

MTH 98-Foundations for Contemporary Math

Winter 2021-CRN: 33444

Instructor Information

Instructor: Phillip Jones

e-mail: Jonesp@linnbenton.edu

Instructional Aide: Misa Hargraves

E-mail: hargram@linnbenton.edu

Class Meetings: Our class meets by Zoom drop in hours. This is an asynchronous class, which means we don't have class meetings. Our classroom is located in Zoom at: <https://linnbenton.zoom.us/j/92066781879>

Office Hours with Your Instructor: These are times when you can drop in with questions or just to chat. No appointment needed! Times are: 12:00 pm - 2:00 pm Tuesdays and Thursdays. Office hours are located in Zoom at <https://linnbenton.zoom.us/j/92066781879> if those times do not work for you, contact me to arrange another time, it's not a problem.

Meet with Classmates: Discord is a chatroom type environment, available 24/7, where you can meet with classmates to collaborate (and socialize) at: <https://discord.gg/hsQtvcWy4Z>

And Meet with Misa: Misa will be available in Discord by appointment or she has hours Zoom on Monday/Wednesday/Friday @ 10-11am & 2-3pm <https://linnbenton.zoom.us/j/94627678411>

Drop in Remote Math Help: Open from 9am - 7pm Monday through Friday, 11am - 4pm Saturday, and 11am - 3pm Sunday; available at: <https://linnbenton.zoom.us/j/94627678411>

Course Description and Objectives: Math 98 is designed to prepare students for success in Math 105. Students whose degree or program requires Math 75, Math 95 or Math 111 should not take Math 98. Throughout this course you will develop critical thinking skills, gain number sense, build estimation skills and solve realistic problems. By focusing on relevance and context, you will learn to think algebraically, will understand basic statistics and will use data and functions in mathematical modelling. Upon completion of the course, you will be able to:

- Demonstrate knowledge of numerical skills in a variety of contexts based on the course objectives;
- Interpret and communicate statistical and mathematical concepts using a variety of graphical and computational methods;
- Apply algebraic skills and reasoning to solve problems based on the course objectives;

- Identify properties of a function and create mathematical models.

Materials Needed:

- A device, with a webcam, to access the Internet. This can be a tablet, laptop or phone (not the best choice, but whatever works). LBCC may have laptops to check out if you do not have one.
- Access to the Internet.
- A virtual folder in Google Drive for your assignments. (I will create it and share it with you.)
- You do NOT need to purchase a packet this term.
- A calculator; you can use the one on your device if you don't have one.
- Other: A good attitude! This class was not originally planned for a virtual environment but we are making it work. You can expect some references in our worksheets to still refer to an in-person class environment.
- **Enroll in the Class Software: MyOpenMath**
 - a. Go to www.myopenmath.com
 - b. Click on "Register as a New Student"
 - c. Enter a user name, I recommend using your student ID number
 - d. Choose and confirm a password, one you will not forget
 - e. Enter your first and last names, and your e-mail address
 - f. **Enter the Course ID: 97281**
 - g. **Enter the Enrollment Key: Primes**

What does a typical week include?

Twice a week, by midnight, an **online homework assignment** is due.

And once a week, your **reflections** from the previous week will be due.

The **calendar** in **My Open Math** is the best way to keep track of these assignments.

What will I be graded on and how often?

- Notebooks: 20%, submitted three times during the term
- Online Homework: 20%, submitted twice a week
- Online Reflections: 10%, submitted once a week
- Big Idea Projects: 15%, submitted three times during the term
- Tests: 35%, submitted three times during the term
- Letter grades will be based on your weighted average of the above.

Using LockDown Browser for Online Exams

*This course requires the use of LockDown Browser for online exams. Watch this [short video](#) to get a basic understanding of LockDown Browser and the webcam feature (which is required for exams).

To take an online test, you will need to start in Moodle, rather than MyOpenMath. You will click on the link for the exam in Moodle, start the LockDown Browser, answer the question “Are you ready to start” and will then get a link to navigate to the exam in MyOpenMath. (You won’t be able to access the exam with a standard web browser, not will you be able to access it directly in MyOpenMath.) For additional details on using LockDown Browser, review this Student [Quick Start Guide \(PDF\)](#) or [Video](#)*

Finally, when taking an online exam, follow these guidelines:

- Select a location where you won't be interrupted
- Before starting the test, know how much time is available for it, and that you've allotted sufficient time to complete it
- Turn off all mobile devices, phones, etc. and don't have them within reach
- Clear your area of all external materials — books, papers, other computers, or devices
- Remain at your desk or workstation for the duration of the test
- LockDown Browser will prevent you from accessing any other websites or applications except MyOpenMath

Some grading details

Notebooks: Notebooks will be “graded” on the day before each test. Notebooks are graded on whether they are: organized, completed and corrected

Online Homework: Every couple days, you will have homework problems due through our online platform MyOpenMath. This gives you a chance to immediately reflect on your learning and understanding.

Online Reflections: Research indicates that one of the best things you can do to increase your learning is to write about it. Reflective Writing entries are graded using the following criteria:

- Completeness (all the questions for a particular entry are addressed);
- The level of insight and reflection (evidence that your response is thoughtful and you took time on it);
- That support is provided for the observations and conclusions you make; and
- The extent to which relevant course content (from class and elsewhere) is integrated into the entries.

Big Idea Projects and Summaries: Each assignment will have a description and a grading rubric. This helps you identify your goal for the grade you want to earn.

Tests: Tests will be a proctored, online experience. You may use one 3X5 note card front and back for notes. *The test will be accessed through a link in Moodle, and we will have a practice session on doing that before an actual test.*

Attendance policy

If you have any issues please let me know immediately. Don't wait until the day of something being due and ask for an extension. That won't fly. It's in your best interest to notify me as soon as you can.

This feels different from other math classes...

This course is taught with a focus on verbal problems and reasoning. This is likely different than any other math class you've taken, and you may not know what strategies are most effective and appropriate. Read the list below carefully and revisit it often during the term. Practice the Effective and Appropriate Behaviors to get the most out of this class.

Effective and Appropriate Behaviors:

- Reading carefully through the problems and thinking about what you are asked before starting any calculations. You will find many questions that do not require calculations!
- Checking your work through multiple approaches – usually there is more than one way to do a problem; this helps you check your work and feel confident.
- Do your homework all the way through without checking the answer key AND attempt every problem, even if all you do is write down what you know about the problem. See inappropriate behaviors for the reason why.
- When you do corrections, make sure you figure out where you went wrong with your solution – writing the correct answer will not help you learn, but finding your mistakes and correcting them will. Make your corrections using a different color font so you can refer back to them. See inappropriate behaviors for more information.

Ineffective and Inappropriate Behaviors:

- Asking a friend or Math Desk Helper to tell you how to do a problem – Instead ask “what is this question asking for?”, “can you tell me the meaning of this word?”, “What does this question relate to that we've already done?”

- Copying work from another student or answer key – it might be tempting if you get behind, but this is not helpful for learning the material .
- Copying from the answer key BEFORE trying the problem yourself – while some students worry about practicing a problem incorrectly, letting yourself try a problem gives you a “place” to put your learning in your brain. If you make a mistake, your brain now has a place for this learning to go. If you reflect on the mistakes you make, your learning will be even greater!
- Simply writing correct answers as your homework corrections – While your brain might have a place to put your learning, reflecting, writing what you got wrong, and detailing the correct steps for the problem, will increase your learning! You learn faster when you reflect on the corrections you make.

Where can I find resources to help me be successful?

- Zoom in and visit with me! Send me an email to make an appointment if my posted office hours don't work for you.
- Use Discord <https://discord.gg/baJ4beF> to connect with your classmates, pick anytime you want to meet up!
 - and with Misa, Zoom on Monday/Wednesday/Friday @ 10-11am & 2-3pm
<https://linnbenton.zoom.us/j/94627678411>
- Use the online Math Help Desks! Located in Zoom at:
<https://linnbenton.zoom.us/j/94627678411>
 - Open from 9am - 7pm Monday through Friday, 11am - 4pm Saturday and Sunday
11am - 3 pm.

Other

Acts of academic dishonesty are regarded by the college as very serious offenses. Penalties will be the maximum permitted by the college.

LBCC maintains a policy of nondiscrimination and equal opportunity in employment and admissions, without regard to race, color, sex, marital and/or parental status, religion, national origin, age, mental or physical disability, Vietnam era, or veteran status.

The LBCC community is enriched by diversity. Each individual has worth and makes contributions to create that diversity at the college. Everyone has the right to think, learn, and work together in an environment of respect, tolerance, and goodwill

LBCC is committed to inclusiveness and equal access to higher education. If you have approved accommodations through the Center for Accessibility Resources (CFAR) and would like to use your accommodations in this class, please talk to your instructor as soon as possible to discuss your needs. If you believe you may need accommodation but are not yet registered with CFAR, please visit the CFAR website at www.linnbenton.edu/cfar for steps on how to apply for services or call 541-917-4789
