tasks and have different interests. Must the secretaries, punch press operators, drivers, and clerical help all belong to the same union in a small factory? The National Labor Relations Board (NLRB) has the authority to determine which group of employees will constitute the appropriate bargaining unit. To make its determination, the board must look at the history of collective bargaining among similar workers in the industry; the employees'

duties, wages, skills, and working conditions; the relationship between the proposed unit and the structure of the employer's organization; and the desires of the employees themselves.

Two groups must be excluded from any bargaining unit—supervisory employees and independent contractors. Determining whether or not a particular employee is a supervisor is left to the discretion of the board.

### **Interfering with Employee Communication**

To conduct an organizing drive, a union must be able to communicate with the employees. But the employer has valid interests in seeing that employees and organizers do not interfere with company operations. Several different problems arise from the need to balance these interests.

One problem is the protection of the employer's property rights. May nonemployee union organizers come onto the employer's property to distribute union literature—for example, by standing in the company's parking lots to hand out leaflets when employees go to and from work? May organizers, whether employees or not, picket or hand out literature in private shopping centers in order to reach the public—for example, to protest a company's policies toward its nonunion employees? The interests of both employees and employers under the NLRB are twofold: (1) the right of the employees (a) to communicate with each other or the public and (b) to hear what union organizers have to say, and (2) the employers' (a) property rights and (b) their interest in managing the business efficiently and profitably.

The rules that govern in these situations are complex, but in general they appear to provide these answers: (1) If the persons doing the soliciting are not employees, the employer may bar them from entering its private property, even if they are attempting to reach employees—assuming that the employer does not discriminate and applies a rule against use of its property equally to everyone. *NLRB v. Babcock Wilcox Co.*, 351 U.S. 105 (1956). (2) If the solicitors are not employees and they are trying to reach the public, they have no right to enter the employer's private property. (3) If the solicitors are employees who are seeking to reach the public, they have the right to distribute on the employer's property—in a common case, in a

shopping center—unless they have a convenient way to reach their audience on public property off the employer’s premises. *Hudgens v. NLRB*, 424 U.S. 507 (1976). (4) If the solicitors are employees seeking to reach employees, the employer is permitted to limit the distribution of literature or other solicitations to avoid litter or the interruption of work, but it cannot prohibit solicitation on company property altogether.

### **Exclusivity**

Once selected as the bargaining representative for an appropriate group of employees, the union has the exclusive right to bargain. Thereafter, individual employees may not enter into separate contracts with the employer, even if they voted against the particular union or against having a union at all. The principle of exclusivity is fundamental to the collective bargaining process. Just how basic it is can be seen in *Emporium Capwell Co. v. Western Addition Community Organization*, in which one group of employees protested what they thought were racially discriminatory work assignments, barred under the collective bargaining agreement (the contract between the union and the employer). Certain of the employees filed grievances with the union, which looked into the problem more slowly than the employees thought necessary. They urged that the union permit them to picket, but the union refused. They picketed anyway, calling for a consumer boycott. The employer warned them to desist, but they continued and were fired. The question was whether they were discharged for engaging in concerted activity protected under Section 7 of the NLRA.

### **The Duty to Bargain in Good Faith**

The NLRA holds both employer and union to a duty to “bargain in good faith.” What these words mean has long been the subject of controversy. Suppose Mr. Mardian, a company’s chief negotiator, announces to Mr. Ulasewicz, the company’s chief union negotiator, “I will sit down and talk with you, but be damned if I will agree to a penny more an hour than the people are getting now.” That is not a refusal to bargain: it is a statement of the company’s position, and only Mardian’s actual conduct during the negotiations will determine whether he was

bargaining in good faith. Of course, if he refused to talk to Ulasewicz, he would have been guilty of a failure to bargain in good faith.

Suppose Mardian has steadily insisted during the bargaining sessions that the company must have complete control over every aspect of the labor relationship, including the right to hire and fire exactly as it saw fit, the right to raise or lower wages whenever it wanted, and the right to determine which employee was to do which job. The Supreme Court has said that an employer is not obligated to accept any particular term in a proposed collective bargaining agreement and that the NLRB may not second-guess any agreement eventually reached. *NLRB v. American National Insurance Co.*, 343 U.S. 395 (1962). However, the employer must actually engage in bargaining, and a stubborn insistence on leaving everything entirely to the discretion of management has been construed as a failure to bargain. *NLRB v. Reed St Prince Manufacturing Co.*, 205 F.2d 131 (1st Cir. 1953).

Suppose Mardian had responded to Ulasewicz's request for a ten-cent-an-hour raise: "If we do that, we'll go broke." Suppose further that Ulasewicz then demanded, on behalf of the union, that Mardian prove his contention but that Mardian refused. Under these circumstances, the Supreme Court has ruled, the NLRB is entitled to hold that management has failed to bargain in good faith, for once having raised the issue, the employer must in good faith demonstrate veracity. *NLRB v. Truitt Manufacturer Co.*, 351 U.S. 149 (1956).

### **Mandatory Subjects of Bargaining**

The NLRB requires employers and unions to bargain over "terms and condition of employment." Wages, hours, and working conditions—whether workers must wear uniforms, when the lunch hour begins, the type of safety equipment on hand—are well-understood terms and conditions of employment. But the statutory phrase is vague, and the cases abound with debates over whether a term insisted on by union or management is within the statutory phrase. No simple rule can be stated for determining whether a desire of union or management is mandatory or nonmandatory. The cases do suggest that management retains the right to

determine the scope and direction of the enterprise, so that, for example, the decision to invest in labor-saving machinery is a nonmandatory subject—meaning that a union could not insist that an employer bargain over it, although the employer may negotiate if it desires. Once a subject is incorporated in a collective bargaining agreement, neither side may demand that it be renegotiated during the term of the agreement.

### **The Board’s Power to Compel an Agreement**

A mere refusal to agree, without more, is not evidence of bad-faith bargaining. That may seem a difficult conclusion to reach in view of what has just been said. Nevertheless, the law is clear that a company may refuse to accede to a union’s demand for any reason other than an unwillingness to consider the matter in the first place. If a union negotiator cannot talk management into accepting his demand, then the union may take other actions—including strikes to try to force management to bow. It follows from this conclusion that the NLRB has no power to *compel* agreement—even if management is guilty of negotiating in bad faith. The federal labor laws are premised on the fundamental principle that the parties are free to bargain.

### **The Right to Strike**

Section 13 of the NLRA says that “nothing in this Act, except as specifically provided for herein, shall be construed so as either to interfere with or impede or diminish in any way the right to strike, or to affect the limitations or qualifications on that right.” The labor statutes distinguish between two types of strikes: the economic strike and the strike over an unfair labor practice. In the former, employees go on strike to try to force the employer to give in to the workers’ demands. In the latter, the strikers are protesting the employer’s committing an unfair labor practice. The importance of the distinction lies in whether the employees are entitled to regain their jobs after the strike is over. In either type of strike, an employer may hire substitute employees during the strike. When it concludes, however, a difference arises. In *NLRB v. International Van Lines*, the Supreme Court said that an employer may hire permanent

employees to take over during an economic strike and need not discharge the substitute employees when it is done. *NLRB v. International Van Lines*, 409 U.S. 48 (1972). That is not true for a strike over an unfair labor practice: an employee who makes an unconditional offer to return to his job is entitled to it, even though in the meantime the employer may have replaced him.

These rules do not apply to unlawful strikes. Not every walkout by workers is permissible. Their collective bargaining agreement may contain a no-strike clause barring strikes during the life of the contract. Most public employees—that is, those who work for the government—are prohibited from striking. Sit-down strikes, in which the employees stay on the work site, precluding the employer from using the facility, are unlawful. So are wildcat strikes, when a faction within the union walks out without authorization. Also unlawful are violent strikes, jurisdictional strikes, secondary strikes and boycotts, and strikes intended to force the employer to sign “hot cargo” agreements.

### **Secondary Boycotts**

Section 8(b)(4), added to the NLRA by the Taft-Hartley Act, prohibits workers from engaging in secondary boycotts—strikes, refusals to handle goods, threats, coercion, restraints, and other actions aimed at forcing any person to refrain from performing services for or handling products of any producer other than the employer, or to stop doing business with any other person, like the Robinson-Patman Act.

## 18.2 Title from Nonowners

### The Problem of Title from Nonowners

We have examined when title transfers from buyer to seller, and here the assumption is, of course, that seller had good title in the first place. But what title does a purchaser acquire when the seller has no title or has at best only a voidable title? This question has often been difficult for courts to resolve. It typically involves a type of eternal triangle with a three-step sequence of events, as follows (see [Figure 18.1 "Sales by Nonowners"](#)): (1) The nonowner obtains possession, for example, by loan or theft; (2) the nonowner sells the goods to an innocent purchaser for cash; and (3) the nonowner then takes the money and disappears, goes into bankruptcy, or ends up in jail. The result is that two innocent parties battle over the goods, the owner usually claiming that the purchaser is guilty of conversion (i.e., the unlawful assumption of ownership of property belonging to another) and claiming damages or the right to recover the goods.

### The Response to the Problem of Title from Nonowners

#### The Basic Rule

To resolve this dilemma, we begin with a basic policy of jurisprudence: a person cannot transfer better title than he or she had. (The Uniform Commercial Code [UCC] notes this policy in Sections 2-403, 2A-304, and 2A-305.) This policy would apply in a sale-of-goods case in which the nonowner had a void title or no title at all. For example, if a nonowner stole the goods from the owner and then sold them to an innocent purchaser, the owner would be entitled to the goods or to damages. Because the thief had no title, he had no title to transfer to the purchaser. A person cannot get good

title to goods from a thief, nor does a person have to retain physical possession of her goods at all times to retain their ownership—people are expected to leave their cars with a mechanic for repair or to leave their clothing with a dry cleaner.

If thieves could pass on good title to stolen goods, there would be a hugely increased traffic in stolen property; that would be unacceptable. In such a case, the owner can get her property back from whomever the thief sold it to in an action called replevin (an action to recover personal property unlawfully taken). On the other hand, when a buyer in good faith buys goods from an apparently reputable seller, she reasonably expects to get good title, and that expectation cannot be dashed with impunity without faith in the market being undermined. Therefore, as between two innocent parties, sometimes the original owner does lose, on the theory that (1) that person is better able to avoid the problem than the downstream buyer, who had absolutely no control over the situation, and (2) faith in commercial transactions would be undermined by allowing original owners to claw back their property under all circumstances.

### **Sellers with a Voidable Title**

Under the UCC, a person with a voidable title has the power to transfer title to a good-faith purchaser for value. The Code defines *good faith* as “honesty in fact in the conduct or transaction concerned.” Uniform Commercial Code, Section 1-201(19). A “purchaser” is not restricted to one who pays cash; any taking that creates an interest in property, whether by mortgage, pledge, lien, or even gift, is a purchase for purposes of the UCC. And “value” is not limited to cash or goods; a person gives value if he gives any consideration sufficient to support a simple contract, including a binding commitment to extend credit and security for a preexisting claim. Recall from [Chapter 9 "The Agreement"](#) that a “voidable” title is one that, for policy reasons, the courts will cancel on application of one who is aggrieved. These reasons include fraud, undue influence, mistake, and lack of capacity to contract. When a person has a voidable title, title can be taken away from her, but if it is not, she can transfer better title than she has to a good-faith purchaser for value. (See ["Defrauding Buyer Sells to Good-Faith Purchaser for Value"](#) at the end of this chapter.)

Rita, sixteen years old, sells a video game to her neighbor Annie, who plans to give the game to her nephew. Since Rita is a minor, she could rescind the contract; that is, the title that Annie gets is voidable: it is subject to be avoided by Rita's rescission. But Rita does not rescind. Then Annie discovers that her nephew already has that video game, so she sells it instead to an office colleague, Donald. He has had no notice that Annie bought the game from a minor and has only a voidable title. He pays cash. Should Rita—the minor—subsequently decide she wants the game back, it would be too late: Annie has transferred good title to Donald even though Annie's title was voidable.

Suppose Rita was an adult and Annie paid her with a check that later bounced, but Annie sold the game to Donald before the check bounced. Does Donald still have good title? The UCC says he does, and it identifies three other situations in which the good-faith purchaser is protected: (1) when the original transferor was deceived about the identity of the purchaser to whom he sold the goods, who then transfers to a good-faith purchaser; (2) when the original transferor was supposed to but did not receive cash from the intermediate purchaser; and (3) when “the delivery was procured through fraud punishable as larcenous under the criminal law.” Uniform Commercial Code, Sections 2-403(1), 2-403(1), 2A-304, and 2A-305.

## **Entrustment**

A merchant who deals in particular goods has the power to transfer all rights of one who entrusts to him goods of the kind to a “buyer in the ordinary course of business” (see [Figure 18.3 "Entrustment"](#)). Uniform Commercial Code, Sections 2-403(2), 2A-304(2), and 2A-305(2). The UCC defines such a buyer as a person who buys goods in an ordinary transaction from a person in the business of selling that type of goods, as long as the buyer purchases in “good faith and without knowledge that the sale to him is in violation of the ownership rights or security interest of a third party in the goods.” Uniform Commercial Code, Section 1-201(9). Bess takes a pearl necklace, a family heirloom, to Wellborn's Jewelers for cleaning; as the entrustor, she has entrusted the necklace to an trustee. The owner of Wellborn's—perhaps by mistake—sells it to Clara, a buyer, in the ordinary course of business. Bess cannot take the necklace back from Clara, although she has a cause of action against Wellborn's for conversion. As between the two innocent parties, Bess and Clara

(owner and purchaser), the latter prevails. Notice that the UCC only says that the trustee can pass *whatever title the entrustor had* to a good-faith purchaser, not necessarily good title. If Bess's cleaning woman borrowed the necklace, soiled it, and took it to Wellborn's, which then sold it to Clara, Bess could get it back because the cleaning woman had no title to transfer to the trustee, Wellborn's.

## 18.3 Risk of Loss

### Why Risk of Loss Is Important

“Risk of loss” means who has to pay—who bears the risk—if the goods are lost or destroyed *without the fault of either party*. It is obvious why this issue is important: Buyer contracts to purchase a new car for \$35,000. While the car is in transit to Buyer, it is destroyed in a landslide. Who takes the \$35,000 hit?

### When Risk of Loss Passes

#### The Parties May Agree

Just as title passes in accordance with the parties' agreement, so too can the parties fix the risk of loss on one or the other. They may even devise a formula to divide the risk between themselves. Uniform Commercial Code, Section 2-303.

Common terms by which parties set out their delivery obligations that then affect when title shifts (F.O.B., F.A.S., ex-ship, and so on) were discussed earlier in this chapter. Similarly, parties may use common terms to set out which party has the risk of loss; these situations arise with trial sales. That is, sometimes the seller will permit the buyer to return the goods even though the seller had conformed to the contract. When the goods are intended primarily for the buyer's use, the transaction is said to be “sale on approval.” When they are intended primarily for resale, the transaction is said to be “sale or return.” When the “buyer” is really only a sales agent for the “seller,” it is a consignment sale.

### Risk of Loss in Absence of a Breach

If the goods are *conforming*, then risk of loss would indeed pass when delivery obligations are complete, just as with title. And the analysis here would be the same as we looked at in examining shift of title.

**A shipment contract.** The contract requires Delta to ship the sponges by carrier but does not require it to deliver them to a particular destination. In this situation, risk of loss passes to Very Fast Foods when the goods are delivered to the carrier.

**A destination contract.** If the destination contract agreement calls for Delta to deliver the sponges by carrier to a particular location, Very Fast Foods assumes the risk of loss only when Delta's carrier tenders them at the specified place.

**Goods not to be moved.** If Delta sells sponges that are stored at Central Warehousing to Very Fast Foods, and the sponges are not to be moved, Section 2-509(2) of the UCC sets forth three possibilities for transfer of the risk of loss:

1. The buyer receives a negotiable document of title covering the goods. A document of title is negotiable if by its terms goods are to be delivered to the bearer of the document or to the order of a named person.
2. The bailee acknowledges the buyer's right to take possession of the goods. Delta signs the contract for the sale of sponges and calls Central to inform it that a buyer has purchased 144 cartons and to ask it to set aside all cartons on the north wall for that purpose. Central does so, sending notice to Very Fast Foods that the goods are available. Very Fast Foods assumes risk of loss upon receipt of the notice.
3. When the seller gives the buyer a nonnegotiable document of title or a written direction to the bailee to deliver the goods and the buyer has had a reasonable time to present the document or direction.

**All other cases.** In any case that does not fit within the rules just described, the risk of loss passes to the buyer only when the buyer actually receives the goods. Cases that come within this section generally involve a buyer who is taking physical delivery from the seller's premises. A merchant who

sells on those terms can be expected to insure his interest in any goods that remain under his control. The buyer is unlikely to insure goods not in his possession. The *Ramos* case ([Section 18.4.3 "Risk of Loss, Seller a Merchant"](#) in this chapter) demonstrates how this risk-of-loss provision applies when a customer pays for merchandise but never actually receives his purchase because of a mishap.

### **Risk of Loss Where Breach Occurs**

The general rule for risk of loss was set out as this: risk of loss shifts when seller has completed obligations under the contract. We said if the goods are conforming, the only obligation left is delivery, so then risk of loss would shift upon delivery. But if the goods are nonconforming, then the rule would say the risk doesn't shift. And that's correct, though it's subject to one wrinkle having to do with insurance. Let's examine the two possible circumstances: breach by seller and breach by buyer.

First, suppose the *seller* breaches the contract by proffering nonconforming goods, and the buyer *rejects* them—never takes them at all. Then the goods are lost or damaged. Under Section 2-510(1) of the UCC, the loss falls on seller and remains there until seller cures the breach or until buyer accepts despite the breach. Suppose Delta is obligated to deliver a gross of industrial No. 2 sponges; instead it tenders only one hundred cartons or delivers a gross of industrial No. 3 sponges. The risk of loss falls on Delta because Delta has not completed its obligation under the contract and Very Fast Foods doesn't have possession of the goods. Or suppose Delta has breached the contract by tendering to Very Fast Foods a defective document of title. Delta cures the defect and gives the new document of title to Very Fast Foods, but before it does so the sponges are stolen. Delta is responsible for the loss.

Now suppose that a seller breaches the contract by proffering nonconforming goods and that the buyer, not having discovered the nonconformity, *accepts* them—the nonconforming goods are in the buyer's hands. The buyer has a right to revoke acceptance, but before the defective goods are returned to the seller, they are destroyed while in the buyer's possession. The seller breached, but here's the wrinkle: the UCC says that the seller bears the loss only to the extent of any deficiency in the buyer's insurance coverage. Uniform Commercial Code, Section 2-510(2). Very Fast Foods had

taken delivery of the sponges and only a few days later discovered that the sponges did not conform to the contract. Very Fast has the right to revoke and announces its intention to do so. A day later its warehouse burns down and the sponges are destroyed. It then discovers that its insurance was not adequate to cover all the sponges. Who stands the loss? The seller does, again, to the extent of any deficiency in the buyer's insurance coverage.

Second, what if the *buyer* breaches the contract? Here's the scenario: Suppose Very Fast Foods calls two days before the sponges identified to the contract are to be delivered by Delta and says, "Don't bother; we no longer have a need for them." Subsequently, while the lawyers are arguing, Delta's warehouse burns down and the sponges are destroyed. Under the rules, risk of loss does not pass to the buyer until the seller has delivered, which has not occurred in this case. Nevertheless, responsibility for the loss here has passed to Very Fast Foods, to the extent that the seller's insurance does not cover it. Section 2-510(3) of the UCC permits the seller to treat the risk of loss as resting on the buyer for a "commercially reasonable time" when the buyer repudiates the contract before risk of loss has passed to him. This transfer of the risk can take place only when the goods are identified to the contract. The theory is that if the buyer had taken the goods as per the contract, the goods would not have been in the warehouse and thus would not have been burned up.

## Chapter 19 Performance and Remedies

### Learning Objectives

After reading this chapter, you should understand the following:

1. What performance is expected of the seller in a sales contract
2. What performance is expected of the buyer in a sales contract
3. What rights and duties the buyer has if there is a nonconforming delivery
4. How, in general, the UCC approaches remedies
5. What the seller's remedies are for breach by the buyer
6. What the buyer's remedies are for breach by the seller
7. What excuses the UCC provides for nonperformance

In Part II, we examined contract performance and remedies under common law. In this chapter, we examine performance and remedies under Article 2, the law of sales, of the Uniform Commercial Code (UCC). In the next chapter, we cover special remedies for those damaged or injured by defective products.

The parties often set out in their contracts the details of performance. These include price terms and terms of delivery—where the goods are to be delivered, when, and how. If the parties fail to list these terms, the rules studied in this chapter will determine the parties' obligations: the parties may agree;

if they do not, the UCC rules kick in as the default. In any event, the parties have an obligation to act in good faith.

## **19.1 Performance by the Seller**

### **The Seller's Duty in General**

The general duty of the seller is this: to make a timely delivery of conforming goods. Uniform Commercial Code, Sections 2-301 and 2-309.

### **Analysis of the Seller's Duty**

#### **Timing**

By agreement or stipulation, the parties may fix the time when delivery is to be made by including statements in contracts such as "Delivery is due on or before July 8" or "The first of 12 installments is due on or before July 8." Both statements are clear.

If the parties do not stipulate in their contract when delivery is to occur, the UCC fills the gap. Section 2-309 of the UCC says, "The time for shipment or any other action under a contract if not provided for in this Article or agreed upon shall be a reasonable time." And what is a "reasonable time" is addressed by comment 1 to this section:

It thus turns on the criteria as to "reasonable time" and on good faith and commercial standards set forth in Sections 1-202, 1-203 and 2-103. It...depends on what constitutes acceptable commercial conduct in view of the nature, purposes and circumstances of the action to be taken.

## If There Is No Agreement

If the parties do not stipulate delivery terms or if their agreement is incomplete or merely formulaic, the UCC describes the seller's obligations or gives meaning to the formulaic language. (Because form contracts are prevalent, formulaic language is customary.) You recall the discussion in [Chapter 18 "Title and Risk of Loss"](#) about when title shifts: we said title shifts when the seller has completed delivery obligations under the contract, and we ran through how those obligations are usually expressed.

The contract may be either a *shipment* contract, a *destination* contract, or a contract where the *goods are not to be moved* (being held by a bailee). In any case, unless otherwise agreed, the delivery must be at a reasonable time and the tender (the offer to make delivery) must be kept open for a reasonable time; the buyer must furnish facilities "reasonably suited to the receipt of the goods." Uniform Commercial Code, Section 2-503.

In a shipment contract, the seller has four duties: (1) to deliver the goods to a carrier; (2) to deliver the goods with a reasonable contract for their transportation; (3) to deliver them with proper documentation for the buyer; and (4) to promptly notify the buyer of the shipment (UCC, Section 2-504). The contract may set out the seller's duties using customary abbreviations, and the UCC interprets those: "F.O.B. [insert place where goods are to be shipped from]" means "free on board"—the seller must see to it that the goods are loaded on the vehicle of conveyance at the place of shipment. "F.A.S. [port of shipment inserted here]" means the seller must see to it that the goods are placed along the ship on the dock ready to be loaded (Section 2-319). Price terms include "C.I.F.," which means the sale price includes the cost of the goods, insurance, and freight charges, and "C. & F.," which means the sales price includes the cost of the goods at a cheaper unit price and freight but not insurance. Uniform Commercial Code, Section 2-320. If it is clear from the contract that the seller is supposed to ship the goods (i.e., the buyer is not going to the seller's place to get them) but not clear whether it is a shipment or a destination contract, the UCC presumes it is a shipment contract. Uniform Commercial Code, Section 2-503(5).

If it is a destination contract, the seller has two duties: to get the goods to the destination at the buyer's disposal and to provide appropriate documents of delivery. Uniform Commercial Code, Section 2-503. The contract language could be "F.O.B. [place of destination inserted here]," which obligates the seller to deliver to that specific location; "ex-ship," which obligates the seller to unload the goods from the vehicle of transportation at the agreed location (e.g., load the goods onto the dock); or it could be "no arrival, no sale," where the seller is not liable for failure of the goods to arrive, unless she caused it. Uniform Commercial Code, Sections 2-319, 2-322, and 2-324.

If the goods are in the possession of a bailee and are not to be moved—and the parties don't stipulate otherwise—the UCC, Section 2-503 says delivery is accomplished when the seller gives the buyer a negotiable document of title, or if none, when the bailee acknowledges the buyer's right to take the goods.

If nothing at all is said about delivery, the place for delivery is the seller's place of business or his residence if he has no place of business. Uniform Commercial Code, Section 2-308.

### **Conforming Goods**

As always, the parties may put into the contract whatever they want about the goods as delivered. If they don't, the UCC fills the gaps.

### **By Agreement**

The parties may agree on what "conforming goods" means. An order will specify "large grade A eggs," and that means something in the trade. Or an order might specify "20 gross 100-count boxes No. 8 × 3/8 × 32 Phillips flathead machine screws." That is a screw with a designated diameter, length, number of threads per inch, and with a unique, cruciform head insert to take a particular kind of driver. The buyer might, for example, agree to purchase "seconds," which are goods with some flaw, such as clothes with seams not sewed quite straight or foodstuffs past their pull date. The parties may also agree in the contract what happens if nonconforming goods are delivered, as we'll see later in this chapter.

## **If There Is No Agreement**

If nothing is said in the contract about what quality of goods conform to the contract, then the UCC default rule kicks in. The seller is to make a perfect tender: what is delivered must in every respect conform to the contract. Uniform Commercial Code, Section 2-601. And if what is delivered doesn't conform to the contract, the buyer is not obligated to accept the goods.

## **Installment Contracts**

Unless otherwise agreed, all goods should be delivered at one time, and no payment is due until tender. But where circumstances permit either party to make or demand delivery in lots, Section 2-307 of the UCC permits the seller to demand payment for each lot if it is feasible to apportion the price. What if the contract calls for delivery in installment, and one installment is defective—is that a material breach of the whole contract? No. Section 2-612 of the UCC says this:

(2) The buyer may reject any installment which is non-conforming if the non-conformity substantially impairs the value of that installment and cannot be cured or if the non-conformity is a defect in the required documents; but if the non-conformity does not fall within subsection (3) and the seller gives adequate assurance of its cure the buyer must accept that installment.

(3) Whenever non-conformity or default with respect to one or more installments substantially impairs the value of the whole contract there is a breach of the whole.

## **Cure for Improper Delivery**

Failure to make a perfect tender, unless otherwise agreed, is a material breach of the sales contract. However, before the defaulting seller is in complete default, she has a right to cure. Here's what the UCC says in Section 2-508:

(1) Where any tender or delivery by the seller is rejected because non-conforming and the time for performance has not yet expired, the seller may seasonably notify the buyer of his intention to cure and may then within the contract time make a conforming delivery.

(2) Where the buyer rejects a non-conforming tender which the seller had reasonable grounds to believe would be acceptable with or without money allowance the seller may if he seasonably notifies the buyer have a further reasonable time to substitute a conforming tender.

Buyer orders Santa Claus candles deliverable November 5; on October 25 the goods are delivered, but they're not right: they're Christmas *angel* candles instead. But the seller still has eleven days to cure, and the buyer must allow that. Buyer places an order exactly the same as the first order, and the order arrives on November 5 in the original manufacturer's packaging, but they're not right. "Well," says the seller, "I thought they'd be OK right out of the package. I'll get the correct ones to you right away." And the buyer would have a duty to allow that, if "right away" is a "further reasonable time."

## 19.2 Performance by Buyer

### General Duties of Buyer

The general duty of the buyer is this: inspection, acceptance, and payment. Uniform Commercial Code, Sections 2-301 and 2-513. But the buyer's duty does not arise unless the seller tenders delivery.

### Inspection

Under Sections 2-513(1) and (2) of the Uniform Commercial Code (UCC), the buyer has a qualified right to inspect goods. That means the buyer must be given the chance to look over the goods to determine whether they conform to the contract. If they do not, he may properly reject the goods and refuse to pay. The right to inspect is subject to three exceptions:

1. The buyer waives the right. If the parties agree that payment must be made before inspection, then the buyer must pay (unless the nonconformity is obvious without inspection). Payment under these circumstances does not constitute acceptance, and the buyer does not lose the right to inspect and reject later.
2. The delivery is to be made C.O.D. (cash on delivery).
3. Payment is to be made against documents of title.

If the buyer fails to inspect, or fails to discover a defect that an inspection would have revealed, he cannot later revoke his acceptance, subject to some exceptions.

## Acceptance

Acceptance is clear enough: it means the buyer takes the goods. But the buyer's options on improper delivery need to be examined, because that's often a problem area.

The buyer may accept goods by words, silence, or action. Section 2-606(1) of the UCC defines acceptance as occurring in any one of three circumstances:

1. **Words.** The buyer, after a reasonable opportunity to inspect, tells the seller either that the goods conform or that he will keep them despite any nonconformity.
2. **Silence.** The buyer fails to reject, after a reasonable opportunity to inspect.
3. **Action.** The buyer does anything that is inconsistent with the seller's ownership, such as using the goods (with some exceptions) or selling the goods to someone else.

Once the buyer accepts, she is obligated to pay at the contract rate and loses the right to reject the goods. Uniform Commercial Code, Section 2-607. She is stuck, subject to some exceptions.

## Payment

The parties may specify in their contract what *payment* means and when it is to be made. If they don't, the UCC controls the transaction. Uniform Commercial Code, Sections 2-511 and 2-512.

## A Buyer's Right on Nonconforming Delivery

Obviously if the delivery is defective, the disappointed buyer does not have to accept the goods: the buyer may (a) reject the whole, (b) accept the whole, or (c) accept any commercial unit and reject the rest (2-601, 2A-509), or (d)—in two situations—revoke an acceptance already made.

## Rejection and a Buyer's Duties after Rejection

Under UCC, Section 2-601(a), rejection is allowed if the seller fails to make a perfect tender. The rejection must be made within a reasonable time after delivery or tender. Once it is made, the buyer may not act as the owner of the goods. If he has taken possession of the goods before he rejects them, he must hold them with reasonable care to permit the seller to remove them. If the buyer is a merchant, then the buyer has a special duty to follow reasonable instructions from the seller for disposing of the rejected goods; if no instructions are forthcoming and the goods are perishable, then he must try to sell the goods for the seller's account and is entitled to a commission for his efforts. Whether or not he is a merchant, a buyer may store the goods, reship them to the seller, or resell them—and charge the seller for his services—if the seller fails to send instructions on the goods' disposition. Such storage, reshipping, and reselling are not acceptance or conversion by the buyer.

### **Acceptance of a Nonconforming Delivery**

The buyer need not reject a nonconforming delivery. She may accept it with or without allowance for the nonconformity.

### **Acceptance of Part of a Nonconforming Delivery**

The buyer may accept any commercial unit and reject the rest if she wants to. A commercial unit means “such a unit of goods as by commercial usage is a single whole for purposes of sale and division of which materially impairs its character or value on the market or in use. A commercial unit may be a single article (as a machine), a set of articles (as a suite of furniture or an assortment of sizes), a quantity (as a bale, gross, or carload), or any other unit treated in use or in the relevant market as a single whole.”Uniform Commercial Code, Sections 2-105 and 2A103(1).

### **Installment Sales**

A contract for an installment sale complicates the answer to the question, “What right does the buyer have to accept or reject when the seller fails to deliver properly?” (An installment contract is one calling for delivery of goods in separate lots with separate acceptance for each delivery.) The general answer is found in the UCC at Section 2-612, which permits the buyer to reject any nonconforming

installment if the nonconformity cannot be cured if it substantially impairs the value of that particular installment. However, the seller may avoid rejection by giving the buyer adequate assurances that he will cure the defect, unless the particular defect substantially impairs the value of the whole contract.

Suppose the Corner Gas Station contracts to buy 12,000 gallons of regular gasoline from Gasoline Seller, deliverable in twelve monthly installments of 1,000 gallons on the first of each month, with a set price payable three days after delivery. In the third month, Seller is short and can deliver only 500 gallons immediately and will not have the second 500 gallons until midmonth. May Corner Gas reject this tender? The answer depends on the circumstances. The nonconformity clearly cannot be cured, since the contract calls for the full 1,000 on a particular day. But the failure to make full delivery does not necessarily impair the value of that installment; for example, Corner Gas may know that it will not use up the 500 gallons until midmonth. However, if the failure will leave Corner Gas short before midmonth and unable to buy from another supplier unless it agrees to take a full 1,000 (more than it could hold at once if it also took Seller's 500 gallons), then Corner Gas is entitled to reject Seller's tender.

Is Corner Gas entitled to reject the entire contract on the grounds that the failure to deliver impairs the value of the contract as a whole? Again, the answer depends on whether the impairment was substantial. Suppose other suppliers are willing to sell only if Corner Gas agrees to buy for a year. If Corner Gas needed the extra gasoline right away, the contract would have been breached as whole, and Corner Gas would be justified in rejecting all further attempted tenders of delivery from Seller. Likewise, if the spot price of gasoline were rising so that month-to-month purchases from other suppliers might cost it more than the original agreed price with Seller, Corner Gas would be justified in rejecting further deliveries from Seller and fixing its costs with a supply contract from someone else. Of course, Corner Gas would have a claim against Seller for the difference between the original contract price and what it had to pay another supplier in a rising market (as you'll see later in this chapter).

## **Revocation**

A revocation of acceptance means that although the buyer has accepted and exercised ownership of the goods, he can return the goods and get his money back. There are two circumstances in which the buyer can revoke an acceptance if the nonconformity “substantially impairs its value to him”: Uniform Commercial Code, Section 2-608.

1. if the buyer reasonably thought the nonconformity would be cured and it is not within a reasonable time; or
2. if the acceptance was due to a latent defect that could not reasonably have been discovered before acceptance.

Consider two examples illustrated in the next paragraph. The first deals with point a (buyer thought nonconformity would be cured and it was not within a reasonable time), and the second gets to point b (latent defect).

In August 1983, the Borsages purchased a furnished mobile home on the salesperson’s assertion that it was “the Cadillac of mobile homes.” But when they moved in, the Borsages discovered defects: water leaks, loose moldings, a warped dishwasher door, a warped bathroom door, holes in walls, defective heating and cooling systems, cabinets with chips and holes, furniture that fell apart, mold and mildew in some rooms, a closet that leaked rainwater, and defective doors and windows. They had not seen these defects at the time of purchase because they looked at the mobile home at night and there were no lights on in it. The Borsages immediately complained. Repairmen came by but left, only promising to return again. Others did an inadequate repair job by cutting a hole in the bottom of the home and taping up the hole with masking tape that soon failed, causing the underside of the home to poach out. Yet more repairmen came by but made things worse by inadvertently poking a hole in the septic line and failing to fix it, resulting in a permanent stench. More repairmen came by, but they simply left a new dishwasher door and countertop at the home, saying they didn’t have time to make the repairs. In June 1984, the Borsages provided the seller a long list of uncorrected problems; in October they stopped making payments. Nothing happened. In March 1986—thirty-one months after buying the mobile home—they told the seller to pick up the mobile home: they revoked their acceptance and sued for the purchase price. The defendant seller argued that the Borsages’

failure to move out of the house for so long constituted acceptance. But they were repeatedly assured the problems would be fixed, and moreover they had no place else to live, and no property to put another mobile home on if they abandoned the one they had. The court had no problem validating the Borsages' revocation of acceptance, under the section noted earlier, if they ever had accepted it. The seller might have a right to some rental value.

## **19.3 Remedies**

### **Remedies in General**

#### **General Policy**

The general policy of the Uniform Commercial Code (UCC) is to put the aggrieved party in a good position as if the other party had fully performed—as if there had been a timely delivery of conforming goods. The UCC provisions are to be read liberally to achieve that result if possible. Thus the seller has a number of potential remedies when the buyer breaches, and likewise the buyer has a number of remedies when the seller breaches.

#### **Specifying Remedies**

We have emphasized how the UCC allows people to make almost any contract they want (as long as it's not unconscionable). Just as the parties may specify details of performance in the contract, so they may provide for and limit remedies in the event of breach. Uniform Commercial Code, Sections 2-719(1) and 2A-503(1). The following would be a typical limitation of remedy: "Seller's sole obligation in the event goods are deemed defective by the seller is to replace a like quantity of nondefective goods." A remedy is optional unless it is expressly agreed that it is the exclusive remedy. Uniform Commercial Code, Sections 2-719(1)(b) and 2A-503(2).

But the parties are not free to eliminate all remedies. As the UCC comment to this provision puts it, "If the parties intend to conclude a contract for sale within this Article they must accept the legal consequence that there be at least a fair quantum of remedy for breach of the obligations or duties

outlined in the contract.” In particular, the UCC lists three exemptions from the general rule that the parties are free to make their contract up any way they want as regards remedies:

- (1) withhold delivery of such goods;
- (2) stop delivery by any bailee;
- (3) identify to the contract conforming goods not already identified;
- (4) reclaim the goods on the buyer’s insolvency;
- (5) resell and recover damages;
- (6) recover damages for non-acceptance or repudiation;
- (7) or in a proper case recover the price;
- (8) cancel.

Items (1)–(4) address the seller’s rights to deal with the goods; items (5)–(7) deal with the seller’s rights as regards the price, and item (8) deals with the continued existence of the contract.

### **Remedies on Breach**

Bunker, the buyer, breaches the contract. He sends Howard an e-mail stating that he won’t buy and will reject the goods if delivery is attempted. Howard has the following cumulative remedies; election is not required.

#### **Withhold Further Delivery**

Howard may refuse to send the third batch of twenty-five prints that are awaiting shipment.

#### **Stop Delivery**

Howard may also stop the shipment. If Bunker is insolvent, and Howard discovers it, Howard would be permitted to stop any shipment in the possession of a carrier or bailee. If Bunker is not insolvent, the UCC permits Howard to stop delivery only of carload, truckload, planeload, or larger shipment. The reason for limiting the right to bulk shipments in the case of noninsolvency is that stopping delivery burdens the carrier and requiring a truck, say, to stop and the driver to find a small part of the contents could pose a sizeable burden.

### **Identify to the Contract Goods in Possession**

Howard could “identify to the contract” the twenty-five prints in his possession. Section 2-704(1) of the UCC permits the seller to denote conforming goods that were not originally specified as the exact objects of the contract, if they are under his control or in his possession at the time of the breach. Assume that Howard had five hundred prints of the Bruegel painting. The contract did not state which one hundred of those prints he was obligated to sell, but once Bunker breached, Howard could declare that those particular prints were the ones contemplated by the contract. He has this right whether or not the identified goods could be resold. Moreover, Howard may complete production of the twenty-five unfinished prints and identify them to the contract, too, if in his “reasonable commercial judgment” he could better avoid loss—for example, by reselling them. If continued production would be expensive and the chances of resale slight, the seller should cease manufacture and resell for scrap or salvage value.

### **Resell**

Howard could resell the seventy-five prints still in his possession as well as the original. As long as he proceeds in good faith and in a commercially reasonable manner, per Section 2-706(2) and Section 2A-527(3), he is entitled to recover the difference between the resale price and the contract price, plus incidental damages (but less any expenses saved, like shipping expenses). “Incidental damages” include any reasonable charges or expenses incurred because, for example, delivery had to be stopped, new transportation arranged, storage provided for, and resale commissions agreed on.

The seller may resell the goods in virtually any way he desires as long as he acts reasonably. He may resell them through a public or private sale. If the resale is public—at auction—only identified goods can be sold, unless there is a market for a public sale of futures in the goods (as there is in agricultural commodities, for example). In a public resale, the seller must give the buyer notice unless the goods are perishable or threaten to decline in value speedily. The goods must be available for inspection before the resale, and the buyer must be allowed to bid or buy.

The seller may sell the goods item by item or as a unit. Although the goods must relate to the contract, it is not necessary for any or all of them to have existed or to have been identified at the time of breach.

The seller does not owe the buyer anything if resale or re-lease results in a profit for the buyer. Uniform Commercial Code, Sections 2-706 and 2A-527.

### **Recover Damages**

The seller may recover damages equal to the difference between the market price (measured at the time and place for tender of delivery) and the unpaid contract price, plus incidental damages, but less any expenses saved because of the buyer's breach. Suppose Howard's contract price was \$100 per print plus \$10,000 for the original and that the market price on the day Howard was to deliver the seventy-five prints was \$75 (plus \$8,000 for the original). Suppose too that the shipping costs (including insurance) that Howard saved when Bunker repudiated were \$2,000 and that to resell them Howard would have to spend another \$750. His damages, then, would be calculated as follows: original contract price (\$17,500) less market price (\$13,625) = \$3,875 less \$2,000 in saved expenses = \$1,875 plus \$750 in additional expenses = \$2,625 net damages recoverable by Howard, the seller.

**The CISG puts it similarly in Article 75: “If the contract is avoided and if, in a reasonable manner and within a reasonable time after avoidance, the buyer has bought goods in replacement or the seller has resold the goods, the party claiming damages may recover the difference between the contract price and the price in the substitute transaction as well as any further damages recoverable.”**

If the formula would not put the seller in as good a position as performance under the contract, then the measure of damages is lost profits—that is, the profit that Howard would have made had Bunker taken the original painting and prints at the contract price (again, deducting expenses saved and adding additional expenses incurred, as well as giving credit for proceeds of any resale). Uniform Commercial Code, Section 2-708(2); Section 2A-528(2) is similar. This provision becomes especially important for so-called lost volume sellers. Howard may be able to sell the remaining seventy-five prints easily and at the same price that Bunker had agreed to pay. Then why isn't Howard whole? The reason is that the second buyer was not a *substitute* buyer but an *additional* one; that is, Howard would have made that sale even if Bunker had not reneged on the contract. So Howard is still short a sale and is out a profit that he would have made had Bunker honored the contract.

### **Recover the Price**

Howard—the seller—could recover from Bunker for the price of the twenty-five prints that Bunker holds. Or suppose they had agreed to a shipment contract, so that the risk of loss passed to Bunker when Howard placed the other prints with the trucker and that the truck crashed en route and the cargo destroyed. Howard could recover the price. Or suppose there were no market for the remaining seventy-five prints and the original. Howard could identify these prints to the contract and recover the contract price. If Howard did resell some prints, the proceeds of the sale would have to be credited to Bunker's account and deducted from any judgment. Unless sold, the prints must be held for Bunker and given to him upon his payment of the judgment.

### **Cancel the Contract**

When Bunker repudiated, Howard could declare the contract cancelled. This would also apply if a buyer fails to make a payment due on or before delivery. Cancellation entitles the nonbreaching party to any remedies for the breach of the whole contract or for any unperformed balance. That is what happens when Howard recovers damages, lost profits, or the price. Uniform Commercial Code, Sections 2-703(f) and 2A-524(1)(a).

**Again, the CISG is similar. Article 64 provides that the seller may declare the contract avoided “if the failure by the buyer to perform any of his obligations under the contract or this Convention amounts to a fundamental breach of contract; or if the buyer does not, within the additional period of time fixed by the seller perform his obligation to pay the price or take delivery of the goods, or if he declares that he will not do so within the period so fixed.”**

Note again that these UCC remedies are cumulative. That is, Howard could withhold future delivery *and* stop delivery en route, *and* identify to the contract goods in his possession, *and* resell, *and* recover damages, *and* cancel.

## **Buyer’s Remedies**

In this section, let us assume that Howard, rather than Bunker, breaches, and all other circumstances are the same. That is, Howard had delivered twenty-five prints, twenty-five more were en route, the original painting hung in Howard’s living room, another twenty-five prints were in Howard’s factory, and the final twenty-five prints were in production.

### **In General**

The buyer can do the following three things by way of defaulting: repudiate the contract, fail to deliver the goods, or deliver or tender nonconforming goods. Section 2-711 of the UCC provides the following remedies for the buyer:

Where the seller fails to make delivery or repudiates, or the buyer rightfully rejects or justifiably revokes, then with respect to any goods involved, and with respect to the whole if the breach goes to the whole contract, the buyer may;

(1) cancel the contract, and

(2) recover as much of the price as has been paid; and

(3) “cover” and get damages; and

(4) recover damages for nondelivery.

Where the seller fails to deliver or repudiates, the buyer may also:

(5) if the goods have been identified recover them; or

(6) in a proper case obtain specific performance or

(7) replevy the goods.

On rightful rejection or justifiable revocation of acceptance, a buyer:

(8) has a security interest in goods in his possession or control for any payments made on their price and any expenses reasonably incurred in their inspection, receipt, transportation, care and custody and may hold such goods and resell them in like manner as an aggrieved seller.

If the buyer has accepted non-conforming goods and notified seller of the non-conformity, buyer can

(9) recover damages for the breach; Uniform Commercial Code, Section 2-714.

and in addition the buyer may

(10) recover incidental damages and

(11) recover consequential damages. Uniform Commercial Code, Section 2-715.

Thus the buyer’s remedies can be divided into two general categories: (1) remedies for goods that the buyer does not receive or accept, when he has justifiably revoked acceptance or when the seller repudiates, and (2) remedies for goods accepted.

### **Goods Not Received**

The UCC sets out buyer's remedies if goods are not received or if they are rightfully rejected or acceptance is rightfully revoked.

### **Cancel**

If the buyer has not yet received or accepted the goods (or has justifiably rejected or revoked acceptance because of their nonconformity), he may cancel the contract and—after giving notice of his cancellation—he is excused from further performance. Uniform Commercial Code, Sections 2-711(1), 2-106, 2A-508(1)(a), and 2A-505(1).

### **Recover the Price**

Whether or not the buyer cancels, he is entitled to recover the price paid above the value of what was accepted.

### **Cover**

In the example case, Bunker—the buyer—may “cover” and have damages: he may make a good-faith, reasonable purchase of substitute goods. He may then recover damages from the seller for the difference between the cost of cover and the contract price. This is the buyer's equivalent of the seller's right to resell. Thus Bunker could try to purchase seventy-five additional prints of the Bruegel from some other manufacturer. But his failure or inability to do so does not bar him from any other remedy open to him.

### **Sue for Damages for Nondelivery**

Bunker could sue for damages for nondelivery. Under Section 2-713 of the UCC, the measure of damages is the difference between the market price at the time when the buyer learned of the breach and the contract price (plus incidental damages, less expenses saved). Suppose Bunker could have bought seventy-five prints for \$125 on the day Howard called to say he would not be sending the rest of the order. Bunker would be entitled to \$1,875—the market price (\$9,375) less the contract price (\$7,500). This remedy is available even if he did not in fact purchase the substitute prints. Suppose

that at the time of breach, the original painting was worth \$15,000 (Howard having just sold it to someone else at that price). Bunker would be entitled to an additional \$5,000, which would be the difference between his contract price and the market price.

For leases, the UCC, Section 2A-519(1), provides the following: “the measure of damages for non-delivery or repudiation by the lessor or for rejection or revocation of acceptance by the lessee is the present value, as of the date of the default, of the then market rent minus the present value as of the same date of the original rent, computed for the remaining lease term of the original lease agreement, together with incidental and consequential damages, less expenses saved in consequence of the lessor’s default.”

### **Recover the Goods**

If the goods are unique—as in the case of the original Bruegel—Bunker is entitled to specific performance—that is, recovery of the painting. This section is designed to give the buyer rights comparable to the seller’s right to the price and modifies the old common-law requirement that courts will not order specific performance except for unique goods. It permits specific performance “in other proper circumstances,” and these might include particular goods contemplated under output or requirements contracts or those peculiarly available from one market source. Uniform Commercial Code, Sections 2-716(1) and 2A-521(1).

Even if the goods are not unique, the buyer is entitled to *replevy* them if they are identified to the contract and after good-faith effort he cannot recover them. Replevin is the name of an ancient common-law action for recovering goods that have been unlawfully taken; in effect it is not different from specific performance, and the UCC makes no particular distinction between them in Section 2-716. Section 2A-521 holds the same for leases. In our case, Bunker could replevy the twenty-five prints identified and held by Howard.

Bunker also has the right to recover the goods should it turn out that Howard is insolvent. Under UCC, Section 2-502, if Howard were to become insolvent within ten days of the day on which Bunker

pays the first installment of the price due, Bunker would be entitled to recover the original and the prints, as long as he tendered any unpaid portion of the price.

For security interest in goods rightfully rejected, if the buyer rightly rejects nonconforming goods or revokes acceptance, he is entitled to a security interest in any goods in his possession. In other words, Bunker need not return the twenty-five prints he has already received unless Howard reimburses him for any payments made and for any expenses reasonably incurred in their inspection, receipt, transportation, care, and custody. If Howard refuses to reimburse him, Bunker may resell the goods and take from the proceeds the amount to which he is entitled. Uniform Commercial Code, Sections 2-711(3), 2-706, 2A-508(5), and 2A-527(5).

### **Goods Accepted**

The buyer does not have to reject nonconforming goods. She may accept them anyway or may effectively accept them because the time for revocation has expired. In such a case, the buyer is entitled to remedies as long as she notifies the seller of the breach within a reasonable time. Uniform Commercial Code, Sections 2-714(1) and 2A-519(3). In our example, Bunker can receive three types of damages, all of which are outlined here.

### **Compensatory Damages**

Bunker may recover damages for any losses that in the ordinary course of events stem from the seller's breach. Suppose Howard had used inferior paper that was difficult to detect, and within several weeks of acceptance the prints deteriorated. Bunker is entitled to be reimbursed for the price he paid.

### **Consequential Damages**

Bunker is also entitled to consequential damages. Uniform Commercial Code, Sections 2-714(3), 2-715, and 2A-519(3). These are losses resulting from general or particular requirements of the buyer's needs, which the seller had reason to know and which the buyer could not reasonably prevent by cover or otherwise. Suppose Bunker is about to make a deal to resell the twenty-five prints that he

has accepted, only to discover that Howard used inferior ink that faded quickly. Howard knew that Bunker was in the business of retailing prints and therefore he knew or should have known that one requirement of the goods was that they be printed in long-lasting ink. Because Bunker will lose the resale, he is entitled to the profits he would have made. (If Howard had not wished to take the risk of paying for consequential damages, he could have negotiated a provision limiting or excluding this remedy.) The buyer has the burden of proving consequential damages, but the UCC does not require mathematical precision. Suppose customers come to Bunker's gallery and sneer at the faded colors. If he can show that he would have sold the prints were it not for the fading ink (perhaps by showing that he had sold Bruegels in the past), he would be entitled to recover a reasonable estimate of his lost profits.

### **Incidental Damages**

Section 2-715 of the UCC allows incidental damages, which are “damages resulting from the seller's breach including expenses reasonably incurred in inspection, receipt, transportation and care and custody of goods rightfully rejected, any commercially reasonable charges, expenses or commissions in connection with effecting cover and any other reasonable expense incident to the delay or other breach.” Section 2A-520(1) of the UCC is similar for leases.

## **23.4 Excuses for Nonperformance**

### **Casualty to Identified Goods**

As always, the parties may agree what happens if the goods are destroyed before delivery. The default is Sections 2-613 and 2A-221(a) of the Uniform Commercial Code (UCC). The UCC says that “where the contract requires for its performance goods identified when the contract is made, and the goods suffer casualty without fault of either party before the risk of loss passes to the buyer,...then (a) if the loss is total the contract is avoided; and (b) if the loss is partial the buyer may nevertheless accept them with due allowance for the goods' defects.” Thus if Howard ships the original Bruegel to Bunker but the painting is destroyed, through no fault of either party, before delivery occurs, the parties are

discharged. If the frame is damaged, Bunker could, if he wants, take the painting anyway, but at a discount.

## **The UCC's Take on Issues Affecting "Impossibility"**

Although this matter was touched on in [Chapter 15 "Discharge of Obligations"](#), it is appropriate to mention briefly again the UCC's treatment of variations on the theme of "impossibility."

### **Impracticability**

Sections 2-614(1) and 2A-404(1) of the UCC require reasonable substitution for berthing, loading, and unloading facilities that become unavailable. They also require reasonable substitution for transportation and delivery systems that become "commercially impracticable"; if a practical alternative exists, "performance must be tendered and accepted." If Howard agreed to send the prints by rail, but a critical railroad bridge is unusable and no trains can run, delivery by truck would be required.

Section 2-615 of the UCC says that the failure to deliver goods is not a breach of the seller's duty "if performance as agreed has become impracticable by the occurrence of a contingency the non-occurrence of which was a basic assumption on which the contract was made or by compliance in good faith with any applicable foreign or domestic government regulation or order whether or not it later proves to be invalid." Section 2A-405(b) of the UCC is similar for leases.

### **Right to Adequate Assurances of Performance**

Section 2-609, Comment 1, of the UCC observes that "the essential purpose of a contract...is actual performance [but] a continuing sense of reliance and security that the promised performance will be forthcoming when due is an important feature of the bargain." Thus the UCC says that if one party has "reasonable grounds for insecurity arise...either party may in writing demand adequate assurance and until he receives such assurance may if commercially reasonable suspend [his own] performance[.]"

## **Anticipatory Repudiation**

Obviously if a person repudiates the contract it's clear she will not perform, but what if she repudiates before time for performance is due? Does the other side have to wait until nonperformance actually happens, or can he sue in anticipation of the other's default? Sections 2-610 and 2A-402 of the UCC say the aggrieved party can do either: wait for performance or "resort to any remedy for breach." Under the UCC, Sections 2-611 and 2A-403, the one who has anticipatorily repudiated can "retract his repudiation unless the aggrieved party has since the repudiation cancelled or materially changed his position[.]"
